**HOLLISTER, SAN BENITO CO., CAL.**—Bridges, steel and reinforced concrete. Cost not stated. Engineer, County Surveyor. Hollister. Owners, San Benito County. County Surveyor McCray of Hollister presented complete plans and specifications for two bridges to the Board of Supervisors. Plans were ordered accepted. One bridge will be erected in Road District No. 5, and will be known as the Collins bridge. The other will be over the San Benito Creek on the State Highway. Bids will be called for at once.

**ANAHEIM, ORANGE CO., CAL.**—Bridge, reinforced concrete. \$40,000. Engineer, County Surveyor. Orange. Owners, Orange County. The Board of Supervisors has ordered the publication of a Notice to Contractors calling for bids for the construction of a \$40,000 reinforced concrete bridge to be erected connecting the towns of Anaheim and Olive. An official proposal will be published in the Orange County Plaindealer. Bids will also be called for shortly for paying the Anaheim-Olive road.

**COACHELLA, IMPERIAL CO., CAL.**—Bridge, reinforced concrete. \$10,000. Engineer, County Surveyor, El Centro. Owners, Imperial County. County Surveyor Fulmore has been instructed to revise plans for the proposed bridge

across the Santa Ana River at North Main street. An advertisement ordering its construction has been recalled and a new advertisement will be published shortly. Estimates on the new plans show the bridge will cost in the neighborhood of \$10,000. Construction will be of reinforced concrete.

**ORANGE, ORANGE CO., CAL.**—Bridge, reinforced concrete. Cost not stated. Engineer, City Engineer, Orange. Owners, City and County of Orange. The City Trustees decided to construct the East Chapman street bridge of reinforced concrete. The bridge will be 165 feet long and will be carried over the creek in three spans. The cost will be divided between the city and county. Work will be started at once.

**BIDWELL PARK, BUTTE CO., CAL.**—Bridge, steel and reinforced concrete. Cost not stated. Engineer, County Surveyor, Oroville. Owners, Butte County. Plans for a combination steel and reinforced concrete highway bridge 90 feet in length have been approved and are now out for figures. Plans and specifications can be secured from the County Clerk at Oroville. Bids will be opened on September 10th.

**SEATTLE, WASH.**—Gantry crane, \$20,000. Engineers, Port of Seattle Commission, Central Bldg., Seattle. Owners, City of Seattle. Sealed bids will be received until September 16th for furnishing a large gantry crane which will be installed at Smith's cove. Complete information of this work can be secured from the Port of Seattle Commission.

#### Contracts Awarded.

**UKIAH, MENDOCINO CO., CAL.**—Bridge, timber construction, \$1,750. Engineer, County Surveyor, Ukiah. Owners, Mendocino County. Contractors, Roberts & Martin, Ukiah. Contract price, \$1,750.

**CHICO, BUTTE CO., CAL.**—Bridges, 2, reinforced concrete. Cost not stated. Engineer, County Engineer, Oroville. Owners, Butte County. Contractors, Chico Construction Co., Chico. Contract price, \$4,041 and \$3,965.

**SAN LUIS OBISPO, SAN LUIS OBISPO CO., CAL.**—Bridges, 2, reinforced concrete. Cost not stated. Engineer, County Surveyor, San Luis Obispo. Owners, San Luis Obispo County. Contractors, Mercereau Bridge and Contracting Co., Los Angeles. Contract price, \$3,544 and \$2,365.

**SANTA BARBARA, SANTA BARBARA CO., CAL.**—Sea wall construction, \$16,392. Engineer, City Engineer George P. Robinson, Santa Barbara. Owners, City of Santa Barbara. Contractors, Mercereau Bridge and Contracting Co., Pacific Electric Bldg., L. A. Contract price, \$16,392.

#### CHURCHES.

**BERKELEY, ALAMEDA CO., CAL.**—Church, 2 story and base. Class C construction, \$10,000. Architect, Eugene K. Martin, 2192 Shattuck avenue, Berkeley. Owners, First Baptist Church. The building will be erected at the corner of Dana and Haste streets, covering a large ground area. There will be a main auditorium, Sunday school rooms, social hall and pastor's study. Interior will be finished in pine with ornamental plaster in the main auditorium. There will be steam heat Art glass windows will be used. Exterior of the building will be faced with pressed brick. Plans have been approved by the Public Buildings Committee for the elevator work in the new City Hall and figures will be opened by the Board of Public Works on August 26th. Plans and specifications can be secured from the City Department of Architecture, Temporary City Hall.

**NEW WESTMINSTER, B. C.**—Court house, 2 story and base, stone and steel, \$70,000. Architects, Gardiner & Mercer, Westminster. Owners, Westminster Province. Plans and specifications for the new court house to be erected in Westminster have been completed and forwarded to Victoria for approval. Bids will be called for as soon as plans have been approved.

#### FACTORIES & WAREHOUSES.

**SAN FRANCISCO**—Shop and office, 1 story, frame and corrugated iron, \$12,000. Architect, City Department of Architecture, Temporary City Hall, S. F. Owners, City and County of San Francisco. The Board of Public Works has instructed the City Department of Architecture to prepare plans at once for a combination office and shop building to be erected in the Corporation Yards at 11th and Bryant streets. Interior of the office portion of the building will be finished in pine. Exterior will be covered with shiplap and corrugated iron. Plans are now being prepared.

**OAKLAND, CAL.**—Creamery, 2 story and base, reinforced concrete, \$10,000.

Architect, none. Owners, Jersey Milk, Cream and Butter Co., 37th near Grove, Oakland. The building will be erected on 37th street near Grove, and will contain the offices of the company, sales rooms and creamery. Interior will be finished in pine with considerable tile and marble. There will be special machinery, furnished by the owners. Exterior of the building will be faced with cement plaster. A cement floor will be used. Plans are complete and figures are now being taken by the owners.

#### FIRE HOUSES.

**SAN FRANCISCO**—Juvenile detention home, 1 and 2 story, brick, \$50,000. Architect, City Department of Architecture, Temporary City Hall, S. F. Owners, City and County of San Francisco. The City Department of Architecture has been instructed to prepare plans for this work, but as yet has not determined upon any of the details. The exact location of the building and further information will be published next week.

#### FLATS.

**SAN FRANCISCO**—Flats, 2 story and base, frame, \$3,500. Architect, none. Owner, John F. Haner, 2379 19th street, S. F. The building will be erected on the west side of 4th avenue south of Anza, covering an area of 25 by 54 feet, and has been designed to contain two modern flats of five and six rooms. Interiors will be finished in pine throughout. Some hardwood floors will be used. Each living room will have an open fire place with tile or brick mantel. Bath rooms will have tile wainscot. Exterior of the building will be covered with rustic, cement plaster on metal lath and a tapestry brick base. Plans are complete and in the hands of the owner who will do the work by Day Labor. Materials are now being purchased.

**SAN FRANCISCO**—Flats, 2 story and base, frame, \$5,000. Architect, none. Owner, Oscar Thurnberg, 678 9th avenue, S. F. The building will be erected on the west side of 9th avenue near Cabrillo, and has been designed to contain two flats of five and six rooms with basement garage. Interiors will be finished in pine and elm panels. Hardwood floors will be used in the principal rooms. There will be open fire places in each living room. Mantels will be of tile. Tile wainscot will be used in the bath rooms and kitchens. Exterior will be covered with rustic and cement plaster on metal lath. Plans are complete and the work will be done by Day Labor.

#### GOVERNMENT WORK AND SUPPLIES.

**Salt Lake City, Utah, Post Office.**

The contract for installing window and door screens in the U. S. post office at Salt Lake City, Utah, has been awarded to E. T. Burrows Co., Portland, Me., at \$511.20.

**Idaho Falls, Idaho, Post Office.**

The contract for the construction complete of the U. S. post office at Idaho Falls, Idaho, has been awarded to the Sound Construction and Engineering Company, Seattle, Wash., at \$56,199.

**Canal Work.**

The Reclamation Service is asking for proposals for the construction of the Wallace feeder canal on the Salt River irrigation project, Ariz. The work, which is located near Phoenix, involves the excavation of approximately 68,000 cubic yards of material, 275 cubic yards of plain and reinforced concrete in structures, 80 square yards of grouted paving, laying 100 linear feet of 18-inch concrete pipe, and the erection of four bridges, involving the use of 16,180 feet, B. M., of lumber and 9,600 pounds of steel and iron. Bids will be opened after 2 o'clock p. m. August 24, 1914, at the office of the Reclamation Service, Phoenix, Ariz.

**Jackson Hole, Highway Bridge.**

The following bids were received by the U. S. Reclamation Service, Boise, Idaho, for constructing the Jackson Hole highway bridge:

**Jackson Site.**

Omaha Structural Steel Works, Omaha, Neb., schedule 5, \$10,715.6; 6, \$1,049.7; 7, \$8,044.50 and \$4,221.8; 8, \$10,971 and \$11,014. Total, regular, \$39,777.50; do, alternate, \$26,997.

Central States Bridge Co., Indianapolis, Ind., schedule 5, \$9,711.

Security Bridge Co., Billings, Mont., schedule 5, \$9,614.85; 6, \$2,376.7; 7, \$7,362.50 and \$3,927.8; 8, \$16,762.85 and \$12,122.85. Total, regular, \$36,115.35; alternates, \$28,058.70.

Midland Bridge Co., Kansas City, Mo., schedule 5, \$9,975.6; 6, \$721.7; 7, \$13,816.50 and \$7,300.20; 8, \$15,834.60 and \$10,780.60. Total, regular, \$39,646.10; alternates, \$28,655.80.

**Gros Ventre Site.**

Omaha Structural Steel Works, schedule 1, \$10,120; 2, \$1,104; 3, \$6,505; 4, \$10,130. Total, \$26,765.

Central States Bridge Co., Indianapolis, Ind., schedule —, \$9,082.

Security Bridge Co., Billings, Mont., schedule 1, \$9,987.85; 2, \$2,170; 3, \$6,272.50; 4, \$11,749.75. Total, \$29,180.10.

Midland Bridge Co., schedule 1, \$9,166; 2, \$863; 3, \$11,451.60; 4, \$9,415.20. Total, \$30,930.20.

Minneapolis Steel and Machine Co., schedule 1, \$5,478.

**San Francisco, Cal., Light Fixtures.**

All bids received June 10 by the supervising architect, Treasury Department, Washington, D. C., for installing lighting fixtures in the subtreasury, San Francisco, Cal., have been rejected. The work has been readvertised and new bids will be opened on August 21.

**Salt Lake City, Utah, Post Office.**

The bid of R. E. Campbell, Salt Lake City, Utah, \$1,994 in amount, has been accepted for making changes in workroom and basement to the U. S. post office, Salt Lake City.

**Huntley Irrigation Project.**

The Secretary of the Interior has authorized the Reclamation Service to award contracts as follows for the construction of drains in connection with the Huntley irrigation project, Mont.: Schedule 1, involving excavation, laying of tiling and backfilling, to the Newell-Atherley Co., of Billings, Mont., contract price, \$8,245; schedule 2, for similar work, to S. Lindstrum, of Billings, Mont., contract price, \$11,168.60.

**Boise Project, Insulators.**

The following bids were opened by the U. S. Reclamation Service, Los Angeles, Cal., for furnishing under specifications No. 311 strain insulators for the Boise project, Idaho:

Central Electric Co., Chicago, Ill., \$7.7 days.

Western Electric Co., Los Angeles, Cal., \$15.50, 2 days.

Pacific States Electric Co., San Francisco, Cal., \$15.00, 1 day.

Pherson, Roeding & Co., Los Angeles, Cal., \$3.50; at San Francisco, 3 days.

Deliveries to be made at address of bidder unless otherwise stated.

**Okanogan Project, Sleeves.**

Abstract of proposals, No. 316, for splicing sleeves for Okanogan project, Wash., opened at Los Angeles, Cal.:

The Clark Electric & Mfg. Co., New York City, \$5.30; Brooklyn, N. Y., 10 days.

Electric Appliance Co., San Francisco, Cal., \$4.75; San Francisco, 1 day.

Hickey & Schneider, 61 Broadway, New York City, \$5.80, Elizabethport, N. Y., 5 days.

Central Electric Co., Chicago, Ill., \$8.10, Chicago, 5 days.

**Salt River, Traveling Crane.**

Abstract of proposals, No. 312-F, for traveling crane for Salt River project, Ariz., opened at Los Angeles, Cal.:

Northern Engine Works, Detroit, Mich., \$5,790; Detroit, Mich., 70 days.

Manning, Maxwell & Moore, San Francisco, Cal., \$2,956; Muskegon, Mich., 90 days.

Niles-Bement-Pond Co., 111 Broadway, New York City, \$4,000; Philadelphia, Pa., 90 days.

Whiting Foundry Equipment Co., Harvey, Ill., \$4,100; Harvey, Ill., 90 days.

The Cleveland Crane and Engineering Co., Wickliffe, Ohio, \$4,300; Wickliffe, Ohio, 90 to 100 days.

The Exeter Machine Works, Pittston, Pa., \$4,920; Pittston, Pa., 120 days.

Toledo Bridge and Crane Co., Toledo, Ohio, \$6,400; Toledo, Ohio, 90 days.

**Copper Strand, Milk River Project.**

The following is an abstract of the bids received by the U. S. Reclamation Service, Los Angeles, Cal., for furnishing, under advertisement No. 315, copper strand, Milk River project, St. Mary's storage unit, Mont.:

John A. Roebbing's Sons Co., Los Angeles, Cal., item 1, \$242.75; 2, \$13.35; 3, \$17.40; Trenton, 20 days.

Pacific States Electric Co., San Francisco, Cal., item 1, \$4,288.10; 2, \$26.30; 3, \$21.60; San Francisco, 1 to 40 days.

B. F. Kierulff, Jr., & Co., Los Angeles, Cal., item 1, \$265; Elizabeth, N. J., 2, \$38.70, Stamford, Conn., 5 days.

Standard U. S. Cable Co., Los Angeles, Cal., item 1, \$248.50; 2, \$31.67; 3, \$17.56; Perth Amboy, N. J., 7 days.

Electric Appliance Co., San Francisco, Cal., item 1, \$269; 2, \$33.49; 3, \$22.44; San Francisco, 6 days.

Hombird-Reynolds Co., Los Angeles, Cal., item 2, \$36.80; Los Angeles, 1 day.

National Conduit and Cable Co., Los Angeles, Cal., item 1, \$248.50; Hastings-on-Hudson, 10 days.

Central Electric Co., Chicago, Ill., item 1, \$256.75; 2, \$30.38; 3, \$19.80; Chicago, Ill.

Illinois Electric Co., Los Angeles, Cal., item 1, \$263, Phillipsdale, R. I., 7 days; 2, \$23; 3, \$22; Chicago, 6 days.

**Vertical A. C. Generator.**

The following bids were opened at the office of the U. S. Reclamation Service, Los Angeles, Cal., for vertical alternating current generator for Roosevelt power plant, sixth unit.

General Electric Co., Schenectady, N. Y., delivery Schenectady, \$21,694; 180 days.

The Westinghouse Electric and Mfg. Co., Los Angeles, Cal., delivery East Pittsburgh, Pa., \$21,000; 150 days; alternate bid, \$22,820; 150 days.

Allis-Chalmers Co., Milwaukee, Wis., delivery Milwaukee, \$22,160; 120 days.

**Wiring Material, Milk River Project.**

The following bids were received by the U. S. Reclamation Service, Los Angeles, Cal., for furnishing wiring material:

Item 1, 200 glass insulators; 2, pins and brackets; 3, switches, etc.; 4, sockets, bushings and shades; 5, circular balm; 6, porcelain tubes.

Pacific States Electric Co., San Francisco, Cal., item 1, \$2,148; 2, \$17.95; 3, \$35; 4, \$28.22; 5, \$8.40; 6, \$7.32.

B. F. Kierulff, Jr., & Co., Los Angeles, Cal., item 2, \$6.60.

Electric Appliance Co., Chicago, Ill., item 1, \$8.10; 2, \$15.00; 3, \$49.52; 4, \$9.07; 5, \$11.37; 6, \$6.

Illinois Electric Co., Los Angeles, Cal., item 1, \$8.25; 2, \$3.95; 3, \$27.70; 4, \$27.95; 5, \$9.60; 6, \$4.40.

Woodill & Hulse Electric Co., Los Angeles, Cal., item 1, \$14.35; 2, \$6.80; 3, \$19.70; 4, \$38; 5, \$7; 6, \$7.15.

**Hanford, Cal., Plaster Models.**

The following bids were received by the supervising architect, Treasury Department, Washington, D. C., for baking plaster models for the U. S. post office at Hanford, Cal.:

Ernest Bairdston, Washington, D. C., \$555.

Lombard & Ludwig, Washington, D. C., \$665.

E. Jung, Washington, D. C., \$500.

**San Francisco, Cal., Signal System.**

The following bids were received by the supervising architect, Treasury Department, Washington, D. C., for installing a signal system in the U. S. subtreasury building, San Francisco, Cal.:

American District Telegraph Co., New York City, \$2,916.64; time, November 30.

Butte Engineering and Electric Co., San Francisco, Cal., \$5,086; time, October 30.

**Riveted Steel Pipes.**

The following bids were opened at the U. S. Reclamation Service, Los Angeles, Cal., under Specification No. 273, for furnishing riveted steel pipes, Milk River project, Mont., St. Mary's Storage Unit:

Bid 1, Wm. B. Pollak Co., Youngstown, Ohio.

2, Struthers-Wells Co., Warren, Pa.

3, Petroleum Iron Works Co., Sharon, Pa.

4, The East Jersey Pipe Co., 50 Church street, New York City.

5, Ritter-Conley Mfg. Co., Pittsburgh, Pa.

6, Chicago Bridge and Iron Works, Chicago, Ill.

7, Fulton Engine Works, Los Angeles, Cal.

Place of delivery: Bid 1, Youngstown, Ohio; 2, Warren, Pa.; 3, Sharon, Pa.; 4, Patterson, N. J.; 5, Browning,

Mont. 6, Browning, Mont. Los Angeles, Cal.

Item 1.—Material, St. Mary's River Crossing.—Bid 1, \$11,315; 2, \$11,301; 3, \$11,300; 1, \$11,175; 5, \$16,750; 6, \$18,000; 7, \$21,900.

Price per lb.—Bid 1, 2.05c; 2, 1.89c; 3, 1.98c; 4, 2.02c; 5, 2.08c; 6, 3.1c; 7, 1.33c.

Weight.—Bid 1, 553,167 lbs; 2, 581,100 lbs; 3, 600,000 lbs; 4, 695,190 lbs; 5, 597,000 lbs; 6, 580,000 lbs; 7, 757,000 lbs.

Time.—Bid 1, 30 days; 2, 150 days; 3, 120 days; 4, 35 days; 5, 150 days; 6, 120 days; 7, 150 days.

Item 2. Material Hall's Coulee Crossing.—Bid 1, \$7,235; 2, \$7,349; 3, \$7,500; 4, \$8,087; 5, \$10,175; 6, \$11,100; 7, \$18,829.

Price per lb.—Bid 1, 2.2c; 2, 1.92c; 3, 2.11c; 4, 2.18c; 5, 2.3c; 6, 3.12c; 7, 4.42c. Weight.—Bid 1, 328,602 lbs; 2, 342,500 lbs; 3, 363,000 lbs; 4, 371,206 lbs; 5, 369,000 lbs; 6, 356,000 lbs; 7, 426,000 lbs.

Time.—Bid 1, 30 days; 2, 150 days; 3, 120 days; 4, 35 days; 5, 150 days; 6, 150 days; 7, 150 days.

Item 3. St. Mary, labor, tools, supplies.—Bid 1, 2.17c per lb; total, \$12,550; 6, \$20,800; 7, 150 days.

Item 4. Hall's Coulee Crossing Labor, Tools and Supplies.—Bid 1, \$3.09c per lb; total, \$19,139; 6, \$19,000; 7, \$27,500.

Remarks.—Bid 1, items 3 and 4 based on contract being placed with one contractor; if separated, item 3 will be \$14,000 and item 4 \$11,316. Prices on items 3 and 4 are based on continuous operation, beginning in May, 1915, and ending about November, 1915. Prices or erection are to be considered in connection with acceptance of items 1 and 2. Bid 2.—Bevel edges, sheared, not plain, shipped knocked down with exception of expansion joints. Bid 3.—Expansion joint shown without brass covering. Bid 5.—Shipped knocked down. Price includes all rivets, plus 1 per cent for field work. No paint included. Bid 6.—Items 3 and 4 include material; to get erection, deduct 1 from 3 and 2 from 4. Bid 7.—If items 3 and 4 are let as one contract and handled as one continuous job, doing item 3 and then item 4, item 3 will be done for \$24,524 and item 4, for \$21,109.

SAN FRANCISCO.—Bachelor officers' quarters, 2 story and base, brick, \$40,000. Architect, Constructing Quartermaster's Office, Fort Mason. Owners, United States Government. This building will be erected at Fort Winfield Scott and has been designed to contain six sets of quarters, each with bath. There will be a large common dining room and social hall and a completely equipped kitchen and servants' quarters. Interior will be finished in pine and hardwood. Some oak floors will be used. Plans provide for steam heat. Bath rooms will be finished in tile. Roof will be of clay tile or slate. Exterior of the building will be faced with pressed brick. Plans are complete and figures are being taken. Bids will be opened on September 8th. Plans and specifications can be secured from the Constructing Quartermaster's Office. An official proposal appears in another column of this issue.

## —HALLS & SOCIETY BLDGS—

LOS ANGELES, CAL.—Lodge hall, 2 story and base, brick. Cost not stated. Architects, Dennis & Hewitt, Play Bldg., L. A. Owners, Westlake Lodge F. and A. M. The building will be erected at the southwest corner of 8th and Burlington streets, covering an area of 50 by 102 feet. There will be stores on the first floor and upper floor will be arranged for lodge rooms, offices and ball room. Interior will be finished in pine with hardwood floors. A hot air heating system will be installed. Exterior of the building will be faced with pressed brick. Plans are complete and figures are being taken.

### Contracts Awarded.

LOS ANGELES, CAL.—Lodge hall, 2 story and base, Class C construction, \$25,000. Architects, Maine Building and Investment Co., Thorpe Bldg., L. A. Owners, Palestine Lodge F. and A. M. Contractors, Maine Building and Investment Co., Thorpe Bldg., L. A. Contract price, \$25,000.

BAKERSFIELD, KERN CO., CAL.—Lodge Hall, 2 story and base, brick and steel, \$24,977. Architect, O. L. Clark, Brower Bldg., Bakersfield. Owners, Bakersfield Pythian Hall Association. Contractor, William Parker, Bakersfield. Contract price, \$24,977.

## HOSPITALS

SAN FRANCISCO.—Hospital, 2 story and base, reinforced concrete. Cost not stated. Architect, City Department of Architecture, Temporary City Hall Bldg., S. F. Owners, City and County of San Francisco. Bids opened for this work at the last Wednesday meeting of the Board of Public Works and Robert Trost was low at \$18,347. He will probably be awarded the work. A complete list of all figures opened will be found under the heading of San Francisco in this issue.

MARE ISLAND NAVY YARD, CAL.—Hospital, 1 and 2 story, reinforced concrete, \$25,000. Architect, Dept. of Public Works, Mare Island. Owners, United States Government. The building will contain a number of private rooms and several wards. Interior finish will be of pine and hardwood. Some tile will be used. There will be steam heat and modern hospital plumbing. Exterior of the building will be faced with cement plaster. Plans are now being prepared.

## HOTELS.

LOS ANGELES, CAL.—Hotel, 3 story and base, brick and steel, \$18,000. Architect, Frank M. Tyler, Black Bldg., L. A. Owner, Edward Hallroter. The building will be erected at the corner of 7th and Santa Fe, and will contain stores on the first floor and a number of hotel rooms on the two upper floors. Interior finish will be of pine throughout. Plans provide or steam heat and a hot water system. Stores will have patent fronts and marble bases. Bath rooms will be finished in tile with composition floors. Exterior of the building will be faced with pressed brick. Plans are complete and figures are now being taken.

### Contracts Awarded.

LOS ANGELES, CAL.—Hotel, 4 story and base, brick and steel, \$26,350. Architect, E. B. Rust, Title Insurance Bldg., L. A. Owner, Susan Eckley.

Contractor, W. L. Miller, 1226 Dalton avenue, L. A. Contract price, \$36,350.

## LIBRARIES.

SANTA CRUZ, SANTA CRUZ CO., CAL.—Library, 1 story and base, reinforced concrete. Cost not stated. Architect, W. H. Weeks, 75 Post street, S. F. Owners, City of Santa Cruz. The building will be erected in Garfield Park and has been designed in the classic style. Interior will provide reading rooms and office of the librarian and stack room. Interior finish will be of pine and hardwood. Metal book stacks will be used. A central heating system, probably warm air, will be installed. Exterior of the building will be faced with cement plaster. Plans are now being prepared.

## PANAMA - PACIFIC EXPOSITION WORK.

SAN FRANCISCO.—Exhibit concession, 1 and 2 story, frame and plaster, \$30,000. Architect's name not given. Owners, Fritz Muller & Son, 171 O'Farrell street, S. F. Fritz Muller & Sons will build a concession building at the Panama-Pacific Exposition to be known as Alt-Nurnberg at a cost of \$30,000. The building will mean the construction of five buildings of frame and plaster. Work will be started at once.

SAN FRANCISCO.—State exhibit building, 2 story, frame and plaster, \$40,000. Architect, H. W. Baerresen, Service Bldg., S. F. Owners, State of Colorado. Complete new plans for the Colorado State exhibit building to be erected at the Panama-Pacific International Exposition are being prepared. Originally Colorado contemplated a building designed to represent Pike's Peak, but this was found to be out of harmony with the other state buildings and plans for a classic structure are now being prepared.

### Contracts Awarded.

SAN FRANCISCO.—Concession building, 2 story, frame and plaster, \$25,000. Architect, William Beasley, 127 Montgomery street, S. F. Owner, James W. Young. Contractor, Richard Senate, S. F. Contract price, \$25,000.

## POST OFFICES.

### Contracts Awarded.

IDAHO FALLS, IDAHO.—Post office, 2 story and base, stone and concrete, \$86,199. Architect, Supervising Architect Oscar Wenderoth, Washington, D. C. Owners, United States Government. Contractors, Sound Construction and Engineering Co., Lowman Bldg., Seattle. Contract price, \$86,199.

## RAILROAD CONST., STATIONS AND EQUIPMENT.

BENICIA TO VALLEJO, SOLANO CO., CAL.—Electric railroad construction. Cost not stated. Engineer Matthews, Benicia. Owners, Benicia Land and Terminal Co., Mills Bldg., S. F. Chief Engineer Matthews of the Benicia Land and Terminal Co. has started surveying for the new electric line to be run from Benicia and Vallejo. Franchises over the streets in Benicia and Vallejo will be asked for at once. A. D. Bowen, Mills Bldg., S. F., is president of the company.

**MODESTO, STANISLAUS CO., CAL.**—Railroad construction. Cost not stated. Engineers, Mahoney Bros., Merchants' National Bank Bldg., S. F. Owners, Mahoney Bros. It is reported that Mahoney Bros. will shortly start construction on a railroad through their property in Stanislaus County. They are negotiating for the old Tide-water line, rails for which are laid for a distance of six miles. The proposed road would bring that portion of Stanislaus County lying between the Southern Pacific and the San Joaquin River in touch with Modesto.

**ROSE STATION TO ELDERWOOD, TULARE CO., CAL.**—Electric line extension. Cost not stated. Engineer, Engineering Department Visalia Electric Railroad Co., Visalia. Owners, Visalia Electric Railroad Co. A two-mile extension to the Visalia Electric Railroad is to be built from Rose Station to Elderwood.

### RESIDENCES.

**SAN FRANCISCO**—Residence, 2 story and base, frame, \$3,000. Architect, none. Owner, Elmer E. Clark, 2529 Anza street, S. F. The dwelling will be erected on the east side of 25th avenue north of Anza, and has been designed to contain six rooms and bath. Interior will be finished in pine and redwood. Hardwood floors will be used in the living room and dining room. There will be open fire places and tile mantels. Bath room and kitchen will have tile wainscot. An automatic water heater will be installed. Exterior of the dwelling will be covered with rustic and cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor.

**SAN FRANCISCO**—Residence alterations and addition, 2 story, frame, \$5,000. Architect, none. Owner, Mrs. M. J. Graves, 2820 Scott street, S. F. This work will consist of an addition of three rooms, removing old shingles from the out side of the dwelling and replacing same with cement plaster on metal lath, new interior finish, plastering, electric work, plumbing, painting, a tar and gravel roof and brick and concrete work. Plans are in the hands of the owner and the work will be done by Day Labor.

**SAN FRANCISCO**—Residence, 2 story and base, frame, \$7,000. Architect, Joseph A. Leonard, 85 Cerritos avenue, S. F. Owners, Urban Realty Co. for H. M. Furman. The dwelling will be erected on the west side of Moncada Way near Cedro, and has been designed to contain eight rooms, two baths and sleeping porch. Interior will be finished in pine and hardwood. Hardwood floors will be used in the living room, library, dining room and reception hall. There will be furnace heat and open fire places. Mantels will be of tile or brick. Bath rooms will be finished in tile. An automatic water heater will be installed. Exterior of the dwelling will be covered with shingles, cement plaster on metal lath and klinker brick base. Plans are complete and the work will be done by Day Labor.

**SAN FRANCISCO**—Residence, 2 story and base, frame, \$2,500. Architect, none. Owners, Johnson and Hatland, 1513 Church street, S. F. The dwelling will be erected on Fertita north of Mohawk, and has been designed for a five-room house with bath. Interior will be finished in pine and redwood.

Some hardwood floors will be used. There will be a large open fire place and tile mantel. Tile wainscot will be used in the bath room and kitchen. Exterior of the house will be covered with rustic and cement plaster on metal lath. Plans are complete and in the hands of the owners who will do the work by Day Labor. Materials are now being purchased.

**SAN FRANCISCO**—Residence, 2 story and base, frame, \$6,000. Architect, Edward G. Bolles, 650 Market street, S. F. Owners, S. A. Born Building Co., 650 Market street, S. F. The dwelling will be erected on lot No. 3 in the Ashbury Terrace District, and has been designed for a seven-room house with bath and sleeping porch. Interior will be finished in pine, redwood and hardwood. Hardwood floors will be used in the living room, dining room and reception hall. Plans provide for furnace heat and open fire places. Mantels will be of tile or brick. An automatic water heater will be installed. Bath room will have tile floor and wainscot. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and work will be done by Day Labor. Materials are now being purchased.

**BERKELEY, ALAMEDA CO., CAL.**—Residence, 2 story and base, frame. Cost not stated. Architect, Olin S. Grove, 2911 Telegraph avenue, Berkeley. Owner, Mathew Hunter. The dwelling will be erected on North Woolsey street east of Dana, and has been designed for a seven-room house with bath and sleeping porch. Interior will be finished in pine and hardwood. Hardwood floors will be used in the living room, dining room and reception hall. There will be furnace heat and open fire places. Mantels will be of tile. Tile wainscot and floor will be used in the bath room. An automatic water heater will be installed. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

**OAKLAND, CAL.**—Residence, 2 story and base, frame, \$6,000. Architect, Warren S. Perry, 2636½ Dwight Way, Berkeley. Owner, Leo M. Mott, Jr. The dwelling will be erected at the corner of 59th and Heinhold Road, and has been designed for an eight-room house with bath and sleeping porch. Interior will be finished in pine with some elm panels. Hardwood floors will be used in the principal rooms. Plans provide for furnace heat and open fire places. Mantels will be of tile or brick. Bath room will be finished in tile. An automatic water heater will be installed. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and the work will be done by Day Labor. Figures are now being taken for the plastering, plumbing and electric work.

**OAKLAND, CAL.**—Residence, 2 story and base, frame. Cost not stated. Architect, Charles W. McCall, Central Bank Bldg., Oakland. Owner Mrs. L. Eschbacher. The dwelling will be erected on Fairbanks avenue and has been designed for a seven-room house with bath and sleeping porch. Interior will be finished in pine with some redwood. Hardwood floors will be used in the living room and dining room. There will be furnace heat and open fire places. Mantels will be of tile or brick. Tile wainscot and floor will be used in the bath room. An automatic

water heater will be installed. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and figures are now being taken.

**OAKLAND, CAL.**—Residence, 2 story and base, frame, \$5,000. Architect, Olin S. Grove, 2911 Telegraph avenue, Berkeley. Owner, Mrs. L. Olson. The dwelling will be erected in East Piedmont Heights and has been designed for a seven-room house with bath and sleeping porch. Interior finish will be of pine and redwood with some white enamel. Hardwood floors will be used in the living room, dining room and reception hall. There will be furnace heat and open fire places. Mantels will be of brick. An automatic water heater will be installed. Bath room will be finished in tile. Exterior of the house will be covered with cement plaster on metal lath. Plans have been completely redrawn and new figures are now being taken.

**BERKELEY, ALAMEDA CO., CAL.**—Residence, 2 story and base, frame, \$5,000. Architect, none. Owner, W. H. Haynes, 2711 Ashby avenue, Berkeley. The dwelling will be erected at the corner of Claremont Boulevard and Avalon avenue. There will be seven rooms, bath and sleeping porch. Interior will be finished in pine and redwood with some elm panels. Hardwood floors will be used in the principal rooms. Plans provide for furnace heat and open fire places. Mantels will be of tile or brick. An automatic water heater will be installed. Bath room will be finished in tile. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor. Materials are now being purchased.

**BERKELEY, ALAMEDA CO., CAL.**—Residences, 18, 1 and 2 story and base, frame, \$2,000 to \$3,500. Architect, Leonard H. Ford, 2136 Center street, Berkeley. Owner's name withheld. These houses will all be erected on the same tract and will be designed to contain from five to seven rooms. The larger houses will have furnace heat. Interiors will be finished in pine, redwood and hardwood. Hardwood floors will be used in the principal rooms. Open fire places and tile or brick mantels will be specified. Automatic water heaters will also be used. Tile wainscot will be used in the bath rooms. Exteriors will be covered with rustic, shingles and cement plaster on metal lath. Plans are now being prepared and when complete the work will be done by Day Labor. Further mention will be made of the work.

**BERKELEY, ALAMEDA CO., CAL.**—Residence, 2 story and base, frame, \$5,000. Architect, Eugene K. Martin, 2192 Shattuck avenue, Berkeley. Owner, Mrs. R. Clifford. The dwelling will be erected in South Berkeley, and has been designed to contain eight rooms and bath. Interior will be finished in pine and redwood. Hardwood floors will be used in the living room, dining room and reception hall. Plans provide for furnace heat and open fire places. Mantels will be of tile or brick. Bath room will be finished in tile. An automatic water heater will be installed. Exterior of the house will be covered with cement plaster on metal lath. Plans are now being prepared.

**BURLINGAME, SAN MATEO CO., CAL.**—Residence, 2 story and base, frame, \$25,000. Architect, Lewis P. Hobart, Crocker Bldg., S. F. Owner, Dr. W. C. Childster, San Mateo. The dwelling will be erected on a large tract recently purchased by Dr. Childster and will contain in the neighborhood of fourteen rooms, several baths and sleeping porches. A garage will also be erected on the property. Interior of the house will be finished in pine, hardwoods and white enamel. Hardwood and inlaid floors will be used in the principal rooms. There will be furnace heat and open fire places. Mantels will be of tile and brick. Vacuum cleaning and automatic water heaters will be installed. Bath rooms will be finished in tile and equipped with showers. Exterior of the garage and dwelling will be covered with cement plaster on metal lath. Preliminary drawings have been made.

**SAN JOSE, SANTA CLARA CO., CAL.**—Residences, 1 story and base, frame. Cost not stated. Architect, none. The following Day Labor jobs are reported as about to be started in San Jose: Thomas Heller, 152 North 3rd street, five-room cottage, \$1,200, and Mary E. Akers, 224 South 23rd street, four-room cottage, \$1,500. Materials are now being purchased.

**SAN FRANCISCO**—Residence, 2 story and base, brick. Cost not stated. Architect, L. E. Peyser, 2297 Union street, S. F. Owner, C. G. Berg. The dwelling will be erected in Buena Vista Terrace and has been designed to contain eight rooms and bath. Interior will be finished in pine and hardwood veneer. Hardwood floors will be used in the principal rooms. Plans provide for furnace heat and open fire places. Mantels will be of tile. Bath room will tile floor and wainscot. An automatic water heater will be installed. Exterior of the house will be faced with pressed brick and stone. Plans are complete and figures are being taken.

**SAN FRANCISCO**—Residences, 2, 2 story and base, frame, \$2,500 each. Architect, none. Owner, W. R. Kenny, 430 Arguello Boulevard, S. F. These two houses will be erected on the west side of 36th avenue south of Balboa, and each will contain five rooms and bath. Interior finish will be of pine throughout. Some hardwood floors will be used. There will be an open fire place in each living room. Mantels will be of tile. Bath rooms and kitchens will have tile wainscot. Exterior of the houses will be covered with rustic and cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor.

**SAN FRANCISCO**—Residence, 2 story and base, frame, \$6,000. Architect, Charles J. Rousseau, 46 Kearny street, S. F. Owner, Mathew A. Little. The dwelling will be erected on Green street west of Divisadero and has been designed to contain eight rooms, two baths and sleeping porch. Interior will be finished in pine and hardwood. Hardwood floors will be used in the living room, dining room and reception hall. Plans provide for furnace heat and open fire places. Mantels will be of tile or brick. Bath rooms will be finished in tile. An automatic water heater will be installed. Exterior of the dwelling will be covered with rustic and cement plaster on metal lath. Plans are complete and the work will

be done by Day Labor. Materials are now being purchased.

**LOS ANGELES, CAL.**—Residence, 1 and 2 story and base, brick. Cost not stated. Architects, Morgan, Walls & Morgan, Van Nuy Bldg., L. A. Owner, J. Benton Van Nuy. The dwelling has been designed to contain twenty rooms, a number of baths and sleeping porch. The house will be erected on a large lot in Windsor Square. Interior will be finished in pine and hardwood. Hardwood floors will be used in the principal rooms. Plans provide for steam heat and open fire places. Mantels will be of tile. There will be a hot water system and vacuum cleaning. Bath rooms will be finished in tile and will be equipped with showers. Exterior of the house will be faced with cement plaster. A clay tile roof will be used. Plans are complete and figures are being taken.

**LOS ANGELES, CAL.**—Residence, 2 story and base, brick and frame. Cost not stated. Architect, C. C. Rittenhouse, Washington Bldg., L. A. Owner, A. Jamieson. The dwelling will be erected in Wilshire Heights, and has been designed for a ten-room house with baths and sleeping porch. Interior will be finished in pine and hardwood veneer. Hardwood floors will be used in the principal rooms. There will be open fire places and furnace heat. Mantels will be of tile or brick. Bath rooms will have tile floors and wainscot. An automatic water heater will be installed. Exterior of the dwelling will be covered with ruffled brick veneer. Plans are complete and work will be done by Day Labor.

**SAN GABRIEL, LOS ANGELES CO., CAL.**—Residence, 2 story and base, hollow tile construction. Cost not stated. Architects, Architectural Designing Co., Grosse Bldg., L. A. Owner, Frank Hogan. The dwelling will be erected on a large tract and has been designed to contain fourteen rooms, several baths and sleeping porch. A garage will also be erected on the property. Interior of the house will be finished in pine with hardwood finish and hardwood floors in the principal rooms. Plans provide for furnace heat, a hot water supply and vacuum cleaning. There will be open fire places and tile mantels. Bath rooms will be finished in tile and will be equipped with showers. Exterior of the house and garage will be faced with cement plaster. Plans are now being prepared.

**LOS ANGELES, CAL.**—Residence, 2 story and base, frame. Cost not stated. Architects, Architectural Designing Co., Grosse Bldg., L. A. Owner, Mrs. A. Trisler. The dwelling has been designed in the Japanese style and will be erected on Bonnie Brae street, and has been designed for a ten-room house with several baths. Interior will be finished in pine and hardwood. Hardwood floors will be used in the principal rooms. Plans provide for furnace heat and open fire places. Mantels will be of tile. Bath rooms will be finished in tile. There will be automatic water heaters. Exterior of the dwelling will be covered with rustic and shingles. Plans are being prepared.

**SAN FRANCISCO**—Residence, 1½ story and base, frame, \$3,000. Architect, none. Owner, Anna C. Surkamp, 918 Taraval street, S. F. The dwelling will be erected on 12th avenue south of Santiago, and has been designed to

contain six rooms and bath. Interior finish will be of pine throughout. Hardwood floors will be used in the principal rooms. There will be open fire places and tile mantels. Bath room and kitchen will have tile wainscot. Exterior of the house will be covered with rustic. Plans are complete and in the hands of the owner who will do the work by Day Labor. Materials are now being purchased.

#### Contracts Awarded.

**LOS ANGELES, CAL.**—Residence, 2 story and base, stone and frame, \$50,000. Architect, R. D. Farquhar, Van Nuy Bldg., L. A. Owner, Henry D. Lombard. Contractor, T. C. Marlow, Van Nuy Bldg., L. A. Contract price, \$50,000.

#### SCHOOLS.

**PITTSBURG, CONTRA COSTA CO., CAL.**—School, 2 story and base, brick, \$50,000. Architect, A. W. Cornelius, Merchants' National Bank Bldg., S. F. Owners, Pittsburg School District. Bids opened for this work show J. O. Kuykendall low on the general construction at \$49,955.50 and the Seibert Co. low on the plumbing at \$4,500. These figures are but a little above the amount available and contracts will probably be awarded. A complete list of the figures presented will be found under the heading of Marin, Contra Costa and Sonoma Counties in this issue.

**STOCKTON, SAN JOAQUIN CO., CAL.**—School, 2 story and base, brick, \$75,000. Architects, Stone & Wright, 24 South California street, Stockton. Owners, City of Stockton. Plans for the building to be erected on Lower Sacramento Road at North street are practically complete and figures will be called for shortly. Plans provide for twelve class rooms, assembly hall and departments for domestic science and manual training. Interior will be finished in pine with maple floors in the class rooms. There will be steam heat and modern school plumbing. Vacuum cleaning and program clocks are also specified. Exterior of the building will be faced with pressed brick. Further mention will be made of the work when plans go out for figures.

**ROSEVILLE, PLACER CO., CAL.**—School, 1 story and base, brick and reinforced concrete, \$10,000. Architect, W. H. Weeks, 75 Post street, S. F. Owners, Roseville School District. The building has been designed in the Mission style and will contain eight class rooms and an assembly hall. Interior will be finished in pine with maple floors in the class rooms. There will be a central heating system, probably warm air system, and modern school plumbing. A program clock system will be installed. Exterior of the building will be faced with cement plaster and pressed brick. Plans are complete and figures are being taken. Plans and specifications can be secured from the architect.

**LINDSAY, TULARE CO., CAL.**—School, 2 story and base, brick and steel, \$86,000. Architect, F. W. Griffin, Visalia. Owners, Lindsay School District. The building will contain ten class rooms, assembly hall, principal's office, teachers' room and department of domestic science and manual training. Interior will be finished in pine with maple floors in the class rooms. Plans provide for steam heat, oil

## BRODE IRON WORKS

Established 1866—Incorporated 1913  
Tel. Kearny 2464.

Fabricators and Contractors of Structural Steel and Ornamental Iron Work

Office & Works: 31-37 Hawthorne St., bet. Howard & Folsom Sts., San Francisco, Cal.

burning system, modern school plumbing and program clocks. Exterior of the building will be faced with pressed brick. Plans are complete and figures are being taken. Plans and specifications can be secured from the architect.

LOS ANGELES, CAL.—School supplies. Cost not stated. Architect, none. Owners, City of Los Angeles. Bids are being taken by the Board of Education for furnishing the School Department with lumber, cement, program clocks and certain machinery for the fiscal year. Complete information of this work can be secured from the Clerk of the Board of Education.

AZUSA, LOS ANGELES CO., CAL.—School, 2 story and base, frame. Cost not stated. Architect, Norman F. Marsh, 212 Broadway, L. A. Owners, Azusa School District. Plans provide for six class rooms, departments for music and commercial study and teachers' rooms. Interior will be finished in pine. Maple floors will be used in the class rooms. There will be a central heating system and modern school plumbing. Exterior of the building will be covered with cement plaster on metal lath. Plans are complete and figures are being taken. Bids will be opened on August 29th.

KENTFIELD, MARIN CO., CAL.—School, 1 story and base, frame and plaster, \$12,000. Architect, Irwin Schaefer, Plaza Bldg., Oakland. Owners, Kentfield School District. The building has been designed in the Mission style and will contain four class rooms and an assembly hall. Interior finish will be of pine with some maple floors in the class rooms. A central heating system, probably steam heat, will be installed. Exterior of the building will be covered with cement plaster on metal lath. Plans are complete and figures are being taken. Bids will be opened on August 22nd.

ALTADENA, LOS ANGELES CO., CAL.—Schools, 2 1 story and base, frame. Cost not stated. Architects, Marsten & Van Pelt, Chamber of Commerce Bldg., L. A. Owners, Altadena and Lamadena School Districts. These two buildings will each contain four rooms and assembly hall. Interiors will be finished in pine throughout. Central heating systems will be installed in both buildings. Exteriors will be covered with cement plaster on metal lath. Plans are complete and figures will be opened on September 13th. Plans and specifications can be obtained from the architects.

ALHAMBRA, LOS ANGELES CO., CAL.—Schools, 1, 1 story and base, brick. Cost not stated. Architects, Allison & Allison, Hiernian Bldg., L. A. Owners, City of Alhambra. Plans provide for one building of eight rooms, one of four and two of three rooms. Interiors will be finished in pine throughout. There will be central heating systems, probably steam heat. Composition blackboards will be used. Exteriors will be faced with pressed brick. Plans are complete and figures are being taken. Bids will be opened

on August 21st. Plans and specifications can be secured from the architects.

SIERIA MADRE, LOS ANGELES CO., CAL.—School group, 1 story, frame and plaster. Cost not stated. Architect, W. J. Saunders, International Bank Bldg., L. A. Owners, Sierra Madre School District. The group will include a main administration building, domestic science, kindergarten, sloyd building and grammar school. Interior finish will be of pine. A central heating system will be installed. Exteriors of all buildings will be covered with cement plaster on metal lath. Plans are complete and figures are being taken. Bids will be opened on August 29th. Plans and specifications can be secured from the architect.

SEATTLE, WASH.—School, 3 story and base, brick and steel, \$300,000. Architect, City School Department, Seattle. Owners, Ballard School District, No. 1. The building will be of fireproof construction with steel frame and brick exterior walls. It will cover an area of 200 by 220 feet, and besides a large number of class rooms will contain two gymnasiums and a large auditorium. Interior partitions will be of hollow tile. There will be steam heat and modern school plumbing. Exterior of the building will be faced with pressed brick, granite and terra cotta. Plans are complete and figures are being taken.

FULTON PARK, ORE.—School, 1 and 2 story and base, hollow tile construction, \$21,000. Architect, F. A. Naramore, Portland. Owners, Fulton Park School District. The building will contain six class rooms and an assembly hall. Interior will be finished in pine. There will be steam heat and modern school plumbing. Exterior will be faced with cement plaster. Plans are complete and figures are being taken.

### Contracts Awarded.

VAN NUYS, LOS ANGELES CO., CAL.—School, 2 story and base, brick, \$57,552.50. Architects, Allison & Allison, Hiernian Bldg., L. A. Owners, Van Nuys School District. Contractor, Fred Stahlhut, 350 South Pasadena avenue, Pasadena, general construction. Thomas Haverly Co., plumbing.

### SEWERS, STREET WORK AND WATER SYSTEMS.

SAN FRANCISCO—Tunnel construction. Cost not stated. Engineer, City Engineer, Temporary City Hall, S. F. Owners, City and County of San Francisco. With the permission of the Board of Public Works, Edward Malley has transferred the contract for constructing Mile Rock Tunnel to R. C. Storrie Co.

CALIFORNIA—Highway construction. Cost not stated. Engineer, State Highway Engineer, Forum Bldg., Sacramento. Owners, State of California. The State Highway Commission has awarded contracts for highway construction as follows: Fairbanks &

Buechtel, Wilhite, 13.8 miles in Humboldt County, \$120,893. James H. Falconer, Escalon, 3.6 miles in Contra Costa County, \$11,113.30. Ramsome-Crummey Co., Oakland, 1.9 miles in Santa Clara County, \$30,661.30. T. K. Beard, Modesto, 9.3 miles in Santa Barbara County, \$52,168. Bids for constructing the road from Shively to Jordan Creek in Humboldt County were rejected as being above the engineer's estimate and will either be readvertised or will be done by Day Labor under the direction of the State Highway Commission.

SAN FRANCISCO—Grading and concrete and paving. Cost not stated. Engineer, none. Owners, City and County of San Francisco. Bids will be opened by the Park Commissioners at the Park Lodge, Golden Gate Park on August 20th for grading, concrete work and paving as required by the Park Commissioners. Complete information can be secured from the Commissioners at the Lodge, Golden Gate Park.

LIVERMORE, ALAMEDA CO., CAL.—Sewer construction. Cost not stated. Engineer, City Engineer, Livermore. Owners, City of Livermore. Bids have been ordered advertised for on the construction of 1,614 feet of six-inch sewer. Vitrified, salt-glazed, ironstone pipe will be used. Plans have been prepared by the City Engineer.

PORTERVILLE, TULARE CO., CAL.—Street paving. Cost not stated. Engineer, City Engineer, Porterville. Owners, City of Porterville. Resolutions of intention have been passed by the Trustees for a large amount of pavement in both the business and residence sections of the city. The work will be done with asphalt and concrete base.

STOCKTON, SAN JOAQUIN CO., CAL.—Road repairs, \$18,000. Engineer, County Surveyor, Stockton. Owners, San Joaquin County. County Surveyor Quail has been instructed to prepare plans for grading and otherwise improving the Jack Tone road from the Linder road, a distance of 5 miles into the Tokay Colony. The work is estimated at \$18,000.

SAUSALITO, MARIN CO., CAL.—Street work, paving, curbs and sidewalks, \$100,000. Engineer, City Engineer, Sausalito. Owners, City of Sausalito. The Town Engineer states that plans and specifications for \$100,000 worth of street paving and improvements will be completed within two weeks. The Town Trustees have completed arrangements for the disposal of bonds amounting to \$100,000 and the work will be advertised at once.

VALLEJO, SOLANO CO., CAL.—Sewer work. Cost not stated. Engineer, City Engineer, Vallejo. Owners, City of Vallejo. Bids will be opened on August 20th by the City Trustees for constructing approximately 1,650 feet of six-inch vitrified, salt-glazed, ironstone pipe sewers, two brick manholes and a number of Y branches. WOODLAND, YOLO CO., CAL.—Road machine. Cost not stated. Engineer, County Surveyor, Woodland. Owners, Yolo County. Bids will be opened on August 27th for furnishing one No. 4 road machine for use in Road District No. 4. Complete particulars can be secured from the County Clerk at Woodland.

**Contracts Awarded.**

OAKLAND, CAL.—Road improvement, \$3,191. Engineer, County Surveyor, Oakland. Owners, Alameda County. Contractor, P. H. Hoare, Oakland. Contract price, \$3,191.

RICHMOND, CONTRA COSTA CO., CAL.—Street paving, \$88,154.75. Engineer, City Engineer, Richmond. Owners, City of Richmond. Contractor, George W. Cutting, Richmond. Contract price, \$88,154.75.

**STORES.**

SAN FRANCISCO.—Telephone Exchange alterations, \$3,000. Architect, Cobbs, 353 Grant Avenue, S. F. Owners, Pacific Telephone and Telegraph Co. This work will include new plumbing fixtures, plastering and painting to be installed at the company's exchange at the corner of 17th and Albion streets. Plans are complete and the work will be done by Day Labor. Materials are now being purchased.

**Contracts Awarded.**

SALEM, ORE.—Stores and business college, 2 story and base, brick, \$25,000. Architect, Fred A. Legg, Salem. Owner, George F. Rogers. Contractor, C. Van Patton, Salem. Contract price, \$25,000.

PORTLAND, ORE.—Market building, 1 story and base, brick and concrete. Cost not stated. Architects, Whitehouse & Foulhoux, Wilcox Bldg., Portland. Owner, Scott Brook. Contractors, Palmer & Ellison, Henry Bldg., Portland. Contract price not stated.

SEATTLE, WASH.—Stores and lofts, 4 story and base, reinforced concrete, \$100,000. Architect, Louis Mendell, Orienta Bldg., Seattle. Owners, O'Shea Bros. Contractor, Otto Rosehart, Lowman Bldg., Seattle. Contract price, \$100,000.

**THEATRES.**

OAKLAND, CAL.—Theatre, 1 story and base, brick and steel, \$20,000. Architect, Alvin J. Stern, 1542 Broadway, Oakland. Owner's name withheld. The building will be erected on the east side of Telegraph Avenue south of 33rd street. Construction will be practically fireproof. A cement floor will be used. Interior will be finished in pine and ornamental plaster. A modern system of ventilation will be installed. Special electric work is specified. An organ, estimated to cost \$5,000, will be installed. Exterior of the building will be faced with buff pressed brick. Plans are complete and figures are now being taken.

BERKELEY, ALAMEDA CO., CAL.—Theatre, 1 story and base, brick, \$12,000. Architect, Clay N. Barrett, Albany Bldg., Oakland. Owner's name withheld. The building will be erected on Adeline street and will cover a large ground area. Interior will be finished in pine and ornamental plaster. Modern ventilating and electric work will be installed. Exterior of the building will be faced with pressed brick. Plans are now being prepared.

BERKELEY, ALAMEDA CO., CAL.—Theatre, 1 story and base, Class C construction. Cost not stated. Architect, W. H. Ratchell, Jr., First National Bank Bldg., Berkeley. Owners, J. A. Elstone and George Clark. This building, which has been mentioned here before, will be erected on Durant Avenue east of Telegraph. Plans have

been revised and new figures are being taken on various parts of the work. Interior will be finished in pine and ornamental plaster. Plans provide for a modern system of ventilation and special electric work. There will be one store besides the theatre. Exterior of the building will be faced with pressed brick.

**SEALED PROPOSALS.****PROPOSALS FOR RECLAMATION WORK.**

RECLAMATION WORK.—Department of the Interior, United States Reclamation Service, Washington, D. C.—Sealed proposals will be received at the office of the United States Reclamation Service, Phoenix, Ariz., until 2 o'clock p. m., August 21, 1914, for the construction of the Wallace Feeder Canal on the Salt River Project, Ariz. The work is located near Phoenix, Ariz., and involves the excavation of approximately 65,000 cubic yards of material, 275 cubic yards of plain and reinforced concrete in structures, 160 linear feet of grouted piling, laying square yards of 18-inch concrete pipe and the erection of four bridges, involving the use of 16,380 feet, b. m., of lumber and 3,600 pounds of steel, and iron. For further particulars address the United States Reclamation Service, Phoenix, Ariz., or Washington, D. C. F. H. NEWELL, director.

**PROPOSALS FOR PRESSURE PIPE.**

STEEL PRESSURE PIPE.—U. S. Reclamation Service, Los Angeles, Cal.—Sealed proposals will be received here until 2 p. m., August 21, 1914, for furnishing riveted steel pressure pipe for the Okanogan project, Wash. For particulars address U. S. Reclamation Service, 605 Federal Building, Los Angeles, Cal., or Washington, D. C. O. H. ENSIGN, chief electrical engineer.

**PROPOSALS FOR LIGHT FIXTURES.**

LIGHT FIXTURES.—Treasury Department, Office of the Supervising Architect, Washington, D. C.—Sealed proposals will be received in this office until 2 p. m., August 21, 1914, and then opened, for furnishing and installing lighting fixtures in the United States custom house at Boston, Mass.; the United States post office at Minneapolis, Minn.; the United States post office and court house at Muskogee, Okla.; and the United States subtreasury at San Francisco, Cal., in accordance with drawings and specifications, copies of which may be had at this office. Bidders are required to submit designs for special fixtures. Proposals are desired only from those qualified to produce work of the highest grade both artistically and mechanically, and the right is reserved to refuse to send the drawings and specifications to or to receive proposals from anyone who, in the opinion of the supervising architect is not so qualified. O. WENDERTH, supervising architect.

**NOTICE TO CONTRACTORS.**

C.—Sealed proposals will be received at this office until 2 o'clock p. m., August 21, 1914, and then opened for metal counters, screen partitions, shelving, etc., for the U. S. subtreasury at San Francisco, Cal.

Plans and specifications may be had at the office of the supervising superintendent of construction, room 163 post office and court house, San Francisco, Cal., or at the office in the district of the supervising architect, O. WENDERTH, Supervising Architect.

## NOTICE TO CONTRACTORS.

## PANAMA-PACIFIC INTERNATIONAL EXPOSITION.

SEALED PROPOSALS will be received by the Buildings and Grounds Committee of the Panama-Pacific International Exposition Company at Room 213, in the Service Building, Fillmore and Chestnut Streets, San Francisco, California, at 3 o'clock A. M. Tuesday, August 25th, for constructing Wood and Glass Ceilings over office spaces in Exhibit Palaces, in accordance with plans and specifications on file in the office of the Director of Works.

Each proposal must be accompanied by a certified check payable to the order of the Panama-Pacific International Exposition Company in the sum of ten (10) per cent of the amount bid, or the same will not be considered. When the contract is made all checks will be returned to the respective bidders, except that filed with the accepted proposal or bid, which check will be returned upon the successful bidder signing the contract and filing the required bond. A bond in the sum of fifty (50) per cent of the contract price will be required for faithful performance of the contract; the sureties thereon must be satisfactory to the Buildings and Grounds Committee of the Panama-Pacific International Exposition Company.

Progressive payments will be made. The right is reserved to reject any and all bids and to waive technical defects in the interest of the Exposition Company.

Plans and specifications for the work may be obtained from the Director of Works, Room 213, Service Building, Fillmore and Chestnut Streets, San Francisco, by depositing \$25.00, which amount will be refunded to successful bidder. Bids will be opened at 10 o'clock A. M. All persons taking out plans and failing to submit bona fide bids will forfeit the deposit of Ten Dollars to the Exposition Company.

By order of the Buildings and Grounds Committee.

WILLIAM H. CROCKER,  
Chairman. (\*)

STATE OF CALIFORNIA.  
DEPARTMENT OF ENGINEERING.  
CALIFORNIA HIGHWAY COMMISSION

## NOTICE TO CONTRACTORS.

SEALED PROPOSALS will be received at the office of the California Highway Commission, 515 Forum Bldg., Sacramento, Cal., until the times hereinafter noted, at which times bids will be publicly opened and read, for construction in accordance with the specifications therefor, to which special reference is made, portions of State Highways as follows:

Until 11 o'clock A. M., August 31, 1914.  
Colusa County from Berlin to Colusa Junction (III-Col-7-B), about 12.6 miles in length, to be built of Portland cement concrete.

Yuba County from the southerly county boundary to Morrison's Crossing (III-Yub-3-A), about 3.3 miles in length, to be built of Portland cement concrete.

San Luis Obispo County from Alascendado Creek to Escondido (V-S-L-O-2-B), about 10.0 miles in length, to be built of Portland cement concrete.

Kern County from the southerly county boundary to a point about 2.2 miles south of Rose Station (VI-Ker-4-A), about 10.7 miles in length, to be graded.

Orange County from Irvine to Santa Ana (VII-Or-2-C), about 7.1 miles in length, to be built of Portland cement concrete.

Until 2 o'clock P. M., August 31, 1914.  
Sacramento County from Folsom to the easterly county boundary (III-Sac-11-A), about 6.8 miles in length to be built of Portland cement concrete.

Solano County from Vacaville to Batavia (III-Sol-7-D), about 8.2 miles in length, to be built of Portland cement concrete.

Santa Barbara County from Divisadero to Orcutt (V-S-B-2-A), about 3.6 miles in length, to be built of Portland cement concrete.

Santa Barbara County from Stone Creek to El Capitán Creek (V-S-B-2-C&D), about 10.2 mile in length, to be graded.

Los Angeles County from Castaic School to Section 17, T. 6 N., R. 17 W.

S. R. R. & M. (VII-L-A-4-D), about 12.8 miles in length, to be graded.

Plans may be seen, and forms of proposals, bonds, contract, and specifications may be obtained, at the said office, and they may be seen at the offices of the Division Engineers at Los Angeles and San Francisco, and at the office of the Division Engineer of the various districts in which the work is situated. The Division Engineers' offices are located at Willets, Dunsmuir, Sacramento, San Francisco, San Luis Obispo, Fresno, and Los Angeles.

No bid will be received unless it is made on blank form furnished by the Commission. The special attention of prospective bidders is called to the "Notice to Contractors" annexed to the blank form of proposal, for full directions as to bidding, quantities of work to be done, etc.

The Department of Engineering reserves the right to reject any or all bids or to accept the bid deemed for the best interest of the State.

CHARLES D. BLANEY,  
NEWELL D. DARLINGTON,  
CHAIRMAN E. STOKES.

California Highway Commission.  
AUSTIN B. FLETCHER,  
Highway Engineer.

CHARLES C. CARLETON,  
Chief Acting Secretary. (\*)

Dated: July 21, 1914.

## PROPOSALS FOR AUDITORIUM WORK.

PURSUANT to Resolution No. 5527 N. S., passed July 22, 1914, the Council of the City of Oakland will receive bids for furnishing all of the materials, labor, and workmanship required in connection with the construction, erection and finish of Elevators and Curtain Hoists; Marble and Tiling; Cement Plinths; Paints and Hardware; Partitioning; Seating; Plastering and Lathing and Electrical Work for the Auditorium Building to be erected on the grounds of Peralta Park, located on the southerly side of Twelfth street, between Fallon street and Lake Shore avenue, in the City of Oakland.

All proposals shall be made upon and conform to the requirements of the forms of proposals, prepared and furnished by the City, through the Supervising Architect, and shall be enclosed in sealed envelopes endorsed "Bid for Auditorium," (specifying work bid upon) addressed to the Council and deposited by the bidder or his agent, with the Council, which is sealed between 11 o'clock A. M. and 12 o'clock Noon, Pacific Time, on the 20th day of August, 1914, in the room of the Council in the City Hall, Fourteenth and Washington streets, Oakland, and at the expiration of the time named the bids will be opened, examined and publicly declared in open session of the Council.

All said materials, labor and workmanship is to consist of that required by, and be in accordance with the plans, drawings and specifications prepared therefor and on file in the office of John J. Donovan, Supervising Architect of the City of Oakland, to which said plans and specifications reference is hereby made.

No bid will be received or considered which is not accompanied by a check, certified by a responsible bank, payable to the order of Frank M. Smith, City Clerk, in an amount not less than ten per cent of the aggregate amount of the proposal. Said check will be forfeited and retained by the City if the successful bidder fails or refuses to execute the contract in the required form and furnish bond, or if the forms of proposals, plans, drawings and specifications required by the Charter of the City of Oakland, within twenty days after receiving notice of award.

The Council and upon the execution of the agreement, the contractor shall at the same time execute to the City of Oakland and deliver to the Auditorium Board, a guarantee to the City for the faithful performance of the contract, and in an amount equal to twenty-five per centum (25%) of the amount named in the agreement. He shall likewise execute and deliver at the same time another and separate bond to protect any and all persons performing labor or furnishing materials to be used upon the said work, and in an amount equal to fifty per centum (50%) of the amount named in said agreement.

A bond set forth of the forms of proposal and of the required affidavits.

agreement, bonds, acknowledgments and specifications will be furnished contractors on demand at the office of the Supervising Architect of the City of Oakland, Security Bank Building, corner of 11th and Broadway. The plans and drawings may be had at the said office of the Supervising Architect after July 28th, 1914, within a reasonable time after application, and upon a deposit of Twenty-five Dollars (\$25.00), which deposit will be returned to the applicant when the said plans and drawings are returned to the Architect in good condition; one complete set of plans and drawings required for the work will be furnished each applicant, and as required by Section 122 of the Charter of the City of Oakland provided the applicant pays the cost of reproduction, such additional copies to be returned to the Architect together with the first set.

All information relative to the requirements for bidding, and all directions necessary to explain and make definite any of the provisions of the specifications or drawings will be given by the Supervising Architect upon application at his office.

The right is reserved to the Council in accordance with the provisions of the Charter of the City of Oakland, to reject any or all bids submitted.

Each bid shall bear the affidavit of the bidder, as required by Section 122 of the Charter of the City of Oakland.

FRANK M. SMITH, City Clerk.

## PROPOSALS FOR OIL BURNING PLANT.

M., August 20, 1914, and then and there publicly opened, for a coal-hoisting tower for the naval coal about San Diego, Cal. Plans and specifications may be obtained on application to the bureau, H. R. STANFORD chief of bureau.

Firms dealing news from certain localities like San Francisco, Los Angeles, Portland, Seattle, etc., will find all such items, commencing on this page, all carefully classified as to location. These same items are repeated in the fore part of the news department under distinct headings, such as Banks, Churches, Hotels, etc.

## SAN FRANCISCO.

**BACHELOR OFFICERS' QUARTERS**—2 story and base, brick, \$40,000. San Francisco. Architect, Constructing Quartermaster's Office, Fort Mason, Owners, United States Government. This building will be erected at Fort Winfield Scott and has been designed to contain six sets of quarters, each with bath. There will be a large common dining room and social hall and a completely equipped kitchen and servants' quarters. Interior will be finished in pine and hardwood. Some oak floors will be used. Plans provide for steam heat. Bath rooms will be finished in tile. Roof will be of clay tile or slate. Exterior of the building will be faced with pressed brick. Plans are complete and figures are being taken. Bids will be opened on September 8th. Plans and specifications can be secured from the Constructing Quartermaster's office. An official proposal appears in another column of this issue.

**EXHIBIT CONCESSION**—1 and 2 story, frame and plaster, \$30,000. San Francisco. Architect's name not given. Owners, Fritz Muller & Son, 171 O'Farrell street, S. F. Fritz Muller & Son will build a concession building at the Panama-Pacific Exposition to be known as Alt-Nurnberg at a cost of \$30,000. The building will mean the construction of five buildings of frame and plaster. Work will be started at once.

**FERRY SLIPS NOS. 6 AND 7**—\$51,400. San Francisco. Engineer, Assistant State Engineer, Newman. Ferry Bldg., S. F. Owners, State of California. Bids open by the State Board of Harbor Commissioners for constructing Ferry Slips Nos. 6 and 7 show the San Francisco Bridge Co. low at \$51,400. They will probably be awarded the work. A complete list of these figures appears under the heading of San Francisco in this issue.

**GRADING AND CONCRETE AND PAVING**—Cost not stated. San Francisco. Engineer, none. Owners, City and County of San Francisco. Bids will be opened by the Park Commissioners at the Park Lodge, Golden Gate Park, on August 20th for grading, concrete work and paving as required by the Park Commissioners. Complete information can be secured from the Commissioners at the Lodge, Golden Gate Park.

**APARTMENT HOUSE**—3 story and base, frame, \$14,000. San Francisco. Architects, Rousseau & Rousseau, Monadnock Bldg., S. F. Owners, Rousseau Realty Co. The building will be erected on the north side of California street east of Leavenworth, covering an area of 27½ by 84 feet. There will be six apartments of three rooms each. All suites will have wall beds and private bath rooms. Interior of the apartments will be finished in pine with some elm panels and hardwood floors. Bath rooms will have tile wainscot and composition floors. There will be steam heat and a hot water system. Exterior of the building will be covered with rustic and pressed brick veneer.

Plans are complete and the work will be done by Day Labor.

**APARTMENT HOUSE**—3 story and base, brick and steel, \$75,000. San Francisco. Architect, Leonard T. Ford, 2126 Center street, Berkeley. Owner's name withheld. The building will cover a ground area of 60 by 100 feet and will have a light steel frame with brick exterior walls. Interior has been arranged for a total of sixty suites of two and three rooms. There will be wall beds and private bath rooms. Pine, elm and oak will be used for interior finish. All bath rooms will have tile wainscot and composition floors. Plans provide for steam heat, elevator service, a vacuum cleaning system and hot water supply. Exterior of the building will be faced with pressed brick and terra cotta. Plans are being prepared.

**APARTMENT HOUSE**—2 story and base, frame, \$17,000. San Francisco. Architect, Albert Schroepfer, Foxcroft Bldg., S. F. Owner, L. D. Stoff, 215 Montgomery street. The building will be erected at the southeast corner of Clayton and Grove streets, and will contain eight large apartments with private garages in the basement. Interior of the suites will be finished in pine and elm panels with oak floors in the living rooms and dining rooms. There will be steam heat and a hot water system. Bath rooms will have tile wainscot and composition floors. All apartments will be equipped with wall beds. Exterior of the building will be covered with rustic and a brick veneer. Plans are complete and work will be done by Day Labor.

**APARTMENT HOUSE**—5 or 6 story and base, brick and steel. Cost not stated. San Francisco. Architect, Joseph Cahen, 45 Kearny street, S. F. Owners, Joseph Cahen and A. Tonn. The building will be erected at the northwest corner of Sutter and Jones streets, covering an area of 127½ by 137½ feet. The property has recently been purchased and the new owners have not fully decided to build on the entire area or only a portion. The building will be arranged for suites of two, three and four rooms with private baths and wall beds. Interior finish will be largely of pine with some elm panels and oak floors. Plans provide for steam heat, elevator service, a vacuum cleaning system and wall beds. Exterior will probably be faced with pressed brick and terra cotta. Plans are now being prepared.

**APARTMENT HOUSE**—3 story and base, frame, \$10,000. San Francisco. Architect, Albert Parr, Foxcroft Bldg., S. F. Owner's name withheld. The building will be erected on 26th avenue near Lake and has been designed for apartment flats. Interior finish will be of pine and hardwood. Hardwood floors will be used in the principal rooms. There will be open fire places in the living rooms. Mantels will be of tile. All apartments will have wall beds and private baths. Tile wainscot and composition floors will be used in the bath rooms. Exterior of the building will be covered with rustic and cement plaster on metal lath. Plans are being prepared.

**CITY HALL CARPENTRY AND MILL WORK**—\$125,000. San Francisco. Architects, Bakewell & Brown, 251 Kearny street, S. F. Owners, City and County of San Francisco. Plans and specifications for the carpentry and mill work in connection with the new City Hall have received the approval of the Public Buildings Committee and the Board of Public Works has been instructed to advertise for bids. Figures will be opened on August 26th. Plans and specifications can be secured from the Department of Architecture, Temporary City Hall.

**CITY HALL ELEVATOR WORK**—Cost not stated. San Francisco. Architects, Bakewell & Brown, 251 Kearny street, S. F. Owners, City and County of San Francisco. Plans have been approved by the Public Buildings Committee for the elevator work in the new City Hall and figures will be opened by the Board of Public Works on August 26th. Plans and specifications can be secured from the City Department of Architecture, Temporary City Hall.

**SHOP AND OFFICE**—1 story, frame and corrugated iron, \$12,000. San Francisco. Architect, City Department of Architecture, Temporary City Hall, S. F. Owners, City and County of San Francisco. The Board of Public Works has instructed the City Department of Architecture to prepare plans at once for a combination office and shop building to be erected in the Corporation Yards at 11th and Bryant streets. Interior of the office portion of the building will be finished in pine. Exterior will be covered with shiplap and corrugated iron. Plans are now being prepared.

**FLATS**—2 story and base, frame, \$3,500. San Francisco. Architect, none. Owner, John F. Haner, 3579 19th street, S. F. The building will be erected on the west side of 4th avenue south of Anza, covering an area of 25 by 51 feet, and has been designed to contain two modern flats of five and six rooms. Interiors will be finished in pine throughout. Some hardwood floors will be used. Each living room will have an open fire place with tile or brick mantel. Bath rooms will have tile wainscot. Exterior of the building will be covered with rustic, cement plaster on metal lath and a tapestry brick base. Plans are complete and in the hands of the owner who will do the work by Day Labor. Materials are now being purchased.

**FLATS**—2 story and base, frame, \$5,000. San Francisco. Architect, none. Owner, Oscar Thumberg, 678 9th avenue, S. F. The building will be erected on the west side of 9th avenue near Cabrillo, and has been designed to contain two flats of five and six rooms with basement garage. Interiors will be finished in pine and elm panels. Hardwood floors will be used in the principal rooms. There will be open fire places in each living room. Mantels will be of tile. Tile wainscot will be used in the bath rooms and kitchens. Exterior will be covered with rustic and cement plaster on metal lath. Plans are complete and the work will be done by Day Labor.

**HOSPITAL**—2 story and base, reinforced concrete. Cost not stated. San Francisco. Architects, City Department of Architecture, Temporary City Hall Bldg., S. F. Owners, City and County of San Francisco. Bids were opened for this work at the last

Wednesday meeting of the Board of Public Works and Robert Trost was low at \$18,347. He will probably be awarded the work. A complete list of all figures opened will be found under the heading of San Francisco in this issue.

**RESIDENCE**—2 story and base, frame, \$3,000. San Francisco. Architect, none. Owner, Elmer E. Clark, 2529 Anza street, S. F. The dwelling will be erected on the east side of 25th avenue north of Anza, and has been designed to contain six rooms and bath. Interior will be finished in pine and redwood. Hardwood floors will be used in the living room and dining room. There will be open fire places and tile mantels. Bath room and kitchen will have tile wainscot. An automatic water heater will be installed. Exterior of the dwelling will be covered with rustic and cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor.

**RESIDENCE ALTERATIONS AND ADDITION**—2 story, frame, \$5,000. San Francisco. Architect, none. Owner, Mrs. M. J. Graves, 2820 Scott street, S. F. This work will consist of an addition of three rooms, removing old shingles from the outside of the dwelling and replacing same with cement plaster on metal lath, new interior finish, plastering, electric work, plumbing, painting, a tar and gravel roof and brick and concrete work. Plans are in the hands of the owner and the work will be done by Day Labor.

**RESIDENCE**—2 story and base, frame, \$7,000. San Francisco. Architect, Joseph A. Leonard, 87 Ceritos avenue, S. F. Owners, Urban Realty Co., for H. M. Furman. The dwelling will be erected on the west side of Moncada Way near Cedro, and has been designed to contain eight rooms, two baths and sleeping porch. Interior will be finished in pine and hardwood. Hardwood floors will be used in the living room, library, dining room and reception hall. There will be furnace heat and open fire places. Mantels will be of tile or brick. Bath rooms will be finished in tile. An automatic water heater will be installed. Exterior of the dwelling will be covered with shingles, cement plaster on metal lath and a klinker brick base. Plans are complete and the work will be done by Day Labor.

**RESIDENCE**—2 story and base, frame, \$2,500. San Francisco. Architect, none. Owners, Johnson and Hatland, 1513 Church street, S. F. The dwelling will be erected on Bertita north of Mohawk, and has been designed for a five-room house with bath. Interior will be finished in pine and redwood. Some hardwood floors will be used. There will be a large open fire place and tile mantel. Tile wainscot will be used in the bath room and kitchen. Exterior of the house will be covered with rustic and cement plaster on metal lath. Plans are complete and in the hands of the owners who will do the work by Day Labor. Materials are now being purchased.

**RESIDENCE**—2 story and base, frame, \$5,000. San Francisco. Architect, S. F. Owners, S. A. Born Build-ect, Edward G. Bolles, 660 Market ing Co., 660 Market street, S. F. The dwelling will be erected on lot No. 3 in the Ashbury Terrace District, and

has been designed for a seven-room house with bath and sleeping porch. Interior will be finished in pine, redwood and hardwood. Hardwood floors will be used in the living room, dining room and reception hall. Plans provide for furnace heat and open fire places. Mantels will be of tile or brick. An automatic water heater will be installed. Bath room will have tile floor and wainscot. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and work will be done by Day Labor. Materials are now being purchased.

**APARTMENT HOUSE**—4 story and base, brick and steel, \$45,000. San Francisco. Architects, Rousseau & Rousseau, Monadnock Bldg., S. F. Owners, Metropolis Investment Co., 333 Kearny street, S. F. The building will be erected at the northwest corner of Hyde and Sacramento streets, covering an area of 37½ by 30 feet. There will be a total of nine apartments of two, three and four rooms. All suites will have wall beds and private baths. Plans provide for steam heat and a hot water supply. An automatic elevator will be installed. Exterior of the building will be faced with pressed brick. Plans are complete and the work will be done by Day Labor.

**APARTMENT HOUSE ALTERATION**—Cost not stated. San Francisco. Architect, Oscar Haupt, Phelan Bldg., S. F. Owner's name withheld. The present three story frame dwelling located on Haight street near Fillmore will be altered into a modern apartment house. The work will require plastering, painting, interior finish, plumbing and electric work. Wall beds will be used. Plans are being prepared.

**RESIDENCE**—2 story and base, brick. Cost not stated. San Francisco. Architect, L. E. Peyser, 2207 Union street, S. F. Owner, C. G. Berg. The dwelling will be erected in Buena Vista Terrace, and has been designed to contain eight rooms and bath. Interior will be finished in pine and hardwood veneer. Hardwood floors will be used in the principal rooms. Plans provide for furnace heat and open fire places. Mantels will be of tile. Bath room will have tile floor and wainscot. An automatic water heater will be installed. Exterior of the house will be faced with pressed brick and stone. Plans are complete and figures are being taken.

**RESIDENCES**—2, 2 story and base, frame, \$2,500 each. San Francisco. Architect, none. Owner, W. R. Kenny, 40 Arguello Boulevard, S. F. These two houses will be erected on the west side of 26th avenue south of Balboa, and each will contain five rooms and bath. Interior finish will be of pine throughout. Some hardwood floors will be used. There will be an open fire place in each living room. Mantels will be of tile. Bath rooms and kitchens will have tile wainscot. Exteriors of the houses will be covered with rustic and cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor.

**RESIDENCE**—2 story and base, frame, \$5,000. San Francisco. Architect, Charles J. Rousseau, 36 Kearny street, S. F. Owner, Mathew A. Little. The dwelling will be erected on Green street west of Divisadero, and has been designed to contain eight rooms, two baths and sleeping porch. Inter-

rior will be finished in pine and hardwood. Hardwood floors will be used in the living room, dining room and reception hall. Plans provide for furnace heat and open fire places. Mantels will be of tile or brick. Bath rooms will be finished in tile. An automatic water heater will be installed. Exterior of the dwelling will be covered with rustic and cement plaster on metal lath. Plans are complete and the work will be done by Day Labor. Materials are now being purchased.

**TELEPHONE EXCHANGE ALTERATIONS**—\$3,000. San Francisco. Architect, Cobby, 333 Grant avenue, S. F. Owners, Pacific Telephone and Telegraph Co. This work will include new plumbing fixtures, plastering and painting to be installed at the company's exchange at the corner of 15th and Albion streets. Plans are complete and the work will be done by Day Labor. Materials are now being purchased.

**APARTMENT HOUSE**—4 story and base, Class C construction, \$47,000. San Francisco. Architects, Zanolini & Jewett, 604 Montgomery street, S. F. Owner, Mrs. Mary A. Bradbury. The building will be erected at the northwest corner of Polk and California streets, having a frontage of 112½ feet on Polk and 50 feet 9 inches on California. There will be seven stores on the first floor besides the entrance. Upper floors will be arranged for two and three room apartments with private baths and wall beds. Interior finish will be of pine throughout. Plans provide for steam heat and a hot water service. An automatic elevator will be installed. Bath rooms will have tile wainscot and composition floors. Patent store fronts are specified. Exterior of the building will be faced with pressed brick. Plans are complete and figures are being taken.

**JUVENILE DETENTION HOME**—1 and 2 story, brick, \$50,000. San Francisco. Architect, City Department of Architecture, Temporary City Hall, S. F. Owners, City and County of San Francisco. The City Department of Architecture has been instructed to prepare plans for this work but as yet has not determined upon any of the details. The exact location of the building and further information will be published next week.

**STATE EXHIBIT BUILDING**—2 story, frame and plaster, \$40,000. San Francisco. Architect, H. W. Baerlesen, Service Bldg., S. F. Owners, State of Colorado. Complete new plans for the Colorado. Complete new plans for the erected at the Panama-Pacific International Exposition are being prepared. Originally Colorado contemplated a building to represent Pike's Peak, but this was found to be out of harmony with the other state buildings and plans for a classic structure are now being prepared.

**RESIDENCE**—1½ story and base, frame, \$3,000. San Francisco. Architect, none. Owner, Anna C. Surkamp, 918 Taraval street, S. F. The dwelling will be erected on 13th avenue south of Santiago, and has been designed to contain six rooms and bath. Interior finish will be of pine throughout. Hardwood floors will be used in the principal rooms. There will be open fire places and tile mantels. Bath room and kitchen will have tile wainscot. Exterior of the house will be covered with rustic. Plans are com-

plete and in the hands of the owner who will do the work by Day Labor. Materials are now being purchased.

**TUNNEL, CONSTRUCTION.**—Cost not stated. San Francisco, Engineer, City Engineer, Temporary City Hall, S. F. Owners, City and County of San Francisco. With the permission of the Board of Public Works, Edward Malley has transferred the contract for constructing Mile Rock Tunnel to R. C. Storrie Co.

#### Contracts Awarded.

**CHURCH—1 and 2 story, frame or reinforced concrete, \$15,000.** San Francisco. Architects, Shea & Lofquist, Bankers' Investment Bldg., S. F. Owners, Star of the Sea Church. Contractor, James L. McLaughlin, 244 Kearny street, S. F. Contract price, \$15,000.

**CONCESSION BUILDING—2 story, frame and plaster, \$25,000.** San Francisco. Architect, William Beasley, 127 Montgomery street, S. F. Owner, James W. Young, Contractor, Richard Senate, S. F. Contract price, \$25,000.

## City Bids Opened.

#### Nine Sets of Bids Received For Potrero Emergency Hospital, Robert Trost Low Man.

Nine sets of figures were received by the Board of Public Works at their Wednesday afternoon meeting for the construction of the new Potrero Emergency Hospital. Robert Trost submitted the lowest figure at \$18,347 and will probably be awarded the contract.

Bids were also received at the same meeting for furnishing cast iron pipe for the auxiliary water supply system. The United States Cast Iron Pipe Co. submitted the only bid at \$26 per ton of 2,000 pounds. Following is a complete list of the figures as received:

## OAKLAND AND ALAMEDA COUNTY.

**WHARF**—Timber construction. Cost  
not stated. Oakland, Cal. Engineer,  
James E. Sutton, Oakland. Owners,  
City of Oakland. Plans prepared by  
City Engineer James E. Sutton of Oak-  
land have been approved by the City  
Council. Original plans were found to  
be too light for the purpose to which  
the wharf will be put. Specifications  
are now being written and bids will  
be called for very shortly.

**SEWER CONSTRUCTION** Cost not  
stated. Livermore, Alameda Co., Cal.  
Engineer, City Engineer, Livermore.  
Owners, City of Livermore. Bids have  
been ordered advertised for on the  
construction of 1,161 feet of six-inch  
sewer. Vitrified, salt glazed pipe will  
be used. Plans have been prepared by  
the City Engineer.

**APARTMENT HOUSE**—3 story and  
base, frame, \$25,000. Berkeley, Ala-  
meda Co., Cal. Architect, Clay N. Bur-  
rell, Albany Bldg., Berkeley. Owner's  
name withheld. The building will be  
erected on College avenue near Clare-  
mont, covering an area of 70 by 70  
feet. Interior will be arranged for  
two and three room suites. Pine and  
elm panels will be used for interior  
finish. All suites will have wall beds  
and private baths. Bath rooms will  
have tile wainscot and composition  
floors. Plans provide for steam heat  
and a hot water supply. Exterior of  
the building will be covered with ce-  
ment plaster on metal lath. Plans are  
being prepared.

**APARTMENT HOUSE LIGHTING  
FIXTURES, ORNAMENTAL IRON  
WORK, WALL PAPER AND FUR-  
NISHINGS**—Cost not stated. Oakland,  
Cal. Architect, Clay N. Burrell, Al-  
bany Bldg., Oakland. Owner, C. Lange.  
The building at the corner of Grand  
avenue and Park View Terrace is now  
nearly completed and the architect is  
taking figures for the above mentioned  
work.

**CHURCH**—2 story and base. Class  
C construction, \$40,000. Berkeley, Ala-  
meda Co., Cal. Architect, Eugene K.  
Martin, 2192 Shattuck avenue, Berke-  
ley. Owners, First Baptist Church.  
The building will be erected at the  
corner of Dana and Haste streets, cov-  
ering a large ground area. There will  
be a main auditorium, Sunday school  
rooms, social hall and pastor's study.  
Interior will be finished in pine with  
ornamental plaster in the main audi-  
torium. There will be steam heat. Art  
glass windows will be used. Exterior  
of the building will be faced with  
pressed brick. Plans are complete  
and in the hands of the Building Com-  
mittee who are now taking all figures.

**CHURCH**—2 story and base. Class  
C construction, \$75,000. Oakland, Cal.  
Architect, William A. Newman, David  
Hewes Bldg., S. F. Owners, Oakland  
Christian Science Church. The build-  
ing will be erected on 34th street near  
Telegraph, and will cover a large  
ground area. Construction will be of  
either brick and steel or reinforced  
concrete. Interior will contain a  
large main auditorium, reading rooms  
and lecture halls. Interior finish will  
be of pine and hardwood. Some art  
glass will be used. There will be  
steam heat and a modern system of  
ventilating. Exterior of the building  
will be faced with either pressed brick  
and terra cotta or cement plaster. Pre-  
liminary plans only have been pre-  
pared.

**CREAMERY**—2 story and base, re-  
inforced concrete, \$10,000. Oakland,  
Cal. Architect, none. Owners, Jersey  
Milk, Cream and Butter Co., 37th near  
Grove, Oakland. The building will be  
erected on 37th street near Grove, and  
will contain the offices of the company,  
sales rooms and creamery. Interior  
will be finished in pine with consid-  
erable tile and marble. There will be  
special machinery, furnished by the  
owners. Exterior of the building will  
be faced with cement plaster. A ce-  
ment floor will be used. Plans are  
complete and figures are now being  
taken by the owners.

**RESIDENCE**—2 story and base,  
frame, cost not stated. Berkeley, Ala-  
meda Co., Cal. Architect, Olin S. Grove,  
2911 Telegraph avenue, Berkeley. Own-  
er, Mathew Hunter. The dwelling will  
be erected on North Woolsey street  
east of Dana, and has been designed  
for a seven-room house with bath and  
sleeping porch. Interior will be fin-  
ished in pine and hardwood. Hard-  
wood floors will be used in the living  
room, dining room and reception hall.  
There will be furnace heat and open  
air places. Mantels will be of tile.  
The wainscot and floor will be used  
in the bath room. An automatic water  
heater will be installed. Exterior of  
the house will be covered with cement  
plaster on metal lath. Plans are com-  
plete and figures are being taken.

**RESIDENCE**—2 story and base,  
frame, \$6,000. Oakland, Cal. Archi-  
tect, Warren S. Perry, 2636½ Dwight  
Way, Berkeley. Owner, Leo M. Mott,  
Jr. The dwelling will be erected at  
the corner of 59th and Reinhold Road  
and has been designed for an eight-  
room house with bath and sleeping  
porch. Interior will be finished in  
pine with some elm panels. Hard-  
wood floors will be used in the prin-  
cipal rooms. Plans provide for fur-  
nace heat and open air places. Man-  
tels will be of tile or brick. Bath room  
will be finished in tile. An automatic

ater heater will be installed. Exterior of the house will be covered with cement plaster on metal lath. Plans complete and the work will be done by Day Labor. Figures are now being taken for the plastering, plumbing and electric work.

RESIDENCE—2 story and base, same. Cost not stated. Oakland, Cal. Architect, Charles W. McCall, Central Bank Bldg., Oakland. Owner, Mrs. L. Lehbach. The dwelling will be erected on Fairbanks avenue and has been designed for a seven-room house with bath and sleeping porch. Interior will be finished in pine with some redwood. Hardwood floors will be used in the living room and dining room. There will be furnace heat and open fire places. Mantels will be of tile or brick. Tile wainscot and floor will be used in the bath room. An automatic water heater will be installed. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and figures are now being taken.

RESIDENCE—2 story and base, same, \$5,000. Oakland, Cal. Architect, Olin S. Grove, 2911 Telegraph avenue, Berkeley. Owner, Mrs. L. Olson. The dwelling will be erected in East Edmont Heights and has been designed for a seven-room house with bath and sleeping porch. Interior finish will be of pine and redwood with white enamel. Hardwood floors will be used in the living room, dining room and reception hall. There will be furnace heat and open fire places. Mantels will be of brick. An automatic water heater will be installed. Bath room will be finished in tile. Exterior of the house will be covered with cement plaster on metal lath. Plans have been completely redrawn and new figures are now being taken.

RESIDENCE—2 story and base, same, \$5,000. Berkeley, Alameda Co., Cal. Architect, none. Owner, W. H. Lynes, 2711 Ashby avenue, Berkeley. The dwelling will be erected at the corner of Claremont Boulevard and Alameda avenue. There will be seven rooms, bath and sleeping porch. Interior will be finished in pine and redwood with some elm panels. Hardwood floors will be used in the principal rooms. Plans provide for furnace heat and open fire places. Mantels will be of tile or brick. An automatic water heater will be installed. Bath room will be finished in tile. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and in the hands of the owner, who will do the work by Day Labor. Materials are now being purchased.

RESIDENCES—18, 1 and 2 story and base, frame, \$2,000 to \$3,500. Berkeley, Alameda Co., Cal. Architect, Leonard H. Ford, 2136 Center street, Berkeley. Owner's name withheld. These houses will all be erected on the same tract and will be designed to contain from five to seven rooms. The larger houses will have furnace heat. Interiors will be finished in pine, redwood and hardwood. Hardwood floors will be used in the principal rooms, open fire places and tile or brick mantels will be specified. Automatic water heaters will also be used. Tile wainscot will be used in the bath rooms. Interiors will be covered with rustic,ingles and cement plaster on metal lath. Plans are now being prepared and when complete the work will be

done by Day Labor. Further mention will be made of the work.

RESIDENCE—2 story and base, frame, \$5,000. Berkeley, Alameda Co., Cal. Architect, Eugene K. Martin, 2192 Shattuck avenue, Berkeley. Owner, Mrs. R. Clifford. The dwelling will be erected in South Berkeley and has been designed to contain eight rooms and bath. Interior will be finished in pine and redwood. Hardwood floors will be used in the living room, dining room and reception hall. Plans provide for furnace heat and open fire places. Mantels will be of tile or brick. Bath room will be finished in tile. An automatic water heater will be installed. Exterior of the house will be covered with cement plaster on metal lath. Plans are now being prepared.

THEATRE—1 story and base, brick and steel, \$20,000. Oakland, Cal. Architect, Alvin J. Stern, 1512 Broadway, Oakland. Owner's name withheld. The building will be erected on the east side of Telegraph avenue south of 33rd street. Construction will be practically fireproof. A cement floor will be used. Interior will be finished in pine and ornamental plaster. A modern system of ventilation will be installed. Special electric work is specified. An organ, estimated to cost \$5,000, will be installed. Exterior of the building will be faced with buff pressed brick. Plans are complete and figures are now being taken.

THEATRE—1 story and base, brick, \$12,000. Berkeley, Alameda Co., Cal. Architect, Clay N. Burrell, Albany Bldg., Oakland. Owner's name withheld. The building will be erected on Adeline street and will cover a large ground area. Interior will be finished in pine and ornamental plaster. Modern ventilating and electric work will be installed. Exterior of the building will be faced with pressed brick. Plans are now being prepared.

THEATRE—1 story and base. Class C construction. Cost not stated. Berkeley, Alameda Co., Cal. Architect, W. H. Hatchett, Jr., First National Bank Bldg., Berkeley. Owners, J. A. Elstone and George Clark. This building, which has been mentioned here before, will be erected on Durant avenue east of Telegraph. Plans have been revised and new figures are being taken on the various parts of the work. Interior will be finished in pine and ornamental plaster. Plans provide for a modern system of ventilation and special electric work. There will be one store besides the theatre. Exterior of the building will be faced with pressed brick.

## SAN JOSE AND THE SANTA CLARA VALLEY

**RESIDENCE**—2 story and base, frame, \$25,000. Burlingame, San Mateo Co., Cal. Architect, Lewis P. Hobart, Crocker Bldg., S. E. Owner, Dr. W. C. Chidester, San Mateo. The dwelling will be erected on a large tract recently purchased by Dr. Chidester, and will contain in the neighborhood of fourteen rooms, several baths and sleeping porches. A garage will also be erected on the property. Interior of the house will be finished in pine, hardwoods and white enamel. Hardwood and inlaid floors will be used in the principal rooms. There will be furnace heat and open fire places. Mantels will be of tile and brick. Vacuum cleaning and automatic heaters will be installed. Bath rooms will be finished in tile and equipped with showers. Exterior of the garage and dwelling will be covered with cement plaster on metal lath. Preliminary drawings have been made.

**RESIDENCES**—1 story and base, frame. Cost not stated. San Jose, Santa Clara Co., Cal. Architect, none. The following Day Labor jobs are reported as about to be started in San Jose: Thomas Heller, 152 North 3rd street, five-room cottage, \$1,300, and Mary E. Akers, 221 South 23rd street, four-room cottage, \$1,300. Materials are now being purchased.

**LIBRARY**—1 story and base, reinforced concrete. Cost not stated. Santa Cruz, Santa Cruz Co., Cal. Architect, W. H. Weeks, 75 Post street, S. E. Owners, City of Santa Cruz. The building will be erected in Garfield Park and has been designed in the classic style. Interior will provide reading rooms, office of the librarian and stack rooms. Interior finish will be of pine and hardwood. Metal book stacks will be used. A central heating system, probably warm air, will be installed. Exterior of the building will be faced with cement plaster. Plans are now being prepared.

**BRIDGES**—Steel and reinforced concrete. Cost not stated. Hollister, San Benito Co., Cal. Engineer, County Surveyor, Hollister. Owners, San Benito County. County Surveyor McCray of Hollister presented complete plans and specifications for two bridges to the Board of Supervisors. Plans were ordered accepted. One bridge will be erected in Road District No. 5 and will be known as the Collins bridge. The other will be over the San Benito Creek on the State Highway. Bids will be called for at once.

## MARIN, CONTRA COSTA AND SONOMA COUNTIES.

**BRIDGE**—Concrete and timber. Cost not stated. Bear Creek, Contra Costa Co., Cal. Engineer, County Surveyor, Martinez. Owners, Contra Costa County. Plans and specifications for the new Bear Creek bridge are complete and out for figures. Bids will be opened on September 8th. The bridge will be 45 feet long and 16 feet wide. Plans and specifications can be secured from the County Clerk at Martinez.

**WHARF**—Timber construction. Cost not stated. Suisun, Solano Co., Cal. Engineer, none. Owner, E. D. Le Clara, Suisun. E. D. Le Clara will build

public wharf as soon as the City Trustees can adjust certain rights. If the permit is granted as asked for the wharf will be 160 feet long, otherwise a 100-foot structure will be built. Construction will be of timber.

**STREET WORK**—Paving, curbs and sidewalks, \$100,000. Sausalito, Marin Co., Cal. Engineer, City Engineer, City Engineer, Sausalito, Owners, City of Sausalito. The Town Engineers states that plans and specifications for \$100,000 worth of street paving and improvement will be completed within two weeks. The Town Trustees have completed arrangements for the disposal of bonds amounting to \$100,000 and the work will be advertised at once.

**SEWER WORK**—Cost not stated. Vallejo, Solano Co., Cal. Engineer, City Engineer, Vallejo, Owners, City of Vallejo. Bids will be opened on August 20th by the City Trustees for constructing approximately 1,650 feet of 6-inch vitrified, salt-glazed, iron-stone pipe sewers, two brick man-holes and a number of Y branches. Plans and specifications can be secured from the City Clerk.

**ELECTRIC RAILROAD CONSTRUCTION**—Cost not stated. Benicia to Vallejo, Solano Co., Cal. Engineer, Matthews, Benicia, Owners, Benicia Land and Terminal Co., Mills Bldg., S. F. Chief Engineer Matthews of the Benicia Land and Terminal Co. has started surveying for the new electric line to be run from Benicia to Vallejo. Franchises over the streets in Benicia and Vallejo will be asked for at once. A. D. Bowen, Mills Bldg., S. F., is president of the company.

**SCHOOL**—2 story and base, brick, \$50,000. Pittsburg, Contra Costa Co., Cal. Architect, A. W. Cornelius, Merchants' National Bank Bldg., S. F. Owners, Pittsburg School District. Bids opened for this work show J. O. Kuykendall low on the general construction at \$19,955.50 and the Seibert Co. low on the plumbing at \$1,500. These figures are but a little above the amount available and contracts will probably be awarded. A complete list of the figures presented will be found under the heading of Marin, Contra Costa and Sonoma Counties in this issue.

**HOSPITAL**—1 and 2 story, reinforced concrete, \$25,000. Mare Island Navy Yard, California. Architect, Dept. of Public Works, Mare Island, Owners, United States Government. The building will contain a number of private rooms and several wards. Interior finish will be of pine and hardwood. Some tile will be used. There will be steam heat and modern hospital plumbing. Exterior of the building will be faced with cement plaster. Plans are now being prepared.

**SCHOOL**—1 story and base, frame and plaster, \$12,000. Kentfield, Marin Co., Cal. Architect, Irwin Schaefer Plaza Bldg., Oakland. Owners, Kentfield School District. The building has been designed in the Mission style and will contain four class rooms and an assembly hall. Interior finish will be of pine with some maple floors in the class rooms. A central heating system, probably steam heat, will be installed. Exterior of the building will be covered with cement plaster on metal lath. Plans are complete and figures are being taken. Bids will be opened on August 22nd.

### Contracts Awarded.

### SACRAMENTO, STOCKTON & NORTHERN CALIFORNIA.

**SCHOOL**—1 story and base, brick and reinforced concrete, \$29,000. Roseville, Placer Co., Cal. Architect, W. H. Weeks, 75 Post street, S. F. Owners, Roseville School District. The building has been designed in the Mission style and will contain eight class

rooms and an assembly hall. Interior will be finished in pine with maple floors in the class rooms. There will be a central heating system, probably warm air system, and modern school plumbing. A program clock system will be installed. Exterior of the building will be faced with cement plaster and pressed brick. Plans are complete and figures are being taken. Plans and specifications can be secured from the architect.

**SCHOOL**—2 story and base, brick. **BRIDGES**—Steel and reinforced concrete. Cost not stated. Oroville, Butte Co., Cal. Engineer, County Surveyor, Oroville. Owners, Butte County. The Board of Supervisors approved plans for the the Hooker Oak bridge over the Big Chico Creek and for the Mahie bridge over Honcut Creek at Honcut. The former will be 50 feet long, constructed of reinforced concrete and steel and will cost about \$2,000. The Honcut bridge will be 160 feet long and constructed of steel, costing \$7,000. Bids will be called for at once.

**BRIDGES**—Steel and concrete. Cost not stated. Stockton, San Joaquin Co., Cal. Engineers, County Surveyors of San Joaquin and Contra Costa Counties. The Secretary of War has granted the permit to construct two steel highway bridges over the Old and Middle Rivers between Contra Costa and San Joaquin Counties. The bridges will be of combination type for road and electric cars, and each will be 25 feet wide and 520 feet long, with draw spans of 250 feet. Approaches will be 135 feet long. Bids will be called for as soon as the County Surveyors can complete plans and specifications. Further mention will be made of the work.

**BRIDGE**—Reinforced concrete. Cost not stated. Stockton, San Joaquin Co., Cal. Engineer, City Engineer, Stockton. Owners, City of Stockton. Plans have been completed for a reinforced concrete bridge to be erected over Mormon Channel on Sutter street. Plans have been approved by the City Council and figures are now being taken. Bids will be opened on August 21st. Plans and specifications can be from the County Clerk.

**BRIDGE**—Reinforced concrete. Cost not stated. Esparto, Yolo Co., Cal. Engineer, County Surveyor, Woodland. Owners, Yolo County. The bridge will be erected over Cache Creek north of Esparto, and has been designed for a road bridge. Plans are complete and figures are being taken. Bids will be opened on August 27th. Plans and specifications can be secured from the County Clerk.

**BRIDGE**—Reinforced concrete. Cost not stated. Marysville, Yuba Co., Cal. Engineer, County Engineer, Yuba City. Owners, Yuba County. The time for figuring the construction of the new reinforced concrete and steel bridge which is to be erected over the Yuba River at D street has been extended until September 8th. Two bids were received by the Supervisors but were returned unopened to the bidders.

**HIGHWAY CONSTRUCTION**—Cost not stated. California. Engineer, State Highway Commission, Forum Bldg., Sacramento. Owners, State of California. The State Highway Commission has awarded contracts for highway construction as follows: Embanks & Baehdel, Wilbur, 10 miles in Humboldt County, \$70,000; James H. Palmer, Escalon, 10 miles in Contra Costa County, \$14,113.50; Ran-

some-Crummey Co., Oakland, 1.9 miles in Santa Clara County, \$30,664.50; T. K. Beard, Modesto, 9.3 miles in Santa Barbara County, \$2,168. Bids for constructing the road from Shively to Jordan Creek in Humboldt County were rejected as being above the engineer's estimate and will be readvertised or will be done by Day Labor under the direction of the State Highway Commission.

**ROAD REPAIRS**—\$18,000. Stockton, San Joaquin Co., Cal. Engineer, County Surveyor, Stockton. Owners, San Joaquin County. County Surveyor Quail has been instructed to prepare plans for grading and otherwise improving the Jack Tone Road from the Linder Road, a distance of 5 miles, into the Tokay Colony. The work is estimated at \$18,000.

**ROAD MACHINE**—Cost not stated. Woodland, Yolo Co., Cal. Engineer, County Surveyor, Woodland. Owners, Yolo County. Bids will be opened on August 25th for furnishing one No. 4 road machine for use in Road District No. 4. Complete particulars can be secured from the County Clerk at Woodland.

**SCHOOL**—2 story and base, brick, \$75,000. Stockton, San Joaquin Co., Cal. Architects, Stone & Wright, 24 South California street, Stockton. Owners, City of Stockton. Plans for the building to be erected on the Lower Sacramento Road at North street are practically complete and figures will be called for shortly. Plans provide for twelve class rooms, assembly hall and department for domestic science and manual training. Interior will be finished in pine with maple floors in the class rooms. There will be steam heat and modern school plumbing. Vacuum cleaning and program clocks are also specified. Exterior of the building will be faced with pressed brick. Further mention will be made of the work when plans go out for figures.

**BRIDGE**—Steel and reinforced concrete. Cost not stated. Bidwell Park, Butte Co., Cal. Engineer, County Surveyor, Oroville. Owners, Butte County. Plans for a combination steel and reinforced concrete highway bridge 90 feet in length have been approved and are now out for figures. Plans and specifications can be secured from the County Clerk at Oroville. Bids will be opened on September 10th.

#### Contracts Awarded.

**BRIDGE**—Timber construction, \$1,799. Ukiah, Mendocino Co., Cal. Engineer, County Surveyor, Ukiah. Owners, Mendocino County. Contractors, Roberts & Martin, Ukiah. Contract price, \$1,799.

**BRIDGES**—2, reinforced concrete. Cost not stated. Chico, Butte Co., Cal. Engineer, County Engineer, Oroville. Owners, Butte County. Contractors, Chico Construction Co., Chico. Contract price, \$1,041 and \$2,365.

**LOS ANGELES AND SOUTHERN CALIFORNIA.**

BRIDGE—Reinforced concrete, \$10,000. Anaheim, Orange Co., Cal. Engineer, County Surveyor, Orange. Owners, Orange County. The Board of Supervisors have ordered the publica-

tion of a Notice to Contractors calling on bids for the construction of a \$10,000 reinforced concrete bridge to be erected to connect the towns of Anaheim and Olive. An official proposal will be published in the Orange County Plumber. Bids will also be called for shortly for paving the Anaheim-Olive road.

BRIDGE—Reinforced concrete, \$10,000. Coachella, Imperial Co., Cal. Engineer, County Surveyor, El Centro. Owners, Imperial County. County Surveyor Fulmore has been instructed to revise plans for the proposed bridge across the Santa Ana River at North Main street. An advertisement ordering its construction has been recalled and a new advertisement will be published shortly. Estimates on the new plans show the bridge will cost in the neighborhood of \$10,000. Construction will be of reinforced concrete.

BRIDGE—Reinforced concrete. Cost not stated. Orange, Orange Co., Cal. Engineer, City Engineer, Orange. Owners, City and County of Orange. The City Trustees decided to construct the East Chapman street bridge of reinforced concrete. The bridge will be 165 feet long and will be carried over the creek in three spans. The cost will be divided between the city and county. Work will be started at once.

HOTEL—3 story and base, brick and steel, \$18,000. Los Angeles, Cal. Architect, Frank M. Tyler, Black Bldg., 12 A. Owner, Edward Hallitree. The building will be erected at the corner of 7th and Santa Fe, and will contain stores on the first floor and a number of hotel rooms on the two upper floors. Interior finish will be of pine throughout. Plans provide for steam heat and a hot water system. Store will have patent fronts and marble bases. Bath rooms will be finished in tile with composition floors. Exterior of the building will be faced with pressed brick. Plans are complete and figures are now being taken.

APARTMENT HOUSE—2 story and base, brick. Cost not stated. Venice, Los Angeles Co., Cal. Architect, W. S. Garrett, Currier Bldg., L. A. Owner, J. M. Elliott. The building will be erected on Trolleyway near Horizon, and has been designed to contain stores on the first floor and a number of two and three room suites on the upper floor. Interior will be finished in pine throughout. Plans provide for wall beds and private baths. There will be steam heat. Patent store fronts will be used. Exterior of the building will be faced with pressed brick. Plans are nearly complete and figures will be called for at once.

APARTMENT HOUSE—2 story and base, brick. Cost not stated. Hollywood, Los Angeles Co., Cal. Architects, Architectural Designing Co., Grosse Bldg., L. A. Owner, J. Small. The building has been designed to contain stores on the first floor and apartments of two and three rooms above. Interior will be finished in pine. There will be wall beds and private baths. Bath rooms will be finished in tile with composition floors. Plans provide for steam heat and a hot water system. Exterior will be faced with pressed brick. Plans are being prepared.

APARTMENT HOUSE—3 story and base, brick and steel. Cost not stated. Los Angeles, Cal. Architect, Richard D. King, 1 W. Hellman Bldg., L. A. Owner, L. Fighera. The building will be erected at the southeast corner of

7th and Westmoreland, covering an area of 56 by 131 feet. There will be a total of 75 rooms which will be arranged in suites of three, four and five rooms. Interior will be finished in pine and hardwood with hardwood floors in the larger suites. Plans provide for steam heat, elevator service, a vacuum cleaning plant and hot water supply. All suites will have wall beds and private bath rooms. Bath rooms will be finished in tile. Exterior of the building will be faced with pressed brick. Plans are complete and figures are being taken.

**APARTMENT HOUSE**—3 story and base, brick and steel. Cost not stated. Los Angeles, Cal. Architects, Peter W. Ehlers and A. W. Rieve, California Bldg. owner, R. D. Manning. The building will be erected on Beaudry street, and will cover an area of 46 by 154 feet. Besides the apartments of two and three rooms the building will contain a large lobby and amusement room. Interior will be finished in pine with some hardwood veneer. Plans provide for steam heat and a hot water system. Bath rooms will have tile wainscot and composition floors. All suites will have wall beds and private baths. Exterior of the building will be faced with pressed brick. Plans are complete and figures are being taken.

**LODGE HALL**—2 story and base, brick. Cost not stated. Los Angeles, Cal. Architects, Dennis & Hewitt, Fay Bldg., L. A. Owners, Westlake Lodge, F. and A. M. The building will be erected at the southwest corner of 8th and Burlington streets, covering an area of 50 by 102 feet. There will be stores on the first floor and upper floor will be arranged for lodge rooms, offices and ball room. Interior will be finished in pine with hardwood floors. A hot air heating system will be installed. Exterior of the building will be faced with pressed brick. Plans are complete and figures are being taken.

**RESIDENCE**—1 and 2 story and base, brick. Cost not stated. Los Angeles, Cal. Architects, Morgan, Walls & Morgan, Van Nuys Bldg., L. A. Owner, J. Benton Van Nuys. The dwelling has been designed to contain twenty rooms, a number of baths and sleeping porch. The house will be erected on a large lot in Windsor Square. Interior will be finished in pine and hardwood. Hardwood floors will be used in the principal rooms. Plans provide for steam heat and open fire places. Mantels will be of tile. There will be a hot water system and vacuum cleaning. Bath rooms will be finished in tile and will be equipped with showers. Exterior of the house will be faced with cement plaster. A clay tile roof will be used. Plans are complete and figures are being taken.

**RESIDENCE**—2 story and base, brick and frame. Cost not stated. Los Angeles, Cal. Architect, C. C. Rittenhouse, Washington Bldg., L. A. Owner, A. Jamieson. The dwelling will be erected in Wilshire Heights, and has been designed for a ten room house with baths and sleeping porch. Interior will be finished in pine and hardwood veneer. Hardwood floors will be used in the principal rooms. There will be open fire places and furnace heat. Mantels will be of tile and brick. Bath rooms will have tile floors and wainscot. An automatic water heater will be installed. Exterior of the dwelling will be covered with ruffled brick veneer. Plans are

complete and work will be done by Day Labor.

**SCHOOL SUPPLIES**—Cost not stated. Los Angeles, Cal. Architect, none. Owners, City of Los Angeles. Bids are being taken by the Board of Education for furnishing the School Department with lumber, cement, program clocks and certain machinery for the fiscal year. Complete information of this work can be secured from the Clerk of the Board of Education.

#### Contracts Awarded.

## Weekly Talks on Efficiency and Advertising

by Lloyd C. Comegys

### VARIOUS POINTS ABOUT ADVERTISEMENTS.

#### HEADLINES:

Headlines or catch phrases serve the first purpose of calling attention. This being accomplished they must then serve to start the mind working in the proper direction to create satisfaction with your proposition. If they merely attract and then start the mind working in a direction opposite to which it is necessary to have them travel to get up a proper interest in your offer, they serve you in your first purpose and immediately desert or actively work against you in your further purpose of creating interest in your proposition. Further, if the headline is not followed up in your advertisement in the same train of thought, the mind becomes divided upon two different lines of reasoning and the value of your argument is weakened.

#### KEYING ADS:

This may be done by using a different street number in each of your publications or ads or may be accomplished by designating a department as one, two or three in the different ads.

Initials may be used in different combinations also in mentioning who dictated or signed the letter. Keying ads enables you to check up returns from any particular piece of direct selling advertising. This system is of no value for trade name advertising.

#### THE DIRECT COMMAND:

We have all, from our very childhood up, been so accustomed to being told to do things that the very fact of being told to do so, creates an impetus to do it; therefore, such phrases as "Learn book-keeping," "Learn to draw," "Order now," "Come in and see us," and the like, tend to create the action we desire.

#### RETURN COUPONS:

In all direct result getting advertising, the return coupon, order blank, inquiry blank, or request for catalogue or price list, should be attached to the ad or accompany it as an insert. Everything should be done to make it as easy as possible for the prospect to answer or order.

## Three Additions To Plant Necessary.

San Francisco Metal Stamping and Corrugating Company Has Met Well Deserved Success Here.

A marked development has taken place in the business of the San Francisco Metal Stamping and Corrugating Co., which is owned and managed by T. Lahaye and located at 2269 Folsom street. During the past five years the company's plant and art studio has been enlarged no less than

five times to meet the requirements of their growing business and a new department has recently been added which will give San Francisco the only plant manufacturing leader pipe of all sizes in lengths of ten feet. Mr. Lahaye is contemplating another addition which will shortly be made and in which an art school in hammered copper and bronze will be established.

The art studio of the San Francisco Metal Stamping and Corrugating Co. is the only studio of its kind in the West and its display of hand wrought copper and bronze can not be excelled in this country. Recently there has been a considerable recognition of the value of hand wrought copper and bronze as an artistic decoration which has resulted in the revival of the ancient art of the Egyptians, Greeks and Romans. Excellent work in all branches of this art is now being done by the San Francisco Metal Stamping and Corrugating Company and includes the execution of the largest or smallest genre, vases, urns, plaques, memorial and inscription plates, friezes, bas reliefs, busts and statues. A specialty is made of replacing patina and repairing antiques.

The services of Mr. Hans Jauchen, former instructor of the Art Metal Department of the University of California, as well as other competent artists, have been secured. A cordial invitation is extended to connoisseurs, architects and all those interested in the art of hand wrought copper and bronze, to visit the Art Studio of the San Francisco Metal Stamping and Corrugating Company and see the work in progress.

## Local Turntable Concern Opens Northern Office.

The Dellamore turntable Company of California with sales offices at 6 Staats Building, Pasadena, has recently completed the installation of their table in some of the new Southern California garages where the most modern equipment in every particular was demanded. The Dellamore product was selected in each of these cases because it is unique and different from other turntables in that it is propelled entirely by the automobile without recourse to hand power and is, according to its manufacturers, the only really automatic automobile turntable that has been perfected. The Dellamore table revolves by the action of the rear wheels, running with the engine reversed, upon a pair of metal rollers set in the floor of the table. The car is driven upon the table until the rear wheel engages the rollers. Then the engine is reversed and the table revolves silently and with ease and without the driver having to leave his car.

The value of a turntable in any modern garage of any pretensions whatever is apparent to everyone and it is becoming an adjunct of every up-to-date garage. By means of the installation of a turntable accidents are prevented, space is conserved, there is a saving in convenience and time and it lends itself to the beautifying and ornamentation of the grounds. With the

Dellamore all these desirable features are secured with a very important additional one that the table needs no attention and requires no manual effort in operation. It is merely a case of "letting the machine do the work."

The Dellamore Turntable Company, the manufacturers of the Dellamore Automatic Turntable, are opening an office in San Francisco and are negotiating for agencies throughout the Eastern states.

### LARGE FACTS ABOUT A LARGE CITY.

What are the names of the three largest cities in the Western Hemisphere? About 100 out of every well-posted citizens of the United States would promptly answer—New York, Chicago and Philadelphia. And, according to a communication just received by the Pan American Union they would guess wrong. This message states that the corrected returns of this recently taken census show that the population of Buenos Aires has grown to 1,700,000, thus passing Philadelphia and crowding her out of the third place.

The growth of the Argentine capital has been phenomenal. In 20 years it has almost trebled its population and become the largest city in the world south of the equator, the largest Spanish speaking city in the world, the second largest Latin city—Paris alone outranks it—and the third largest city in the Western World. Immigration is, of course, largely responsible for this rapid increase, but the city's birth rate, 34.1 per thousand has cut considerable figure.

Some very interesting questions, the answers to which are not very generally known, might be asked in this connection. For instance—Where is the finest Jockey Club in the world? Where the most expensive theatre in the Americas? Where the most remarkable newspaper building in the world? Where the most elaborately housed municipal water-work station? Where the most architecturally artistic business street? And the answer to each is Buenos Aires.

A few other noteworthy facts relative to the Argentine metropolis are the following: Not only is it the greatest South American sea port, but in point of entrances and clearances of vessels engaged in foreign trade it is ahead of even New York, while in tonnage and value of foreign commerce it ranks next to New York in all the Americas. It is the greatest wool-exporting port in the world, late returns showing that it has crowded Sydney, Australia, out of first place. In exports of frozen and chilled beef Argentina leads the world; next to Russia it exports more wheat than any country in the world; in the production and export of linseed it leads the world, while in the export of corn it more than trebles the United States, and, of course leads the world.

Relative to the newspaper building mentioned above, in a descriptive article in a recent issue of the *Monthly Bulletin* of the Pan American Union, Edward Ables writes:

"The building is on the Avenida de Mayo, not far from the Plaza, and is said to have cost over \$3,000,000. In addition to the newspaper plant the owners of La Prensa (The Press) maintain at their own expense a free me-

dical dispensary, an able physician and assistants who prescribe for and attend charity patients; a law office where the poor may go for free legal advice; a free library; and a free employment agency. A large concert hall, beautifully decorated with paintings and frescoes, is maintained for its staff of employees, who also have a gymnasium and a private restaurant. Finally a suit of rooms is maintained, consisting of a banquet hall, smoking room, ladies' boudoir, reception room, and sumptuously furnished bedrooms, for the accommodation of distinguished visitors from foreign countries as guests of the nation in general and of La Prensa in particular. Those apartments are not inferior in their furnishings and artistic decorations to many of the renowned palaces of European royalty. Incidentally the paper claims to have the most extensive foreign news service of any paper in the world."

"The Avenida de Mayo is unquestionably one of the greatest thoroughfares in the world. It is about 120 feet wide and nearly a mile and a half long, extending from the Plaza de Mayo at the lower end to the new plaza in front of the Capital at the upper. Along the middle, suspended from ornamental iron posts, is a double row of arc lights, and on each side near the curb of the 20-foot sidewalks, is a row of fine trees extending the entire length of the street. The main feature which strikes the stranger, however, is the uniformity in height, and the fine architecture of the buildings. The municipal government offers an annual prize for the most artistic building erected on the several business streets, and supplements this prize by exempting the building from taxation for a certain number of years. Again, under the building regulations each new structure must harmonize in architecture, height, and material, with its neighbors. Thus no one and two story cheap buildings are found to mar the general effects on the Avenida."

## Up and Down the Coast.

LOYALTON, Sierra Co., Cal.—The entire stock of the California White Pine Lumber Company, a short distance south of this place, comprising between 10,000,000 and 12,000,000 feet of lumber, was destroyed by fire with an estimate loss of \$25,000.

MARYSVILLE, Yuba Co., Cal.—Because the Yuba County Supervisors overlooked the Legislature of 1913 regarding the law governing the number of days which an advertisement calling for bids on county work must be run, work on the proposed D street bridge will be delayed one month. The error was called to the attention of the Supervisors after they had met to award the contract.

OKADALE, Stanislaus Co., Cal.—Work has started on the first part of the highway to be used in the construction of the municipal water system for San Francisco, the Utah Construction Company putting 75 men at work at Hetch Hetchy. Two twelve-horse mule teams left Okadale Sunday with equipment.

The surfaced highway to be built will be twelve miles in length and the contract calls for its completion by November 1.

The contractors, who are to get something over \$150,000 for the twelve-mile stretch of road, expect to have 300 men at work within a few days, and the job will be pushed as rapidly as possible.

MODESTO, Stanislaus Co., Cal.—Mahoney Bros., of San Francisco, who have recently made large investments in Stanislaus real estate, are now contemplating the construction of a railway. It has been reported recently that the Mahoneys are planning the construction of a railway from Turlock to the San Joaquin river, opening up their property—the Glendora tract and the old Sperry Ranch—and the Turlock Garden Land Company's tract. They are negotiating for the Tidewater line on which rails have been laid for six miles west of Turlock and it is thought that active construction will start at an early date. Besides the tracts named the Mahoney Bros. have made other investments in Stanislaus.

OROVILLE, Butte Co., Cal.—Plans for the bridge to span Big Chico Creek, near Hooker Oak, have been accepted by the County Board of Supervisors. The bridge will be about 50 feet long and will be of steel and concrete construction costing about \$2,000. The Mahle bridge plans over Honcut creek at Honcut were also accepted. This structure will be approximately 160 feet long and will cost in the neighborhood of \$7,000.

CHICO, Butte Co., Cal.—The Chico Construction Co. has been awarded the contract for the construction of a reinforced concrete bridge to be erected across Big Chico Creek at the foot of the Esplanade. The contract price is \$1,941. The same company was given the contract to construct a steel bridge at Angel's slough near the Parrott grant. This bridge will cost in the neighborhood of \$3,965. Work will begin in two weeks. Both structures will be provided with ornamental railings and electrolifers.

BENICIA, Solano Co., Cal.—Engineers for the Benicia Land and Terminal Company have started the surveying necessary before the company can make application for franchises for the proposed electric railroad between Benicia and Vallejo. The outfit is now in charge of Chief Engineer Matthews, and the work will be rushed along and completed at an early date. The franchisees over streets in Benicia and Vallejo will probably be asked for in the near future, but the county franchise matter must wait upon the surveys. President A. D. Bowen and William Stanford of San Francisco have recently visited Benicia to look over the work.

EXETER, Tulare Co., Cal.—Two miles are to be added to the Visalia Electric Railway. The new extension will be built from Rose Station to Elderwood.

SAUSALITO, Marin Co., Cal.—The Sausalito Incline Railway Company has received its certificate of incorporation from the Secretary of State, and have filed an application with the Railroad Commission for permission to issue stock and to construct the road up Excelsior Lane. It is thought that actual construction will start at an early date.

VALLEJO, Solano Co., Cal.—A resolution has been passed by the City Commissioners to provide for the construction of a six-inch sewer in the

alley of block 343, fifty feet west of the western line of Butte street. The sewer is to extend to the proposed manhole at the center line of Trinity street. The city will soon call for bids on the work.

SUISUN, Solano Co., Cal.—Providing certain legal rights can be adjusted, E. D. Le Clare will soon commence building a public wharf 160 feet long. If the city is unable to grant certain privileges he will construct a 100 foot wharf. A crew of men are now at work on the enterprise.

RICHMOND, Contra Costa Co., Cal.—Bonds will be voted here on September 22nd, for the purpose of raising funds for which to establish a dependable water system.

DAVIS, Yolo Co., Cal.—The Board of Supervisors here have purchased a lot on the corner of Third and Court streets on which will be erected a new county jail building.

MARYSVILLE, Yuba Co., Cal.—New bids will be called for by the Board of Supervisors for the construction of the proposed D street bridge. All bids formerly submitted were rejected. Some mistake in the printing of the proposal made it necessary to reject all bids submitted.

MONTAGUE, Siskiyou Co., Cal.—J. E. Wells of the Engineering Department of the Standard Oil Company, and E. J. Fowler, contractor in charge of the building, are in this city staking off the ground for the buildings of the Oil Company's plant in Montague. Work will be commenced on the foundations for the oil tanks as soon as the city water system can supply water for the mixing of the cement, which will require a week or ten days.

SAUSALITO, Marin Co., Cal.—It is rumored here that W. R. Hearst will soon start the construction of a large residence on his property, the building to be completed before the opening of the exposition. While it is not definitely stated, it is understood that plans have been prepared for the building and virtually accepted. Mr. and Mrs. Hearst and a party of friends spent last Saturday looking over the site and spoke of improvements.

MARYSVILLE, Yuba Co., Cal.—The Supervisors of Yuba County have authorized County Surveyor L. R. Cook of this county and Martin Polk of Butte County, to prepare plans and specifications for the new Mahle bridge to be constructed across Honcut Creek on the boundary line between Butte and Yuba counties.

WINTHROP, Shasta Co., Cal.—The people of this vicinity are signing a petition asking the Supervisors to bridge the McCloud river near its mouth and build a road from Winthrop through Copper City over the proposed bridge to connect with the State Highway in the vicinity of Baird.

FRUITVALE, Alameda Co., Cal.—Plans for the paving of a portion of Ninetieth Avenue, for sewerage Made-line avenue westerly from Maple avenue, for sewerage east from Twenty-sixth avenue westerly, have been passed by the City Council.

CALEXICO, Imperial Co., Cal.—Building permits issued in this city for the month of July shows a gain of 913 per cent over the corresponding period of the year previous. The amount invested in this city for building construction shows \$32,875. The largest permit granted was for the construction of a \$25,000 hotel building.

## Editorial Comment.

The Chicago American is sending out a circular letter asking everybody to co-operate in a peace plan to stop the wars of the world. This is the great omnipotent and omniscient William Randolph Hearst that yesterday published the fake Carranza letter at the mediation at Niagara Falls and left no stone unturned to plunge this country into war with Mexico. It is the same Hearst that twisted every fact to vilify the President of the United States, and now has the unprincipled audacity to jump in and try to carry off and claim the results of the great principles of peace for which Bryan and Wilson have fought.

Scientists long ago had a theory to account for the constitution of matter in which the ultimate division was supposed to be the atom. No what division is even smaller and the ultimate element of energy is the electron. If the human mind is ever capable of conceiving or naming anything smaller it may then be able to name something with which to compare the soul of Hearst.

The history of diplomacy of Europe is that of intrigue without regard to right or justice in the main event. It is no more civilized in its moral right than that of the sixteenth century. The history of Europe seems to go round and round in the same beaten circle.

Just forty-eight years ago Prussia humbled Austria in the crushing defeat at Sadowa. Today the shadow of Sadowa has fallen across Europe. For it was that defeat which impelled Austria to seek its future in Slavic South-eastern Europe instead of the Teutonic West.

Until the cementing of the German empire by the Franco-Prussian War Austria had cherished the hope of winning back its place of leadership in the German federation. After 1870 it turned to the Slavic countries of the southeast. The occupation of the Slavic provinces of Bosnia and Herzegovina, inhabited by Serbs, was part of this policy. The two provinces were taken from Turkey after the Russo-Turkey war and turned over to the dual monarchy by the treaty of Berlin.

The kingdom of Serbia itself became an Austrian satrapy. When Bulgaria defeated it in 1885 it was Austria which forbade the following up of the victory. On the death of King Milan in 1901 the new king, Alexander, adopted an anti-Austrian policy, and the Austrian papers regarded his assassination with marked resignation. But the Serbian political leaders turned more and more from Austria. In 1905 Serbia and Bulgaria formed a tariff agreement which was exceedingly distasteful to Austria, and the empire excluded Serbian cattle and agricultural

products. This attempt to strangle Serbia, which had been reaching European markets through Austrian territory, was unsuccessful, however, for Serbia succeeded in opening new trade routes through Turkey.

The same year the southern Slavs of the Austrian empire, who had been separated by religious differences, held a conference for reconciliation, which was bitterly resented by the Austrian authorities. They charged a conspiracy promoted from outside the empire, and arrested fifty-seven participants in the congress on the charge of treason.

The accusation of a Pan-Serbian plot was used in 1908 by Austria as an excuse for the annexation of Bosnia and Herzegovina, which had long been regarded by Serbia as destined to union with that power on grounds of race and language. The "Pan-Serb conspiracy" has long been a favorite device of Austrian politics. It was brought out once more last month to justify the Austrian attack on Serbia. But it has always been denied by Austrian Serbs. In 1909 the Serbian members of the provincial diet of Croatia brought charges of libel against an Austrian writer who had accused them of treasonable relations with Serbia. They proved that his case rested on forged documents which had been supplied him by the Austro-Hungarian foreign office. These documents, it was ascertained, had been prepared by a member of the Austro-Hungarian legation in Belgrade.

Thus ill feeling accumulated between Austria and its little neighbor across the Danube. When the Balkan War broke out Austrian sympathy was with Turkey, in the expectation that a Serbian defeat would leave the country under Austrian domination. Austria is credited with having incited Bulgaria in the war with Serbia that followed the campaign against Turkey. It was Austria, again, that took the lead in creating the kingdom of Albania and shutting Serbia off from the southeast at the conclusion of the second Balkan War.

The Austrian attack on Serbia is sufficiently accounted for by the impulse to expand toward the southeast, augmented by the hatreds that have piled up in forty years of diplomatic sparing.

### TIME-LEARNING — SAME REHE.

The life of an editor was saved the other day by a couple of dollars in his pocket which he had just received on subscription. A crank shot at him and the bullet struck the money and only perforated the editor's leg, which was not nearly so fatal as if it had punctured his skull. Our subscribers should take warning at this incident and save themselves from any possibility of having failed to save the life of the News editor should anything similar happen.—Inglewood News.

## THE TIME TO BUILD.

By A. C. Claussen

In Pacific Builder and Engineer

The time of year in which the contracts for the building of a house are let has considerable to do with the prices received. For example, a contract can be let for about 10 per cent cheaper at the present time of the year, the house to be built during the winter, than the prices one would get during the rush of the building season next spring. If only the foundation is put in now and the contract is let early in the year, enabling the contractors to get an earlier start than would be possible if the foundation was put in then, there would be a saving of from 6 to 8 per cent. It is the purpose of this article, however, to call the prospective home builder's attention to various economies in the construction of a home and the letting of the contract that would apply at any time of the year.

A great many people think that they can save money through being their own contractor. They figure that they will save the contractor's profit of from 8 to 10 per cent by buying their own materials, hiring their own labor and superintending the construction of the house themselves. In this they make a fatal error. Few contractors figure much for the profit on labor, since this is really an unknown quantity, on which they can merely make estimates in a general way based upon their previous experience. Since the wages paid out for labor amounts to almost half the cost of the house, it is very important that this item should be handled in a systematic manner. A contractor through his experience knows just how many men he can work to an advantage on a house of a certain size; how many common laborers he would need to supply his brick masons with mortar and brick, just what quantities and at what time certain materials are needed at the job, and knows how much work each man should turn out in a day, enabling him to keep track of their work and discharge any slow or incompetent workman.

When a man attempts to take a contractor's place, lacking all the technical knowledge and experience of the latter, his labor bill will usually amount to 25 or 30 per cent more through his not being able to carry on the work in a systematic manner. The writer has observed houses where a whole crew of men had to be laid off temporarily during the busy season of the year because the owner did not order certain material far enough ahead of time to get it when needed. Men do not stay idle during the busy season in the building time, and a crew laid off in this manner will immediately look for other positions, thereby leaving their former employer handicapped for the lack of labor when the work starts again. The owner is often unable to get enough men together again to carry on the work properly. Those whom he does hire under these circumstances know nothing about the work that has been done and have to study into the matter all over again,

unless a competent foreman has been engaged with a salary above the union scale, whose salary would go on whether the work was going on or not. I have also noticed bricklayers mixing their own mortar and carrying their own bricks when the home-builder should have had common labor to do this work for him instead of paying a man \$1.50 to do work that could be done just as well by cheap labor. Also, the workmen on a house built for the owner himself know that they will probably never have occasion to work for this man again; they know he is incapable of judging the amount of work that should be done in a day and is not apt to discover minor imperfections in the work. These facts have a demoralizing effect over the workmen which means poorer work done in more time than when they are under the guidance of a man whom they hope to work for throughout the year.

When it comes to the buying of materials, while a man may be able to get some one or two things at low cost through having some friend or relative in the business, taken as a whole the material throughout the house will cost the home-builder more than they would cost a contractor. For example, a contractor of any importance will buy his cement, flooring, siding, shingles, dimension lumber and other much used materials by the carload, thereby receiving special quotations on the prices of materials ordered. The materials that he does not use on one house he can use on the next one, for he is in business for a lifetime. The final conclusion is that it is cheaper to let the contract for the entire house, except the heating and plumbing, which should be let separate, to one general contractor, after having obtained his price through competition with other contractors. He is "the man who knows." He has paid for his knowledge in the school of experience and with a properly prepared set of plans is able to carry on the work in a systematic manner. There is no line of business in which this is more true than in the building business, where so many different materials and so many different men are brought together under one man's leadership, to accomplish the building of a home. "Put all your eggs in one basket, but watch that basket."

There are other economies to be considered when the home is being planned before the matter of letting it to the contractor is considered. If the house is of frame construction or brick veneer the height of the stories should be made so that full length studding of 16, 18 or 20 feet can be used without cutting, and in laying out the floor plans care should be taken that the joists all run in one direction bearing upon one or two partitions, according to the size of the house, that extend through the center from the basement to the attic. Wherever practical the partitions on the second floor should be placed directly over those on the first floor, making the studding

two stories high, thereby reducing the settlement of the house through the shrinkage of the floor joist and making it easier and cheaper to construct. Where practical the rooms should be made an odd number of feet plus two inches in the direction that the joists run. For example, a room 13 feet 2 inches wide can be spanned by 14-foot floor joist. If the room were made 13 feet 6 inches wide, 16-foot floor joist would have to be used, with nearly a foot and a half at the end of each joist going to waste, for floor joist can only be obtained an even number of feet in length, except where such length as 7 and 9 feet are required, which can be obtained by cutting joist 14 feet, 18 feet, etc., in two. As few angles should be made in the outside walls as possible, for turning corners costs money, especially in the roof. While stone always looks better than cement, a saving can be made in the sills, lintels, water table, etc., in a house of masonry construction by having them made of cement cast in forms and reinforced with rods. If this is done properly the difference can hardly be detected between the cement product and Bedford sandstone, and the former is very durable when properly made.

Good effects can be had for interior finish on inexpensive woods if a careful painter is obtained. Take, for example, clear birch, stained and grained to imitate dark mahogany, and straight grained Washington fir to imitate mission oak. They can hardly be distinguished from the genuine wood. It is poor economy, and in fact not economy in the long run, to try and economize by using little cement and more sand in the foundation, inferior grades of paint on the outside, cheap varnish on the inside finish, pine floor instead of hardwood, the cheapest heating plant in the market instead of a good hot air or hot water system, the cheapest grade of plumbing, etc. While a great many minor matters might be mentioned wherein a home-builder could economize while having his plans and specifications prepared, the advice given in this entire article might be summed up in one sentence: Engage the services of a competent architect. He makes a special study of these matters, since his reputation depends entirely upon the manner in which he serves his clients' interests. It is his business to compare the size of a home with the amount a man desires to invest and apply strict economy wherever practicable. An architect cannot, however, entirely control the cost of a house. When a home-builder wants a house of a certain style, with certain things on the inside and outside, he should expect to pay for those things and not expect his home to cost no more than a house one-third smaller and not finished as elaborate in detail as he would have his own. System is the word. When constructing a home or building it should be applied from the first to the last.

Pacific Builder and Engineer.

# NOTABLE PHASES OF ENGLISH VITAL STATISTICS FOR 1911.

The vital statistics for 1911, even if issued very belatedly, should be of great interest to those concerned in life assurance. The Registrar-General's report is, of course, very voluminous, and is worthy of study at leisure. One remarkable point of note is the number of deaths due to what is no regarded as largely a preventable disease—phthisis. During 1911 it removed 39,232 persons, while cancer was responsible for the deaths of 35,992, a total of 75,134. It is somewhat startling to find that the death-rate in London from phthisis is, as nearly as possible, twice that of the rural areas, and that the rate in the smaller towns is practically the same as in the rural districts. We find, too, that a study of infant mortality in relation to parents' occupations and social position discloses some significant features. For instance, the middle-class mortality was only 61 per cent. of the total legitimate infant mortality of the country. "This at once suggests"—says the report—"that at least 40 per cent of the present infant mortality could be avoided if the health conditions of infant life in general could be approximated to those met with in this class. Rates of under 50 are not very uncommon amongst the professional classes—that for army officers is 41, for naval officers and for solicitors 41, for medical practitioners 39, and for artists 27. Figures like these show how little of our present infant mortality is essentially inevitable. There seems no reason to consider the limit of improvement reached till infant mortality in general is reduced to the level where that of the professional classes now stands, or, say, to one-third of its present amount."—The Review (London).

# AUSTRALIAN GOVERNMENT CONSIDERING UNEMPLOYMENT INSURANCE.

The problem of unemployment insurance is engaging the attention of the Australian Government. It would appear that there is contention whether the system to be adopted shall be contributory or non-contributory. As the Australasian remarks, a contributory system is fair, and removes the stigma of charity which attaches to the acceptance of a free gift from the Government. "Unfortunately, individual members of the Labor party hold the strange view" (it adds) "that a system ceases to be charitable if the grant is payable to all people, whether they need it or not, and that there should be no contribution by the recipients towards the fund from which they are to be paid. In other words, it is considered that in order to give benefits to the poorer classes of society the well-to-do class solely should be taxed. The scheme which the Cook Ministry has in view will, none the less, require to be carefully safeguarded. In the case of insurance against unemployment 'malingerers'—pretending, that is, that it is impossible to obtain work, or apathy in the pursuit of employment—would be extremely easy. At the beginning of this winter scores of unemployed had work offered to them, but they refused it—most of them because they did not care

to leave the city. The official figures on the subject were astounding. There would not be nearly so many persons out of work today had it not been for the action of the unions, especially in the building trade, in forcing up wages unduly during the busy summer months. Such action has made it unprofitable to employ, during the winter, any but the very best workmen." This all helps to show how universal is the problem of the malingeringer, and that his extermination should be one of the very prime aims of reformers of today. It is most refreshing to find that in Australia the problem is being probed before a definite scheme has been decided upon. In older and more effete countries the malingeringer is not thought of till afterwards.—The Review (London).

# British Workmen's Compensation Experience in 1912.

There has recently been issued from the Home Office an important Blue Book treating of "Workmen's Compensation," giving statistics of compensation and proceedings under the Acts during the year 1912. The returns are divided into two parts. The first deals with statistics as to compensation paid during the year under the Workmen's Compensation Act, in seven industries, viz.: mines, quarries, railways, factories, harbors, docks, etc., constructional work and shipping; while the second part presents general statistics in regard to the administration of the Workmen's Compensation Act, and the Employers' Liability Act. In regard to the seven industries included in the first division as above, returns were received from 136,279 employers of whom 111,066 were included in the collective returns supplied by employers' associations, mutual indemnity societies, and insurance companies, on behalf of the employers belonging to or insured by them. In the seven industries, above mentioned, during the year 1912, compensation was paid under the Act in respect of 2,399 cases of death, and 424,106 cases of disablement, while the gross total of compensation amounted to £3,174,101, as compared with a gross total of £2,274,238 in 1909. The annual charge for compensation, taking the seven groups of industries together, averaged 8s. 7d. per person employed. It was lowest in the case of persons employed in factories, being only 5s. per person; in the case of railways it was 8s. 2d.; it rose to 11s. 2d. in quarries, to 15s. 9d. in shipping, and to 11s. 7d. in constructional work; it was highest in docks, 21s. 4d., and in mines, 21s. 10d. It is noteworthy that in the coal mining industry the charge arising under the Act works out to about 1,65d. only per ton of coal raised. When to the total amount of compensation during the year (£3,174,101) is added the cost of management, commission, legal and medical expenses, etc., it is estimated that the total charge borne by the seven industries probably amounts to nearly £5,000,000. The figures given in the returns, however, represent only the actual amount paid to workmen or their dependants under the Act. To find the total charge on the seven industries in respect to accident compensation it would be necessary to include (1) the expenditure incurred for law costs, administration expenses, etc., (2) compensation paid otherwise than under the Act, i. e., under the earlier Compensation Act (a number of

cases arising under which are still outstanding), under contracting out schemes certified under the Act, under the Employers' Liability Act, or at common law. Information as to the total amounts expended under these heads is not available. Out of the gross total of £3,174,101 paid in 1912, £1,659,900, or 53 per cent., was paid by the insurance companies. Their returns to the Board of Trade for 1912 are not yet available, but the returns for 1911 show that while the payments for claims, including legal and medical expenses, amounted to £1,997,418, the payments for commission and expenses of management amounted to £1,032,529; the total amount of premiums paid in the year was £3,995,670. That is, of the total expenditure of insurance companies in connection with accident compensation, 31 per cent. was for commission and expenses of management, and 66 per cent. was for compensation and for legal and medical expenses. In the case of the indemnity societies, who paid £1,206,519 of the gross total for the year, and in the case of uninsured employers, particulars are not available as to the expenses in connection with the payment of compensation, but even if a much lower rate of management and other expenses is allowed in the case of indemnity societies than in the case of insurance companies, it would seem that the charge for management and other expenses in connection with compensation paid in the seven great industries considerably exceeded £1,000,000, and in addition there are the legal and medical expenses which the returns of the companies to the Board of Trade include in the compensation figure. The total charge cannot have fallen very far short of £5,000,000, obviously, the yearly total of compensation under the Act, as shown in the returns relating to the seven specified industries, is steadily on the increase, especially in cases of disablement. While the fatal cases have increased only 3.6 per cent., and the amount of compensation in such cases 5.7 per cent., the number of disablement cases has increased 30 per cent., and the amount of compensation for such cases has increased 68 per cent. The increase has been steady throughout the five years. The material for a full investigation of the causes of the increase is not available. So far as regards the increase in the number of cases, in part it is no doubt due to the fact that the remedies provided by the Act have become better known and more fully used. This would be a longer process in the non-fatal than in the fatal cases. Workmen now stay away—legitimately—for injuries when previously they would have kept on with their work as best they could. As, however, all the seven industries (with the exception of shipping) were also included in the Act of 1897, this cause must have produced much of its effect before the Act of 1906 was in full operation. To a large degree, the increase must be due to expansion of trade. The number of persons employed in the seven industries (according to the returns) rose from 6,569,715 in 1909 (the 1908 returns are not trustworthy) to 7,111,005 in 1912, an increase of 13 per cent. The effect of expansion, moreover, on the accident rate cannot be measured merely by the increase in the number employed. Busy trade results in longer hours being

worked, e. g., in those trades where slackness of trade is met not by discharging workpeople but by working shorter time, work is speeded up, etc. How far these causes account for the increase or how far the increase is due to improper claims or to malingering cannot be gauged. In Part 2 of the returns we have much interesting statistical information as to the administration of the Workmen's Compensation Act. These statistics show that only a very small proportion of the claims under the Act become the subject of litigation. The total number of cases under the Workmen's Compensation Act which were taken into court in 1912 was 10,372, but the total number of original claims for compensation finally settled within the cognizance of the courts was only 5,858. Of the 5,858 claims for compensation settled judicially under the Act in the United Kingdom, the decision was in favor of the applicant, that is, the workman, in 4,455, or 76 per cent. The total number of cases under the Employers' Liability Act, 1880, taken into court in the whole of the United Kingdom, was 604 in 1907, 406 in 1908, 298 in 1909, 217 in 1910, 223 in 1911, and 197 in 1912. These figures show clearly the tendency of the remedy provided by the older Act to fall into disuse since the Act of 1906 came into full operation.—The Insurance Journal (London).

#### CONCERNING SPECIFICATIONS.

That there is a lawsuit in every building contract (at the pleasure of the parties concerned) is an accepted axiom. Hence, the contract is a document that is usually drawn up with considerable care and legal minds are not infrequently requisitioned in its preparation. When it comes to specification, however, laxity is more honored in the observance than in the breach. The clauses are strung together one below the other, with but little regard to what has gone before or what is to follow. Repetition and tautology become wearisome, while an infinity of unnecessary detail prolongs the length of the document beyond the bounds of necessity. The fact is only too often overlooked that the specification is as much a legal document as the contract; indeed it forms, with the plans—and for the matter of that with the correspondence that ensues—a part of the contract, and the two must stand or fall together. Specification writing must be regarded as an important branch of the work of the engineer and the architect, and it is difficult to understand how the lamely worded, halting, ungrammatical documents that one only too often sees can come from the pens of men whose calling presupposes the receipt of a fairly advanced education.

Clearness, brevity and consistency are the three things to aim at in writing a specification. Lengthy sentences of necessity become involved, and the snappiness of modern journalism may be followed with advantage. Reiteration of descriptions of similar work and materials does not, as is commonly thought, add strength to the document; and, too, there is ever the danger of dissimilar clauses on similar matters creeping in, to the confusion of all parties concerned. Tautology is to be avoided if possible, but true literary excellence is not to be attained and

an expressive word or phrase had better be used over and over again if to ring the changes on it would mean any danger of confusion of ideas. A general clause to the effect that everything shall be done in the best and most workmanlike manner will save an infinity of that needless description of working processes which, to use the words of an authority on the subject, is often carried "to the verge of absurdity." Words such as "proper" and "sufficient" have practically no meaning at all, and the writer should avoid them by stating clearly and concisely what is proper and sufficient. Small detail sketches may be introduced in the margin with advantage, not necessarily as saving description but as helping to elucidate it. But even these may be overdone and "carried to the verge of absurdity" unless the writer places due restraint upon himself. "The description in specifications of workmanship and material of the highest class in positions which any practical builder knows to be unreasonable and unlikely to be insisted on," says the authority already quoted, "leads to a general system of discounting the written requirements by the experienced estimator, who tenders accordingly, and at a much

lower rate than his deluded competitors, who weakly suppose that the specification means what it says." To sum the matter up: If the specification drafter clearly understands what he is writing about, says exactly what he means and not a word more, clearness, brevity and consistency will have been attained.

Many books have been published giving complete specifications or specimen specification clauses for both building and engineering works. Used with judgment such books may prove of the greatest service; but there is ever the danger of irresponsible consultation and the extraction of clauses which may, when strung together and read as a single document, have all the bad features that have been referred to above. Stock clauses to fit the requirements of every class of work cannot be drafted, and the architect or engineer who dabbles in such things may court serious trouble with his clients. Every clause must have precision of application, for incertitude is fatal. The wide tendering of which so much is heard is due largely to the atmosphere of uncertainty which attaches to many specifications. —From Western Canada Contractor.

**Firms desiring news on special classes of buildings, such as Banks, Churches, Schools, Hotels, etc., will find such items all classified and grouped under proper headings, commencing on this page. These same items are again repeated under "LOCALITIES" in the last part of our news department.**

#### APARTMENT HOUSES.

**SAN FRANCISCO**—Apartment house, 3 story and base, frame, \$35,000. Architects, Fabre and Bearwald, Merchants' National Bank Bldg., S. F. Owner's name withheld. The building will be erected on the south side of Clay street east of Franklin and has been designed to contain six apartments of six rooms each. Interior will be finished in hardwood with hardwood floors in the living rooms, dining rooms and reception hall. There will be private baths, finished in tile and equipped with showers. All apartments will have sleeping porches. Rector gas steam radiators will be installed. Exterior of the building will be covered with cement plaster in imitation of cut stone with a veneer stone base. Plans are now being prepared.

**SAN FRANCISCO**—Apartment house alteration, frame, \$2,500. Architect, William H. Crim, Jr., 425 Kearny street, S. F. Owner, J. P. Trouillet. This work will include the installation of new plumbing, wall beds, painting, interior finish, a lighting plant and gas steam radiators in the building located at the northwest corner of Clay and Leavenworth streets. Plans are complete and figures will be called for at once.

**SAN FRANCISCO**—Apartment house, 3 story and base, frame, \$6,000. Architect, none. Owner, Louis A. Pfeiffer, 102 Stuart street, S. F. The building will be erected on the south side of 20th street west of Dolores covering an area of 30 by 70. The building has been designed to contain six modern apartments which will have wall beds and private baths. Interior finish will be of pine with some elm panels. There will be a hot water system. Bath rooms will have tile wainscot and composition floors. Exterior

of the building will be covered with cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor. Materials are now being purchased.

**SAN FRANCISCO**—Apartment house, 4 story and base, brick, \$35,000. Architect, Earl B. Scott, Humboldt Bank Bldg., S. F. Owner's name withheld. The building will be erected on the north side of Pine street and has been designed to contain 32 apartments arranged in two and three room suites with wall beds and private bath rooms. Interior will be finished in pine and elm panels. There will be steam heat, oil burning plant, a hot water system and modern plumbing. All bath rooms will have tile wainscot and composition floors. Tile and marble wainscot will be used in the entrance. Exterior of the building will be faced with pressed brick. Plans are nearly complete and figures will be called for shortly.

**SAN FRANCISCO**—Apartment house, 6 story and base, Class C construction, \$20,000. Architects, Rousseau & Rousseau, Monadnock Bldg., S. F. Owner's name withheld. The building will be erected on the south side of Turk street east of Polk street, covering an area of 30 by 55 feet. There will be one store besides the entrance on the first floor and a total of 18 suites of two and three rooms on the upper floors. Interiors will be finished in pine and hardwood with some oak floors. Plans provide for steam heat, a hot water system and an automatic elevator. Bath rooms will be finished in tile with composition floors. All suites will have private baths and wall beds. Exterior of the building will be faced with pressed brick. Plans are being prepared.

**SAN FRANCISCO**—Apartment house alterations, 3 story, frame, \$3,000.

Architects, Helman & Schwartz, Nevada Bank Bldg., S. F. Owner, H. Cohen. This work will consist of interior alterations, new interior finish, plumbing, plastering, painting and electric work. Wall beds will be installed. Plans are complete and figures are being taken.

#### ATASCADERO COLONY.

ATASCADERO COLONY, SAN LUIS OBISPO CO., CAL.—Colony work, concrete construction. Cost not stated. Architects, Bliss & Paville, Balboa Bldg., S. F. Owners, Atascadero Colony, Mutual Bank Bldg., S. F. An announcement has been made by the managers of the Atascadero Colony, San Luis Obispo County, to the effect that in the future all building operations will be carried on by contract instead of Day Labor. Architects Bliss & Paville, Balboa Bldg., have working drawings for a number of important buildings under way and figures will be called for shortly.

#### BONDS.

MODESTO, STANISLAUS CO., CAL.—No bids were received here for the purchase of \$610,000 of bonds for the proposed enlargement of the sewer system of the Modesto Irrigation District.

RIO BONITO SCHOOL DISTRICT, BUTTE CO., CAL.—Bonds voted here on August 5th carried by a large majority. The bonds were for \$6,000 and will be used in the construction of a new school building.

REDONDO BEACH, LOS ANGELES CO., CAL.—Trustee Thompson has introduced an ordinance calling a special bond election to be held in September for the purpose of raising \$121,000 for the acquisition, construction and completion of a wharf at the foot of Emerald street. The matter will be taken up at the next meeting.

HUMBOLDT COUNTY, CAL.—An advertisement calling for bids for the \$150,000 worth of California State Highway bonds held by Humboldt County has been authorized by the Board of Supervisors. The bids will be received and opened at the next meeting of the Board in September.

HERMOSA BEACH, LOS ANGELES CO., CAL.—An ordinance has been adopted here by the Board of City Trustees calling for a special bond election to be held September 26th, for the voting of bonds of \$15,000. Of this amount \$10,000 will be used in the construction of a new city hall building and \$5,000 for the purchasing of fire fighting equipment. B. F. Brown is the City Clerk.

LOS ANGELES, CALIF.—The Board of Supervisors here will receive bids for the purchase of the Compton Union High School district bonds of \$50,000, until 2 p. m. September 5th. H. J. LeLande is the County Clerk.

GLENDORA, LOS ANGELES CO., CAL.—An ordinance has been prepared by the City Council calling for a special bond election to be held September 10th for the purpose of submitting to the voters the question of incurring a bonded indebtedness of \$37,500 for the construction and completion of a municipal water plant.

LOS ANGELES, CALIFORNIA.—The Board of Supervisors of Los Angeles County will receive bids until September 5th for the purchase of bonds

amounting to \$150,000. Funds will be used in the construction of a school building for the Redondo Union High School District. H. J. LeLande is the County Clerk.

SACRAMENTO, CAL.—The Board of Supervisors here has postponed the proposed bond issue of county roads bonds amounting to \$2,125,000, until their meeting of September 8th. The bonds were to be voted on September 25th.

TURLOCK, STANISLAUS CO., CAL.—The City Council has sold the \$15,000 school bonds to G. B. Blymeyer and company of San Francisco, who offered a premium of \$8.00 for the issue.

HUGHSON, STANISLAUS CO., CAL.—The Hughson School bonds of \$10,000 have been sold to the state at par and five per cent interest. Part of the money will be used in the construction of a new rural school three miles southwest of Hughson.

OAKDALE, STANISLAUS CO., CAL.—The question of voting \$400,000 bonds to complete the irrigation system here will be submitted to the voters here at an early date.

PORTERVILLE, TULARE CO., CAL.—N. M. Ball, the Porterville member of the Tulare county highway commission, contrary to general report, has not taken official action to indefinitely postpone the proposed issue of \$1,500,000 in bonds for county road purposes. The committee met with the supervisors in Visalia the first of this month, and following the gathering it was given out that by reason of the European war and consequently unsettled financial conditions, the securities would not be proposed at this time. Ball says that a series of meetings are to be held in the principal towns of the county, at which time the opinion of the publicity bodies will be secured, and upon their recommendation the final action to be taken will be based.

SUISUN, SOLANO CO., CAL.—At the second annual banquet of the Chamber of Commerce the matter of a \$40,000 school bond election was discussed and met with favor on all sides. Meetings will soon be called and the matter will be taken up at an early date.

CUCAMONGA, SAN BERNARDINO CO., CAL.—Residents of Cucamonga do not want a new school building as shown here in the defeat of a \$35,000 school bond election. There were 211 in favor of the issuing of the bonds and 177 against. This is the second time the matter of holding a special bond election has been defeated.

REDONDO, LOS ANGELES CO., CAL.—Hermosa Beach citizens have abandoned the opposition to the bond issue of \$150,000 recently voted for a new school building for the Redondo Union High School District. Bonds will be readvertised at once.

WATSONVILLE, SANTA CRUZ CO., CAL.—A meeting to discuss the proposed bond issue in the Vega School District for a new school building will be held here at a date fixed by the Trustees.

ROADS—Cost not stated. San Rafael, Marin Co., Cal. Engineer, County Engineer, San Rafael. Owners, Marin County. Bids will be received here on September 5th for the grading and macadamizing of Kent avenue. Plans are on file at the County Clerk's office at San Rafael.

#### BATH HOUSES.

SANTA BARBARA, SANTA BARBARA CO., CAL.—Bath house, 2 story and base, hollow tile construction. Cost not stated. Architect, H. Alban Reeves, Chamber of Commerce Bldg., S. F. Owners, Southern California Edison Co. The building will cover an area of 60 by 250 feet and will contain, besides the plunge and dressing rooms, offices and waiting room of the Santa Barbara Electric Railroad Co. Interior will be finished in pine and redwood. Plunge will be of concrete. Special filtration equipment and water heating system will be installed. Exterior of the building will be faced with cement plaster. Plans are complete and figures are being taken. Architects Ray & Soule of Santa Barbara will act as supervising architects.

#### BRIDGES AND DAMS.

SAN JOSE, SANTA CLARA CO., CAL.—Bridge, reinforced concrete. Cost not stated. Engineer, County Surveyor, San Jose. Owners, Santa Clara County. Plans have been completed for a reinforced concrete road bridge to be erected over Adobe Creek at Edith avenue. Bids are now being taken for the work and will be opened on September 8th at 11 a. m. Plans and specifications can be secured from County Clerk.

SEATTLE, WASH.—Docks and terminal yards, \$15,000,000. Architects and Engineers, Rowells & Stokes, Seattle and New York. Owners, Bridle Belt Railroad and Navigation Co., Henry Bldg., Seattle. According to statements made here a project which will require the immediate expenditure of \$15,000,000 and ultimately \$50,000,000 is about ready for starting preliminary work. The project is headed by A. P. Gillies, Henry Building at Seattle, who is representing the Bridle Belt Railway and Navigation Company. The first unit will include the two four-story docks 200x800 ft., an eight-story building 500x500 ft., hotel and office building 200x500 ft. and a tunnel under a number of streets to be about three miles long. According to information furnished Stone & Webster, of this city, the Seattle Traction Company is interested in the project. Plans were prepared by Howells & Stokes, architects of New York and Seattle, and although no confirmation has been given it is reported the contract will be let to Grant Smith & Company of Seattle.

SAN FRANCISCO—Pier and bulkhead construction, crocated pile. Cost not stated. Engineer, Assistant State Engineer Newman, Ferry Bldg., S. F. Owners, State of California. Plans and specifications for Pier No. 37 have been completed and are now out for figures. Included in the contract to be let will be a bulkhead adjoining the pier and a shed which will be erected on the pier. Construction will be of crocated piles and timber. Shed will have a steel frame covered with galvanized iron. Special steel rolling doors will be used. Plans and specifications can be secured from the office of the State Board of Harbor Commissioners, Ferry Bldg. Bids will be opened on September 3rd. An official proposal appears in another column of this issue.

**Contracts Awarded.**

ANACORTES, WASH.—Dike construction, \$500,000. Engineer's name not given. Owners, Padilla Bay Reclamation District. Contractors, James Park Engineering and Construction Co., Anacortes. Contract price, \$500,000.

ST. HELENS, ORE.—Bridges, 1 steel and concrete. Cost not stated. Engineer, State Highway Engineer H. L. Bowley, Portland. Owners, Columbia County. Contractors, Ambrose-Burd-sall Co., Portland. Contract price for all four bridges, \$26,336.

**FACTORIES & WAREHOUSES.**

SAN FRAN 'ISCO—Factory, 1 story, brick, \$5,000. Architect, none. Owner, John Hunt, 1763 Octavia street, S. F. The building will be erected on Mission street west of 12th and will cover an area of 4½ by 13½ feet. There will be a cement floor. Interior will be finished in redwood. Galvanized cornices and a tar and gravel roof will be used. Exterior of the building will be faced with pressed or wire cut brick. Plans are in the hands of the owner who will do the work by Day Labor. Materials are being purchased.

SAN FRANCISCO—Warehouse, 2 and 3 story Mill construction, \$120,000. Architect, Nathaniel Blaisdell, 255 California street, S. F. Owners, San Francisco Investment Co. The building will be erected on Bryant near Beale street and has been leased to Dunham, Carriagan & Hayden. The building will cover a large ground area loads. Interior will be finished in pine and hardwood veneer in the office and display room portions. There will be a central heating system, elevator and automatic sprinklers. Metal window sash and frames will be used. Exterior of the building will be faced with pressed brick. Spur track will be run into the building. Plans are being prepared.

EMERYVILLE, ALAMEDA CO., CAL.—Factory, 1 story and base, reinforced concrete, \$50,000. Architect, Edward W. McManus, Bankers' Investment Bldg., S. F. Owners, Merchant Calculating Machine Co., Syndicate Bldg., Oakland. The building will be erected on 4th street near Stanford and will cover a considerable ground area. Interior finish will be of pine. A cement floor will be used. Metal window sash and frames are specified. Exterior will be faced with cement plaster. Special machinery to be installed will be furnished by the owners. Plans are being prepared.

BERKELEY, ALAMEDA CO., CAL.—Factory, 1 story and base, Class C construction, \$10,000. Architect, none. Owners, San Francisco Sulphur Co., 624 California street, S. F. The building will be erected on West 7th street south of Snyder street. Interior of the building will be divided into five separate apartments. Interior finish will be of pine. A cement floor will be used. Special machinery will be installed under a separate contract. Exterior of the building will be faced with cement plaster. Plans are complete and work will be done by Day Labor. Materials are now being purchased.

PORTLAND, ORE.—Stable, 1 and 2 story 3-informed concrete, \$50,000. Architect, Architectural Department, Portland. This building, which has been mentioned here before, will be

erected at the corner of 15th and Chapman streets and will cover a large ground area. Construction will be fireproof with reinforced concrete walls and floors. Interior will be left unfinished. Plans provide for special stable equipment and electric work. Exterior will be faced with cement plaster. Plans are complete and figures are now being taken.

**Contracts Awarded.**

LOS ANGELES, CAL.—Factory group 1 and 2 story and base, reinforced concrete. Cost not stated. Architect, George W. Harding, Washington Bldg., 14 A. Owners, Pinney-Boyle Mfg. Co. Contractors, Broadway Construction Co., Security Bldg., 1 A. general construction. Contract price not stated. Union Iron Works, structural steel. Contract price not stated.

**FLATS.**

SAN FRANCISCO—Flats, 2 story and base, frame, \$7,000. Architect, J. A. Porporato, 619 Washington street, S. F. Owner's name withheld. The building will be erected in the Richmond District and has been designed to contain two modern flats of six rooms each. Private garage will be located in the basement. Interior will be finished in pine and hardwood with hardwood floors in the principal rooms. There will be furnace heat and open fire places. Mantels will be of tile or brick. Bath rooms will have tile wainscot and floors. Automatic water heaters will be installed. Exterior of the building will be covered with rustic and shiplap. Plans are complete and figures are being taken.

SAN FRANCISCO—Flat alterations, 3 story and base, frame, \$6,000. Architect, Charles C. Frye, 20 Montgomery street, S. F. Owners, Pacific Realty Co. The recent building located on California near Scott street will be altered and made into 12 flats. Interior will be finished in pine with hardwood floors. An automatic elevator will be installed. New plumbing, painting and electric work will be installed. Exterior of the building will be repainted. Plans are complete and figures are being taken.

**GOVERNMENT WORK AND SUPPLIES.****Spokane, Wash., Post Office.**

The contract for furnishing new armatures for new fields for the motors for two electric passenger elevators in the U. S. post office at Spokane, Wash., has been awarded to the Otis Elevator Co., Washington, D. C., at \$2,450.

**Boise, Idaho, Screens.**

Bids were received by the Supervising Architect, Treasury Department, Washington, D. C., for doors and window screens for the U. S. post office, Boise, Idaho, as follows:

McKee Green Mfg. Co., St. Louis, Mo., \$1,115.50.

E. T. Burrowes Co., Portland, Me., \$1,149.52.

Weller Mfg. Co., Milwaukee, Wis., \$1,450.

Robbins Mfg. Co., 1891 No. Central Park Ave., Chicago, Ill., \$1,455.

**Santa Barbara, Cal., Furniture.**

The following bids were received by the supervising architect, Treasury Department, Washington, D. C., for

supplying furniture for the U. S. post office at Santa Barbara, Cal.:

Federal Equipment Co., Carlisle, Pa., \$1,396.85.

Jacob Beitzel & Son, York, Pa., \$1,781.90 days.

Louck & Hill Co., Richmond, Ind., \$1,832.26; 90 days.

J. E. Sjostrom, Philadelphia, Pa., \$2,035.90 days.

Nelson & Co., Inc., Brooklyn, N. Y., \$1,976.90 days.

**New Method for Purchasing Army Supplies.**

As soon as arrangements can be perfected contracts for all supplies for the army will be made through the office of the quartermaster general instead of by the various depot quartermasters. As far as possible purchases will be made under annual schedules.

It is proposed to place the various supplies common to the commercial trade used in the maintenance and upkeep of the army in classes or groups and list such supplies alphabetically by classes or groups in a schedule, specifying in each case a clear description of the article.

**Conditions in the Supervising Architect's Office.**

Many requests are received for the immediate preparation of plans, etc., for particular Federal buildings which have been authorized by existing legislation, irrespective of the date of such authorization. The following statement of the present status of public building work is issued for the information of all concerned.

Beginning with 1902 it has been the policy of Congress to authorize public buildings by what are known as "Omnibus" acts, each act including a great many separate projects. In addition, special acts are passed from time to time, providing for individual projects, increases in the limits of cost of projects previously authorized, etc. The "Omnibus" Act of 1902 was followed by similar acts in 1903, 1906, 1908, 1910, and 1913.

It is the present policy to place under contract for construction all buildings, or extensions to buildings, authorized in any on "Omnibus" act before beginning plans for projects authorized by a subsequent act. It is also the present practice to prepare the plans for all buildings, or projects, authorized in any given act in the order of the dates upon which the titles to the sites thereof were vested in the United States.

To determine the precise order in which the plans for the various buildings shall receive attention the following procedure is followed: The buildings authorized in any one act are first divided into groups according to the priority of the acts in which their sites were authorized. All buildings in each such act-group are further arranged in the order of the dates of the acquisition of their sites, the earliest date first. For instance, the 1913 act authorizes buildings upon sites which had been authorized in the act of 1908, in the act of 1910, and in the act of 1913. It is intended that the buildings so authorized in 1913 to be erected upon sites authorized in 1908 shall first be placed under contract. These will be followed by buildings authorized in 1913 to be constructed upon sites authorized in 1910. Then the buildings authorized in 1913 to be built upon sites also authorized in 1913 will take

their respective turns for attention.

Extensions are usually authorized to be erected upon land already owned by the United States. While extension projects are included with the buildings authorized in a particular act, discretion is exercised in determining the order in which extensions shall be placed under contract for construction, depending upon the urgency of the need of the improvement.

The output of plans by the Supervising Architect's Office is governed by the extent of the technical force (designers, draftsmen, computers, superintendents, etc.) which the appropriations given by Congress permit the Department to employ.

At this date the Office of the Supervising Architect has on its books, waiting to be placed under contract, approximately \$35,500,000 worth of authorizations for new buildings and extensions, exclusive of the value of the land. This includes the new buildings and extensions in the act of 1913. This office is placing buildings and extensions under contract at the rate of about seven million dollars annually, so that at the present rate of progress the last of the buildings authorized in the act of 1913 will not have been placed under contract until about the beginning of the calendar year 1920. It will not be until after the latter date that it will be possible for the Supervising Architect to place under contract any buildings contained in any act, or acts, which may be passed in the meantime.

## —HALLS & SOCIETY BLDGS—

**OAKLAND, CAL.**—Auditorium, 2-story and base. Class A construction. Supervising Architect, J. J. Donovan, Oakland. Owners, City of Oakland. Bids for elevator and curtain hoists, cement finish, finish hardware, marble and tiling, painting, seating, lath and plastering and electric work were opened by the City Council on August 20th. All bids were referred to the Advisory Committee and the City Attorney. A complete list of the figures submitted will be found under the heading of Oakland and Alameda County in this issue.

## HOSPITALS

**CALIFORNIA**—State institutions, \$146,958. Architect, State Architect George B. McDougall, Sacramento. Owners, State of California. In the neighborhood of \$146,958 will shortly be expended by the State of California in improvements at the various state institutions. This amount has been divided as follows: Agnew State Hospital, \$33,971; California School for Girls at Ventura, \$85,000; Sonoma State Hospital, \$2,500; Napa State Hospital, \$2,820; Stockton State Hospital \$18,940; State Capitol Building, \$3,200 and San Quentin Prison, \$521. All work will be handled through the State Department of Engineering.

**VENTURA, VENTURA CO., CAL.**—Hospital cottage, 1 story, concrete. Cost not stated. Architect, State Architect George B. McDougall, Sacramento. Owners, State of California. Bids will be opened in Sacramento on September 24th for constructing the Hospital Cottage and typical cottages Nos. 1 and 2 at the California School for Girls. An official proposal appears in another column of this issue. Plans

and specifications can be secured from the State Architect. This work is the first of a new group of buildings to be erected at Ventura. The entire group will cost in the neighborhood of \$68,000.

**PORTLAND, ORE.**—Hospital, 1 story and base, reinforced concrete, \$45,000. Architects, Tourtelotte and Hummel, Rothchild Bldg., Portland. Owners, Emanuel Hospital. The building will be erected in the eastern portion of the city and will cover an area of 45 by 110 feet. There will be both wards and private rooms. Interior finish will be of pine and hardwood with some tile and marble wainscot. Special hospital plumbing and equipment will be installed. There will be steam heat, a hot water system, vacuum cleaning and elevator service. Exterior of the building will be faced with cement plaster. Plans are complete and figures are being taken.

**OAKLAND, CAL.**—Old People's Home group of 3 story brick and concrete buildings, \$50,000. Architect, Oscar Haupt, Phelan Bldg., S. F. Owners, California Altheim. These buildings will be erected on property adjoining the present Altheim near Fruitvale and will consist of a dining hall, dormitories and social hall. Interior will be finished in pine throughout. There will be steam heat and hot and cold running water. Exteriors will be faced with pressed brick and cement plaster. Plans are complete and figures will be called for shortly.

**NAPA, NAPA CO., CAL.**—Chambers cottage, frame and concrete. Cost not stated. Architect, State Architect George B. McDougall, Sacramento. Owners, State of California. Plans have been completed for the Chambers Cottage to be erected at the Napa State Hospital and plans are now out for figures. Bids will be opened on September 21st at 12 o'clock. An official proposal appears in another column of this issue. Plans and specifications can be secured from the State Architect, Sacramento.

## HOTELS.

**SAN FRANCISCO**—Hotel, 5 story and base, brick and steel. Cost not stated. Architect, Henry Shermund, Mills Bldg., S. F. Owner's name withheld. The building will be erected on Jessie street near Fourth covering an area of 25 by 75 feet. There will be a total of thirty guest rooms and ten baths. Interior finish will be of pine throughout. Plans provide for steam heat, an oil burning plant and elevator service. All rooms will be supplied with hot and cold running water. Bath rooms will have tile wainscot and composition floors. Simplex windows are specified. Exterior will be faced with pressed brick. Plans are nearly complete and figures will be called for at once.

**SAN FRANCISCO**—Hotel, 3 story and base, brick and steel. Cost not stated. Architects, Rhodes and Marsh, 3372 16th street, S. F. Owner, C. F. Hornung, 422 Church street. The building will be erected on the west side of Valencia street south of 16th. There will be a high class restaurant on the first floor. Upper floors will be arranged for single rooms and baths. Interior will be finished in pine throughout. There will be steam heat and a hot water supply. Bath rooms will be finished in tile with composi-

tion floors. Exterior of the building will be faced with pressed brick. Plans are complete and a contract for the steel work has been let to the Schrader Iron Works. Concrete work will be done by Rasmussen and the balance of the building will be constructed by Day Labor.

**PLAISIRSPEN, PLUMAS CO., CAL.**—Hotel and resort, 11 buildings, log construction. Cost not stated. Architect, Frederick Whitton, 251 Kearny street, S. F. Owners, Interstate Resort Co. The principal of these buildings will be a two story hotel structure containing lobby, social rooms, dining rooms, complete kitchen equipment and about 30 guest rooms. There will be ten cottages of from three to ten rooms. Interiors of all buildings will be finished in the rustic style. There will be steam heat. Hot and cold running water will be supplied to all cottages. Exteriors will be covered with logs and rustic. A large reinforced concrete swimming tank will also be installed. Plans are complete and figures are being taken.

**SAN BRUNO, SAN MATEO CO., CAL.**—Hotel and bakery, 2 story, frame. Cost not stated. Architect, John J. Foley, 46 Kearny street, S. F. Owner Mr. Sullivan. The building will cover an area of 65 by 130 feet. The entire first floor will be occupied by the bakery. Upper floors will contain 12 rooms and bath. Interior will be finished in pine and redwood. There will be plate glass display windows. Exterior of the building will be covered with cement plaster on metal lath. Plans are being prepared.

**ONTARIO, SAN BERNARDINO CO., CAL.**—Hotel addition, 2 story and base, brick, \$40,000. Architects, Butler Bros. Mason Bldg., L. A. Owners, Ford Bros. The addition will contain the office and lobby besides about 30 guest rooms, nearly all of which will have private baths. Interior finish will be of pine throughout. A hot water system will be installed. Bath rooms will be finished in tile. Exterior of the building will be faced with white enameled brick. Plans are being revised and work will be started at once.

## LIBRARIES.

story and base, brick, \$25,000. Architects, Kysor and Biggar, Wright and Callender Bldg., L. A. Owners, City of Los Angeles. The building will be erected on Central avenue at the corner of 54th street and will cover an area of 18 by 100 feet. The design is in the classic style. There will be two large reading rooms, librarian's office, stack rooms and game room. Interior finish will be of pine and hardwood with maple floors in the reading rooms. Metal book stacks will be used. Plans provide for steam heat and a vacuum cleaning system. Exterior of the building will be faced with ruffled brick. Plans are now being prepared. Bids will be called for within a month or six weeks.

**CLOVIS, FRESNO CO., CAL.**—Library, 1 story frame and plaster, \$7,000. Architects, Glass and Butner, Rowell Bldg., Fresno. Owners, Town of Clovis. The building will be erected on Pollasky avenue between 2nd and 4th streets and have been designed in the classic style. There will be one large main reading room, office of the librarian, stack and work room. Interior will be finished in pine through-

out. Maple floor will be used in the reading room. A central heating system will be installed. Exterior of the building will be faced with cement plaster on metal lath. Plans are complete and figures will be opened on September 8th.

## PANAMA - PACIFIC EXPOSITION WORK.

SAN FRANCISCO—Chile Exhibit Building, 1 and 2 story, frame and plaster. Cost not stated. Architect's name not given. Owner, Government of Chile. Plans for the exhibit building to be erected by Chile at the Panama-Pacific International Exposition have been completed and forwarded to the Director of Works for approval. Some slight changes will be made and figures will be taken at once. Plans and specifications can be secured from the office of the Director of Works, Service Bldg.

SAN FRANCISCO—Exhibit booth interior work, \$2,000. Architect, Clay N. Burrell, Albany Bldg., Oakland. Owner, Gus Dieckmann Co., 2118 California street, S. F. These owners have secured a large space in the Manufacturers Building. The booth will be finished in hardwood, plaster, art glass and tile. Considerable wood carving will be used. Plumbing fixtures will be installed. Plans are complete and in the hands of the owners who are taking figures on the work.

FRESNO, FRESNO CO., CAL.—Exhibit building, 1 story, frame. Cost not stated. Architect, none. Owner, Fresno County. Plans are complete and in the hands of D. M. Barnwell of Fresno for a one-story building to be erected at the County Fair Grounds to house the cattle exhibit. Bids are now being taken on the work and will be opened on September 8th. Plans and specifications can be secured from Mr. Barnwell.

## RAILROAD CONST., STATIONS AND EQUIPMENT.

SAN FRANCISCO—Railroad Track construction. Cost not stated. Engineer, City Engineer, Temporary City Hall, S. F. Owners, City and County of San Francisco. Plans have been completed for the track work and conduit on the Stockton street Municipal line from Sutter street through the Stockton street tunnel to Sacramento street and figures are being taken. Bids will be opened today.

RICHMOND, CONTRA COSTA CO., CAL.—Passenger and freight depot, frame and plaster construction, \$18,000. Architect, Architectural Dept. Southern Pacific Co., Flood Bldg., S. F. Owners, Southern Pacific Co. Plans have been prepared for the new freight and passenger station to be erected at Richmond. The passenger station will be a Mission style structure costing in the neighborhood of \$6,000 while about \$12,000 will be expended for the freight depot. The balance of \$30,000 will be used in extensions to the company's yards. Exterior of both the freight and passenger stations will be covered with cement plaster. Plans are only awaiting the approval of the State Railroad Commission before construction will be started.

## RESIDENCES.

SAN FRANCISCO—Residence, 3 story, frame and plaster. Cost, \$25,000. Architects, Ward & Blohme, Alaska Commercial Bldg. Owner, George P. Fuller. The dwelling will be erected on the north side of Vallejo street just east of Fillmore and has been designed to contain fifteen rooms and three baths. Interior will be finished in pine and hardwood. Hardwood floors will be used in the principal rooms. Baths will have tile wainscot and floors and will be equipped with showers. The plans provide for furnace heat and open fireplaces. Exterior of the building will be covered with metal lath and plaster. Plans are now being figured. Note—Concrete and excavating has been let to C. W. Haun, 110 Jessie street, for \$1129.

SAN FRANCISCO—Residences, alterations to 7 3-story and base, frames. Cost, \$14,000. Architect, Charles C. Frye, 20 Montgomery street. Owner, Pacific Realty Company. The buildings are situated on Pacific avenue near Buchanan and will undergo extensive alterations. Included in the work will be new interior finish of pine and blue gum, hardwood floors, painting, imported tapestry wall paper, plumbing, light fixtures and finish hardware. Furnace heat will be installed in each of the buildings, together with automatic water heaters. Baths will be finished in tile and will have composition floors. Plans are complete and figures are being taken.

#### Contracts Awarded.

SAN FRANCISCO—Residence, 2 story and base, frame, \$4,900. Architect, John J. Foley, 46 Kearny street, S. F. Owner, Mr. Campion. Contractor, Michael Brueck, 600 Charter Oak, S. F. Contract price, \$4,300.

#### SCHOOLS.

SAN FRANCISCO—Well boring, Cost not stated. Engineer, City Engineer. Temporary City Hall, S. F. Owners, City and County of San Francisco. Bids will be received on September 2nd by the Board of Public Works for boring a well on the school property located at 12nd avenue and Balboa st.

Plans can be secured from the City Engineer.

RICHMOND, CONTRA COSTA CO., CAL.—Lavatories for school. Cost not stated. Architect's name not given. Owners, City of Richmond. Bids will be opened on August 28th by the Board of Education for furnishing and installing lavatories in the Lincoln School. Plans and specifications, together with full particulars, can be secured from the secretary of the Board of Education at Richmond. The contract is the largest for this kind of work let in Richmond in some time.

SONOMA, SONOMA CO., CAL.—School, 2 story and base, brick, \$35,000. Architect, A. C. Lutgens, 525 Market st., S. F. Owners, Sonoma School District. Bids opened for this work show P. H. Ingraham low at \$28,142. He will probably be awarded the contract. A complete list of the bids received will be found under the heading of Marin, Contra Costa and Sonoma Counties in this issue.

FRESNO, FRESNO CO., CAL.—School, 2 story and base, brick, \$94,000. Architect, Eugene Mathewson, Forsythe Bldg., Fresno. Owners, City of Fresno. Plans are now being prepared, under the direction of Supervising Architect W. D. Coates, for the Washington School. The building will be erected on Main street and will contain twelve class rooms, assembly hall, domestic science and manual finished in pine with maple floors in finish din pine with maple floors in the class rooms. There will be steam heat, oil burning system, vacuum cleaning, program clocks and modern school plumbing. Exterior of the building will probably be faced with pressed brick. Only preliminary plans have been prepared. Further mention will be made of the work.

LINDSAY, TULARE CO., CAL.—School, 2 story and base, brick, \$15,000. Architect, F. W. Griffin, Porterville. Owners, Lindsay School District. Architect F. W. Griffin wires that bids opened for the construction of the new school building to be erected at Lindsay ran from \$12,000 to \$61,000. Also that the Board of Education is unable to award contract as no funds are available, bonds of the district not having been sold. Mr. Griffin promises further information as soon as definite action is taken.

SUTTER CITY, SUTTER CO., CAL.—School addition, 2 rooms, frame. Cost not stated. Architect, E. C. Kenyon, 330 J Street, Sacramento. Owners, Sutter City School District. The two rooms will be added to the present frame and plaster building. Interior finish will be of pine. There will be maple floors and composition blackboards. Exterior of the new portion of the building will be covered with cement plaster on metal lath. Plans are complete and figures are being taken. Bids will be opened on September 5th.

Bids will be received here on August 26th for the trenching, removing old pipe and laying new six-inch cast iron pipe in the City of Grass Valley. Plans may be secured at the City Clerk's office.

GRASS VALLEY, NEVADA CO., CAL.—Trenching and laying cast iron water pipe. Cost not stated. Engineer, City Engineer, Grass Valley. Owners, City of Grass Valley. Bids for the trenching and laying of cast iron pipe will be received here August 26th. Further particulars may be obtained from the City Clerk's office.

GRASS VALLEY, NEVADA CO., CAL.—Pipe Sewer. Cost not stated. Engineer, City Engineer, Grass Valley. Owners, City of Grass Valley. Bids for the furnishing of 1320 feet of six inch vitrified salt glazed sewer pipe, 22 1/2 inch Y branches, 1 cast iron manhole cover and 1 cast iron lamp hole cover. Plans and full particulars can be had by addressing the City Clerk's office at Grass Valley.

MT VEEDEE, NAPA CO., CAL.

**Building and macadamizing roads.** Cost not stated. Engineer, County Surveyor, Napa. Owner, Napa County. Bids will be opened here on September 10th for the building and macadamizing of roads of Mt. Vreder and Redwood Permanent Road District No. 2, Sections A, B and C, Napa County. Further particulars can be had from the County Clerk's office at Napa, where plans are on file.

**RIO VISTA, SOLANO CO., CAL.**—Grading and asphalt paving. Cost not stated. Engineer, Town Engineer, Rio Vista. Bids will be received here on August 27th for the grading, paving, curbing and the laying of corrugated iron culverts with manholes, on Front, First and Seventh streets. Plans and full particulars may be obtained from the Town Clerk's office at Rio Vista.

**GRASS VALLEY, NEVADA CO., CAL.**—Trenching and pipe laying. Cost not stated. Engineer, City Engineer, Grass Valley. Owner, City of Grass Valley. Bids will be opened here on August 26th for the trenching and laying of sewer pipe and constructing manholes. Complete particulars and plans can be secured from the City Engineer at Grass Valley.

**SAN FRANCISCO**—Constructing Island Parks. Cost not stated. Engineer, City and County of San Francisco. Owners, City and County of San Francisco. Bids will be opened by the Board of Public Works on August 26th for the constructing of island parks on Dolores street between 18th and 19th streets. Plans and specifications may be obtained from the City Engineer.

**SAN RAFAEL, MARIN CO., CAL.**—Grading and macadamizing roads. Cost not stated. Engineer, County Engineer, San Rafael. Owners, Marin County. Bids will be received here on September 8th for the grading and macadamizing of Kent avenue. Plans are on file at the County Clerk's office at San Rafael.

**SANTA CLARA CO., CAL.**—Highway lighting. Cost not stated. Engineer, County Engineer, San Jose. Owner, Santa Clara County. Bids will be received here on September 8th for the highway lighting of the Willow Glen Lighting District. Plans are on file at the County Clerk's office at San Jose.

**SAN FRANCISCO**—Tunnel construction, \$3,500,000. Engineer, City Engineer, Temporary City Hall Bldg., S. F. Owners, City and County of San Francisco. No bids were received by the Board of Public Works for the construction of the Twin Peaks Tunnel. These figures were to have been opened on Wednesday, August 19th. The fact that no figures were received caused little comment at the meeting as it has been understood for some time that conditions which were made a part of the contract rendered it practically impossible for even the largest construction companies in the east to submit figures. McArthur Bros. of New York wired that if given a ninety day extension of time in which to figure that they would submit a bid. The clause which caused the greatest objection among the local firms was that which stipulated that \$100,000 worth of work should be completed each month and that if less work was completed payment should not be made until the following month's work amounting to \$100,000 should have been completed. Contractors also state that the time at-

lowed for figuring this work was not sufficient. Some trouble was also found by local contractors in securing bonds sufficient to cover the fifty per cent. The Board of Public Works passed a resolution ordering the work readvertised and fixing the opening date as September 16th. Changes in the general conditions may or may not be made.

**SAN FRANCISCO**—Fountain alteration. Cost not stated. Architect, City Department of Architecture, Temporary City Hall, S. F. Owners, City and County of San Francisco. Plans for extensive addition and alteration to the Donohue Fountain at the corner of Battery and Market streets have been completed and are now out for figures. Bids will be opened by the Board of Public Works on September 2nd. Plans and specifications can be secured from the City Department of Architecture.

**FRESNO, FRESNO CO., CAL.**—Ornamental street lights, \$15,000. Engineer, City Engineer, Fresno. Owners, City of Fresno. The City Council has ordered that new figures be called for on the ornamental street lighting system to be installed. A contract was awarded to Ne-Page-McKinney Co. of Seattle for \$15,000, but has been declared void as the company did not start the work within the time specified. Bids will be taken at once.

## STORES.

**LOS ANGELES, CAL.**—Offices, 8 story and base, Class A construction, \$200,000. Architects, Reid Bros., California-Pacific Bldg., S. F. Owner, Hulett C. Merritt, represented by The Spring Street Co. The building will be erected at the northwest corner of Broadway and 8th street and will contain four stores on the first floor and a total of 132 offices, besides the space on the eighth floor which will be occupied by the Merritt companies. Construction will be fireproof. A contract for the structural steel has been awarded to the Llewellyn Iron Works and figures on the general construction are being taken. Original plans have been completely revised.

### Contracts Awarded.

**SAN FRANCISCO**—Stores and lofts, 2 story and base, Class C construction, \$15,000. Architects, O'Brien Bros., Union Bldg., S. F. Owner, W. F. Baron. Contractor, John Sargo, concrete work; Brandon & Lawson, brick work; A. M. Wallen, general carpentry work. Contract prices not given. Note—The elevator work is still to be let.

## SEALED PROPOSALS.

### PROPOSALS.

**OFFICE OF THE BOARD OF PUBLIC WORKS OF THE CITY AND COUNTY OF SAN FRANCISCO.**

Sealed proposals will be received at this office between the hours of 2 o'clock p. m. and 3 o'clock p. m. on **Wednesday, the 2nd day of September, 1914**, for doing the following work, including the furnishing of the necessary labor and materials therefor, to-wit:

Alterations and additions to the Donohue Fountain, located at the junction of Market, Battery and Bush streets.

Progressive payments will be made. Said work must be done in accordance with the specifications on file in the office of the Board of Public Works, to which reference is hereby made, and must be commenced within five (5) calendar days from the receipt of

written notice from the Board of Public Works, and completed within sixty (60) calendar days thereafter.

The amount of bond for faithful performance of contract has been fixed at \$5000.

All proposals offered must be accompanied by a check certified by a responsible bank, payable to the order of the Clerk of the Supervisors, for an amount not less than ten per cent of the aggregate of the proposal.

Printed proposals will be furnished gratuitously upon application at the office of the Board of Architecture, and all proposals must be made upon such forms.

The Board of Public Works reserves the right to reject any and all bids. By order of the Board of Public Works.

F. J. CHURCHILL,  
Secretary.

## NOTICE TO CONTRACTORS.

Office of the Board of State Harbor Commissioners, Union Depot and Ferry House, San Francisco, Cal., August 21st, 1914.

Sealed proposals or bids will be received at this office until 11:00 o'clock a. m. on **Thursday, September 3rd, 1914**, for furnishing materials and constructing Pier No. 37, and adjacent Bulkhead Wharf, and shed over the pier, on the waterfront of the City and County of San Francisco, in accordance with the plans and specifications prepared therefor by the Assistant Engineer, and adopted by the Board, and on file in this office, to which special reference is hereby made.

The materials to be used in this work shall consist of the requisite quantities of Portland cement and creosoted piles (which will be furnished to the Contractor by the Board), merchantable yellow fir lumber, redwood lumber, sand, crushed rock or gravel, reinforcing materials, metal lath, castings, structural steel, roof bolts, spikes, car springs, rails and fastenings, asphalt paving, bituminous concrete paving, roofing and painters' materials, glass, window frames, etc. All materials used must be of the best of their respective kinds if not especially specified herein. All materials used in the structures will be subjected to a rigid examination and test, and if found defective, under size, unsuitable or not as specified, will be condemned and must be immediately removed from the work by the Contractor at his expense.

No bid will be received unless it is made on a blank form furnished from this office. Each bid shall be accompanied by a check for an amount equal to five (5) per cent of the amount of the proposal, to be made payable to the order of the Secretary of the Board, conditioned that if the proposal is accepted and the contract awarded, and if the bidder shall fail or neglect to execute a contract and give the bond required within six days after the award is made, in that case said sum mentioned in said check shall be deemed liquidated damages for such failure to execute and shall be paid to the San Francisco Harbor Improvement Fund.

The bond required to be not less than one-half the amount of the bid, with two or more sureties to be approved by the Board of State Harbor Commissioners, and conditioned for the faithful performance by the contractor of all the terms and conditions of said contract according to the true intent and meaning thereof and to the satisfaction of said Board, and said bond shall also be effective as provided in an act approved May 1, 1911, for the protection of material men, mechanics and laborers.

Bidders will not be considered by the Board unless delivered to the Secretary or to the Assistant Secretary at the office of the Secretary at or prior to 11 o'clock a. m. on **Thursday, September 3rd, 1914**, at which time and place the bids will be opened.

The Board reserves the right to reject any or all bids if deemed for the best interest.

Bidders are invited to be present at the opening of the bids.

Plans and specifications of this work to be done at the Union Depot and Ferry House, upon depositing \$20.00 for same, which will be returned on return of plans and specifications.

W. R. BRODE, Pres. LOUIS R. HOLM, Sec. R. J. BRODE, Vice-Pres.

C., until 11 o'clock a. m., August 29, 1914, and then there publicly opened, for a coal-hoisting tower for the naval coal depot, San Diego, Cal. Plans and specifications may be obtained on application to the bureau. H. R. STANFORD, chief of bureau.

Firms desiring news from certain localities like San Francisco, Los Angeles, Portland, Seattle, etc., will find all such items, commencing on this page, all carefully classified as to location. These same items are repeated in the fore part of the news department under distinct headings, such as Banks, Churches, Hotels, etc.

#### SAN FRANCISCO.

CHILE EXHIBIT BUILDING—1 and 2 story, frame and plaster. Cost not stated. San Francisco. Architect's name not given. Owners, Government of Chile. Plans for the exhibit building to be erected by Chile at the Panama-Pacific International Exposition have been completed and forwarded to the Director of Works for approval. Some slight changes will be made, and figures will be taken at once. Plans and specifications can be secured from the office of the Director of Works, Service Bldg.

APARTMENT HOUSE, 3 story and base, frame, \$35,000. San Francisco. Architects, Fabre & Bearwald, Merchants' National Bank Bldg., S. F. Owner's name withheld. The building will be erected on the south side of Clay street east of Franklin and has been designed to contain six apartments of six rooms each. Interior will be finished in hardwood with hardwood floors in the living rooms, dining rooms and reception hall. There will be private baths, finished in tile and equipped with showers. All apartments will have sleeping porches. Rector gas steam radiators will be installed. Exterior of the building will be covered with cement plaster in imitation of cut stone with a veneer stone base. Plans are now being prepared.

APARTMENT HOUSE ALTERATION—Frame, \$2,500. San Francisco. Architect, William H. Crim Jr., 12 Kearny street, S. F. Owner, J. P. Trouillet. This work will include the installation of new plumbing, wall beds, painting, interior finish, a lighting plant and gas steam radiators in the building located at the northwest corner of Clay and Leavenworth streets. Plans are complete and figures will be called for at once.

APARTMENT HOUSE—3 story and base, frame, \$6,000. San Francisco. Architect, none. Owner, Louis A. Pfeiffer, 102 Stuart street, S. F. The building will be erected on the south side of 24th street west of Dolores covering an area of 30 by 70. The building has been designed to contain six modern apartments which will have wall beds and private baths. Interior

finish will be of pine with some elm panels. There will be a hot water system. Bath rooms will have tile wainscot and composition floors. Exterior of the building will be covered with cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor. Materials are now being purchased.

APARTMENT HOUSE—4 story and base, brick, \$35,000. San Francisco. Architect, Earl B. Scott, Humboldt Bank Bldg., S. F. Owner's name withheld. The building will be erected on the north side of Pine street and has been designed to contain 32 apartments arranged in two and three room suites with wall beds and private bath rooms. Interior will be finished in pine and elm panels. There will be steam heat, oil burning plant, a hot water system and modern plumbing. All bath rooms will have tile wainscot and composition floors. Tile and marble wainscot will be used in the entrance. Exterior of the building will be faced with pressed brick. Plans are nearly complete and figures will be called for shortly.

APARTMENT HOUSE—6 story and base, Class C construction, \$20,000. San Francisco. Architects, Rousseau & Rousseau, Monandach Bldg., S. F. Owner's name withheld. The building will be erected on the south side of Turk street east of Polk street covering an area of 30 by 85 feet. There will be one store besides the entrance on the first floor and a total of 18 suites of two and three rooms on the upper floors. Interiors will be finished in pine and hardwood with some oak floors. Plans provide for steam heat, a hot water system and an automatic elevator. Bath rooms will be finished in tile with composition floors. All suites will have private baths and wall beds. Exterior of the building will be faced with pressed brick. Plans are being prepared.

FACTORY—1 story brick, \$5,000. San Francisco. Architect, none. Owner, John Hunt, 1703 Octavia street, S. F. The building will be erected on Mission street west of 12th and will cover an area of 41½ by 128 feet. There will be a cement floor. Interior will be finished in redwood. Galvanized cornices and a tar and gravel

roof will be used. Exterior of the building will be faced with pressed or wire cut brick. Plans are in the hands of the owner who will do the work by Day Labor. Materials are being purchased.

**WAREHOUSE**—2 and 3 story Mill construction, \$126,000. San Francisco. Architect, Nathaniel Blaisdell, 255 California street, S. F. Owners, San Francisco Investment Co. The building will be erected on Bryant near Beale street and has been leased to Dunham, Carrigan & Hayden. The building will cover a large ground area and has been designed for heavy floor loads. Interior will be finished in pine with hardwood veneer in the office and display room portions. There will be a central heating system, elevator and automatic sprinklers. Metal window sash and frames will be used. Exterior of the building will be faced with pressed brick. Spur track will be run into the building. Plans are being prepared.

**FLATS**—2 story and base, frame, \$7,000. San Francisco. Architect, J. A. Porporato, 619 Washington street, S. F. Owner's name withheld. The building will be erected in the Richmond District and has been designed to contain two modern flats of six rooms each. Private garage will be located in the basement. Interior will be finished in pine and hardwood with hardwood floors in the principal rooms. There will be furnace heat and open fire places. Mantels will be of tile or brick. Bath rooms will have tile wainscot and floors. Automatic water heaters will be installed. Exterior of the building will be covered with rustic and shiplap. Plans are complete and figures are being taken.

**FLAT ALTERATIONS**—3 story and base, frame, \$6,000. San Francisco. Architect, Charles C. Frye, 29 Montgomery street, S. F. Owners, Pacific Realty Co. The recent building located on California near Scott street will be altered and made into 12 flats. Interior will be finished in pine with hardwood floors. An automatic elevator will be installed. New plumbing, painting and electric work will be installed. Exterior of the building will be repainted. Plans are complete and figures are being taken.

**HOTEL**—5 story and base, brick and steel. Cost not stated. San Francisco. Architect, Henry Shermund, Mills Bldg., S. F. Owner's name withheld. The building will be erected on Jessie street near Fourth covering an area of 25 by 75 feet. There will be a total of thirty guest rooms and ten baths. Interior finish will be of pine throughout. Plans provide for steam heat, an oil burning plant and elevator service. All rooms will be supplied with hot and cold running water. Bath rooms will have tile wainscot and composition floors. Simplex windows are specified. Exterior will be faced with pressed brick. Plans are nearly complete and figures will be called for at once.

**HOTEL**—3 story and base, brick and steel. Cost not stated. San Francisco. Architect, Rhodes & Marisch, 2372 16th street, S. F. Owner, C. F. Hornung, 422 Church street. The building will be erected on the west side of Valencia street south of 16th. There will be a high class restaurant on the first floor. Upper floors will be arranged for single rooms and baths. Interior will be finished in pine

throughout. There will be steam heat and a hot water supply. Bath rooms will be finished in tile with composition floors. Exterior of the building will be faced with pressed brick. Plans are complete and a contract for the steel work has been let to the Schrader Iron Works. Concrete work will be done by Rasmussen and the balance of the building will be constructed by Day Labor.

**CONSTRUCTING ISLAND PARKS**—Cost not stated. San Francisco, Cal. Engineer, City and County of San Francisco. Owners, City and County of San Francisco. Bids will be opened by the Board of Public Works on August 26th for the constructing of island parks on Dolores street between 15th and 19th streets. Plans and specifications may be obtained from the City Engineer.

**RESIDENCE**—3 story, frame and plaster, Cost, \$25,000. San Francisco. Architects, Ward & Blohne, Alaska Commercial Bldg. Owner, George P. Fuller. The dwelling will be erected on the north side of Vallejo street just east of Fillmore and has been designed to contain fifteen rooms and three baths. Interior will be finished in pine and hardwood. Hardwood floors will be used in the principal rooms. Baths will have tile wainscot and floors and will be equipped with showers. The plans provide for furnace heat and open fireplaces. Exterior of the building will be covered with metal lath and plaster. Plans are now being figured. Note—Concrete and excavating has been let to C. W. Haun, 116 Jessie street, for \$1129.

**RESIDENCES**—Alterations to 7 3 story and base, frames. Cost, \$14,000. San Francisco. Architect, Charles C. Frye, 29 Montgomery street. Owner, Pacific Realty Company. The buildings are situated on Pacific avenue near Buchanan and will undergo extensive alterations. Included in the work will be new interior finish of pine and blue gum, hardwood floors, painting, imported tapestry wall paper, plumbing, light fixtures and finish hardware. Furnace heat will be installed in each of the buildings, together with automatic water heaters. Baths will be finished in tile and will have composition floors. Plans are complete and figures are being taken.

**RESIDENCE**—Art Glass Work. Cost not stated. San Francisco. Architects, Ward & Blohne, Alaska Commercial Building, S. F. These architects are now taking figures for art and leaded glass to be installed in the Patigan residence on the corner of Hyde and Francisco streets.

**RESIDENCE**—2 story and base, APARTMENT HOUSE ALTERATIONS—3 story, frame, \$3,000. San Francisco. Architects, Heiman & Schwartz, Nevada Bank Bldg., S. F. Owner, R. Cohen. This work will consist of interior alterations, new interior finish, plumbing, plastering, painting and electric work. Wall beds will be installed. Plans are complete and figures are being taken.

**RAILROAD CONSTRUCTION WORK**—Cost not stated. San Francisco. Engineer, City Engineer, Temporary City Hall, S. F. Owners, City and County of San Francisco. Plans have been completed for the track work and conduit on the Stockton street Municipal line from Sutter street through the Stockton Street Tunnel to Sacramento street, and figures are being taken. Bids will be opened today.

**RESIDENCE**—2 story and base, frame, \$2,500. San Francisco. Architect, none. Owner, A. C. Hilton, 716 Shrader street, S. F. The dwelling will be erected on the west side of 2nd avenue south of Union street and has been designed for a six room house. Interior will be finished in pine and redwood with hardwood floors in the principal rooms. There will be open fire places and tile mantels. Bath room will have tile wainscot and composition floor. Exterior of the house will be covered with shingles and rustic. Plans are complete and in the hands of the owner who will do the work by Day Labor. Materials are now being purchased.

**FOUNTAIN ALTERATION**—Cost not stated. San Francisco. Architect, City Department of Architecture, Temporary City Hall, S. F. Owners, City and County of San Francisco. Plans for extensive addition and alteration to the Donohue Fountain at the corner of Battery and Market streets have been completed and are now out for figures. Bids will be opened by the Board of Public Works on September 2nd. Plans and specifications can be secured from the City Department of Architecture.

**TUNNEL CONSTRUCTION**—\$3,500,000. San Francisco. Engineer, City Engineer, Temporary City Hall Bldg., S. F. Owners, City and County of San Francisco. No bids were received by the Board of Public Works for the construction of the Twin Peaks Tunnel. These figures were to have been opened on Wednesday, August 19th. The fact that no figures were received caused little comment at the meeting as it has been understood for some time that conditions which were made a part of the contract rendered it practically impossible for even the largest construction companies in the east to submit figures. McArthur Bros. of New York wired that if given a ninety day extension of time in which to figure that they would submit a bid. The clause which caused the greatest objection among the local firms was that which stipulated that \$100,000 worth of work should be completed each month and that if less work was completed payment should not be made until the following month's work amounting to \$100,000 should have been completed. Contractors also state that the time allowed for figuring this work was not sufficient. Some trouble was also found by local contractors in securing bonds sufficient to cover the fifty per cent. The Board of Public Works passed a resolution ordering the work readvertised and fixing the opening date as September 16th. Changes in the general condition may or may not be made.

**PIER AND BULKHEAD CONSTRUCTION**—Crescoted pile. Cost not stated. San Francisco. Engineer, Asst State Engineer Newman, Ferry Bldg., S. F. Owners, State of California. Plans and specifications for Pier No. 37 have been completed and are now out for figures. Included in the contract to be let will be a bulkhead adjoining the pier and a shed which will be erected on the pier. Construction will be of crescoted piles and timber. Shed will have a steel frame covered with galvanized iron. Special steel rolling doors will be used. Plans and specifications can be secured from the office of the State Board of Harbor Commissioners, Ferry Bldg. Bids will be

opened on September 1st. An official proposal appears in another column of this issue.

**RESIDENCE**—1 story and base, frame, \$1,000. San Francisco. Architects, Coats and Traver, Head Bldg., S. F. Owner, M. A. Van Schmidt. The dwelling has been designed for a seven room house and will be erected on 13rd avenue north of Fulton. Interior finish will be of pine and redwood with some elm panels. Hardwood floors will be used in the principal rooms. There will be furnace heat and open fire places. Mantels will be of tile. Tile wainscot will be used in the bath room and kitchen. Exterior of the house will be covered with shingles. Plans are complete and work will be done by Day Labor.

**RESIDENCE**—2 story and base, frame and brick, \$20,000. San Francisco. Architect, G. Albert Lansburgh, 709 Mission street, S. F. Owner, Samuel Lowenstein. The dwelling will be erected at the southwest corner of Webster and Broadway and has been designed to contain twelve or fourteen rooms, several baths and sleeping porch. Interior will be finished in pine and hardwood with white enamel in the sleeping rooms. There will be a hot water system of heating and open fire places. Mantels will be of tile or brick. Bath rooms will have tile floors and wainscot and will be equipped with showers. A vacuum cleaning system will be installed. Exterior of the dwelling will be covered with veneer pressed brick. Plans are now being prepared.

**RESIDENCE**—2 story and base, frame, \$15,000. San Francisco. Architect, T. Patterson Ross, 310 California st., S. F. Owner, George A. Ames. The dwelling has been designed for a ten room house with three baths and will be erected on the south side of Green street east of Hyde. A private garage will also be erected on the property. Interior of the dwelling will be finished in pine and mahogany with white enamel in the sleeping rooms. There will be furnace heat and open fire places and tile mantels. Tile wainscot will be used in the bath room. Exterior of the house and garage will be covered with cement plaster on metal lath. Plans are being prepared.

**RESIDENCE**—2 story and base, frame, \$3,000. San Francisco. Architect, none. Owner, P. Nelson, 30 Presidio Terrace, S. F. The dwelling will be erected on the north side of California street west of 15th avenue and has been designed to contain six rooms and bath. Interior will be finished in pine and redwood. Some hardwood floors will be used. There will be open fire places and tile mantels. Tile wainscot will be used in the bath room. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor.

**EXHIBIT BOOTH INTERIOR WORK**—\$2,000. San Francisco. Architect, Clay N. Burrell, Albany Bldg., Oakland. Owner, Gus Diekmann Co., 2118 California street, S. F. These owners have secured a large space in the Manufacturers Building. The booth will be finished in hardwood, plaster, art glass and tile. Considerable wood

carving will be used. Plumbing fixtures will be installed. Plans are complete and in the hands of the owners who are taking figures on the work.

#### Contracts Awarded.

**RESIDENCE**—2 story and base, frame, \$1,000. San Francisco. Architect, John J. Foley, 16 Kearny street, S. F. Owner, Mr. Cannon. Contractor, Michael Bruce, 600 Charter Oak, S. F. Contract price, \$1,900.

**WELL BORING**—Cost not stated. San Francisco. Engineer, City Engineer, Temporary City Hall, S. F. Owners, City and County of San Francisco. Bids will be received on September 2nd by the Board of Public Works for boring a well on the school property located at 32nd avenue and Railroad street. Plans can be secured from the City Engineer.

**STORES AND LOFTS**—2 story and base, Class C construction, \$15,000. San Francisco. Architects, O'Brien Bros., Clunie Bldg., S. F. Owner, W. F. Baron. Contractor, John Spargo, concrete work; Brandon & Lawson, brick work; A. M. Wallen, general carpentry work. Contract prices not given. Note.—The elevator work is still to be let.

## No Bids Received For Tunnel Work.

**Twin Peaks Tunnel Work Will Be Re-advertised New Bids To Be Opened on September 16th.**

No bids were received by the Board of Public Works for the construction of the Twin Peaks Tunnel. These figures were to have been opened on Wednesday, August 19th. The fact that no figures were received caused little comment at the meeting as it has been understood for some time that conditions which were made a part of the contract rendered it practically impossible for even the largest construction companies in the east to submit figures.

MacArthur Bros. of New York wired that if given ninety days extension of time in which to figure they would submit a bid. The clause which caused the greatest objection among the local firms was that which stipulated that \$100,000 work of work should be completed each month, and that if less work was completed payment should not be made until the following month's work amounting to \$100,000 should have been completed. Contractors also state that the time allowed for figuring this work was not sufficient. Some trouble was also found by local contractors in securing bonds sufficient to cover the 50 per cent.

The Board of Public Works passed a resolution ordering the work re-advertised and fixing the opening date as September 16th. Changes in the general conditions may or may not be made.

## OAKLAND AND ALAMEDA COUNTY.

FACTORY—1 story and base, rein-  
 forced concrete, \$50,000, Emeryville,  
 Alameda Co., Cal. Architect, Edward  
 W. McManus, Bankers' Investment  
 Bldg., S. F. Owners' Marchant Cal-  
 culating Machine Co., Syndicate Bldg.,  
 Oakland. The building will be erect-  
 ed on 4th street near Stanford and  
 will cover a considerable ground area.  
 Interior finish will be of pine. A  
 cement floor will be used. Metal win-  
 dows sash and frames are specified.  
 exterior will be faced with cement  
 plaster. Special machinery to be in-  
 stalled will be furnished by the own-  
 ers. Plans are being prepared.

FACTORY—1 story and base. Class  
 C construction, \$10,000. Berkeley, Al-  
 ameda Co., Cal. Architect, none. Own-  
 ers, San Francisco Sulphur Co., 624  
 California street, S. F. The building  
 will be erected on West 7th street  
 south of Snyder street. Interior of  
 the building will be divided into five  
 separate apartments. Interior finish  
 will be of pine. A cement floor will  
 be used. Special machinery will be  
 installed under a separate contract.  
 Exterior of the building will be faced  
 with cement plaster. Plans are com-  
 plete and work will be done by Day  
 Labor. Materials are now being pur-  
 chased.

RESIDENCE—2 story and base,  
 frame, cost, \$3,500. Oakland, Cal. Ar-  
 chitect, none. Owner, Anderson &  
 Folwick, 950 73rd avenue, Oakland.  
 The dwelling has been designed to con-  
 tain seven rooms with baths. Inter-  
 ior will be finished in pine with some  
 elm panels. Hardwood floors will be  
 used in the principal rooms. Baths  
 will have tile wainscot and composi-  
 tion floors. There will be brick or  
 tile mantels. A hot water heater will  
 be installed. Exterior of the dwelling  
 will be finished with cement plaster.  
 The work will be done by Day Labor.

RESIDENCE—2 story and base,  
 frame, cost not stated, Oakland Archi-  
 tect, C. W. Dieckey, Central Bank Bldg.,  
 Oakland, Owner, J. D. Kennedy. The  
 dwelling will be erected on Haddon  
 Hall in Oakland and has been designed  
 to contain in the neighborhood of

eight rooms. Interior will be finished  
 in pine and redwood. Hardwood floors  
 will be used in the principal rooms.  
 Bath will have tile wainscot and com-  
 position floors. There will be furnace  
 heat and open fireplaces. Brick or  
 tile mantels will be specified. Plans  
 are nearing completion and figures will  
 soon be taken.

AUDITORIUM—2 story and base.  
 Class A construction. Oakland, Cal.  
 Supervising Architect, J. J. Donovan.  
 Oakland. Owners, City of Oakland.  
 Bids for elevator and curtain hoists,  
 cement finish, finish hardware, marble  
 and tiling, painting, seating, lath and  
 plastering and electric work were  
 opened by the City Council on August  
 20th. All bids were referred to the  
 Advisory Committee and the City At-  
 torney. A complete list of the figures  
 submitted will be found under the  
 heading of Oakland and Alameda  
 County in this issue.

OLD PEOPLE'S HOME—Group of 3  
 story brick and concrete buildings,  
 \$50,000. Oakland, Cal. Architect, Os-  
 car Haupt, Phelan Bldg., S. F. Own-  
 ers, California Altheim. These  
 buildings will be erected on property  
 adjoining the present Altheim near  
 Fruitvale and will consist of a dining  
 hall, dormitories and social hall. Inter-  
 ior will be finished in pine through-  
 out. There will be steam heat and hot  
 and cold running water. Exteriors  
 will be faced with pressed brick and  
 cement plaster. Plans are complete  
 and figures will be called for shortly.

RESIDENCE — 2 story and base,  
 brick and plaster, \$18,000. Piedmont,  
 Alameda Co., Cal. Architect, Clinton  
 Day, Nevada Bank Bldg., S. F. Owner,  
 Mrs. T. L. Barker. The dwelling will  
 contain ten rooms, three baths and  
 sleeping porch. A garage will be  
 erected in the rear. Interior of the  
 dwelling will be finished in pine, ma-  
 hogany and white enamel. Hardwood  
 floors will be used in the living room,  
 dining room, library and reception  
 hall. Plans provide for a central heat-  
 ing system, open fire places and vac-  
 uum cleaning. Mantels will be of tile  
 or brick. Bath rooms will be finished  
 in tile and equipped with showers.  
 Exterior of the house and garage will  
 be covered with pressed brick and ce-  
 ment plaster. Plans are nearly com-  
 plete and figures will shortly be called.

## MARIN, CONTRA COSTA AND SONOMA COUNTIES.

**BUILDING AND MACADAMIZING** roads. Cost not stated. Mt. Veeder, Napa Co., Cal. Engineer, County Surveyor, Napa. Owner, Napa County. Bids will be opened here on September 10th for the building and macadamizing of roads of Mt. Veeder and Redwood Permanent Road District No. 2, Sections A, B and C, Napa County. Further particulars can be had from the County Clerk's office at Napa, where plans are on file.

**GRADING AND ASPHALT PAVING**—Cost not stated. Rio Vista, Solano Co., Cal. Engineer, Town Engineer, Rio Vista. Owner, Town of Rio Vista. Bids will be received here on August 27th for the grading, paving, curbing and the laying of corrugated iron culverts with manholes, on Front, First and Seventh streets. Plans and full particulars may be obtained from the Town Clerk's office at Rio Vista.

**CHAMBERS COTTAGE**—Frame and concrete. Cost not stated. Napa, Napa Co., Cal. Architect, State Architect George B. McDougall, Sacramento. Owners, State of California. Plans have been completed for the Chambers Cottage to be erected at the Napa State Hospital and plans are now out for figures. Bids will be opened on September 21st at 12 o'clock. An official proposal appears in another column of this issue. Plans and specifications can be secured from the State Architect, Sacramento.

**LAVATORIES FOR SCHOOL**—Cost not stated. Richmond, Contra Costa Co., Cal. Architect's name not given. Owners, City of Richmond. Bids will be opened on August 28th by the Board of Education for furnishing and installing lavatories in the Lincoln School. Plans and specifications, together with full particulars, can be secured from the secretary of the Board of Education at Richmond. The contract is the largest for this kind of work let in Richmond in some time.

**SCHOOL**—2 story and base, brick, \$35,000. Sonoma, Sonoma Co., Cal. Architect, A. C. Lutgens, 525 Market st., S. F. Owners, Sonoma School District. Bids opened for this work show P. H. Ingraham low at \$23,142. He will probably be awarded the contract. A complete list of the bids received will be found under the heading of Marin, Contra Costa and Sonoma Counties in this issue.

**PASSENGER AND FREIGHT DEPOT**—Frame and plaster construction, \$18,000. Richmond, Contra Costa Co., Cal. Architect, Architectural Dept. Southern Pacific Co., Flood Bldg., S. F.

Owners, Southern Pacific Co. Plans have been prepared for a new freight and passenger station to be erected at Richmond. The passenger station will be a Mission style structure costing in the neighborhood of \$6,000 while about \$12,000 will be expended for the freight depot. The balance of \$30,000 will be used in extensions to the company's yards. Exterior of both the freight and passenger stations will be covered with cement plaster. Plans are only awaiting the approval of the State Railroad Commission before construction will be started.

## Contracts Awarded.

**SCHOOL**—2 story and base, brick, \$30,000. Sonoma Sonoma Co., Cal. Architect, A. C. Lutgens, 525 Market street, S. F. Owners, Sonoma School District. Contractor, R. H. Ingraham, Martinez. Contract price, \$28,500.

## FRESNO, MODESTO, STANISLAUS AND CENTRAL CALIFORNIA.

**COLONY WORK**—Concrete construction. Cost not stated. Atascadero Colony, San Luis Obispo Co., Cal. Architects, Bliss & Faville, Balboa Bldg., S. F. Owners, Atascadero Colony, Mutual Bank Bldg., S. F. An announcement has been made by the managers of the Atascadero Colony, San Luis Obispo County to the effect that in the future all building operations will be carried on by contract instead of Day Labor. Architects Bliss & Faville, have working drawings for a number of important buildings under way and figures will be called for shortly.

**EXHIBIT BUILDING**—1 story, frame. Cost not stated. Fresno, Fresno Co., Cal. Architect, none. Owner, Fresno County. Plans are complete and in the hands of D. M. Barnwell of Fresno for a one-story building to be erected at the County

grounds to house the cattle of the county. Bids are now being taken on the work and will be opened on September 8th. Plans and specifications can be secured from Mr. Barnwell.

**RESIDENCE**—2 story and base, brick and concrete, \$12,000. Fresno, Fresno Co., Cal. Architect, Eugene Mathewson, Forsythe Bldg., Fresno. Owner, O. J. Woodward. The dwelling has been designed for a ten room house with two baths and sleeping porch. Interior will be finished in pine and hardwood with hardwood floors in the living room, dining room and reception hall. There will be furnace heat and open fire places. Mantels will be of brick. Tile floors and wainscot will be used in the both rooms. There will be an automatic water heater. Exterior of the house will be faced with pressed brick. Plans are being prepared.

**SCHOOL**—2 story and base, brick, \$36,000. Fresno, Fresno Co., Cal. Architect, Eugene Mathewson, Forsythe Bldg., Fresno. Owners, City of Fresno. Plans are now being prepared, under the direction of Supervising Architect W. D. Coates, for the Washington School. The building will be erected on Main street and will contain twelve class rooms, assembly hall, domestic science and manual training departments. Interior will be finished in pine with maple floors in the class rooms. There will be steam heat, oil burning system, vacuum cleaning, program clocks and modern school plumbing. Exterior of the building will probably be faced with pressed brick. Only preliminary plans have been prepared. Further mention will be made of the work.

**SCHOOL**—2 story and base, brick, \$45,000. Lindsay, Tulare Co., Cal. Architect, F. W. Griffin, Porterville. Owners, Lindsay School District. Architect F. W. Griffin wires that bids opened for the construction of the new school building to be erected at Lindsay ran from \$42,000 to \$61,000. Also that the Board of Education is unable to award contract as no funds are available, bonds of the district not having been sold. Mr. Griffin promises further information as soon as definite action is taken.

**ORNAMENTAL STREET LIGHTS**—\$15,000. Fresno, Fresno Co., Cal. Engineer, City Engineer, Fresno. Owners, City of Fresno. The City Council has ordered that new figures be called for on the ornamental street lighting system to be installed. A contract was awarded to Ne-Page-McKinney Co. of Seattle for \$15,600, but has been declared void as the company did not start the work within the time specified. Bids will be taken at once.

**LIBRARY**—1 story frame and plaster, \$7,000. Clovis, Fresno Co., Cal. Architects, Glass and Butler, Rowell Bldg., Fresno. Owners, Town of Clovis. The building will be erected on Pollasky avenue between 3rd and 4th streets and has been designed in the classic style. There will be one large main reading room, office of the librarian, stack and work room. Interior will be finished in pine throughout. Maple floor will be used in the reading room. A central heating system will be installed. Exterior of the building will be faced with cement plaster on metal lath. Plans are complete and figures will be opened on September 8th.

**SCHOOL**—2 story and base, brick, \$85,000. Fresno, Fresno Co., Cal. Architects, Swartz, Hotchkiss & Swartz, Rowell Bldg., Fresno. Owners, City of Fresno. Working drawings for the new building to be erected on Hazelwood avenue have been completed and approved by the Board of Education. The building will contain twelve classrooms, assembly hall and departments for domestic science and manual training. Interior will be finished in pine with maple floors in the classrooms. Plans provide for steam heat, oil burning equipment, vacuum cleaning and program clocks. Slate black boards will be used. Exterior of the building will be faced with pressed brick. Bids are now being taken and will be opened on September 18th.

### SACRAMENTO, STOCKTON & NORTHERN CALIFORNIA.

**TRENCHING AND PIPE LAYING**—Cost not stated. Grass Valley, Nevada Co., Cal. Engineer, City Engineer, Grass Valley. Owner, City of Grass Valley. Bids will be opened here on August 26th for the trenching and laying of sewer pipe and constructing manholes. Complete particulars and plans can be secured from the City Engineer at Grass Valley.

**TRENCHING AND PIPE LAYING**—Cost not stated. Grass Valley, Nevada Co., Cal. Engineer, City Engineer, Grass Valley. Owners, City of Grass Valley. Bids will be received here on August 26th for the trenching, removing old pipe and laying new six inch cast iron pipe in the City of Grass Valley. Plans may be secured at the City Clerk's office.

**TRENCHING AND LAYING CAST IRON WATER PIPE**—Cost not stated. Grass Valley, Nevada Co., Cal. Engineer, City Engineer, Grass Valley. Owners, City of Grass Valley. Bids for the trenching and laying of cast iron pipe will be received here August 26th. Further particulars may be obtained from the City Clerk's office.

**PIPE SEWER**—Cost not stated. Grass Valley, Nevada Co., Cal. Engineer, City Engineer, Grass Valley. Owners, City of Grass Valley. Bids for the furnishing of 120 feet of six inch vitrified salt glazed sewer pipe, 22-6x4 Y branches, 1 cast iron manhole cover and 1 cast iron lamp hole cover. Plans and full particulars can be had by addressing the City Clerk's office at Grass Valley.

**CAST IRON PIPE AND VALVES**—Cost not stated. Grass Valley, Nevada Co., Cal. Engineer, City Engineer, Grass Valley. Owners, City of Grass Valley. Bids will be received on August 26th for the furnishing of 150 feet six-inch cast iron pipe in six foot length, 5-6x4 inch C. I. T. branches, 2-6 brass mounted gate valves, 1-4 inch brass mounted gate valve, 1 6x4 inch reducer weight 20, bell at each end and 500 pounds of pig lead. Further particulars and plans may be had from the City Clerk at Grass Valley.

**RESIDENCES**—1 story frames. Cost not stated. Sacramento, Cal. Ar-

chitect, none. The following Day Labor jobs are reported as about to be started in Sacramento. Jas. J. Jennings, 719 J St., Sacramento, 1 story, five room, frame, \$1400; J. W. Nace, 4303 Rose St., Sacramento, 1 story, frame, \$950; A. McClelland, 620 J St., Sacramento, repair and finish five room dwelling, cost \$750.

**HOTEL AND RESORT**—11 buildings, log construction. Cost not stated. Blairsden, Plumas Co., Cal. Architect, Frederick Whitten, 251 Kearny street, S. F. Owners, Interstate Resort Co. The principal of these buildings will be a two-story hotel structure, containing lobby, social rooms, dining rooms, complete kitchen equipment and about 30 guest rooms. There will be ten cottages of from three to ten rooms. Interior of all buildings will be finished in the rustic style. There will be steam heat. Hot and cold running water will be supplied to all cottages. Exteriors will be covered with logs and rustic. A large reinforced concrete swimming tank will also be installed. Plans are complete and figures are being taken.

**STATE INSTITUTIONS**—\$146,958 California. Architect, State Architect George B. McHughall, Sacramento. Owners, State of California. In the neighborhood of \$146,958 will shortly be expended by the State of California in improvements at the various state institutions. This amount has been divided as follows: Agnew State Hospital, \$33,977; California School for Girls at Ventura, \$85,000; Sonoma State Hospital, \$2,500; Napa State Hospital, \$8,820; Stockton State Hospital, \$18,940; State Capitol Building, \$3,200, and San Quentin State Prison, \$521. All work will be handled through the State Department of Engineering.

**SCHOOL ADDITION**—2 rooms, frame. Cost not stated. Sutter City, Sutter Co., Cal. Architect, E. C. Kenyon, 3330 J Street, Sacramento. Owners, Sutter City School District. The two rooms will be added to the present frame and plaster building. Interior finish will be of pine. There will be maple floors and composition blackboards. Exterior of the new portion of the building will be covered with cement plaster on metal lath. Plans are complete and figures are being taken. Bids will be opened on September 5th.

## Bids Opened For Sonoma School.

Five Bids Opened for Construction of Brick School Designed by Architect Lutgens.

Five sets of figures were opened by the Board of Education at Sonoma for constructing the Sonoma High School, a one and two story brick building, costing in the neighborhood of \$30,000. Architect Lutgens, Underwood Bldg., San Francisco, designed the work. P. H. Ingraham submitted the low figure at \$23,142. Following is a complete list of the figures as opened:

#### Sonoma School.

Harvey A. Klyce	.....\$31,770
J. O. Kuykendall	.....30,850
L. J. L. Daly & Burke	.....29,984
P. H. Ingraham	.....28,142
Stockholm & Allen	.....23,488

The bid of P. H. Ingraham is within the amount available and a contract will probably be awarded.

 tions filed.

### SAN ANGELES AND SOUTH- ERN CALIFORNIA.

**CONSTRUCTION WAGON ROAD**—  
 Not stated. Santa Barbara, Santa  
 Barbara Co., Cal. Engineer, County  
 Surveyor, Santa Barbara. Owners,  
 Santa Barbara County. Bids will be  
 opened here by the Board of Super-  
 intendency of a wagon road in the  
 1st Road District in Santa Barbara  
 County. Further particulars and  
 plans may be had from the County  
 Engineer's office at Santa Barbara.

**GRADING AND PAVING**—Cost not  
 stated. Santa Barbara, Santa Bar-  
 bara Co., Cal. Engineer, County Sur-  
 veyor, Santa Barbara. Owners, Santa  
 Barbara County. Bids will be opened  
 on September 5th for the grading  
 and paving of approximately 6530 feet  
 of the San Marcus Turnpike and 432  
 ft. of Fair View Road. Further par-  
 ticulars and plans may be obtained  
 in the County Surveyor's office.

**BATH HOUSE**—2 story and base, low  
 tile construction. Cost not  
 stated. Santa Barbara, Santa Barbara  
 Co., Cal. Architect, H. Alban Reeves,  
 member of Commerce Bldg., L. A.  
 Owners, Southern California Edison  
 Co. The building will cover an area  
 of 250 feet and will contain, be-  
 sides the plunge and dressing rooms,  
 a waiting room of the Santa Bar-  
 bara Electric Railroad Co. Inter-  
 ior will be finished in pine and red-  
 wood. Plunge will be of concrete,  
 with filtration equipment and  
 heating system will be installed.  
 Exterior of the building will be faced  
 with cement plaster. Plans are com-  
 plete and figures are being taken. Ar-  
 chitects Ray & Soule of Santa Barbara  
 act as supervising architects.

**HOTEL ADDITION**—2 story and

base, brick, \$10,000. Ontario, San Ber-  
 nardino Co., Cal. Architects, Butler  
 Bros., Mason Bldg., L. A. Owners,  
 Ford Bros. The addition will contain  
 the office and lobby besides about 30  
 guest rooms, nearly all of which will  
 have private baths. Interior finish  
 will be of pine throughout. A hot  
 water system will be installed. Bath  
 rooms will be finished in tile. Exterior  
 of the building will be faced with  
 white enameled brick. Plans are be-  
 ing revised and work will be started  
 at once.

**HOSPITAL, COTTAGE**—1 story con-  
 crete. Cost not stated. Ventura, Ven-  
 tura Co., Cal. Architect, State Archi-  
 tect George B. McDougall, Sacramento.  
 Owners, State of California. Bids will  
 be opened in Sacramento on September  
 21st for constructing the Hospital Cot-  
 tage and Typical cottages Nos. 1 and  
 2 at the California School for Girls.  
 An official proposal appears in another  
 column of this issue. Plans and spec-  
 ifications can be secured from the State  
 Architect. This work is the first of  
 a new group of buildings to be erected  
 at Ventura. The entire group will  
 cost in the neighborhood of \$65,000.

**LIBRARY**—1 story and base, brick,  
 \$35,000. Los Angeles, Cal. Architects,  
 Kysor and Biggar, Wright and Callen-  
 der Bldg., L. A. Owners, City of Los  
 Angeles. The building will be erected  
 on Central avenue at the corner of  
 4th street and will cover an area of  
 45 by 100 feet. The design is in the  
 classic style. There will be two large  
 reading rooms, librarian's office, stack  
 rooms and game room. Interior finish  
 will be of pine and hardwood with  
 maple floors in the reading rooms.  
 Metal book stacks will be used. Plans  
 provide for steam heat and vacuum  
 cleaning system. Exterior of the  
 building will be faced with ruffled  
 brick. Plans are now being prepared.  
 Bids will be called for within a month  
 or six weeks.

**OFFICES**—5 story and base, Class A  
 construction, \$200,000. Los Angeles,  
 Cal. Architects, Reid Bros., California-  
 Pacific Bldg., S. F. Owner, Hulett C.  
 Merritt, represented by The Spring  
 Street Co. The building will be erected  
 at the northwest corner of Broad-  
 way and 5th street and will contain  
 four stories on the first floor and a  
 total of 133 offices, besides the space  
 on the eighth floor which will be oc-  
 cupied by the Merritt companies. Con-  
 struction will be fireproof. A con-  
 tract for the structural steel has been  
 awarded to the Llewellyn Iron Works  
 and figures on the general construction  
 are being taken. Original plans  
 have been completely revised.

#### Contracts Awarded.

**FACTORY GROUP**—1 and 2 story  
 and base, reinforced concrete. Cost  
 not stated. Los Angeles, Cal. Archi-  
 tect, George W. Harding, Washington  
 Bldg., L. A. Owners, Pinney-Boyle  
 Mfg. Co. Contractors, Broadway Con-  
 struction Co., Security Bldg., L. A.  
 General construction. Contract price  
 not stated. Union Iron Works, struc-  
 tural steel. Contract price not stated.

### PORTLAND AND OREGON.

**STABLE**—1 and 2 story, reinforced  
 concrete, \$5,000. Portland, Ore. Ar-  
 chitect, Architectural Dept., Portland.  
 Owners, City of Portland. This build-  
 ing, which has been mentioned here  
 before, will be erected at the corner of  
 16th and Chapman streets and will

cover a large ground area. Construc-  
 tion will be fireproof with reinforced  
 concrete walls and floors. Interior  
 will be left unfinished. Plans provide  
 for special stable equipment and elec-  
 tric work. Exterior will be faced with  
 cement plaster. Plans are complete  
 and figures are now being taken.

**HOSPITAL**—1 story and base, rein-  
 forced concrete, \$15,000. Portland,  
 Ore. Architects, Tourtelotte & Hum-  
 mel, Robchild Bldg., Portland. Own-  
 ers, Emanuel Hospital. The building  
 will be erected in the eastern portion  
 of the city and will cover an area of  
 15 by 110 feet. There will be both  
 wards and private rooms. Interior  
 finish will be of pine and hardwood  
 with some tile and marble wainscot.  
 Special hospital plumbing and equip-  
 ment will be installed. There will be  
 steam heat, a hot water system, vac-  
 uum cleaning and elevator service.  
 Exterior of the building will be faced  
 with cement plaster. Plans are com-  
 plete and figures are being taken.

#### Contracts Awarded.

**BRIDGES**—4 steel and concrete.  
 Cost not stated. St. Helens, Ore. En-  
 gineer, State Highway Engineer H. L.  
 Bowley, Portland. Owners, Columbia  
 County. Contractors, Ambrose-Bur-  
 sall Co., Portland. Contract price for  
 all four bridges, \$26,336.

### SEATTLE AND WASHINGTON.

**DOCKS AND TERMINAL YARDS**—  
 \$15,000. Seattle, Wash. Architects  
 and Engineers, Howells & Stokes, Se-  
 attle and New York. Owners, Bridle  
 Belt Railroad & Navigation Co., Henry  
 Bldg., Seattle. According to state-  
 ments made here a project which will  
 require the immediate expenditure of  
 \$15,000,000 and ultimately \$50,000,000 is  
 about ready for starting preliminary  
 work. The project is headed by A. P.  
 Gillies, Henry Building at Seattle, who  
 is representing the Bridle Belt Rail-  
 way & Navigation Company. The first  
 unit will include the two four-story  
 docks 200x500 feet, an eight story  
 building 500x500 feet, hotel and office  
 building 200x500 feet and a tunnel un-  
 der a number of streets to be about  
 three miles long. According to infor-  
 mation furnished Stone & Webster, of  
 this city the Seattle Traction Com-  
 pany is interested in the project.  
 Plans were prepared by Howells &  
 Stokes, architects of New York and  
 Seattle, and although no confirmation  
 has been given it is reported the con-  
 tract will be let to Grant Smith &  
 Company of Seattle.

#### Contracts Awarded.

**DIKE CONSTRUCTION**—\$500,000.  
 Anacortes, Wash. Engineer's name not  
 given. Owners, Padilla Bay Reclama-  
 tion District. Contractors, James  
 Park Engineering and Construction  
 Co., Anacortes. Contract price, \$500,-  
 000.

### HIGH-WATER MARK FOR LIME.

The manufacture of lime in the  
 United States in 1913 broke all pre-  
 vious records, the production amount-  
 ing to 3,595,390 short tons, valued at  
 \$14,648,362, according to R. W. Stone,  
 of the United States Geological Survey.  
 This was an increase over 1912 of 65,925  
 tons in quantity and \$678,248 in value.  
 The average price per ton in 1913 was  
 \$4.07, as compared with \$3.96 in 1912  
 and \$4.03 in 1911. While Pennsylvania  
 is the largest producer, the output of

The Panels that are  
as good as they are  
famous.

## Wybro Veneered Panels insure GOOD service

When you use WYBRO Panels you take no chances of hearing complaints years afterwards.

WYBRO Panels are made in such a way as to insure perfect service. They are smooth, even, clear and always look the same. Each one of the 168 varieties is guaranteed.

## White Brothers

5th and Brannan Streets

San Francisco

this State is only 2.26 per cent of the total, indicating the wide distribution of the industry; in fact, 14 States reported to the Survey a production of lime in 1913.

Lime used in building operations represents nearly a third of the total output, but large quantities are sold to chemical works, sugar factories, tanneries, etc., as well as to farmers for broadcasting on agricultural land.

## Brick Contractor Meets With Accident.

**Thomas F. Mulcahy, Well Known San Francisco Brick Contractor, Injured by Automobile.**

Thos. F. Mulcahy, a prominent brick mason of this city, while cranking his machine in front of the City Hall last Monday broke his right arm. Joseph Burns, concrete foreman for Mulcahy, tried to crank the same machine five minutes later and also received a fracture of the right arm. They were both treated at the Central Emergency Hospital.

After receiving treatment a relative of Mulcahy's drove the injured men home in the same machine, which operated without further mishap.

## STATE WANTS PAINTERS AND TINNERS.

The California State Civil Service Commission announces that applications for employment as Painters and Tanners in the service of the State will be received at the office of the Commission, State Capitol, Sacramento, on or before Sept. 26, 1914.

Further information and application blanks may be secured from the State Civil Service Commission, State Capitol, Sacramento. Applicants should be properly educated and filed with the commission on or before September 26, 1914.

## ANOTHER EASTERN MANUFACTURER OPENS BRANCH HERE.

The Austin Drainage Excavating Co. of Chicago has appointed A. N. Skillman, 1235 Pine street, as their direct representative to handle the numerous kinds of machines made by them. The Austin Cube Mixer, one of the best known concrete mixers, is manufactured by this company. Their line of special street machines and ditch dig-

ging machines are standard the world over. One of their latest ditch digging machines will excavate a ditch 30 feet deep and 6 feet wide. San Francisco is fast becoming recognized as the logical distributing point for the coast.

## SAND AND GRAVEL FOR FILTRATION PLANTS.

Clear-white quartz sand of the proper size is the common material used in filter beds, according to the United States Geological Survey. The floor of a filter may be made of broken trap, granite, or other rock screened to the proper size, or of clean sized gravel. The specifications for the filtration plants at Springfield, Mass., and Toronto, Canada, are practically identical, as follows:

"The filter sand shall be clean sand, with either sharp or rounded grains. It shall be entirely free from clay, dust, or organic impurities and shall, if necessary, be washed to remove such materials from it. The grains shall, all of them, be of hard material which will not disintegrate. The effective size shall not be less than 0.25 millimeter nor more than 0.35 millimeter. The uniformity coefficient shall be not more than 2.0. The sand shall be free from dust and shall not contain more than 1 per cent finer than 0.13 millimeter and shall be entirely free from particles over 5 millimeters in diameter. The sand shall not contain more than 2 per cent by weight of lime and magnesia taken together as carbonates. In all other respects the sand shall be of a quality satisfactory to the engineer."

## PANAMA WILL CONSTRUCT FOURTEEN LIGHTHOUSES.

Work will be begun soon on the construction of fourteen small lighthouses for the Panama government. The work will be done by private contractors. All of the lighthouses will be on the Pacific coast and will be a distinct aid to the navigation of these waters, especially to the small coast traders that make the port of Panama their home port. The lighthouses will be located as follows: One at the entrance to Panama bay, one on Melon Island, one at San Carlos, one at Port Obaldia, one at Port Posada, two at Aquadulee, one at Chitre, at the entrance to the La Villa river, two at Hensabe, one at Santa Lucia river, and two on Linartes rock.

## TRADE OPPORTUNITY.

We of course are not justified in gloating over the European war on account of any advantage it may bring us, but at the same time it is our province to seize upon such advantages just as long as they are to be obtained in the ordinary course of business. Especially will this be true of the big opportunity given to American manufacturers in the opening up of South American trade.

Our failure heretofore to get what should be a major share in the business of South America has been due to a variety of causes, not the least of which has been the fact that American business men have been doing so well with their capital at home that they did not need to go abroad for more. In fact as the United States has been drawing capital from Europe to finance American industrial development, there was no great inducement to go afield for more risky trade in Latin America. But the day of European extension of business in this country is past. The United States is now making nearly enough surplus capital to do its own business and it has the wherewithal to go south for more trade.

Another reason for success of Europe in going after South American bargains has been actual trade advantage. Europe is as near to the Eastern coast of South America as we are, if not nearer, and with an older and better developed shipping, it is no wonder that the commercial interests of England and Germany have found the picking easy in Brazil and Argentina. The war, in this respect, will merely give us a chance to overcome this previous European handicap. And with the opening of the Panama canal we will have an instant opportunity to get established in Chile and other west coast countries before Europe has recovered from the paralysis of the struggle now going on.

We are already receiving evidence of the turning of trade to New York from London and the German ports. If the American shippers have elasticity enough to get a hold on the good will of the markets of the southern world, they will keep all they are getting now, and more.

## THOSE CANX FRENCH.

France has just been engaged in a spectacular murder trial, which has resulted in much excitement and several challenges to duels, when the mobilization of German troops and the attack on Russia brought the nation to a crisis. And then, when it might have been expected that the country

would go wild with excitement, there was shown a calmness, a caution, a self-restraint, which impressed the world as admirable.

There is a good deal of talk about Latin excitability and Latin froth, but it is doubtful whether any nation could have shown greater poise than France on the verge of war. England is supposed to be a model of self-restraint, and England was no more frenzied than France. The truth is that the foreign observers most familiar with the French people have commented on the fact that French excitability is mostly on the surface, and that no people is more canny or has itself better in hand. "Paris," said Victor Hugo, "has been dipped in good sense."

A French man rarely shows the reckless disregard for personal or property rights exhibited in England or the United States. There is no lynch law in France, and there are comparatively few crimes of violence there. For instance M. Taine once made an inquiry which disclosed that there were forty-two cases of highway robbery in France to 738 in England in a year.

Even in the tremendous upheaval of the French Revolution, when the people were cleaning up the accumulated abuses of centuries, there was an immense amount of beneficent legislation put through, and John Morley has pointed out that art, letters and society flourished as gaily as under the old regime. The galleries of the Louvre were opened with ceremony in 1793, and the Revolution produced a school of painting.

England and American always have been much more conservative than France, much more apt to compromise. This means that they are really governed by sentiment to a larger extent than France. The French never have been mystics. They always have had a passion for lucidity, for ideas, for the intellect. One of the keenest observers of the French people, W. C. Brownell, in his penetrating book on "French Traits," explains the excesses of the reign of terror as really due to this passion for reason. "Given an enthusiasm for ideas which excludes a care for personality," he says, "an unqualified belief in reason unmodified by any sentimental conservatism whatever, and a subordination of the sense of individuality and individual dignity and responsibility, and it is easy to see how the cruelty and savagery of the Revolution is to be explained."

English and American statesmen have seen the roots of the present in the past, and have endeavored to make improvements based on existing conditions. The French idea has been to make a clean sweep in reforms, without compromise. If a program was regarded as reasonable by the party in power, it desired to put it into effect without regard to the prejudices of the opposition.

Insipide of the superficial ebullitions, like those in the Caillaux case, the French character is the reverse of hysterical. A country where marriages are arranged on the basis of reason, in accordance with the mature views of the parents of the young people, and where romance is ruled out as foolish, is not a country to lose its head in time of war.—Kansas City Star.

# SAN FRANCISCO APPROPRIATES MONEY FOR AUGUST.

**RESOLVED,** That the following amounts be and the same are hereby set aside, appropriated and authorized to be expended out of the hereinafter mentioned funds for the following purposes, to-wit:

For repairs, etc., to sewers during month of August, 1914, \$12,000.

For paving, repaving, repairs to streets, etc., during month of August, 914, \$60,000.

For expense, maintenance, cleaning, sprinkling and sweeping streets, for August, 1914, \$23,500.

For special emergency sanitary measures by Board of Health and U. S. Marine Hospital service for August, 1914, \$1,250.

For general repairs to public buildings, except school buildings, during August, 1914, \$1,000.

For repairs to Police Stations during August, 1914, \$500.

For repairs to Fire Department buildings during August, 1914, \$1,500.

For resurvey of homesteads during month of August, 1914, \$3,000.

For construction, reconstruction, repairs, etc., of School Department buildings, during August, 1914, \$8,000.

## PERMITS GRANTED TO STORE BENZINE, ETC.

**LAUNDRY**—Peter Lafon, at 659 McAllister street.

**DYEING AND CLEANING WORKS**—Thoms Tippet, at the northwest corner of Eighteenth and Hampshire streets; also to store not more than 300 gallons of benzine.

**AUTOMOBILE SUPPLY STATIONS**—Omen Oil Company, at the northeast corner of Valencia and McCoppin Sts.; also to store 900 gallons of gasoline in three tanks.

**OIL STORAGE TANKS**—L. E. Hanchett, at 2006 Washington street, 1500 gallons capacity.

**Lundstrom Hat Works**, on south side of Jessie street, 25 feet west of 7th street.

**Max A. Dabner**, at 1155 Hayes street, 1500 gallons capacity.

**A. Delmonte**, at 450 Broadway, 800 gallons capacity.

## NOTICE TO ARCHITECTS.

### COMMONWEALTH OF AUSTRALIA.

Department of Home Affairs.

Office of Federal Capital Director of Design and Construction.

MELBOURNE, 20th June, 1914.

The Australian Government announces an international architectural competition for the purpose of selecting the architect of the Parliament House and possibly incidentally additional architect for other government structures of the new Federal Capital City, Canberra.

Only tentative outline sketch designs for the building are requested, and eight (8) prizes are offered aggregating £6,000, the first being £2,000, in addition to commission for service at the scale of the Royal Institute of British Architects.

Designs may be submitted in either Melbourne or London before 31st

March, 1915, and will be judged by the following jury of architects:

George T. Poole of Australia.  
John J. Burnet of London.  
Victor Laloux of Paris.  
Otto Wagner of Vienna.  
Louis E. Sullivan of Chicago.

Whose decision will be final.

A programme will be issued to any practicing architect on application to the High Commissioner for Australia in London, Works Departments of British Colonies, or British Embassies at Berlin, Madrid, Paris, Rome, St. Petersburg, Stockholm, Vienna, Washington, from who also copies of text in French or German may be had on request. Copies in Esperanto may be obtained from the High Commissioner or from the Esperanto headquarters at Geneva.

The importance of this event is not to be measured by that of the foremost building of the Commonwealth, but by the opportunity to establish an architectural standard not only for the future seat of government in Australia but for a great new Democracy of scope, scale and modern advantages as well as the climatic conditions differing radically from any prototype in Europe or elsewhere.

A copy of the programme may be seen at the office of this journal.

## THE SURVEYOR GENERAL.

W. S. Kingsbury, who now wishes to succeed himself as California's Surveyor General, has the reputation of being the first Surveyor General in some forty years or more who has had the backbone to stand for the rights of the people and to kick the land sharks from the State Land Office. Before the election of Kingsbury, citizens who wished to purchase lieu school land had to pay tribute to the land ring.

General Kingsbury was born in the City of Oakland, where he attended the public schools. He moved to Los Angeles and took up the study of civil engineering, becoming prominent in his profession, being Chief Deputy City Engineer when first elected State Surveyor General as the nominee of the Republican and Union Labor parties.

When General Kingsbury took office he found that the records of the State Land Office has been prostituted for the benefit of the "land ring." A million and a half acres of lieu lands alone had been controlled by these "land attorneys" as they styled themselves, the State receiving only \$1.25 an acre, the "land attorneys" getting fancy prices. General Kingsbury secured the passage of a law whereby these lands are sold to bona fide applicants only and bring prices ranging from \$5.00 to \$10.00 per acre, the money going to the public schools instead of to the sharks.

When an editor "dolls" up, says Hondo Murphy of Tepeka, he combs his hair, if any, and changes his pencil from his hip pocket to his vest pocket.

A Los Angeles inventor has patented a full-sized gas range that folds into a wall recess when not in use.

What is said to be the largest wireless transmitting station in the world recently was completed near Carnarvon, Wales.

A flatiron for travelers which takes up but little room is hollow and can be filled with alcohol for heating it quickly.

Government scientists in the Philippines are investigating the properties of an oil bearing nut which grows prolifically and from which the natives extracted an illuminant before the introduction of kerosene.

#### WILL PURCHASE EQUIPMENT FOR GYMNASIUM.

PETALUMA, Sonoma Co., Cal.—At the last meeting of Company K, of the National Guards of California, it was decided to purchase a complete equipment for their gymnasium at this place.

#### TO PURCHASE VESSELS.

SAN JOSE, Santa Clara Co., Cal.—Reports received from San Jose, state that the President of the San Jose Terminal Railway is arranging for the purchase of a fast passenger steamer, a car barge and a tug of 500-horse power.

#### THE TWO CANALS.

The Suez canal, 163 miles long 28 feet deep, requires 17 hours to pass through it. It cost \$127,000,000 to construct. In 1910 4533 vessels passed through it. Toll charges are \$130 per net ton for vessels with cargo, 82 cents per net ton for vessels with ballast and \$1.93 for each passenger 12 years or over. The receipts exceed \$25,000,000 yearly. The British government owns a majority of the stock.

The Panama canal is owned by the American people. It cost \$375,000,000. It is 51 miles long and 41 feet deep. Vessels will pass through in 12 hours. The toll rate on loaded craft will be \$1.20 per net ton. It is estimated that the receipts the first year will be at least \$12,000,000 and the cost of operation \$5,000,000.

Events should move more rapidly now in the war zone. The main body of the German army, the greatest fighting machine the world has ever seen is now in motion and the whole fate of Germany is practically dependent upon its supposed irresistible force. It remains to be seen whether or not it will accomplish what the military party of that country expects. They have a sublime confidence in their army. It is shown in the contempt they have exercised for other people in the present crisis, and they expect to oust their enemies by a movement so swift that the other nations will not have a chance to get together. That plan has not been successful so far. The great battle lines are now at the point of meeting. The next week will probably witness the greatest continuous battle of the world.

Now that the horrors of war are being demonstrated so that he who rides on the fastest aeroplane may read, the policy of President Wilson in Mexico is being vindicated and the blatant jingoists are strangely silent. Secretary Bryan has announced that the policy of "watchful waiting," so long derided and cartooned by the wise little newspaper men and the political philosophers, has proven successful and there is a peaceful succession of government.

News stands and book stores are displaying pictures of the rulers of the world as representing the heads of the different governments. Among them is President Wilson and an American can well feel proud that the electorate of this country has elected to the chief office of the nation a man who bears the high stamp of intelligence upon his face, compared to which the kings of Europe look poor in comparison.

It is certainly a travesty upon the civilization of which they boast that these monarchs are always photographed in military regalia, as if the chief business of kings was the old barbaric occupation of butchering his neighbor. Kaiser Wilhelm der grosse is usually seen with a tin helmet on his head and fierce curling mustache as representing the "war lord of Europe." And it is a fitting comment to say that the rule of kings belongs to that type of barbaric government that is founded on force where the common people are slaves and are fed by the hand of the monarch, while here every man can stand up in his God given right and say who shall represent him and whether or not his country shall go to war or what it shall do.

When one looks at the money that is paid these titled boncheads to wear a crown he can only hope that the present war will howl them all over, supplant militarism by common sense and free mankind from this thralldom of the dark ages.

## News In Brief.

CHICO, BUTTE CO., CAL.—Work is progressing with great rapidity on the highway, according to Superintendent Allen of the B. L. Burr Company, the general contractor doing the work.

Over six miles of the road, from the Tehama County line south, has been graded and surfacing operations with concrete will be started at an early date. Nearly four miles of the road from Sandy Gulch north has been graded and is ready for the concrete work.

TAFT, KERN CO., CAL.—Bids will be opened here on August 24th for the construction of a one-story frame school building for the Conley School District. All bids must be forwarded to W. S. Lierly, Box 24, Taft, Cal.

EUREKA, HUMBOLDT CO., CAL.—The Mercer-Fraser Company has been awarded the contract for the construction of a cable bridge across the Eel River at Fort Seward. The contract price is \$29,700.

HOLLISTER, SAN BENITO CO., CAL.—The Granite Rock Company of Watsonville has a \$50,000 contract for paving three blocks of Fifth street and ten blocks of San Benito street. Construction has already been started and will be completed in about three months.

ARBUCKLE, COLUSA CO., CAL.—The Arbuckle Improvement Co. has purchased a site here and work has been started in the erection of a large dance pavilion. The building will cover an area of 80 by 90 feet and will have a hardwood dancing floor.

SEATTLE, WASH.—According to statements made here a project which will require the immediate expenditure of \$15,000,000 and ultimately \$50,

000,000 is about ready for starting preliminary work.

The project is headed by A. P. Gillies located in the Henry Building at Seattle, who is representing the Bridge, Rail and Navigation Company. The first unit will include the two four-story docks 260x800 feet, and eight-story building covering an area of 500x500 feet, and a hotel and office building 260x500 feet and a tunnel under a number of streets which will be about three miles long. Plans have been prepared by Howells & Stokes, architects of New York and Seattle. Although no confirmation has been given it is thought that the contract will be let to Grant Smith & Co. of Seattle.

CHICO, BUTTE CO., CAL.—George E. Duke, of the U. S. Feature Film Company, has been in this city looking over the ground for which to locate a permanent studio. Should a site be selected the company will at once start the erection of a number of buildings.

SANTA CRUZ, SANTA CRUZ CO., CAL.—At a meeting held here for the purpose of discussing the practicability of a road through San Mateo and Santa Cruz counties to California Redwood Park, a resolution was adopted calling on the San Mateo County Board of Supervisors to appropriate sufficient funds for the construction of a road from Pescadero to connect with the State Highway now being built into the park from Saratoga.

The estimated length of the road is nine miles and the cost \$2,000 a mile. Most of the road is in San Mateo County.

MARTINEZ, CONTRA COSTA CO., CAL.—The Supervisors here are considering the plans and specifications for the three bridges to be constructed along the State Highway between San Pablo and Pinole. All structures will be of steel and concrete construction and will span San Pablo, Wildcat and Garitty Creeks.

PORTOLA, PLUMAS CO., CAL.—The work of rebuilding the dam of the Grizzly Creek Ice Company, a Nevada corporation, on Grizzly Creek, has been started and the contractors have agreed to complete the structure before the winter sets in. The dam will be of concrete construction.

WILLOWS, GLENN CO., CAL.—Luther C. Stiles, County Engineer, has appealed to the State Engineer to call on the United States Government at once to dredge the Sacramento River channel at the Butte City bridge this fall before the rains set in.

SANTA CRUZ, SANTA CRUZ CO., CAL.—In his report to the city council, Superintendent Brower of the municipal wharf construction stated that only 336 feet must be completed to finish the structure. Out of the 455 piles that arrived only eight were rejected.

The driving at the present time is very satisfactory, from 30 to 130 blows being necessary to obtain nineteen feet of penetration. Deck work has been delayed somewhat due to the non-arrival of the materials.

RICHMOND, CONTRA COSTA CO., CAL.—A new fire house thoroughly equipped to be located at Tenth street and Chanslor avenue is the recommendation of fire companies of the Santa Fe district. The recommendation is now in the hands of the city council for consideration.

WILLOWS, GLENN CO., CAL.—Quint School District has let a contract to E. R. Hale for the erection of a new

school building of two rooms. It will cost \$1,887. Work on the structure has been started.

**SUISUN, SOLANO CO., CAL.**—At the second annual banquet of the Chamber of Commerce the matter of a \$10,000 school bond election was discussed. Rev. F. Washburn, on behalf of the Woman's Club, suggested that a public park and playground be provided. A meeting will be arranged at a later date to discuss the issuing of the bonds.

**SANTA BARBARA, Santa Barbara Co., Cal.**—Another big section of this city's sewer system is now under way. Contractor Pendola has put a crew of men to work to rush to completion the installation of the Myrtle avenue, Solo and Rancheria street sewer, a six-inch sewer system, which is to flow into the Anapamu street sewer line. The new sewer will drain the rapidly growing section of this city on the west side.

**PETALUMA, Sonoma Co., Cal.**—Word has been received by the County Supervisors from the State Highway Commission stating that they were ready to advertise for bids for road work from Petaluma Creek to Ignacio and the construction of a steel bridge over Petaluma Creek at Black Point and asked the Board to deposit its \$35,000 contribution with the State Treasurer.

**RED BLUFF, Tehama Co., Cal.**—All bids for the cell work in the proposed county jail were again rejected by the Board of Supervisors and new bids will be taken for the work on September 10th. This is the fourth time bids have been rejected on the same work. The difference between some of the first bids and the last was nearly \$6000.

**STOCKTON, San Joaquin Co., Cal.**—The Board of San Joaquin County Supervisors has decided to improve McKinley avenue to French Camp. County Surveyor Quail has been instructed to prepare plans and specifications for grading and graveling the road. It is expected that by the improvement of McKinley avenue much travel will be diverted from the narrow and the high French Camp toll road and the necessity of building a rail fence along the toll road will be averted. Plans and specifications have also been ordered prepared for the grading and graveling of the Jack Tone Road from the Linden road to the Tokay Colony school house. The work will cost about \$25,900.

**MILL VALLEY, Marin Co., Cal.**—The new Tamalpais dam of the Marin Water and Power Company is now under construction and work is progressing very rapidly. A crew of men are now at work erecting bunk houses, mining tunnels and hauling lumber. The new dam and pipe line, when completed, will cost in the neighborhood of half a million dollars. It is expected to have the work completed in time to catch the first fall of the rain season. At the present time a tunnel is being run under the old Fairfax road in order to tap the center of the lake with a pipe line, to run down into Phoenix Gulch and connect with the 18-inch main at that point.

The dam will be 100 feet high and 650 feet in length and will hold about three billion and a half gallons of water. It covers over 650 acres of ground, and will be the largest dam on this side of the bay.

**SACRAMENTO, Cal.**—The Advisory Board of the State Engineering De-

partment has recommended the erection of a water tower to cost \$2,776 on the grounds of the State Normal School in Chico. The tower will contain a water tank for the use of the school.

**SACRAMENTO, Cal.**—Twenty-two thousand dollars worth of building work is to be done by the Standard Oil Company at its big storage plant near Guthrie's Station. Of this sum \$13,000 will be used for the construction of a new tank and the remaining amount will be expended in making additions and changes on the office building.

**WASHINGTON**—Secretary of the Navy Daniels has announced that on or about August 1st he will advertise for bids for the building of three dreadnoughts, including the one to be available upon the receipt from Greece of the payment for the Mississippi and the Idaho. One of the vessels will be built at the New York Navy Yard. The plans of all three will be similar to those of No. 29. Until names have been selected the three new ships will be known as Nos. 40, 41 and 42.

**CORODOVA, Alaska, July 8.**—Surveys of the possible routes for the government's railroad in Alaska are in progress in this vicinity today. Stakes have already been driven at Chitina by a reconnaissance party under Henry Day. The route is being surveyed from Chitina, where the Fairbanks trail leaves the Copper River & Northwestern Railroad to the Matanuska coal fields.

**RICHMOND, CAL.**—Petitions for the securing of signatures to put an initiative on the ballot in November to provide for a \$1,000,000 bond issue for the establishing and maintenance of a series of sanitariums, dispensaries and hospitals for the prevention of tuberculosis and the care of persons afflicted are being circulated by the State Board of Health and the Tubercular Board of that body.

**WASHINGTON**—The Commerce Department have published figures showing America's exports exceeded its imports in the past year by \$653,000,000.

**MODESTO, Stanislaus Co., Cal.**—The Engineer of the Modesto Irrigation District will receive competitive plans and specifications for a structure at Gasburg Crossing on the Main Canal of this District, until July 31st. The type of the structure may be either a steel siphon of 16 feet diameter, 750 feet long, a steel or concrete flume structure of the same length with an aqueduct cross-sectional area of 220 square feet. The structure may be designed in accordance with specifications which may be had from the engineer of the District. A reward of 3 per cent of the cost of the completed structure will be paid to the successful designer in the case of a steel or concrete flume and a reward of one per cent in the case of a steel siphon.

**SUSANVILLE, Lassen Co., Cal.**—The Supervisors of Lassen County have voted to buy \$200,000 worth of State Highway bonds. This action was decided upon conditional upon the State Highway Commission expending the money in the construction of fifty-two miles of highway in Lassen County.

**BENICIA, Solano Co., Cal.**—The first work of the new Benicia Chamber of Commerce is the enlisting of influential organizations in an effort to have the proposed \$200,000 appropriation for a store house for the Benicia Arsenal included in the Senate Civil Sundries Bill. Many prominent clubs and orga-

nizations have pledged their support in the movement among whom are the San Francisco and Oakland Chamber of Commerce and several clubs in Stockton, Vallejo, Sacramento and Fresno.

**WENGLER, Shasta Co., Cal.**—The tunnel of the Mt. Shasta Corporation is now in over a mile, counting the aggregate distance dug at the two ends. The tunnel, when completed, will be about seven miles long and will be used in conveying the water from the Pit River to the company's power site which will be one of the greatest developments in the state.

**LASSEN, Cal.**—Bids will be received by the Board of Trustees of Lassen County until July 11th, for the construction of septic tank at the Lassen County High School grounds. Plans and specifications can be secured from the county surveyor.

**CHICO, Butte Co., Cal.**—The Northern Electric Company will at once begin the complete re-ballast of its entire roadbed and will spend about \$75,000 on the work.

**AUBURN, Placer Co., Cal.**—E. B. Quigley of the Black Canyon mine at Westville is now constructing a 15-mile power line from Alta to Westville. This is one of the improvements needed in this section and will be a big boom to the mining industry of the Upper Forest Hill divide.

## THE CAMPAIGN AGAINST JOHNSON.

What has become of the cry of "freak legislation" that was raised so vociferously for a time against Governor Johnson. The wall has suddenly been stifled. Fredericks, Keesling and the rival candidates for governor dare not say they would repeal a single bit of Johnson legislation. Taking the concerted cue of the Santa Barbara and San Diego conferences Johnson's opponents are conceding that it has all been beneficent legislation, and they are now trying to rob him of the credit by saying the Republican party did it.

The money "barrel" appears to be open in the Fredericks and Keesling camps. Keesling's campaign manager is said to receive \$500 a month.

In his Fresno meeting Neylan replied that the Taft supporters could easily have placed Taft's name on the ballot by petition, as the Progressives did for Roosevelt.

The fact was that the Taft petition had been signed and was ready for filing when De Young of the "Chronicle" Otis of the "Times," Spreckels of the San Diego "Union," with George Patton of the old S. P. political bureau, former Governor Gillett, Judge Henshaw and others decreed that Taft should not go on the ballot in order that the Republican vote could be thrown to Wilson. Defeat of Roosevelt and Johnson was their first consideration.

The Sacramento "Union," non-Partisan, points out that S. Fred Hogue, campaign manager for Fredericks in the north, was formerly one of Patrick Calfoun's right hand men in San Francisco.

The Progressive State Headquarters offers a reward of \$500 for a correct solution of the mystery of why nine aspirants for governor of the Republican and Democratic parties are making a concerted attack on Governor Johnson, aided by the open columns of

### SEALED PROPOSALS.

#### NOTICE TO CONTRACTORS.

#### PANAMA-PACIFIC INTERNATIONAL EXPOSITION.

SEALED PROPOSALS will be received by the Buildings and Grounds Committee of the Panama-Pacific International Exposition Company at Room 213, in the Service Building, Fillmore and Chestnut Streets, San Francisco, California, at 9:00 A. M., Tuesday, September 1, 1914, for Constructing the Scott Street Entrance, in accordance with plans and specifications on file in the office of the Director of Works.

Each proposal must be accompanied by a certified check payable to the order of the Panama-Pacific International Exposition Company in the sum of ten (10) per cent of the amount bid, or the same will not be considered. When the award of contract is made all checks will be returned to the respective bidders, except that filed with the accepted proposals or bid, which check will be returned upon the successful bidder signing the contract and filing the required bond. A bond in the sum of fifty (50) per cent of the contract price will be required for the faithful performance of the contract; the surties thereon must be satisfactory to the Buildings and Grounds Committee of the Panama-Pacific International Exposition Company.

Progressive payments will be made. The right is reserved to reject any and all bids and to waive technical defects if in the interest of the Exposition Company.

Plans and specifications for the work may be obtained from the Director of Works, Room 207, Service Building, Fillmore and Chestnut Streets, San Francisco, by depositing \$10.00, which amount will be refunded to contractors submitting bona fide bids. All persons taking out plans and failing to submit bona fide bids will forfeit the deposit of Ten Dollars to the Exposition Company.

By order of the Buildings and Grounds Committee.

WILLIAM H. CROCKER,  
Chairman. (\*)

### STATE OF CALIFORNIA, DEPARTMENT OF ENGINEERING, CALIFORNIA HIGHWAY COMMISSION.

#### NOTICE TO CONTRACTORS.

SEALED PROPOSALS will be received at the office of the California Highway Commission, 515 Forum Bldg., San Francisco, Cal., until the times hereinafter noted, at which times they will be publicly opened and read, for construction in accordance with the specifications therefor, to which specification reference is made, portions of State Highway as follows:

Until 11 o'clock A. M., August 31, 1914, Colusa County from Berlin to Colusa Junction (H-11-Col-7-B), about 12.6 miles in length, to be built of Portland cement concrete.

Yuba County from the southern county boundary to Morrison's Crossing (H-11-Yub-3-A), about 2.3 miles in length, to be built of Portland cement concrete.

San Luis Obispo County from Atascadero Creek to Robles (V-S-L-O-2-B), about 10.0 miles in length, to be built of Portland cement concrete.

Kern County from the southern county boundary to a point about 2 miles south of Rose Station (H-Kern-A), about 10.7 miles in length, to be graded.

Orange County from Irvine to Santa Ana (H-11-Oran-2-C), about 7.4 miles in length, to be built of Portland cement concrete.

Until 2 o'clock P. M., August 31, 1914, Sacramento County from Folsom to the easterly county boundary (H-11-Sac-11-A), about 6.8 miles in length, to be built of Portland cement concrete.

Solano County from Vacaville to Batavia (H-11-Sol-7-D), about 8.2 miles in length, to be built of Portland cement concrete.

Santa Barbara County from Divisadero Creek (S-B-2-A), about 3.6 miles in length, to be built of Portland cement concrete.

Santa Barbara County from Stony Creek to El Capitan Creek (V-S-B-2-A&1), about 10.2 miles in length, to be graded.

Los Angeles County from Casta School to Section 17, T. 6 N., R. 1 W., S. 1 E., M. 1, H-11-L-A-4-B), about 12.8 miles in length, to be graded.

Plans may be seen, and forms of proposals, bonds, contract, and specifications may be obtained, at the offices of the Division Engineers at the offices of the Division Engineers at Los Angeles and San Francisco, and at the office of the Division Engineer of the State Highway Commission. The Division Engineers' offices are located at Willets, Dunsmuir, Sacramento, San Francisco, San Luis Obispo, Fresno, and Los Angeles.

No bid will be received unless it is made on blank form furnished by the Commission. The special attention of prospective bidders is called to the fact that the blank form must be filled out in the blank form of proposal, for full directions as to bidding, quantities of work to be done, etc.

The Department of Engineering reserves the right to reject any or all bids or to accept the bid deemed to be the best interest of the State.

## Weekly Talks on Efficiency and Advertising

by Lloyd C. Comegys

### About Advertising In Dull Times.

Men have their good days and bad days. They feel better at times than they do at other times. Business is much the same. On the good days for the man or the good periods or times for business, there is a go-a-head spirit and energy which creates initiative and starts new work and enterprises. This accounts in degree why in good times there is so much more work, activity and business.

And when the bad times come in business, the tendency is to slow down and consequently there is actually less business.

When there is less business the competition for it becomes keener and then not only does a businessman have to figure to fight harder to get new business, but he has to take into consideration the very great efforts that are being made by his competitors to take away from him the business that he already has.

It then becomes necessary to take advantage of every business aid and efficient advertising and selling methods are of the most valuable that may be obtained. This is necessary not only to gain new business, but as a part of protective and defensive tactics. Even if you gain no new business you must throw up bulwarks to protect the business you already have from the increased and more intensive competition.

Using more greatly efficient advertising and selling methods becomes insurance against loss of business, as well as investment to secure new business.

In dull times expenses are cut, every detail is watched more carefully and greater effort is made to produce results. Advertising and selling methods are not expense but an investment from which you figure and expect additional profit. As you do more work, do it more carefully and make every part of your business produce better results in hard times, so then should you use and work harder the modern business facility known as efficient advertising and selling methods. A proper scientific and careful utilization of efficient advertising and selling methods will redound to your financial benefit and once started will never be abandoned by you. It has been made to pay others in large amounts so why not you use it and get the benefits for yourself?

LOYD C. COMEGYS.

#### BRIDGE BUILDING WONDER.

Lehigh Valley Replaces Old Bridge  
With New in Five Minutes.

WENDE, N. Y.—In five minutes a 150 ton bridge was moved out and replaced by a 750-ton bridge on the Le-

high Valley railroad here. It took exactly two minutes to get the old bridge out of the way and two minutes and fifty seconds to roll the new one into place. Traffic was not interfered with the time chosen for the bridge moving having been carefully chosen in relation to the movement of trains.

The new bridge, which is a double-tracked single span structure over a hundred feet long, was already fitted with a ballasted track laid on a concrete foundation, and as soon as it was in place it was only necessary to join the rails to make ready for the passage of trains. The steel spans are ten feet deep and rest on rockers, so that trains passing immediately afterward were able to travel at full speed, as if there

#### SAM D. NORTH SALESMAN FOR ALAMEDA COUNTY.

Sam D. North, for many years Secretary of the San Francisco Builders' Exchange and for a time representative of The Paraffine Paint Co. in Eastern territory, has been appointed Salesman in Alameda Co. for Ruberoid and Malthoid Roofings and all P. & B. Lines, with headquarters at the General Contractors' Association in Oakland. Telephone Lakeside 54.

Mr. North has a host of friends on both sides of the Bay, who are glad to welcome him home.

Mr. North, in speaking to a representative of the "Builder," expressed his surprise and pleasure at the gigantic strides the cities about the Bay have made in the few years past, and that he was glad to be back in California.

Needless to add that P. & B. Lines will move faster than ever in Alameda Co., because Mr. North is a tireless worker.

#### GOLD BRICK BUILDINGS.

Skyscrapers, New York Finds, Are Not  
a Paying Proposition.

In New York's skyscraper belt, where the buildings run from one to fifty-five floors, their average height is under six stories and a half. Only half a dozen skyscrapers in all the city may fairly be called beautiful, though a larger number are admirable feats of engineering.

All the more noteworthy, then, is the calculation of the secretary of New York's height of buildings commission that, allowing for depreciation, the skyscraper's investment return is but 2½ per cent. Nor does this class of edifice profit the community more than the individual. The cost in light and air is supplemented by the fact that skyscrapers hurt sewers with their outflow and force the city to install a high pressure system for fire fighting.

One often hears arguments against the construction of high buildings based upon aesthetics. The most appealing argument is likely to prove that of dollars and cents. Unless as an advertising proposition (which need not greatly concern us) skyscrapers don't pay. New York has found this out rather expensively. The results of the experiment are respectfully referred to all those growing cities in which, as a matter of local pride, skyscraper construction is now so earnestly proposed.—New York Tribune.

#### EMPLOYERS AID IN "SAFETY FIRST" WORK.

The safety first movement, as represented by the State Industrial Accident Commission, is receiving hearty cooperation from employers. R. L. Birmingham, safety engineer for the commission, was recently taken on a 1500 mile auto trip by officials of the San Joaquin Light and Power Company to make suggestions for safeguarding their workmen.

In many other instances the Commission has been assured of the hearty support of employers in matters of accident prevention. They realize that to safeguard their workmen means money saved because fewer accidents will cause less compensation to be paid. In a great many instances the number of accidents can be reduced by more than one-half. It is also possible to secure a reduction in insurance rates by carefully safeguarding machines. In one case a refund of 25% was made to an employer in his costs of insurance, because he had made the necessary improvement recommended by the safety engineer of the Industrial Accident Commission.

Preparations are being made by the Commission to hold public hearings for the purpose of adopting and standardizing safety rules and regulations. At these hearings the Commission will meet with committees from the employers for the purpose of thoroughly going over the field with them. With their assistance such safety rules as are necessary to protect the lives and limbs of employees will be drafted and made into orders of the Commission, but no action will be taken without the co-operation of the employers.

#### GOLD-PLATED DOOR KNOBS!

In some of the \$25,000 a year flats on Fifth avenue, New York, the hardware is gold plated. Hinges, window brackets, fixtures, door handles, key plates, hinges are all treated with gold before being placed in position. All that is required to keep gold in line condition is a slight rubbing with a piece of dry leather. No polish is necessary and the woodwork near this yellow hardware is never tarnished.

Silver plating on white metal is used on the trim in the dining room. Nine coats of paint are spread on the walls of the dining rooms in these magnificent flats, the same care being used as with the paneling of a motor car. The walls, instead of being highly glazed, have a soft, silky finish.

#### MAKES VARNISH DRY QUICKLY.

Product from Wood Oil Tree of China  
Said to Have Had Revolutionary  
Effect on Industry.

Five million gallons of wood oil (also known as tung oil), made from the seeds of the wood oil tree, was imported from China last year, and the product is said to have had a revolutionary effect on the varnish industry of the United States. It has largely taken the place of kauri gum and has made possible the manufacture of a quicker drying varnish, which is less liable to crack than that made from kauri gum, and has been found of special value in waterproof priming for cement. The tree is climatically

adapted for cultivation in the Southern States, and the Department of Agriculture is distributing one-year-old specimens to bona fide experimenters.

### THE SOUTH AMERICAN-UNITED STATES SITUATION AS AFFECTED BY THE EUROPEAN WAR.

The European war has developed such a critical situation in South America that Director General John Barrett of the Pan American Union, in his capacity as an international officer—that is, an officer of all the South American countries as well as of the United States—makes the following urgent appeal to the commercial and financial interests of the United States:

"As the executive officer of the Pan American Union, the organization of the American republics devoted to the development of commerce, friendship, intercourse and good-will among them all, I appeal to the banking, shipping, manufacturing, exporting and importing interests of the United States to give at this moment every possible aid and attention to the critical South American situation brought on by the European war. I also ask the newspapers, in both their editorial and news columns, to give all publicity possible to this matter so that their constituents interested in this situation may be informed of their responsibility and opportunity.

"While everybody must profoundly regret that a condition of war and the sufferings of European nations engaged in a great conflict should in any way be exploited for the selfish gain of the United States, its business interests have a duty and responsibility in this crisis which must be met even if it may bring them vast material benefits. Looking at the situation in a thoroughly unselfish way, it presents demands upon the United States from South America which can not be neglected, but which, if responded to in the right spirit, will be enormously beneficial to South America and the United States alike. The problem divides itself into four heads—IMPORTS,

#### EXPORTS, SHIPS, AND LOANS.

"SOUTH AMERICAN IMPORTS. All South America is an enormous purchaser of the manufactured products of Europe. A large portion of this supply will be shut off during the next six months and possibly during the next year or two if the war continues. As many South American countries depend largely upon Europe for its absolute necessities, and a major part of these orders are placed but a short time ahead because of the excellence of the regular shipping facilities, they are now face to face with an immediate famine in the articles which they most generally import. According to the latest available figures collated in the Pan American Union, the ten South American countries Argentina, Bolivia, Brazil, Chile, Colombia, Ecuador, Paraguay, Peru, Uruguay and Venezuela—annually import products valued at \$961,000,000, of this there come from Europe products valued close to \$660,000,000. While Great Britain supplies products of this total to the value of approximately \$253,000,000, Germany, which is completely cut off by the war, supplies \$180,000,000, France, \$81,000,000, Italy, \$54,000,000, Belgium, \$47,000,000, Austria-Hungary, \$3,000,000, Netherlands, \$8,000,000; Switzerland, \$6,000,000, and

other European countries lesser sums. For comparison it can be stated that the average imports from the United States of these ten countries of South America amount to approximately \$155,000,000. Bearing the fact in mind that the commercial relationship of South America and Europe has been so well organized and systematized that seventy-five per cent of these imports are only ordered about a month or two ahead of their delivery, it can be realized, how soon the present supplies on hand in South America will be exhausted and that she must depend upon the United States to make up the deficiency. If the United States manufacturers and exporters will exert every effort to supply this emergency demand with out increase of prices, or unnecessary delay they will accomplish great permanent good for themselves and the South American business interests alike.

"SOUTH AMERICAN EXPORTS. The same compilation of figures shows that South America annually exports to foreign countries products valued approximately \$1,177,000,000. Of this total nearly \$700,000,000 go to Europe. Of these products Great Britain takes approximately \$270,000,000; Germany, \$151,000,000; France, \$104,000,000; Belgium, \$60,000,000; Netherlands, \$44,000,000; Italy, \$27,000,000; Austria-Hungary, \$22,000,000; with the remaining amount divided among different countries.

For comparison, it can be stated that these ten countries of South America export to the United States annually products valued at approximately \$250,000,000.

"With, therefore, their principal markets for their raw products temporarily closed against them, these ten countries are looking for a place to dispose of their accumulating stores, and if the importing interests of the United States, including the manufacturers of raw material, can relieve the situation by increasing their purchases they may save the South American business interests from a financial crisis.

"SHIPS FOR THE SOUTH AMERICAN TRADE. As nearly ninety per cent of the exports and imports of these South American countries are carried in German, British and other European bottoms, which are now withdrawn from the sea, all of their principal ports, like Rio de Janeiro, Montevideo, Buenos Aires, Valparaiso, Callao and La Guaira are in a state equal to that of a formal blockade. The majority of these vessels will be absolutely unable to operate for many months and possibly for several years unless the situation is quickly remedied. There is no limit to the sufferings that will come to these countries and ports if their facilities for sending out their exports and bringing in the necessary imports are cut off. In this crisis it is to be sincerely hoped that the bill now being passed by the United States Congress may be of great assistance in relieving the situation. That, however, can only point out the way. There must follow the placing upon the high seas to operate between the United States and the principal South American ports a fleet of vessels flying the American flag, and this can only be done by United States companies taking advantage of this act of Congress and carrying out the provisions of this bill.

"NATIONAL LOANS. Just as war was declared several of the principal countries of South America were negotiating loans in the European financial capitals. These loans are inspired by the pressure of local conditions and are absolutely necessary for the welfare of the countries concerned. For the present and probably for a long period it will be impossible to float such loans in Europe. Under the circumstances these governments will naturally turn to the banking and financial interests of the United States which heretofore have seldom subscribed for South American loans or shown much interest in them. By endeavoring to help out these governments in this crisis, they cannot fail to perform a great service to such governments but place themselves in a favorable position to obtain other loans in the future and favorable consideration from the governments concerned.

"In conclusion, it is gratifying to state that the Department of Commerce of the United States with commendable energy has already started an organization to relieve this situation, but far reaching results can only be accomplished by the direct action and interest of the entire financial and commercial interests of the United States; and if the Pan American Union can give information which will be helpful to those who may be interested, it will be glad to supply all the data within its power."

## Up and Down the Coast.

EXETER, TULARE CO., CAL.—Members of the State Highway Commission state that their decision to postpone the proposed \$1,000,000 bond issue for good roads is conditional only, and that final decision on the matter of the proposed bonds will not be made until the members have interviewed the officials of the publicity bodies in the various towns of the county.

WILLOWS, GLENN CO., CAL.—Following a meeting of the Supervisors, which was attended by many taxpayers, the Supervisors have signified their intention of co-operating with Butte County toward constructing a free ferry across the Sacramento River. The ferry will allow Glenn County residents easy access to Chico. The ferry will be constructed for permanent use.

SACRAMENTO, CAL.—An expenditure of \$146,958 is to be made in State Institutions. The items ordered by the Advisory Board to the State Engineering Department are as follows: Agnews State Hospital, \$32,977; California School for Girls at Ventura, \$55,000; Sonoma State Hospital, \$2,500; Napa State Hospital, \$2,820; Stockton State Hospital, \$19,540; State Capitol Building, \$3,200; San Quentin Prison, \$521.

MARTINEZ, CONTRA COSTA CO., CAL.—The Hyde-Hodges Company has commenced the work of piling along the city wharf for the platform 100x150 feet for the Standard Oil Company. The firm will also construct a float off the end of the wharf where oils may be supplied to river craft.

GRASS VALLEY, NEVADA CO., CAL.—The Trustees of the Free Public Library have made application to Andrew Carnegie to erect a library building here.

## Editorial Comment.

Persistent reports state that Zeppelin air ships are dropping bombs in the night upon the city of Antwerp. The dispatches state that the bombs are dropped upon non-combatants and that generally women and children have been slain. This is a barbarous practice and can have little effect unless it be to keep the people in a constant state of fear. It is hardly probable that a general protest of the civilized world would have any effect if it is true as Germany is at war with all the world except the United States and South America. This seems particularly diabolical, however, when we consider that the Belgians are defending their country from a hostile and overpowering foe.

To leave unpunished the bold taking of immense sums from the treasury of a public service corporation would be to make a mockery of the law, and an injustice of the imprisonment of the poor wretch who purloins a loaf of bread to appease a gnawing hunger.

The evidence shows that Patrick Calhoun, under a blanket authorization, took over a million dollars in one case alone from the treasury of the United Railroads, leaving therefor nothing more than his note—which is now appraised at the value of one dollar.

The loss of this money and other large sums meant that the railroad was prevented from making the improvements in the street-car service demanded by the growing needs of the city.

The prosecution of Patrick Calhoun should be pushed speedily, to insure a just punishment of such brazen burglary on a wholesale scale.

The murder of the artist at Carmel by the Japanese seems to have been a crime of most revolting nature. This should afford an excellent opportunity for Fremont Older to show how society had wronged the poor Japanese boy and that he was in no wise to blame.

Newspaper reports give the message of the Emperor of Germany to his sons, congratulating them upon their success in the war and bestowing upon them medals and emblems for bravery. It was like a chapter from the history of the Middle Ages. For surely not in the present scheme of things should the God of our fathers be appealed to in a useless war and not in this most sanguinary conflict which seems to have no shadow of excuse.

The Nobel peace prize might be something worth a monarch's striving for. The credit for the discovery of some remedy for a dread disease would

be something worth striving for. The discovery of a new element, the perfection of a great invention adds to the world's progress and stamps those who contribute them to humanity as the great benefactors of the race.

The result of war has never left a really great name. The present conflict may weave a wreath for some victor's head, but it will make of the life blood of unnumbered thousands of slaughtered lives and be the emblem of sorrow of countless widows and orphans. What manner of men seek the bubble fame in the cannon's mouth. Where military rule exists political liberty cannot be. It matters not whether the militarism be German or Russian or what not, the rule of the soldier always strikes at the arts of peace and is inevitably opposed to popular rule.

Europe has long been an armed camp. It has cost the governments and particularly Germany millions of dollars annually to maintain its army spies. Every man must serve in the army or navy, and he must be ready at a moment's notice for actual warfare. Every other nation must do likewise or it is likely to be wiped off the map by an overwhelming and sudden attack as the present action indicates. Intrigues are founded on treachery and false oaths, and treaties are so much paper to be burnt up when the military monarch gets it into his head that he is called upon by God to rule the world.

Certainly it is a strange world, and one wonders whether or not the brutal club of militarism is going to destroy science and art and the progress of the last hundred years, and turn the clock back to the days of barbarism. One reads of the awful slaughter of the contesting armies; men killed so fast that they didn't have room to fall but remained in a standing posture, propped up by their dead comrades in arms; of cities depopulated and the gutters running red with the blood of slaughtered humanity. And when one realizes that this blood is of the bravest and the best of men taken from the various walks of life, many of them of far more brains and capacity than the monarchs who have brought on this brutal and awful war, it is impossible to believe that those responsible can invoke the blessing of a just God, or can have the effrontery to claim to be the followers of the Prince of Peace.

No doubt the war will be a long and bloody strife. From the smouldering ruins of depopulated cities will come the cry of want and famine, and from every fireside the lamentations for slaughtered kinsmen. And if from out the ruin there comes a bright day, the overthrow of militarism, and the substitution of constitutional government, it is to be hoped that the sacrifice, awful as it is, shall not have been made in vain.

# A City's Waste.

By J. E. Crichton, M. D.

The frequent statements made by sanitarians and magazine writers as to street departments being the municipal housekeepers are far from being entirely correct. A street department, as a matter of fact, keeps the halls and corridors of your city clean, but it is to the sanitary division that your citizens look for the real house-keeping which modern civilization now demands. In order to know whether municipal housekeeping is being properly supervised or not, it is necessary for one to approach a city through its back yards, through dark alleys and by-places, rather than to find entrance through the marble gate or over the well-kept lawn and shaded driveway.

Within a few years every intelligent woman has come to regard her kitchen as the most important part of her entire home; a room which at all times must be kept scrupulously clean. It should not only be clean, but it should contain modern plumbing; it must be well-lighted and splendidly ventilated, and it should be so constructed that it may be free from those things which annoy and disturb. It is no longer the parlor and spare bed room which demand unceasing attention, but it is the kitchen which now stands paramount in the economy of the home.

The garbage division of our municipalities, then, is the department which is charged with the proper hygienic condition of a city to the greatest degree. The true garbage which comes from thousands of homes, with the vast quantities of rubbish and waste of all kinds and descriptions known to civilized man, must be collected and handled expeditiously, and without unnecessary annoyance or cost. For ages urban communities have regarded the garbage man as a person upon whom to vent their morning "grouch," a man upon whom it is not necessary to lavish any considerable respect; a person, who, on account of the peculiar work which he does, can justify no word of kindness or courtesy. And yet there is no vocation in a city that is as important as general health work, and more particularly the collection of waste or garbage of one kind or another which so quickly jeopardizes life—that thing held most precious both by the barbarian and by the man of civilization.

The waste of a city is both solid and liquid. Liquid wastes are at times difficult of disposal, and as fine a brain must be brought to this question as to any other branch of sanitary engineering. The liquid wastes, carrying the most virulent poisons of which we know (the excrements from the human body), must be disposed of in a reasonable, proper manner, or a city cannot thrive; it cannot increase in population, in financial strength and moral influence. Destroy all discharges from the human body and contagion would almost cease. Five hundred thousand people now destroyed annually in the United States with preventable diseases, would live to grow to manhood and womanhood to enrich our country with their energies and productive

powers. And yet there is brought to the subject of garbage collection and disposal, and to the subject of the disposal of liquid wastes, a dearth of knowledge surprisingly shown in the treatment of such a vital question in nearly every city and hamlet on this continent. Strong language can be used at this point when we state that the ignorance displayed by the ordinary city in the treatment of these wastes is not only lamentable but without excuse. It is our opinion that more millions of money have been absolutely wasted in this country in dealing with this question than upon any other single public utility when compared in either case to the amount really necessary.

In order that our cities may benefit from the little knowledge which I have been able to acquire during the past twenty-two years of municipal work as chairman of the health committee of my home city, or as its commissioner of health, let us take up the question of liquid waste disposal first and see if there are not some points which may be of real and immediate value to the many villages and cities in this state. We know that in the state of Washington, outside of a few cities, comparatively little has been accomplished along these lines, and that now is the time when correct ideas, properly applied, will not only mean the wise and economical expenditure of millions of dollars, but will largely result in the saving of human life and in greatly lessening the amount of sickness and suffering.

There are several modern and reasonably efficient and safe methods of disposing of liquid waste, generally called sewage. Not all the methods which are now being attempted have proved successful, and we know that some of these methods will likely result in failure, and yet several methods are important steps forward in the disposal of these impurities. A normal individual can meet and overcome germ life when not too abundant; so direct sewage connection with the ocean is, in my opinion, of all methods the most safe and economical. The enormous dilution and oxygenation, which the mind of man cannot comprehend, the effect of the chemical constituents of salt water upon all forms of putrefying substances, make this method the most feasible and incomparably the best method of disposal. Sewer connection with great lakes necessarily must be occasionally recommended, and yet, frankly speaking, all sanitarians must admit that there is some real danger which exists even in well selected instances on account of peculiar and unexpected water currents, and on account of the influence of continued and heavy winds. Of course we are speaking of properly constructed sewage systems, and we are not attempting to deal with improperly conceived plans, which would be a failure under almost any conditions. Flat sewers, or sewers the outflow of which is not properly stationed at sufficient distant off-shore, or sew-

ers debouching into shallow water, or where there is likely to be danger at the outfall from insufficient knowledge of natural laws, are to be avoided. Great rivers may receive much sewage without much real danger, but certain proportions must always hold—no more than three parts of suspended matter in 100,000 parts water is safe. Small rivers and streams are always dangerous when so used. The oxidation and bacterial treatment of sewage covers a field of usefulness which we believe will be of the greatest possible use to many inland cities. Sufficient dilution of sewage in cities situated too far distant from water courses of great size and adaptability, or lakes or ocean, can not be thought of. In river or lake disposal systems oxygenation is a considerable factor as is the volume of dilution in determining the advisability of such disposal.

In this paper we can only touch upon the methods which are now in operation, and must leave the details largely to the counselors and sanitarians in the different communities within our state. Suffice to point the way which may be followed by our cities and towns in deciding what shall be their most permanent method of ridding themselves of this liquid poison which compels attention from the aristocrat just the same as it compels and demands it from the man who carries the hod, or from the man who carries the garbage from your cellars that your home may be kept wholesome and free from disease.

Oxidation of sewage by methods more or less complex means the bringing of sewage into close contact with oxygen and aerobic bacteria. There are several methods for producing this chemical change.

First, there is what is known as the trickling process, which means as ordinarily considered the trickling of sewage, mixed with water carrying oxygen, through fine sand. Dilution treatment means the introduction of sewage into large quantities of naturally aerated water containing the normal amount of oxygen. Then there is the method of irrigation on to lands, with the idea of, fertilizing same. There is a process of contact filtration and the different devices for filtering sewage. These depend not alone on oxidation, but upon bacterial action as well.

It is necessary to consider carefully the quantity of oxygen in the stream or in the waters in which it is desired to discharge sewage, and the first thing to know is whether, under natural conditions, the water is well aerated or not. In other words, does it contain the usual quantity of oxygen.

Living, moving bodies of water, existing either as lakes, oceans or rivers, are saturated with a substantially normal amount of oxygen. Oxygen is removed from all waters by the introduction of organic material. So, in selecting water, you must consider the amount of oxygen which has already been used for sewage destruction pur-

poses. We cannot speak fully on all the questions which enter into the selection of these most important and truly remarkable sewage disposal principles. It is not a question particularly intricate when the different methods are reasonably well understood. The occasion of failure so often recorded is because engineers and city councils do not take pains to know the difference between successful and unsuccessful plans.

You could not think of introducing large quantities of sewage into a small stream without the destruction of human life below. The quality of sewage is of vast importance and very frequently spells disaster if not carefully considered. Trade sewage often times stops all chemical and bacterial action. The strength of mineral acid like sulphuric, a very common content of sewage in manufacturing districts, at times, makes the methods of filtration and oxidation utterly useless. Cities and towns make serious blunders in not selecting sanitary engineers of known ability and broad experience before selecting their permanent sewage disposal methods.

Nearly all forms of sewage demand some particular method of treatment. The question of handling sludge, the heavy part of sewage, must have special attention, and the solution of the problem has now reached a stage where long experimentation is scarcely necessary. It is to be understood that no method has yet been introduced into practical operation which is a complete success. Clark, of Boston, one of the most eminent authorities on sewage disposal, has accomplished wonderful results both experimentally and practically. From his filter beds, the most eminent sanitarian in this country, during my visit to Boston last summer, drank of the effluent and still lives.

We are not attempting to consider what used to be known as chemical methods by the use of certain strong chemical agents. They have proved in many cases utterly worthless and excessively expensive.

We call the dumping ground where we are carrying on our special process a "sanitary fill." It is located within four hundred feet of fine homes in plain view. We spread out over a considerable area the daily supply of mixed waste and cover the same with a porous material, preferably the crushed clinker or slag from our incinerators. This kind of clinker is only produced in forced draft furnaces, and when crushed to the size of a hickory nut is full of voids and allows the greatest possible freedom of gaseous interchange which results in a very rapid attack upon organic material by the oxygen of the air. We have used coarse sand in some instances, but it is not nearly as satisfactory as the crushed slag or clinker. We believe that rather fine washed gravel would act about as well. Our desire has been to cover a sufficient area of ground, only two or three feet deep, so that the process of nitrification would be well advanced before going over the same area the second, third or fourth time at intervals of about every three to four months. It should be mentioned at this point that it is our aim to fill the tract of land upon which we are adapting this process to a given depth for parking purposes. As the gaseous disintegration

proceeds the whole bulk of the fill gradually subsides, and every three or four months we have it gone over the second and third time again. We have made within the past week an examination of this fill, which is now from eight to ten feet in depth, and have found the putrescible material substantially oxidized and destroyed. The sorted waste, on account of its character, is easily oxidized. If this process proves successful Seattle will have been at least among the first of all American cities to have provided a method of garbage or waste disposal almost ideally perfect. We cover our waste, you should understand, simply to stop all odors and so that the fill may present a better appearance. We cannot at this time know exactly whether our crushed clinker is the most valuable porous covering or not. Such seems to be the case now. If such is the case, as a matter of fact, then with out three incinerators in the central portion of the city where there is an immense garbage accumulation and much trade waste to operate same economically we have a permanent source of clinker supply. We would hardly attempt the making of a fill in this district.

Understand that in using the term waste we mean garbage and rubbish, and refuse, and everything else wasted by man and having for him no further value. In taking up the great division of garbage collection and the disposal, or more properly called waste collection and disposal, we find a field of municipal effort in which the most inexcusable blunders have been, and are being made. We find the municipal collection of waste in most every city given over to the political forces in power, and so far as the political parties themselves are concerned, the blunders are just as great in one party as another. Garbage or waste collection has been the pot of gold to be plundered by every "ward heeler" in substantially every city. Throughout the great American cities the systems of accounting are deficient: the methods of collection are in most instances different, and there is an entire lack of uniformity in methods or practice of waste disposal. Many cities, more than 250 in the United States, are attempting, or have attempted, some form of incineration. Substantially 60 per cent of these plants have proven absolute failures, and a considerable portion of those now said to be working satisfactorily would not be allowed in the city of Seattle by its present commission of health. There are, however, a few furnaces installed at the present time doing the work which justified their building. The Meldrum Brothers' furnaces in use in Seattle have been doing all that could be reasonably expected of them. The He-man type of furnace in Milwaukee seems to be doing its work well, as does the Fred Smith furnace in Portland. If city authorities would but use ordinary common sense in the incineration of their waste, and selected furnaces which are now operating satisfactorily in this country, an immense saving would result and a vast amount of trouble and annoyance would be saved the people. The successful incinerators, and by that we mean furnaces that burn the entire waste of a city unsorted and without the addition of any kind of fuel, are in every instance what are known as the forced draft

furnaces. The American furnaces, so far as my knowledge goes, with the exception of the Fred Smith, have been absolute failures in comparison. They will not burn unsorted waste, nor will they, as a rule, burn without the addition of artificial fuel. This statement is unqualifiably true, I believe. The thousand and one ingredients found in a ton of waste give but a faint idea of the other tens of thousands of things found. A pile of garbage certainly gathers to itself from the farthest corners of the earth queer and strange things which tax the minds of men to dispose of and destroy. Mixed with all this waste, rubbish and refuse are thousands of old mattresses, lounges, stoves, water heaters, old furniture, stove pipe, sheet iron and substances of every possible description. Mixed generously through this stuff is the usual and customary putrefying kitchen waste which so frequently cries aloud for destruction. This material, by the way, is the substance which makes it possible to obtain in our tax levy the necessary funds for the removal and destruction of substances really dangerous. Nine housewives out of ten will keep the telephone more than busy if there is failure to empty a garbage can full of decomposing apple and potato parings, intermingled possibly with a few shreds of beef or other meat scraps, turnips, cabbages or other farm products, while they will placidly sit idly by and allow a mattress, removed from a bed upon which has died a case of tuberculosis, typhoid fever, scarlet fever or diphtheria, to lie around the back yard, not appreciating the fact that in itself garbage is as harmless in the garbage can as it was when it appeared as food upon their tables; nor do they appreciate the fact that the mattress and rags, old sheets and wall paper and old carpet thrown about the back yard, upon which and around which their children play, are by far the most dangerous. How few American cities, indeed, collect such material with any regularity, if at all. Some cities collect this stuff but twice a year, and as a consequence such cities are not rendered as healthful as might otherwise be the case.

Before we pass to another form of waste disposal and the one which Seattle is operating under to a certain degree, and with the greatest possible satisfaction, in order that we may not be misunderstood, we desire to state that true garbage or kitchen waste, while not in the slightest degree dangerous per se, no matter how evil it smells, yet affords feeding grounds for flies and rats and breeding grounds for the former. The fly is one of the most dangerous insects known to man, and ranks, in its causative influence in the production of typhoid fever, diphtheria, tuberculosis, scarlet fever and other fatal diseases as do the special forms of mosquito life in the spread of yellow fever and malaria; as does the tick, the causative agent of mountain fever, or as the hook worm, the causative agent of the deplorable hook worm affliction, as does the tsetse fly in causing sleeping sickness, or as does the rat flea in communicating bubonic plague to man.

The complete destruction of the waste of a city by nitrification has been attempted in Seattle for more than eight months last past and has

(Continued on Page 10.)

Classified according to Character of Work

## APARTMENT HOUSES.

**SAN FRANCISCO**—Apartment house, 1 story and base, Class C, \$17,000. Architects, Zanolini & Jewett, 604 Montgomery street, S. F. Owner, Mary M. Bradbury. The building will be erected on the northwest corner of Polk and California streets, covering an area of 100 by 150 feet. There will be seven stores on the Polk street frontage, while the California street side will contain only the entrance to the upper floors. Plans show a large number of two and three room suites on the upper floors. Interior finish will be of pine and redwood. There will be steam heat, an automatic elevator and a hot water supply. All apartments will have wall beds and private bath rooms. Bath rooms will be finished in tile and composition. Patent store fronts are specified. Exterior of the building will be faced with pressed brick. Plans are complete and figures are being taken.

**SAN FRANCISCO**—Apartment house, 3 story and base, frame, \$14,000. Architect, none. Owner, F. W. Lammann, 1124 Hyde street, S. F. The building will be erected on the south side of California east of Hyde, covering an area of 27½ by 123 feet. There will be twelve suites of two and three rooms with private baths and wall beds. Interior finish will be of pine with some elm panels. Plans provide for steam heat and a hot water system. All bath rooms will have tile wainscot and composition floors. Entrance will be finished in marble and tile. Exterior of the building will be covered with rustic and pressed brick veneer. Plans are complete and in the hands of the owner who will do the work by Day Labor.

**SAN FRANCISCO**—Apartment house, 3 story and base, frame, \$50,000. Architect, O. E. Evans, 2367 Mission street, S. F. Owner's name withheld. The building will be erected on Octavia street between Page and Oak, and has been designed to contain thirty suites of two and three rooms. All apartments will have wall beds and private baths. Interior will be finished in pine with some hardwood floors and elm panels. Plans provide for automatic elevator, steam heat and a hot water supply. Bath rooms will be finished in tile with composition floors. Entrance of the building will be finished in tile and marble. Exterior of the building will be covered with cement plaster and rustic. Plans are now being prepared.

**SAN FRANCISCO**—Apartment house, 1 story and base, brick and steel, \$35,000. Architect, Earl B. Scott, Humboldt Bank Bldg., S. F. Owner's name withheld. The building will be erected on the north side of Pine street, having a frontage of 60 feet. There will be a number of two and three room suites, all of which will have private baths and wall beds. Interior finish will be of pine and elm. Hard-

wood floors will be used in the social room and entrance. There will be an automatic elevator, steam heat and hot water supply. Bath rooms will have tile wainscot and composition floors. Entrance will be finished in marble and tile. Exterior of the building will be faced with pressed brick. Plans are complete and figures are being taken.

**SAN FRANCISCO**—Apartment house, 3 story and base, frame. Cost not stated. Architect, Arthur G. Scholz, Phelan Bldg., S. F. Owner's name withheld. The building will be erected on Dolores street, and has been designed to contain six suites of three and four rooms. All apartments will have wall beds and private baths. Interior will be finished in pine, redwood and elm panels. Some oak floors will be used. Bath rooms will be finished in tile with composition floors. Plans provide for steam heat and a hot water supply. Exterior of the building will be covered with shiplap and cement plaster on metal lath. Plans are nearly complete and figures will be called for shortly.

**SAN FRANCISCO**—Apartment house, 3 story and base, frame, \$2,500. Architect, O. E. Evans, 2367 Mission street, S. F. Owner's name withheld. The building will be erected on Waller street between Steiner and Fillmore, and has been designed to contain thirty suites of two and three rooms besides a large social hall. Interior finish will be of pine and redwood. Elm panels and oak floors will also be used. There will be steam heat and a hot water system. All apartments will have wall beds and private baths. Tile wainscot and composition floors will be used in the bath rooms. Entrance will be finished in tile and marble. Exterior of the building will be covered with rustic and cement plaster on metal lath. Plans are being prepared.

**SAN FRANCISCO**—Apartment house, 1 story and base, reinforced concrete, \$30,000. Architect, Charles J. Rousseau, 16 Kenny street, S. F. Owners, Kincaid Construction Co., 215 Montgomery street. The building will be erected on the south side of Post street west of Polk, having a frontage of 27½ by 120 feet. There will be a total of 20 suites arranged in two and three room apartments. Plans provide for steam heat, an automatic elevator and hot water supply. All apartments will have wall beds and private bath rooms. The wainscot and composition floors will be used in the bath rooms. Entrance will be finished in marble and tile. Exterior of the building will be faced with tapestry brick veneer. Plans are in the hands of the owners who will do the work by Day Labor. Materials are now being purchased.

**OAKLAND, CAL.** Apartment house, 1 story and base, brick and steel, \$75,000. Architect, O. E. Evans, 2367 Mission street, S. F. Owner's name withheld. The building will be erected on Ellis street near 15th, and has been

designed to contain 50 suites of three and four rooms. There will be private baths and wall beds. Interior will be finished in pine and hardwood veneer with hardwood floors in the living rooms. Plans provide for an automatic elevator, steam heat and a hot water system. Vacuum cleaning will also be installed. All bath rooms will be finished in tile. Entrance will have tile and marble wainscot. Exterior of the building will be faced with pressed brick. Plans are now being prepared.

**OAKLAND, CAL.** Apartment house, 3 story and base, brick and frame, \$10,000. Architect, Clay N. Burrell, Albany Bldg., Oakland. Owner's name withheld. The building will be erected on Grand avenue, and will cover an area of 90 by 123 feet. Apartments will contain from three to six rooms and will be handsomely finished in pine, redwood, white enamel and hardwood veneer. Hardwood floors will be used in the principal rooms. All suites will have wall beds and private bath rooms. There will be steam heat, elevator service, a hot water system and vacuum cleaning. Bath rooms will be finished in tile. Exterior of the building will be covered with a pressed brick veneer. Plans are being prepared.

**BERKELEY, ALAMEDA CO., CAL.** Apartment house, 3 story and base, frame, \$20,000. Architect, Olin S. Grove, 2911 Telegraph avenue, Berkeley. Owner, Dr. Cawfish. The building will be erected at the northeast corner of Prince and Ellsworth, covering a considerable ground area. There will be a total of twelve suites arranged in apartments of two and three rooms. Interiors will be finished in pine, redwood and elm. Hardwood floors will be used in the principal rooms. There will be a central heating system and a hot water supply. All apartments will have private baths and wall beds. Bath rooms will be finished in tile with composition floors. Entrance will be finished in marble and tile. Exterior of the building will be covered with cement plaster on metal lath. Plans are nearly complete and figures will be called for shortly.

**LOS ANGELES, CAL.** Apartment house, 3 story and base brick. Cost not stated. Architect, F. H. Gentry, Marsh-Strong Bldg., L. A. Owners, Business Properties Co. The building will be erected at the corner of Moneta and Santa Barbara avenues, covering an area of 50 by 120 feet. There will be two stores on the first floor besides the entrance. Upper floors will contain a total of 15 rooms arranged in suites of two and three rooms. Interior finish will be of pine and redwood. All apartments will have wall beds and private baths. There will be steam heat and a hot water system. Bath rooms will be finished in tile with composition floors. Patent store fronts will be used. Exterior will be faced with pressed brick. Plans are complete and figures are being taken.

**LOS ANGELES, CAL.**—Apartment house, 1 story and base, brick. Cost not stated. Architect, Richard D. King, 1 W. Hellman Bldg., L. A. Owner, J. A. Hill. The building will be erected on Hope street north of 3rd, and will cover an area of 60 by 150 feet. There will be a total of 97 rooms arranged in suites of two and three rooms with private baths. Interior will be finished in pine and elm. All apartments will be equipped with wall beds. Plans provide for an automatic elevator, steam heat and a hot water system. Bath rooms will have tile wainscot and composition floors. Exterior of the building will be faced with pressed brick. Plans are complete and the architect is taking figures. All parts of the work will be segregated.

**PORTLAND, ORE.**—Apartment house, 3 story and base, concrete and brick, \$35,000. Architect, C. A. Duke, Failing Bldg., Portland. Owner, H. Meter. The building will be erected at the gore of Market, Third and Clay streets, covering an area of approximately 76 by 97 feet. There will be four stores on the first floor besides the main entrance to the apartments. Upper floors will contain 37 rooms, arranged in suites of two and three rooms. There will be pine and redwood finish and some oak floors. All suites will have wall beds and private bath rooms. Plans provide for steam heat and a hot water system. Patent store fronts will be specified. Exterior of the building will be faced with pressed brick. Plans are complete and figures are being taken.

**PORTLAND, ORE.**—Apartment house, 3 story and base, brick or concrete, \$30,000. Architect, none. Owner, T. A. Sutherland, 1084 Hawthorne avenue, Portland. The building will be erected at the southeast corner of Glenn and Hawthorne streets, covering an area of 95 by 60 feet. There will be a total of 23 apartments, all of which will have wall beds and private bath rooms. Interior finish will be of pine and elm panels. Some oak floors will be used. Plans provide for steam heat and a hot water supply. Bath rooms will be finished in tile wainscot and composition floors. Tile and marble will be used in the entrance. Exterior of the building will be faced with cement plaster or pressed brick. Plans are being prepared by the owner.

#### Contracts Awarded.

**LOS ANGELES, CAL.**—Apartment house, 4 story and base, brick, \$60,000. Architect, John B. Nicholson, Wright and Callender Bldg., L. A. Owner, H. B. White, Contractor, Fred Siegle, Van Nuys Bldg., L. A. Contract price, \$60,000.

#### BANKS.

**PORTLAND, ORE.**—Bank, Class A construction, \$400,000. Architects, Shepley-Lutman & Coolidge, Boston, Mass. Owners, First National and Security Savings and Trust Co. The building will be erected at the corner of 5th and Stark streets and will cover a large ground area. Construction will be of the Class A type with a heavy steel frame. It has been stated that Architect David D. Lewis of Portland would be associated with the Boston firm and would have complete charge

of the building. Other than the fact that the design will be in the Athenian Parthenon style of architecture no details have been made public. Construction will not be started until January of 1915. Further mention will be made of this work.

#### BONDS.

**SAN FERNANDO, LOS ANGELES CO., CAL.**—Action of the City Trustees of the San Fernando High School, taken at the previous meeting, calling a bond election to vote bonds of \$150,000 for additional high school buildings, has been endorsed by the voters of the district. Architect J. C. Austin has prepared plans for the buildings and has presented them to the City Trustees for their approval.

**PHOENIX, ARIZ.**—Application for permission to issue \$2,000,000 worth of bonds has been filed by the Arizona Hydraulic Power Company with the Corporation Commission. The company contemplates the installation of extensive power plants on the Verde River, and furnishing of power to a number of communities in Yavapai County.

**SANTA BARBARA, SANTA BARBARA CO., CAL.**—An ordinance has been adopted here by the City Council declaring regularity of the sale of 130 Mission Tunnel bonds of the City of Santa Barbara, to the Santa Barbara County National Bank. The bonds are in the sum of \$60,000.

**DOWNEY, LOS ANGELES CO., CAL.**—A school bond election held here recently carried by a large majority. The bonds are for \$35,000, and will be used in the construction of a new school building. Money is available for the building and the purchase of additional school grounds.

**ORANGE, ORANGE CO., CAL.**—Sealed bids were received here last Monday for the purchase of bonds amounting to \$10,000. Bonds were 20 in number bearing 5 per cent interest. C. W. Hallman is the City Clerk.

**MONROVIA, LOS ANGELES CO., CAL.**—A school bond election will be held here on September 4th for the voting of bonds amounting to \$40,000. The money will be used in the construction of school buildings, furnishing and equipping same and the purchasing of additional school grounds.

**MILWAUKEE, WIS.**—Water bonds in the amount of \$20,000 have been declared legal by attorneys and funds will be forthcoming. Question of purchase of present plant or construction of pipe line to connect with Bull Run water will now be taken up by the Mayor and City Council.

**COLUMBIA, COLUMBIA CO., CAL.**—Sealed bids will be received until September 10th by the Supervisors for the sale of bonds amounting to \$125,000. Proceeds will be used in the construction of State Highway. W. J. King is Clerk of the Board.

**PRINCETON SCHOOL DISTRICT, COLUMBIA CO., CAL.**—A petition has been presented to the Supervisors of Columbia County asking them to cancel the \$12,000 issue of bonds of July 11th, 1912.

**SANTA BARBARA, SANTA BARBARA CO., CAL.**—A bond issue of at least \$1,000,000 for a complete system of highways and roads through the county and for other needed improvements has been advocated by the citizens.

Strong resolutions were adopted favoring the issue of the bonds. The matter is now being considered by the city officials.

**SEBESTOOL SCHOOL DISTRICT, SONOMA CO., CAL.**—Sealed bids for purchasing bonds in the sum of \$20,000 will be received here by the Board of Supervisors until September 10th. The funds will be used in the construction of a school building and other improvements. W. W. Felt, Jr., is the County Clerk.

**TURLOCK, STANISLAUS CO., CAL.**—Only one bid was received here by the City Trustees for the sale of fire bonds. G. G. Blymer offered \$16,000, accrued interest to date and a premium of \$8.00, which on motion was accepted. The funds will be used in the betterment of fire protection.

**YUBA CITY, SUTTER CO., CAL.**—The Sutter County Board of Supervisors have sold the \$5,000 school bond issue to the First National Bank of this city. The money will be used in the construction of a new school building for the Live Oak School District.

**RED BLUFF, TEHAMA CO., CAL.**—Tehama County has voted bonds in the sum of \$200,000 for the construction of roads and bridges throughout the county.

**RIO VISTA, SOLANO CO., CAL.**—Bonds, which were refused by a Los Angeles firm, will be purchased by the State. Funds will be used in making improvements throughout the county.

**ANDERSON SCHOOL DISTRICT, MENDOCINO CO., CAL.**—An election for the voting of bonds in the sum of \$2,000 was held here on August 29th. The proceeds to be used in the construction of a school building.

#### BRIDGES, DAMS AND HARBOR WORK.

**AROMAS, SAN BENITO CO., CAL.**—Bridge, steel and concrete. Cost not stated. Engineer, County Surveyor McCray, Hollister. Owners, San Benito County, Santa Cruz County and Monterey County. Plans and specifications for a tri-county bridge at Aromas have been completed and received the approval of the joint county boards. Bids are being advertised and will be opened by the Board of Supervisors in joint session on September 21st. Complete information, plans and specifications can be secured by addressing County Surveyor McCray at Hollister.

**PAICINES, SAN BENITO CO., CAL.**—Bridge, concrete and steel. Cost not stated. Engineer, County Surveyor McCray, Hollister. Owners, San Benito County. Plans and specifications for the bridge over the San Benito Creek at Paicines have been completed and approved by the Board of Supervisors. Bids will be opened on September 21st. Plans and specifications can be secured from the County Surveyor at Hollister.

**RICHMOND, CONTRA COSTA CO., CAL.**—Harbor wall, earth and creosoted piles, \$50,000. Engineer, City Engineer, Richmond. Owners, City of Richmond. The Healy-Tibbitts Construction Co. has been relieved of a contract amounting to \$50,000 on the construction of the outer sea wall in Richmond. Healy-Tibbitts asked that such action be taken claiming that condition in the coastwise trade between Richmond and Washington since the war are such that it is hardly pos-

sible to secure shipments of creosoted piles. The work will probably be re-advertised.

MARIN CO., CAL.—Bridges, reinforced concrete. Cost not stated. Engineer, County Surveyor, San Rafael. Owners, Marin County. Plans are complete and have been approved by the County Board of Supervisors for removing old frame bridges and constructing new reinforced concrete structures in certain road districts in Marin County. Bids will be opened on September 8th. Plans and specifications can be secured from the County Clerk.

STOCKTON, SAN JOAQUIN CO., CAL.—Bridges, 2, steel and concrete. Cost not stated. Engineer, County Surveyor Quail, Stockton. Owners, County of San Joaquin. County Surveyor Quail will have complete charge of the construction of the two large steel bridges to be erected over the Old and Middle Rivers. As has been stated before, permission to construct these bridges has been granted by the War Department, and construction will be started in about sixty days. Both bridges will be designed to carry electric car service, highway and passenger traffic. Further mention will be made of the work when figures are called.

WILLOW CREEK, TEHAMA CO., CAL.—Bridge, steel and concrete. Cost not stated. Engineer, County Surveyor, Red Bluff. Owners, Tehama County. Plans have been completed for a road bridge over Willow Creek in Road District No. 4. The bridge will be of steel and concrete. Figures are now being taken for this work and will be opened by the Board of Supervisors on September 16th. Plans and specifications can be secured from the County Clerk.

ASTORIA, ORE.—Dock sheds, etc., 1 and 2 story, hollow tile construction. Cost not stated. Engineer, F. J. Walsh, Port of Astoria. Owners, Port of Astoria. The building will be 1420 feet long and 90 feet wide, one story high, with a portion of the building, 250 feet long, two stories high. This part will be used for the various offices and passenger accommodations. There will also be platforms on each side, to extend the entire length of the building, 40 feet wide. Provision will also be made for a cold storage platform 350 feet square. The doors and windows will be of steel, while the roofing will be of asbestos, and the walls hollow tile construction.

#### Contracts Awarded.

HOLLISTER, SAN BENITO CO., CAL.—Bridge, steel and concrete, \$19,196. Engineer, County Surveyor, Hollister. Owners, San Benito County. Contractors, Security Construction Co., Los Angeles. Contract price, \$19,196.

#### CHURCHES.

RIVERSIDE, RIVERSIDE CO., CAL.—Mausoleum, 1 story and base, granite, \$130,000. Architect's name not given. Owners, California Mausoleum Company, Los Angeles Investment Bldg., 1, A. The building will be of reinforced concrete construction with granite facing on the exterior and marble and bronze interior finish. It will contain from 350 to 500 crypts, the size depending upon the support the project receives from the people of Riverside.

RIVERSIDE, RIVERSIDE CO., CAL.—Mausoleum, 1 story and base, reinforced concrete, \$85,000. Architect, none. Owners, Granite Mausoleum Co., 810 South Flower street, Los Angeles. The building will be erected in Olive-wood Cemetery. The general construction work will be under the supervision of J. A. Mathis, 236 West 31st street, vice-president of the company. The granite work will be done by Bly Bros. & McMillard, C. E. Bly is treasurer of the company, and Fred E. Pierce, of Pierce Bros., undertakers, president. It will be of reinforced concrete construction with granite exterior facing and white marble and bronze interior finish.

PORTLAND, ORE.—Church, school and residence, 2 story, brick, \$250,000. Architects, Jacobberger & Smith, Board of Trade Bldg., Portland. Owners, Roman Catholic Church. These buildings will be erected on the block bounded by Couch, Davis, 17th and 18th streets. In general, the style followed will be Italian renaissance, with exterior finishings in brick and terra cotta trimmings. The church and residence will be connected, and in an interior court will be constructed a cloister and a playground for the school children. The school building will be two stories in height, with five class rooms and an office on the first floor, and class rooms and a social hall on the second. The basement will house the manual training department and the boys' and girls' lavatories, together with an auditorium for the school. Plans are being prepared.

#### FACTORIES AND WAREHOUSES.

EMERYVILLE, ALAMEDA CO., CAL.—Tallow reduction plant, 1 story, concrete and corrugated iron, \$12,000. Architect, John H. Powers, 460 Montgomery street, S. F. Owners, Peterson Tallow Co. The building will cover a considerable area and has been designed for a modern reduction works. A cement floor will be used. The estimated cost does not include special machinery to be installed. Exterior of the building will be covered with corrugated iron. Plans are complete and figures are being taken.

MERCED, MERCED CO., CAL.—Gas plant addition. Cost not stated. Engineer, Mudell. Owners, San Joaquin Light and Power Co., Merced. Gas Engineer Mudell has approved plans and specifications for a new gas holder and additions to the generating plant of the company at Merced. Work has been started under the Day Labor system. The new additions will double the present capacity of the plant. The work will be done by Day Labor.

FRESNO, FRESNO CO., CAL.—Winery addition, 1 story and base, frame and brick. Cost not stated. Architect, John H. Powers, 460 Montgomery street, S. F. Owners, California Wine Association. The building will be erected on property adjoining the Fresno Plant B, and will add 12,500 gallons capacity to the plant. Construction will be of the heavy mill type with exterior walls faced with stock brick. Interior will be left unfinished. Large wine storage tanks will be used. Plans are complete and in the hands of the owners who will let all contracts from their Fresno office.

SEATTLE, WASH.—Cold storage plant, 3 story and base, reinforced concrete, \$210,000. Architects, H. Paetz, associated with Chief Engineer P. P. Whitman of the Port of Seattle Commission, Seattle. Owners, City of Seattle. The building will be erected at the northwest corner of Spokane and Whetcom streets, covering an area of 147 by 195 feet. Construction will be fireproof throughout with heavy concrete walls, floors and roof slabs. Interior partitions will be of hollow tile. There will be four elevators of 1,000 pounds capacity. Special refrigerating machinery will be installed costing in the neighborhood of \$250,000. Exterior of the building will be faced with cement plaster. Plans are complete and now out for figures. Bids will be opened by the Port of Seattle Commission on September 23rd. Plans and specifications can be secured on application to the Commission at Seattle.

SEATTLE, WASH.—Warehouse, 3 or 4 story, reinforced concrete, \$75,000. Architect, H. Paetz, associated with Chief Engineer P. P. Whitman, Port of Seattle Commission, Seattle. Owners, City of Seattle. Preliminary studies have been started for a fish storage warehouse to be erected in connection with the municipal dock cold storage plant at Seattle. The intention is to construct a building having a capacity of 2,000,000 pounds with an ice storage plant of 5,000 tons capacity. The structure will be of fireproof construction. Further mention will be made of the work as plans progress.

#### FLATS.

SAN FRANCISCO—Flats, 2 story and base, frame, \$5,000. Architect, none. Owner, J. W. Gillogley, 714 San Jose avenue, S. F. The building will be erected on the east side of San Jose avenue north of 30th street, and has been designed to contain two flats of five and six rooms. Interior finish will be of pine and redwood. Some oak floors will be used. There will be open fire places and tile mantels. Bath rooms and kitchens will have tile wainscot. Exterior of the building will be covered with rustic and cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor. Materials are now being purchased.

SAN FRANCISCO—Flats, 2 story and base, frame, \$4,000. Architect, none. Owner, Frank Giarratta, 3254 Scott street, S. F. The building will be erected on Scott street south of Chestnut, covering an area of 25 by 54 feet. There will be a store on the first floor. Upper floor will be arranged for one six-room flat. Interior will be finished in pine and redwood with some oak floors. There will be an open fire place and tile mantel. Bath room will have tile wainscot. Terrazzo entrance steps will be used. Exterior of the building will be covered with rustic and cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor. Materials are now being purchased.

SAN FRANCISCO—Flats, 2, 2 story and base, frame, \$4,000 each. Architect, none. Owners, C. J. and W. J. Keenan, Hayes and Central avenue, S. F. These two buildings will be erect-

ed on Central avenue north of Hayes, and each has been designed to contain two modern flats of five and six rooms. Each building will cover an area of 25 by 57 feet. Interior finish will be of pine and redwood with some elm panels. Hardwood floors will be used in the principal rooms. There will be open fire places and tile or brick mantels. Bath rooms will have tile wainscot and composition floors. Exteriors of the buildings will be covered with cement plaster on metal lath. Plans are complete and in the hands of the owners who will do the work by Day Labor. Materials are being purchased.

## GOVERNMENT WORK & SUPPLIES.

### Pearl Harbor, H. T., Industrial Buildings.

The following bids were received by the chief of the bureau of yards and docks, Navy Department, Washington, D. C., August 15, for erecting 5 industrial buildings at the U. S. Naval Station, Pearl Harbor, H. T.:  
W. N. Concanon, 525 Market St., San Francisco, Cal., \$62,826.  
Spaulding Construction Co., San Francisco, Cal., \$73,360.  
Lord-Young Engineering Co., Honolulu, H. T., \$60,975.  
Honolulu Plating Mill, Ltd., Honolulu, H. T., \$75,550.

### Denver, Colo., Plaster Models.

The following bids were received by the supervising architect, Treasury Department, Washington, D. C., August 17, for furnishing plaster models for the U. S. post office at Denver, Colo.:  
Menconi Bros., New York City, \$8,450.  
Neumann & Eren, New York City, \$6,530.  
Piccirilli Bros., New York City, \$14,870.  
H. W. Miller, Inc., New York City, \$6,979.

### Steel Frame, McQueen Well.

Abstract of proposals for centrifugal pump and steel framework for McQueen Well, Salt River project Arizona, U. S. Reclamation Service, bids opened at 2 p. m., August 7, 1914:  
1. Byron-Jackson Iron Works, Los Angeles, Cal., at West Berkeley, Cal., apparatus, 40 days, \$10 per ft.  
2. Krogh Manufacturing Co., San Francisco, Cal., at San Francisco, Cal., apparatus, 40 days, \$9.00 per ft.  
3. Felton Water Wheel Co., San Francisco, Cal., at San Francisco, Cal., apparatus, 45 days, \$25.50 per ft.

### Hanford, Cal., Plaster Models.

The bid of Ernest C. Bairstow, Washington, D. C., \$335 in amount, has been accepted for making plaster models for the U. S. post office at Hanford, Cal.

### Logan, Utah, Paving Driveway, Etc.

The contract for paving driveway, etc., at the U. S. post office, Logan, Utah, has been awarded to Grohne Contracting Co., Joliet, Ill., at \$2,194; time, October 10, 1914.

### Bozeman, Mont., Post Office.

All bids received by the supervising architect, Treasury Department, Washington, D. C., July 26, for the construction, complete, of the U. S. post office at Bozeman, Mont., have been rejected.

## FOREIGN BUILT SHIPS.

The following is the bill which Congress adopted with relation to the admission of foreign-built ships to American registry:

"An act to provide for the admission of foreign-built ships to American registry for foreign trade and any other purposes.

"Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the words 'not more than five years old at the time they apply for registry,' in section V of the act entitled 'An act to provide for the opening, maintenance, protection, and operation of the Panama Canal and the sanitation and government of the Canal Zone, are hereby repealed.

"That the President of the United States is hereby authorized, whenever in his discretion the needs of foreign commerce may require, to suspend by order, so far and for such length of time as he may deem desirable, the provisions of law prescribing that all the watch officers of vessels of the United States registered for foreign trade shall be citizens of the United States.

"Under like conditions, in like manner, and to like extent the President of the United States is also hereby authorized to suspend the provisions of the law requiring survey, inspection and measurement by officers of the United States of foreign-built vessels admitted to American registry under this act.

"This act shall take effect immediately."

"This is the original measure introduced in the House, the Senate receding from its proposed amendments after rejecting a bill agreed to by conference.

Under the terms of the House bill the foreign-built ships admitted to registry in the United States will not be entitled to enter the coastwise trade of the United States. The House bill, which is the one that will be enacted, amends the Panama Canal act, which admits to registry foreign ships that have been built within five years. The bill accepted removes the five-year restriction and will admit all foreign-built ships to American registry for the overseas trade.

The House bill also authorizes the President in his discretion when the needs of domestic commerce in his judgment require it to suspend the navigation laws of the United States in so far as they require that officers of the foreign-built ships shall be American citizens and to waive the requirement for survey, measurement, and inspection by American officers.

### Greeley, Colo., Plaster Models.

The following bids were received by the supervising architect, Treasury Department, Washington, D. C., August 13, for furnishing plaster models for the U. S. post office at Greeley, Colo.:  
E. Jung, Washington, D. C., \$873.

Van Dorn Iron Works, Cleveland, Ohio, \$4,425; 120 days.

Steel Fixture Manufacturing Co., Topeka, Kansas, \$1,982; 90 days.

Art Metal Construction Co., Jamestown, N. Y., \$4,122; 120 days.

U. S. Metal Products Co., New York City, \$4,560; 150 days.

#### GARAGES.

SAN FRANCISCO—Garage, 2 story concrete and frame, \$5,000. Architect, C. A. Meussdorffer, Humboldt Bank Bldg., S. F. Owner, A. W. Wilson. The building will be erected on the west side of Gough street north of Sacramento, covering an area of 32 by 46 feet. There will be reinforced concrete walls and floor. Interior will be finished in pine. Special gasoline storage tanks will be used. Exterior of the building will be faced with cement plaster. Plans are complete and figures are being taken.

#### HALLS AND SOCIETY BUILDINGS.

EUGENE, ORE.—Armory, 1 and 2 story and base, brick and steel. Cost not stated. Architects, Hunzicker & Freusse, Eugene. Owners, State of Oregon. The building will cover an area of 132 by 148 feet. There will be a large drill room, occupying the most of the main floor, swimming pool and gymnasium the basement, and assembly rooms and locker rooms on the upper floor. Interior will be finished in pine. There will be a maple floor in the drill room. Plans provide for steam heat. Exterior of the building will be faced with pressed brick. Plans are complete and figures will be called for shortly.

TACOMA, WASH.—Lodge hall, 4 story and base, reinforced concrete, \$100,000. Architect, C. Frere, Henry Bldg., Seattle. Owners, Tacoma Elks' Hall Association. The building will be erected at the corner of C and 7th streets and will cover a large ground area. Construction will be fireproof throughout. There will be, besides the social rooms and lodge rooms, office and living apartments. Interior will be handsomely finished in pine and hardwood. Modern mechanical equipment, including elevators, steam heat and vacuum cleaning, will be installed. Exterior of the building will be faced with cement plaster. Competitive plans were submitted, fourteen sets of plans being received. Architect C. H. Bebb of Seattle acted as

advisor. Working drawings are now being completed.

#### Contracts Awarded.

BELLINGHAM, WASH.—Club house, 4 story and base, hollow tile construction, \$50,000. Architects, Carl F. Gould and Charles Bebb, Denny Bldg., Seattle. Owner, C. X. Larabee. Contractor, G. W. Hunt, 1307 North 46th street, Seattle. Contract price, \$50,000. Note: When complete the building will be occupied by the Young Men's Christian Association.

#### HOSPITALS.

##### Contracts Awarded.

SAN FRANCISCO—Hospital, 1 story and base, reinforced concrete, \$18,437. Architect, City Department of Architecture, Temporary City Hall, S. F. Owners, City and County of San Francisco. Contractors, Monson Bros., S. F. Contract price, \$18,437.

#### HOTELS.

SAN FRANCISCO—Hotel, 5 story and base. Class C construction, \$100,000. Architect, William H. Crim, Jr., 425 Kearny street, S. F. Owner, I. I. De Hail. The building will be erected at the corner of 12th and Market streets and will cover a large ground area. There will be five stores on the first floor besides the hotel lobby, offices and entrance. Upper floors will contain in the neighborhood of 160 guest rooms, a large percentage of which will have private baths. Interior will be finished in pine throughout except in the hotel office and lobby which will have oak trim and tile floor. There will be steam heat, elevator service, a hot water supply and vacuum cleaning. Patent store fronts will be used. Bath rooms will be finished in tile with composition floors. Exterior of the building will be faced with pressed brick. Plans are complete and figures are being taken.

SAN FRANCISCO—Hotel, 6 story and base. Class C construction, \$75,000. Architect, Edward T. Foulkes, Crocker Bank Bldg., S. F. Owner, Dr. Keck. This building has been mentioned here a number of times before. Recently plans were out for figures but bids ran too high. It is probable that plans will be revised and new figures called.

SAN FRANCISCO—Hotel, 3 story, frame and plaster. Cost not stated. Architect, Edward T. Foulkes, Crocker Bank Bldg., S. F. Owners, Inside Inn Co. The building will be erected inside the Panama-Pacific International Exposition Grounds, commanding an unexcelled view of the entire grounds and bay. Construction will be of frame and plaster with ample fire protection. Plans provide for a total of 500 guest rooms, which will be rented at from \$1 to \$5 per day depending on the accommodations. Interior of the building will be finished in pine and redwood. There will be steam heat, elevator service, a hot water supply and automatic sprinklers. Exterior will be covered with cement plaster on metal lath. Excavating has been started and other parts of the work will be carried on by Day Labor.

SAN FRANCISCO—Hotel lighting fixtures, 6 story, Class C construction, \$100,000. Architect, G. B. Ashcroft, Balboa Bldg., S. F. Owner, C. A. Hoop-

er. Architect G. B. Ashcroft will shortly take figures for furnishing and installing light fixtures in the new seven story hotel building being erected for C. A. Hooper on O'Farrell street west of Powell.

FRESNO, FRESNO CO., CAL.—Hotel, 2 story and base, brick, \$30,000. Architect, none. Owner, Paul Mayer, Fresno. The building will be erected at the southeast corner of H and Kern streets, and has been designed for stores on the first floor and a number of modern hotel rooms on the upper floor. Interior will be finished in pine throughout. There will be several public baths. Plans provide for a hot water system. Bath rooms will have tile wainscot and composition floors. Patent store fronts are specified. Exterior of the building will be faced with pressed brick. Plans are complete and the work will be done by Day Labor. Materials are now being purchased.

FRESNO, FRESNO CO., CAL.—Hotel, 4 story and base. Class A construction. Cost not stated. Architect, R. F. Felchlin, Fresno. Owner, Mrs. Berry Goodwin. The building will replace a structure recently destroyed by fire. Construction will be of the class A type with a complete steel frame, brick exterior walls and metal lath and plaster interior partitions. The first floor will contain stores besides the hotel lobby and office. Upper floors will be arranged for a number of modern hotel rooms with private baths. Interior finish will be of pine. Bath rooms will have tile wainscot and composition floors. There will be steam heat, elevator service and a hot water supply. Patent store fronts will be used. Exterior of the building will be faced with pressed brick. Plans are being prepared.

LOS ANGELES, CAL.—Hotel, 4 story and base, brick and steel. Cost not stated. Architects, Bordeaux & Johnson, Ferguson Bldg., L. A. Owner's name withheld. The building will be erected on east San Pedro street north of 2nd and will cover a considerable ground area. There will be two stores on the first floor besides the hotel lobby. Upper floors will be divided into 72 guest rooms and a number of public and private baths. Interior will be finished in pine throughout. Plans provide for steam heat, elevator service and a hot water system. Patent store fronts will be used. All bath rooms will have tile wainscot and composition floors. Exterior of the building will be faced with pressed brick. Plans are nearly complete and figures will be called for shortly.

#### LIBRARIES.

WOODLAND, YOLO CO., CAL.—Library addition, 1 story and base, reinforced concrete, \$12,000. Architect, W. H. Weeks, 75 Post street, S. F. Owners, City of Woodland. Architect W. H. Weeks has completed working drawings for the new library addition to be erected at Woodland. The building will be a one story reinforced concrete structure, costing in the neighborhood of \$12,000. Bids will be called for as soon as plans receive the approval of the Board of Trustees.

## PANAMA-PACIFIC EXPOSITION WORK.

**SAN FRANCISCO**—Exhibit building, 1 and 2 story, frame and plaster. Cost not stated. Architect's name not given. Owners, Japanese Government. Bids will be opened on September 21st for constructing the following state highways: Siskiyou, from Weed to Dunsmuir, 17 miles, grading; Glenn, from south boundary to Willows, 8.6 miles, Portland cement concrete; Contra Costa, from Eckley to Martinez, 7 miles, graded; Santa Clara, from south boundary to Los Gatos, 7.5 miles, graded; Santa Barbara, from Alcatraz to Las Cruces, 5 miles, Portland cement concrete. For further particulars address State Highway Commission, Forum Bldg., Sacramento.

SAN MATEO, SAN MATEO CO., CAL. Sewer construction. Cost not stated. Engineer, City Engineer, San Mateo. Owners, City of San Mateo. The City Trustees of San Mateo have agreed with the trustees of Burlingame to construct a concrete storm water sewer between San Mateo and Burlingame if the town of Burlingame will keep the sewer in repair. The City Engineer of San Mateo will prepare plans at once.

REDWOOD CITY, SAN MATEO CO., CAL.—Highway construction, \$55,074. Engineer, County Surveyor, Redwood City. Owners, San Mateo County. The San Mateo County Supervisors have rejected all bids received for constructing the road from San Gregoria to Pescadero and will advertise for new figures. The lowest bid was submitted by James Wilson at \$68,311.62. The County Surveyor's estimate for this work was \$55,074.

NAPA, NAPA CO., CAL.—Sewer work. Cost not stated. Engineer, City Engineer, Napa. Owners, City of Napa. The City Trustees of Napa have passed a resolution of intention to construct an 8-inch iron stone sewer with 12 Y branches in Napa street east of Main; an 8-inch iron stone pipe sewer with 14 Y branches in Napa street east of Yagome; an 8-inch iron stone sewer with 8 Y branches in Grigsby's Court and a reinforced catch-basin 2 feet in diameter. Plans have been prepared by the City Engineer and figures will be called for shortly.

### Contracts Awarded.

ORANGE, ORANGE CO., CAL. — Highway construction, \$20,775.61. Engineer, County Surveyor, Orange. Owners, Orange County. Contractors, Hart & Ducey, Pasadena. Contract price, \$20,775.20.

### STORES AND OFFICES.

SAN FRANCISCO — Cafe, 1 story, frame and plaster, \$20,000. Architect, Maxwell Bugbee, Lick Bldg., S. F. Owner's name withheld. The building

W. R. BRODE, Pres. LOUIS R. HOLM, Sec. R. J. BRODE, Vice-Pres.

## BRODE IRON WORKS

Established 1886—Incorporated 1913  
Tel. Kearny 2464.

Fabricators and Contractors of Structural Steel and Ornamental Iron Work

Office & Works: 31-37 Hawthorne St., bet. Howard & Folsom Sts., San Francisco, Cal.

will be designed in the shape of a huge fish, and is to be erected on the Ocean Beach. Interior will be finished in unique fashion with ornamental plaster and art glass. Exterior of the building will be covered with cement plaster. Plans are being prepared.

LOS ANGELES, CAL.—Offices, 2 story and base, brick and steel. Cost not stated. Architect, G. A. Howard, Jr., Grant Bldg., L. A. Owners, Butler and Taylor. The building will be erected at the corner of 4th and Normandie, covering an area of 12 by 80 feet. There will be two stories on the first floor and seven offices on the upper floor. Interior will be finished in pine and hardwood. Patent store fronts are specified. Exterior of the building will be faced with pressed brick. Plans are complete and figures are being taken.

### Contracts Awarded.

LOS ANGELES, CAL.—Stores and offices, 7 story and base, reinforced concrete, \$374,000. Architects, Frederick Noonan and William Richards, Brockman Bldg., L. A. Owner, J. W. Robinson. Contractors, C. J. Kuback, Co., Van Nuys Bldg., L. A., general construction only. Contract price, \$374,000. The building complete has been estimated to cost \$1,000,000.

TRUCKEE, NEVADA CO., CAL.—Seven thousand feet of snow sheds in the vicinity of Truckee are being regulated by the Southern Pacific Company. The work is expected to be completed the latter part of October. The rebuilding costs in the neighborhood of \$10 a foot, which means an expenditure of \$70,000 for the present work now underway.

WOODLAND, YOLO CO., CAL.—The contractors here are rapidly rushing the work of laying concrete for a section of the State Highway near Putah Creek. About a half mile of the road bed is ready for the concrete. Marysville sand and Folsom crushed rock are being used in the concrete. The mixer turns out two miles of concrete per month.

COLUSA, COLUSA CO., CAL.—Sealed proposals will be received here by the Clerk of the Board of Supervisors on September 10th for the reshingling of the County Hospital buildings in Colusa County. Specifications for the work can be obtained from W. J. King, Clerk of the Board. Bids will also be received on the same date for the construction of a reinforced concrete bridge across drain at Farnsworth Place. Plans for this work may be obtained from the County Surveyor.

MARIPOSA, MARIPOSA CO., CAL.—The M. C. & M. Company are making preparations for a survey of the reservoir site situated in Agua Frio and Guadalupe valleys, with a view of constructing a dam and storing water for irrigation of the land situated in the Buckeye district. The site of the proposed dam will be at the junction of Agua Frio and Carson creeks. Another survey will be made for a

pole line from near Bear Valley to the Elizabeth and Long Mary mines. It is not known whether the company intends working these mines, but the survey for an electric line indicates that something might be done towards developing the property. Frank Cascaccia will be employed to do the work, which will be started in the near future.

RICHMOND, CONTRA COSTA CO., CAL.—Work on the new Southern Pacific depot will be started in this city next week. Plans have been prepared by the company's architects. The buildings will be of brick construction and stucco Mission style.

SACRAMENTO, CAL.—The contract for the construction of the Walnut Grove bridge has been let to Jenkins & Wells for \$77,660. Construction will be started immediately.

Exactus Photo-Film Corporation. Capital stock, \$150,000; subscribed, 50 shares, \$1 each. Directors—T. K. Peters, D. Lever, H. Peterson, L. A. Wittenmeyer, R. L. Green, 10 shares each. Place of business, San Francisco.

San Francisco Peninsula Co. Capital stock, \$2,000,000; subscribed, 500 shares, \$100 each. Directors—J. R. Kennedy, J. F. De Vault, J. W. Henderson, C. E. Sheets, T. H. Chilton, 1 share each. Place of business, San Francisco.

### WAR AFFECTS COPPER PRODUCTION.

With the possible exception of the silver industry, the copper industry will probably feel the injurious effects of the European war more seriously than any other of the leading American metal industries. During the last five years approximately 50 per cent of the copper turned out by American refineries has been exported,

in large part to the countries now involved in the European war, according to the United States Geological Survey. Some of this copper has been imported for metallurgical treatment, and the imports will probably be somewhat restricted on account of shipping conditions.

During these five years, domestic consumers have taken only about 63 to 67 per cent of the copper produced from mines within the United States, so it is evident that there must be a material curtailment of production while present conditions prevail. Considerable copper is of course consumed in munitions of war and for other military purposes, but the constructive arts of peace are far more favorable for the copper industry than the destructive art of war.

American producers have already greatly curtailed their production, and it seems almost certain that the output must be materially restricted for an indefinite period, dependent largely on the European conditions.

### COMPARATIVE VALUE OF CANADIAN TIMBER.

[Consul General R. E. Mansfield, Vancouver, British Columbia.]

Statistics contained in one of the recent bulletins issued by the Dominion Forestry Department show that the value of white-pine lumber cut in Canada in 1912 was one and a half million dollars less than in 1911. The cut of hemlock decreased 30 per cent, that of cedar decreased 27 per cent, and tamarack, the lumber production of which has decreased over 40 per cent in the last two years, bids fair soon to become commercially extinct. Of the six leading tree species in Canada, Douglas fir (known in Europe as "Oregon pine") was the only one whose lumber production increased in 1912. In the Province of British Columbia alone Douglas fir formed over 67.7 per cent of the total lumber cut, and British Columbia is at present by far the richest timber Province in Canada, containing, according to some estimates, one-half of the merchantable timber wealth of the Dominion.

This remarkable tree attains a height of over 200 feet, with a trunk 10 to 12 feet in diameter, forming alone or mixed with hemlock great forests extending 100 miles north of the international boundary. Its natural range extends in Canada to the eastern foothills of the Rocky Mountains in Alberta, where it grows to a height of 130 feet and a diameter of 4 feet and is considered one of the most important timber trees of the Dominion Rocky Mountains Forest Reserve, which covers an area of nearly 21,000 square miles. It is also widely distributed throughout the western United States, being able to stand considerable climatic variation and being practically immune to insects or fungus diseases.

The wood of the Douglas fir is hard and durable, and is extensively used for all kinds of construction, and especially for interior finish. It has an attractive grain and a figure which readily lends itself to staining and varnish finish. Douglas fir attains its highest state of perfection, and its greatest size in British Columbia, and construction timber of this class is shipped from the Province to all parts of the world.

Classified according to Location

## SAN FRANCISCO.

**RESIDENCE**—2 story and base, frame, \$7,000. San Francisco. Architect, Joseph A. Leonard, 85 Cerritos avenue, S. F. Owners, Urban Realty Co. The dwelling will be erected for M. Sobel on his property at the southeast corner of 19th avenue and Anza street, and has been designed for an eight-room house with two baths. Interior finish will be of pine and hardwood with white enamel in the sleeping rooms. There will be furnace heat and open fire places. Mantels will be of tile or brick. Hardwood floors will be used in the living room, dining room, library and den. Bathroom will be finished in tile. An automatic water heater will be installed. Exterior of the house will be covered with rustic and cement plaster on metal lath. Plans are complete and work will be done by Day Labor. Materials are now being purchased by the architect.

**RESIDENCE**—2 story and base, frame, \$2,500. San Francisco. Architect, Fay Spangler, 450 Monadnock Bldg., S. F. Owner, Mrs. S. F. McAdoo. The dwelling will be erected on 28th avenue between Geary and Anza streets, and has been designed to contain five rooms and bath. Interior finish will be of pine and redwood. Hardwood floors will be used in the living and dining rooms. There will be an open fire place and tile mantel. Bath room will be finished in tile. Exterior of the house will be covered with rustic and shiplap. Plans are complete and the architect is letting subcontracts.

**RESIDENCE**—2 story and base, frame, \$3,000. San Francisco. Architect, none. Owner, J. H. Thorup, 281 26th avenue, S. F. The dwelling will be erected on the east side of 25th avenue north of Anza, and has been designed to contain six rooms and bath. Interior finish will be of pine and redwood. Hardwood floors will be used in the principal rooms. There will be an open fire place and tile or brick mantel. Bath room and kitchen will have tile wainscot. Exterior of the house will be covered with rustic and cement plaster on metal lath. Plans are complete and in the hands of the owner, who will do the work by Day Labor. Materials are now being purchased.

**RESIDENCE**—2 story and base, frame, \$1,000. San Francisco. Architect, Joseph A. Leonard, 85 Cerritos avenue, S. F. Owners, Urban Realty Co. The dwelling will be erected on Urbano Drive north of Pico and has been designed for a seven-room house with bath and sleeping porch. Interior will be finished in pine and redwood with white enamel in the sleeping rooms. There will be hardwood floors. Plans provide for furnace heat and open fire place. Mantel will be of tile. Tile wainscot will be used in the bath room and kitchen. Exterior of

the house will be covered with cement plaster on metal lath. Plans are complete and the work will be done by Day Labor. Materials are now being purchased.

**RESIDENCE**—2 story and base, frame, \$2,000. San Francisco. Architect, none. Owner, Alfred Johnson, 2423 Clement street, S. F. The dwelling has been designed for a five-room house with bath, and will be erected on the west side of 16th avenue south of Anza street. Pine and redwood will be used for interior finish. Hardwood floors will be used in the living and dining rooms. There will be an open fire place and tile mantel. Tile wainscot will be used in the bath room. Exterior of the house will be covered with rustic and shiplap. Plans are complete and in the hands of the owner who will do the work by Day Labor.

**RESIDENCE**—2 story and base, frame, \$4,500. San Francisco. Architect, O. E. Evans, 2367 Mission street, S. F. Owner's name withheld. The dwelling will be erected on 19th avenue near Cabrillo, and has been designed for an eight-room house with bath. Interior finish will be of pine and hardwood. Hardwood floors will be used in the principal rooms. Plans provide for furnace heat and open fire places. Mantels will be of tile or tile or brick. Bath room will be finished in tile. An automatic water heater will be installed. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are being prepared and figures will be called for shortly.

**RESIDENCE**—2 story and base, frame, \$10,000. San Francisco. Architect Milton Lichtenstein, 111 Ellis street, S. F. Owner, Louis H. Frederick. The dwelling will be erected in the Western Addition, and has been designed to contain eight rooms and two baths. A garage will also be erected on the property. Interior of the dwelling will be finished in pine, hardwood and white enamel. Hardwood floors will be used in the living room, dining room and reception hall. Plans provide for furnace heat and open fire places. Mantels will be of tile or brick. Bath rooms will be finished in tile and equipped with showers. An automatic water heater will be installed. Exterior of the house will be covered with cement plaster on metal lath. Plans are now being prepared.

**RESIDENCES**—2, 2 story and base, frame, \$7,500 each. San Francisco. Architect, Charles J. Rousseau, 46 Kearny street, S. F. Owner's name not given. These two houses will be erected in Sea Cliff Terrace, and each has been designed to contain eight rooms, two baths and sleeping porch. Grounds will be laid out in formal gardens. Interiors will be finished in pine, blue gum and mahogany. There will be furnace heat and open fire places. Mantels will be of tile or brick. Bath rooms will have tile wain-

scot and floors. Automatic water heaters will be installed. Exteriors will be covered with cement plaster on metal lath. Plans are now being prepared.

**RESIDENCES**—2, 2 story and base, frame, \$2,500. San Francisco. Architect, none. Owners, Johnson & Johnson, 818 14th street, S. F. These two houses will be erected on the east of 21st avenue near Geary and each has been designed to contain five rooms and bath. Interiors will be finished in pine and redwood. Some hardwood floors will be used. There will be open fire places and tile mantels. Bath rooms and kitchens will have tile wainscot. Exteriors will be covered with rustic and shiplap. Plans are complete and in the hands of the owners who will do the work by Day Labor. Materials are now being purchased.

**APARTMENT HOUSE**—4 story and base, Class C, \$17,000. San Francisco. Architects, Zanolini & Jewett, 604 Montgomery street, S. F. Owner, Mary M. Bradbury. The building will be erected at the northwest corner of Polk and California streets, covering an area of 100 by 150 feet. There will be seven stores on the Polk street frontage while the California street side will contain only the entrance to the upper floors. Interior finish will be of pine and redwood. There will be steam heat, an automatic elevator and a hot water supply. All apartments will have wall beds and private bath rooms. Bath rooms will be finished in tile and composition. Patent store fronts are specified. Exterior of the building will be faced with pressed brick. Plans are complete and figures are being taken.

**APARTMENT HOUSE**—2 story and base, frame, \$14,000. San Francisco. Architect, none. Owner, F. W. Lurmann, 1124 Hyde street, S. F. The building will be erected on the south side of California street east of Hyde, covering an area of 27½ by 123 feet. There will be twelve suites of two and three rooms with private baths and wall beds. Interior finish will be of pine with some elm panels. Plans provide for steam heat and a hot water system. All bath rooms will have tile wainscot and composition floors. Entrance will be finished in marble and tile. Exterior of the building will be covered with rustic and pressed brick veneer. Plans are complete and in the hands of the owner who will do the work by Day Labor.

**APARTMENT HOUSE**—3 story and base, frame, \$50,000. San Francisco. Architect, O. E. Evans, 2367 Mission street, S. F. Owner's name withheld. The building will be erected on Octavia street between Page and Polk and has been designed to contain thirty suites of two and three rooms. All apartments will have wall beds and private baths. Interior will be finished in pine with some hardwood floors and elm panels. Plans provide for an au-

tomatic elevator, steam heat and a hot water supply. Bath rooms will be finished in tile with composition floors. Entrance of the building will be finished in tile and marble. Exterior of the building will be covered with cement plaster and rustic. Plans are now being prepared.

**APARTMENT HOUSE—1 story and base, brick and steel, \$35,000.** San Francisco. Architect, Earl B. Scott, Humboldt Bank Bldg., S. F. Owner's name withheld. The building will be erected on the north side of Pine street, having a frontage of 60 feet. There will be a number of two and three room suites, all of which will have private baths and wall beds. Interior finish will be of pine and elm. Hardwood floors will be used in the social room and entrance. There will be an automatic elevator, steam heat and hot water supply. Bath rooms will have tile wainscot and composition floors. Entrance will be finished in marble and tile. Exterior of the building will be faced with pressed brick. Plans are complete and figures are being taken.

**APARTMENT HOUSE—3 story and base, frame. Cost not stated.** San Francisco. Architect, Arthur G. Scholz, Thelan Bldg., S. F. Owner's name withheld. The building will be erected on Dolores street, and has been designed to contain six suites of three and four rooms. All apartments will have wall beds and private baths. Interior will be finished in pine, redwood and elm panels. Some oak floors will be used. Bath rooms will be finished in tile with composition floors. Plans provide for steam heat and a hot water supply. Exterior of the building will be covered with shippl and cement plaster on metal lath. Plans are nearly complete and figures will be called for shortly.

**APARTMENT HOUSE—3 story and frame, \$35,000.** San Francisco. Architect, O. E. Evans, 2367 Mission street, S. F. Owner's name withheld. The building will be erected on Waller street between Steiner and Fillmore, and has been designed to contain thirty suites of two and three rooms besides a large social hall. Interior finish will be of pine and redwood. Elm panels and oak floors will also be used. There will be steam heat and a hot water system. All apartments will have wall beds and private baths. Tile wainscot and composition floors will be used in the bath rooms. Entrance will be finished in tile and marble. Exterior of the building will be covered with rustic and cement plaster on metal lath. Plans are being prepared.

**APARTMENT HOUSE—4 story and base, reinforced concrete, \$50,000.** San Francisco. Architect, Charles J. Rousseau, 16 Kearny street, S. F. Owners, Kincaid Construction Co., 215 Montgomery street. The building will be erected on the south side of Post street west of Polk, having a frontage of 27½ by 120 feet. There will be a total of twenty suites arranged in two and three room apartments. Plans provide for steam heat, an automatic elevator and hot water supply. All apartments will have wall beds and private bath rooms. Tile wainscot and composition floors will be used in the bath rooms. Entrance will be finished in marble and tile. Exterior of the building will be faced with tapestry brick

veneer. Plans are in the hands of the owners who will do the work by Day Labor. Materials are now being purchased.

**FLATS—2 story and base, frame, \$1,000.** San Francisco. Architect, none. Owner, Frank Giarratta, 3254 Scott street, S. F. The building will be erected on Scott street south of Chestnut, covering and area of 25 by 54 feet. There will be a store on the first floor. Upper floor will be arranged for one six room flat. Interior will be finished in pine and redwood with some oak floors. There will be an open fire place and tile mantel. Bath room will have tile wainscot. Terrazzo entrance steps will be used. Exterior of the building will be covered with rustic and cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor. Materials are now being purchased.

**FLATS—2, 2 story and base, frame, \$1,000 each.** San Francisco. Architect, none. Owners, C. J. and W. J. Keenan, Hayes and Central avenue, S. F. These two buildings will be erected on Central avenue north of Hayes, and each has been designed to contain two modern flats of five and six rooms. Each building will cover an area of 25 by 57 feet. Interior finish will be of pine and redwood with some elm panels. Hardwood floors will be used in the principal rooms. There will be open fire places and tile or brick mantels. Bath rooms will have tile wainscot and composition floors. Exterior of the buildings will be covered with cement plaster on metal lath. Plans are complete and in the hands of the owners who will do the work by Day Labor. Materials are being purchased.

**HOTEL—5 story and base. Class C construction, \$100,000.** San Francisco. Architect, William H. Crim, Jr., 425 Kearny street, S. F. Owner, I. I. De Hail. The building will be erected at the corner of 12th and Market streets and will cover a large ground area. There will be five stores on the first floor besides the hotel lobby, offices and entrance. Upper floors will contain in the neighborhood of 160 guest rooms, a large percentage of which will have private baths. Interior will be finished in pine throughout except in the hotel office and lobby, which will have oak trim and tile floor. There will be steam heat elevator service a hot water supply and vacuum cleaning. Patent store fronts will be used. Bath rooms will be finished in tile with composition floors. Exterior of the building will be faced with pressed brick. Plans are complete and figures are being taken.

**HOTEL—5 story and base. Class C construction, \$75,000.** San Francisco. Architect, Edward T. Foulkes, Crocker Bldg., S. F. Owner, Dr. Keck. This building has been mentioned here a number of times before. Recently plans were out for figures but bids ran too high. It is probable that plans will be revised and new figures called.

**HOTEL—3 story, frame and plaster. Cost not stated.** San Francisco. Architect, Edward T. Foulkes, Crocker Bank Bldg., S. F. Owners, Inside Inn Co., The building will be erected inside the Panama-Pacific International Exposition Grounds commanding an unexcelled view of the entire grounds and bay. Construction will be of frame

and plaster with ample fire protection. Plans provide for a total of 500 guest rooms which will be rented at from \$1 to \$5 per day depending on the accommodations. Interior of the building will be finished in pine and redwood. There will be steam heat, elevator service, a hot water supply and automatic sprinklers. Exterior will be covered with cement plaster on metal lath. Excavating has been started and other parts of the work will be carried on by Day Labor.

**HOTEL LIGHTING FIXTURES—6 story, Class C construction, \$100,000.** San Francisco. Architect, G. B. Ashcroft, Balboa Bldg., S. F. Owner, C. A. Hooper. Architect Ashcroft will shortly take figures for furnishing and installing light fixtures in the new seven story hotel building being erected for C. A. Hooper on O'Farrell street, west of Powell.

**GARAGE—2 story, concrete and frame, \$5,000.** San Francisco. Architect, C. A. Meussdorffer, Humboldt Bank Bldg., S. F. Owner, A. W. Wilson. The building will be erected on the west side of Gough street north of Sacramento, covering an area of 32 by 46 feet. There will be reinforced concrete walls and floor. Interior will be finished in pine. Special gasoline storage tanks will be used. Exterior of the building will be faced with cement plaster. Plans are complete and figures are being taken.

**TUNNEL CONSTRUCTION—\$3,500,000.** San Francisco. Engineer, City Engineer, Temporary City Hall, S. F. Owners, City and County of San Francisco. The City Engineer has recommended that the time for figuring the Twin Peaks Tunnel be extended until September 20th. This action was taken by the Board of Public Works. A deduction in the amount of the bond required has also been made, the amount now standing at \$200,000. Time for completing the work, 600 working days, remains unchanged.

**CAFE—1 story, frame and plaster, \$20,000.** San Francisco. Architect, Maxwell Bugbee, Lick Bldg., S. F. Owners name withheld. The building will be designed in the shape of a huge fish and is to be erected on the ocean beach. Interior will be finished in unique fashion with ornamental plaster and art glass. Exterior of the building will be covered with cement plaster. Plans are being prepared.

### Island Parks, Dolores Street.

G. A. Love & Son. ....	\$2,079
M. Schlosser. ....	3,420
Mahoney Bros. ....	3,200
McCabe & Brown. ....	2,405
P. W. McClenahan. ....	3,500
Barrett & Hilp. ....	2,600
J. G. Harney. ....	2,934
James H. O'Brien. ....	3,100
State Improvement Co. ....	3,322
McSheehy Bros. ....	3,842

## OAKLAND AND ALAMEDA COUNTY.

**RESIDENCE**—2 story and base, frame, \$4,500. Oakland, Cal. Architects, Elite Planners, 1844 5th avenue, Oakland. Owner, B. Rigby. The dwelling will be erected in East Piedmont Heights, and has been designed for a seven-room house with two baths and sleeping porch. Interior finish will

be of pine and redwood with white enamel in the sleeping rooms. There will be hardwood floors. Plans provide for furnace heat and open fire places. Mantels will be of tile or brick. Bath rooms will have tile wainscot and floors. An automatic water heater will be installed. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are now being prepared.

**RESIDENCE**—2 story and base, frame, \$1,500. Oakland, Cal. Architect, Charles W. McCall, Central Bank Bldg., Oakland. Owner's name withheld. The dwelling will be erected on Lake Shore Drive near Walla Vista avenue and has been designed for a seven-room house with bath and sleeping porch. Interior finish will be of pine, redwood and hardwood veneer. Hardwood floors will be used in the living room, dining room and reception hall. Plans provide for furnace heat and open fire places. Mantels will be of tile. Bath room will have tile floor and wainscot. An automatic water heater will be installed. Exterior of the house will be covered with cement plaster on metal lath. Plans are now being prepared.

**RESIDENCE**—1 story and base, frame, \$2,000. Alameda, Alameda Co., Cal. Architects, Elite Planners, 1844 5th avenue, Oakland. Owner, M. P. Brasch. The dwelling will contain five rooms and bath and will be erected on Waterside Terrace. Interior will be finished in pine and redwood. Hardwood floors will be used in the principal rooms. There will be open drape place and tile or brick mantel. Bath room will have tile wainscot. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and the work will be done by Day Labor.

**APARTMENT HOUSE**—4 story and base, brick and steel, \$75,000. Oakland, Cal. Architect, O. E. Evans, 2367 Mission street, S. F. Owner's name withheld. The building will be erected on Ellis street near 15th, and has been designed to contain thirty suites of three and four rooms. There will be private baths and wall beds. Interior will be finished in pine and hardwood veneer with hardwood floors in the living rooms. Plans provide for an automatic elevator, steam heat and a hot water system. Vacuum cleaning will also be installed. All bath rooms will be finished in tile. Entrance will have tile and marble wainscot. Exterior of the building will be faced with pressed brick. Plans are now being prepared.

**APARTMENT HOUSE**—3 story and base, brick and frame, \$40,000. Oakland, Cal. Architect, Clay N. Burrell, Albany Bldg., Oakland. Owner's name withheld. The building will be erected on Grand avenue, and will cover an area of 90 by 123 feet. Apartments will contain from three to six rooms and will be handsomely finished in pine, redwood, white enamel and hardwood veneer. Hardwood floors will be used in the principal rooms. There will be steam heat, elevator service, a hot water system and vacuum cleaning. Bath rooms will be finished in tile. Exterior of the building will be covered with a pressed brick veneer. Plans are being prepared.

**APARTMENT HOUSE**—3 story and base, frame, \$20,000. Berkeley, Alameda Co., Cal. Architect, Olin S.

Grove, 2911 Telegraph avenue, Berkeley. Owner, Dr. Crawford. The building will be erected at the northeast corner of Prince and Ellsworth, covering a considerable ground area. There will be a total of twelve suites arranged in apartments of two and three rooms. Interiors will be finished in pine, redwood and elm. Hardwood floors will be used in the principal rooms. There will be a central heating system and a hot water supply. All apartments will have private baths and wall beds. Bath rooms will be finished in tile with composition floors. Entrance will be finished in marble and tile. Exterior of the building will be covered with cement plaster on metal lath. Plans are nearly complete and figures will be called for shortly.

**TALLOW REDUCTION PLANT**—1 story, concrete and corrugated iron, \$12,000. Emeryville, Alameda Co., Cal. Architect, John Powers, 460 Montgomery street, S. F. Owners, Peterson Tallow Co. The building will cover a considerable area and has been designed for a modern reduction works. A cement floor will be used. The estimated cost does not include special machinery to be installed. Exterior of the building will be covered with corrugated iron. Plans are complete and figures are being taken.

**RESIDENCE**—2 story and base, frame, \$1,500. Berkeley, Alameda Co., Cal. Architects, Architectural Designers, First Trust Bldg., Oakland. Owner, Mrs. B. R. Bowers. The dwelling will be erected on the north side of Virginia street east of Oxford, and has been designed for a nine-room house. Interior will be finished in pine and hardwood veneer. Hardwood floors will be used in the living room, dining room and reception hall. Plans provide for furnace heat and open fire places. Mantels will be of tile or brick. An automatic water heater will be installed. Bath room will have tile wainscot and composition floor. Exterior of the house will be covered with cement plaster on metal lath. Plans are being prepared.

**RESIDENCE**—2 story and base, frame, \$3,000. Oakland, Cal. Architects, Elite Planners, 1844 5th avenue, Oakland. Owner, M. P. Brasch. The dwelling will be erected in the Country Club Heights, and has been designed for a seven-room house with bath and sleeping porch. Interior will be finished in pine and redwood. Hardwood floors will be used in the principal rooms. There will be furnace heat and open fire places. Mantels will be of tile. Bath room will have tile wainscot. An automatic water heater will be installed. Exterior of the house will be covered with cement plaster on metal lath. Plans are being prepared and when complete the work will be done by Day Labor.

## SAN JOSE AND THE SANTA CLARA VALLEY.

**BRIDGE**—Concrete and steel. Cost not stated. Palmdes, San Benito Co., Cal. Engineer, County Surveyor, McCray, Hollister. Owners, San Benito County. Plans and specifications for the bridge over the San Benito Creek at Palmdes have been completed and approved by the Board of Supervisors. Bids will be opened on September 21st. Plans and specifications together with

complete information can be secured from the County Surveyor at Hollister.

**BRIDGE**—Steel and concrete. Cost not stated. Aromas, San Benito Co., Cal. Engineer, County Surveyor McCray, Hollister. Owners, San Benito County, Santa Cruz County and Monterey County. Plans and specifications for a tri-county bridge at Aromas have been completed and received the approval of the joint county boards. Bids are being advertised and will be opened by the Boards of Supervisors in joint session on September 21st. Complete information, plans and specifications can be secured by addressing County surveyor McCray at Hollister.

**BUNGALOW**—1 story and base, frame, \$2,000. Daly City, San Mateo Co., Cal. Architect, O. E. Evans, 2367 Mission street, S. F. Owner, Mrs. Lundeen. The dwelling will contain five rooms and bath. Interior finish will be of pine and redwood. Oak floors will be used in the living and dining rooms. There will be an open fire place and tile mantel. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are being prepared.

**SCHOOL**—2 story and base, frame, \$25,000. Burlingame, San Mateo Co., Cal. Architects, Thomas Edwards and E. L. Norberg, Burlingame. Owners, Burlingame Meadows School District. The building has been designed for a six-room school with assembly hall. Interior will be finished in pine throughout. Maple floors will be used in the class rooms. A plenum heating system will be installed. Modern school plumbing will be used. Exterior of the building will be covered with cement plaster on metal lath. Plans are complete and figures are being taken. Bids will be opened on September 15th. Plans can be secured from the architects.

**SEWER CONSTRUCTION**—Cost not stated. San Mateo, San Mateo Co., Cal. Engineer, City Engineer, San Mateo. Owners, City of San Mateo. The City Trustees of San Mateo have agreed with the trustees of Burlingame to construct concrete a storm water sewer between San Mateo and Burlingame the sewer in repair. The City Engineer of San Mateo will prepare plans at once.

**HIGHWAY CONSTRUCTION**—\$55,074. Redwood City, San Mateo Co., Cal. Engineer, County Surveyor, Redwood City. Owners, San Mateo County. The San Mateo County Supervisors have reelected all bids received for confining the town of Burlingame will keep structuring the road from San Gregoria to Pescadero and will advertise for new figures. The lowest bid was submitted by James Wilson at \$48,311.62. The County Surveyor's estimate for this work was \$55,074.

### MARIN, CONTRA COSTA AND SONOMA COUNTIES.

**HAIRPIL WALL**—Earth and creosoted piles, \$50,000. Richmond, Contra Costa Co., Cal. Engineer, City Engineer, Richmond. Owners, City of Richmond. The Healy-Thibbitts Construction Co. has been relieved of a contract amounting to \$50,000 on the construction of the outer sea wall in Richmond. Healy-Thibbitts asked that such action be taken, claiming that conditions in the coastwise trade since

the war are such that it is hardly possible to secure shipments of creosoted piles. The work will probably be re-advertised.

**BRIDGES**—Reinforced concrete. Cost not stated. Engineer, County Surveyor, San Rafael. Owners, Marin County. Plans are complete and have been approved by the County Board of Supervisors for removing old frame bridges and constructing new reinforced concrete structures in certain road districts in Marin County. Bids will be opened on September 8th. Plans and specifications can be secured from the County Clerk.

**SCHOOL**—1 story and base, frame, \$12,000. Kentfield, Marin Co., Cal. Architect, Erwin Schaefer, Oakland. Owners, Kentfield School District. Bids opened for this work show Fred H. Fields of Kentfield low at \$16,250. It is stated that the district will raise the additional money required and that he will be awarded the contract.

**SEWER WORK**—Cost not stated. Napa, Napa Co., Cal. Engineer, City Engineer, Napa. Owners, City of Napa. The City Trustees of Napa have passed a resolution of intention to construct an eight-inch sewer with twelve Y branches in Napa street east of Main; an eight-inch iron stone pipe sewer with fourteen Y branches in Napa street east of Yajome; an eight-inch iron stone pipe sewer with eight Y branches in Grigsby's Court and a reinforced concrete catch basin two feet in diameter. Plans have been prepared by the City Engineer and figures will be called for shortly.

#### CON AWARD

##### Contracts Awarded.

**BRIDGE**—Steel and concrete, \$19,196. Hollister, San Benito Co., Cal. Engineer, County Surveyor, Hollister. Owners, San Benito County. Contractors, Security Construction Co., Los Angeles. Contract price, \$19,196.

## Kentfield School Bids Are Opened.

Fourteen Sets of Figures Received, All of Which Are Above Amount Available, but Work Will Be Let.

Fourteen sets of figures were opened by the Kentfield School Trustees for the construction of the new frame and plaster building to be erected in the Kentfield District, designed by Architect Erwin Schaefer of Oakland. All bids received were above the estimate, but that of Fred H. Fields, Kentfield, for \$16,250 will probably be accepted and revisions made to bring the cost within the amount available. Following is a complete list of figures as opened:

#### Kentfield School Building.

McIntyre & Gladde, Oakland.....	\$18,274
Peterson & Wilson, S. F.....	19,339
R. C. Andrus, S. F.....	17,477
Phillip Le Connac, San Rafael.....	16,492
Collman & Collman, S. F.....	18,219
Robinson & Place, Oakland.....	18,500
Lloyd & Spengler, S. F.....	18,101
Lewis Cereghino & Son, S. F.....	17,273
Peter Hamilton, San Anselmo.....	16,800
Bowers & Fann, S. F.....	18,971
Fred H. Fields, Kentfield.....	16,250
Whalin Bros, Oakland.....	18,350

Fred J. Klenck, S. F.....	19,750
J. M. Merrihew, Berkeley.....	16,445

### FRESNO, MODESTO, SCTANISLAUS AND CENTRAL CALIFORNIA.

**WINERY ADDITION**—1 story and base, frame and brick. Cost not stated. Fresno, Fresno Co., Cal. Architect, John H. Powers, 460 Montgomery street, S. F. Owners, California Wine Association. The building will be erected on property adjoining the Fresno Plant B. and will have 12,500 gallons capacity to the plant. Construction will be of the heavy mill type with exterior walls faced with stock brick. Interior will be left unfinished. Large wine storage tanks will be used. Plans are complete and in the hands of the owners who will let all contracts from their Fresno office.

**HOTEL**—2 story and base, brick, \$30,000. Fresno, Fresno Co., Cal. Architect, none. Owner, Paul Mayer, Fresno. The building will be erected at the southeast corner of H and Kern streets, and has been designed for stores on the first floor and a number of modern hotel rooms on the upper floor. Interior will be finished in pine throughout. There will be several public baths. Plans provide for a hot water system. Bath rooms will have tile wainscot and composition floors. Patent store fronts are specified. Exterior of the building will be faced with pressed brick. Plans are complete and the work will be done by Day Labor. Materials are now being purchased.

**HOTEL**—4 story and base. Class A construction. Cost not stated. Fresno, Fresno Co., Cal. Architect, R. F. Felchlin, Fresno. Owner, Mrs. Berry Goodwin. The building will replace a structure recently destroyed by fire. Construction will be of the Class A type with a complete steel frame, brick exterior walls and metal lath and plaster interior partitions. The first floor will contain stores besides the hotel lobby and office. Upper floors will be arranged for a number of modern hotel rooms with private baths. Interior finish will be of pine. Bath rooms will have tile wainscot and composition floors. There will be steam heat, elevator service and a hot water supply. Patent store fronts will be used. Exterior of the building will be faced with pressed brick. Plans are being prepared.

**GAS PLANT ADDITION**—Cost not stated. Merced, Merced Co., Cal. Engineer, Mudell. Owners, San Joaquin Light and Power Co., Merced. Gas Engineer Mudell, of the San Joaquin Light and Power Co., has approved plans and specifications for a new gas holder and additions to the generating plant of the company at Merced. Work has been started under the Day Labor system. The new additions will double the present capacity of the plant. The work will be done by Day Labor.

### SACRAMENTO, STOCKTON AND NORTHERN CALIFORNIA.

**HIGHWAY WORK**—Cost not stated. California. Engineer, State Highway Commission, Forum Bldg., Sacramento. Owners, State of California. Bids

A. B. SPRECKELS RESIDENCE AS IT APPEARS COMPLETE  
San Francisco

Kenneth Mac Donald, Jr., Architect  
San Francisco

HOSPITAL BUILDING FOR UNIVERSITY OF CALIFORNIA TO BE ERECTED AT ONCE  
San Francisco

Lewis P. Hobart, Architect  
San Francisco

opened for constructing state highways in Kern, Santa Barbara and San Diego Counties show the following bidders: Kern County, Lynn S. Atkinson, L. A., \$174,316 (awarded); Santa Barbara, Arthur S. Bent (construction Co.), L. A., \$61,226.25 (awarded); San Diego, C. L. Hyde Construction Co., San Diego, \$12,059.50.

**HIGHWAY CONSTRUCTION.** Cost not stated. California. Engineer, State Highway Commission, Forum Bldg., Sacramento. Owners, State of California. Bids will be opened on September 21st for constructing the following state highways: Siskiyou, from Weed to Dunsmuir, 17 miles, grading; Glenn, from south boundary to Willows, 8.5 miles, Portland cement concrete. Contra Costa from Pickett to Martinez, 7 miles, graded. Santa Clara from south boundary to Los Santos, 7.5 miles graded. Santa Barbara from Alcatraz to Las Cruces, 5 miles of Portland cement concrete. For further particulars address State Highway Commission, Forum Bldg., Sacramento.

**BRIDGES**—2 steel and concrete. Cost not stated. Stockton, San Joaquin Co., Cal. Engineer, County Surveyor Quail, Stockton. Owners, County of San Joaquin. County Surveyor Quail of Stockton will have complete charge of the construction of the two large steel bridges to be erected over the Old and Middle Rivers. As has been stated before, permission to construct these bridges has been granted by the War Department, and construction will be started in about sixty days. Both bridges will be designed to carry electric car service, highway and passenger traffic. Further mention will be made of the work when figures are allowed.

**BRIDGE**—Steel and concrete. Cost not stated. Willow Creek, Tehama Co., Cal.—Engineer, County Surveyor, Red Bluff. Owners, Tehama County. Plans have been completed for a road bridge over Willow Creek in Road District No. 4. The bridge will be of steel and concrete. Figures are now being taken for this work and will be opened by the Board of Supervisors on September 10th. Plans and specifications can be secured from the County Clerk.

**LIBRARY ADDITION**—1 story and base, reinforced concrete, \$12,000. Woodland, Yolo Co., Cal. Architect, W. F. Weeks, 75 Post street, S. F. Owners, City of Woodland. Architect W. F. Weeks has completed working drawings for the new library addition to be erected at Woodland. The building will be a one-story reinforced concrete structure costing in the neighborhood of \$12,000. Bids will be called for as soon as plans receive the approval of the Board of Trustees.

**BUNGALOW** — 1 story and base, frame, \$3,000. Sacramento, Cal. Architect, none. Owner, W. D. McKee, 3029 East Sacramento street, Sacramento. The dwelling has been designed for a seven-room house and will be erected in the Oaks Addition. Interior finish will be of pine and redwood. Hardwood floors will be used in the living room and dining room. There will be furnace heat and open fire places. Mantels will be of tile or brick. Bath room will have tile wainscot. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and in

the hands of the owner who will do the work by Day Labor.

**Kern Co. Div. 6, Route 4, Sec. II.**  
Lynn S. Atkinson, L. A. .... \$174,316.00  
Engineer's estimate, \$178,474.38.

Materials furnished by the State  
pipe railing, reinforcing steel, corrugated iron pipe and Portland cement. Total, \$55,507.25.

**Santa Barbara Co., Div. 5, Route 2, Sec. A.**  
Arthur S. Bent Constr' Co.,

Los Angeles ..... \$61,226.25  
A. Duperrault, Venice ..... 67,706.00  
Rogers Bros. Co., L. A. .... 73,577.50  
Engineer's estimate, \$68,623.81.

Materials furnished by the State:  
Portland cement, reinforcing steel, corrugated iron pipe, pipe railing, sand and coarse aggregate. Total, \$30,098.68.

**San Diego Co., Div. 7, Route 12, Sec. B.**  
Isabel Constr' Co., S. D. .... \$12,592.75  
C. L. Hyde Constr' Co., S. D. .... 12,059.50  
Engineer's estimate, \$11,955.30.

Materials furnished by the State:  
Pipe railings, reinforcing steel, corrugated iron pipe and Portland cement. Total, \$5,696.70.

## LOS ANGELES AND SOUTHERN CALIFORNIA.

**APARTMENT HOUSE**—3 story and base, brick. Cost not stated. Los Angeles, Cal. Architect, F. H. Gentry, Marsh-Strong Bldg., L. A. Owners, Business Properties Co. The building will be erected at the corner of Moneta and Santa Barbara avenues, covering an area of 50 by 120 feet. There will be two stores on the first floor besides the entrance. Upper floors will contain a total of 45 rooms arranged in suites of two and three rooms. Interior finish will be of pine and redwood. All apartments will have wall beds and private baths. There will be steam heat and a hot water system. Bath rooms will be finished in tile with composition floors. Patent store fronts will be used. Exterior will be faced with pressed brick. Plans are complete and figures are being taken.

**APARTMENT HOUSE**—4 story and base, brick. Cost not stated. Los Angeles, Cal. Architect, Richard D. King, 1. W. Hellman Bldg., L. A. Owner, J. A. Hill. The building will be erected on Hope street north of 3rd, and will cover an area of 60 by 150 feet. There will be a total of 97 rooms arranged in suites of two and three rooms with private baths. Interior will be finished in pine and elm. All apartments will be equipped with wall beds. Plans provide for an automatic elevator, steam heat and a hot water system. Bath rooms will have tile wainscot and composition floors. Exterior of the building will be faced with pressed brick. Plans are complete and the architect is taking figures. All parts of the work will be segregated.

**MAUSOLEUM**—1 story and base, granite, \$130,000. Riverside, Riverside Co., Cal. Architect's name not given. Owners, California Mausoleum Company, Los Angeles Investment Bldg., L. A. The building will be of reinforced concrete construction with granite facing on the exterior and marble and bronze interior finish. It will contain from 350 to 500 crypts, the size depending upon the support the project receives from the people of Riverside.

**MAUSOLEUM** — 1 story and base, reinforced concrete, \$85,000. Riverside, Riverside Co., Cal. Architect, none. Owners, Granite Mausoleum Co., 810 South Flower street, Los Angeles. The building will be erected in Olivewood Cemetery. The general construction work will be under the supervision of J. A. Mathis, 326 W 31st street, vice-president of the company. The granite work will be done by Bly Bros. & McGilliard. C. E. Bly is treasurer of the company, and Fred E. Pierce of Pierce Bros., undertakers, is president. It will be of reinforced concrete construction with granite exterior facing and white marble and bronze interior finish.

**HOTEL**—4 story and base, brick and steel. Cost not stated. Los Angeles, Cal. Architects, Bordeaux & Johnson, Ferguson Bldg., L. A. Owner's name withheld. The building will be erected on east San Pedro street north of 2nd, and will cover a considerable ground area. There will be two stores on the first floor besides the hotel lobby. Upper floors will be divided into 72 guest rooms and a number of public and private baths. Interior will be finished in pine throughout. Plans provide for steam heat, elevator service and a hot water system. Patent store fronts will be used. All bath rooms will have tile wainscot and composition floors. Exterior of the building will be faced with pressed brick. Plans are nearly complete and figures will be called for shortly.

**RESIDENCE** — 2 story and base, frame, \$10,000. Hollywood, Los Angeles Co., Cal. Architect, B. Cooper Corbet, Union Oil Bldg., L. A. Owner, E. E. Laviss. The dwelling has been designed for an eight-room house with two baths and sleeping porch. Interior finish will be of pine, redwood and hardwood. White enamel will be used in the sleeping rooms. There will be hardwood floors in the principal rooms. Plans provide for furnace heat and open fire places. Mantels will be of tile. Bath rooms will have tile wainscot and floors and will be fitted with showers. An automatic water heater will be installed. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are being prepared.

**OFFICES**—2 story and base, brick and steel. Cost not stated. Los Angeles, Cal. Architect, G. A. Howard, Jr., Grant Bldg., L. A. Owner, Butler and Taylor. The building will be erected at the corner of 19th and Normandie

covering an area of 42 by 80 feet. There will be two stores on the first floor and seven offices on the upper floor. Interior will be finished in pine and hardwood. Patent store fronts are specified. Exterior of the building will be faced with pressed brick. Plans are complete and figures are being taken.

#### Contracts Awarded.

**APARTMENT HOUSE**—4 story and base, brick, \$60,000. Los Angeles, Cal. Architect, John B. Nicholson, Wright and Callender Bldg., L. A. Owner, H. E. White. Contractor, Fred Siegle, Van Nuys Bldg., L. A. Contract price, \$60,000.

**HIGHWAY CONSTRUCTION**—\$20,775.61. Orange, Orange Co., Cal. Engineer, County Surveyor, Orange. Owners, Orange County, Contractors, Hart & Ducey, Pasadena. Contract price, \$20,775.20.

**STORES AND OFFICES**—7 story and base, reinforced concrete, \$374,000. Los Angeles, Cal. Architects, Frederick Noonan and William Richards, Brockman Bldg., L. A. Owners, J. W. Robinson. Contractors, C. J. Kubach Co., Van Nuys Bldg., L. A. general construction only. Contract price, \$374,000. The building complete has been estimated to cost, \$1,000,000.

#### PORTLAND AND OREGON.

**APARTMENT HOUSE**—3 story and base, concrete and brick, \$35,000. Portland, Ore. Architect, C. A. Duke, Failing Bldg., Portland. Owner, H. Meter. The building will be erected at the gore corner of Market, Third and Clay streets, covering an area of approximately 76 by 97 feet. There will be four stores on the first floor besides the main entrance to the apartments. Upper floors will contain 37 rooms arranged in suites of two and three rooms. There will be pine and redwood finish and some oak floors. All suites will have wall beds and private bath rooms. Plans provide for steam heat and a hot water system. Patent store fronts will be specified. Exterior of the building will be faced with pressed brick. Plans are complete and figures are being taken.

**APARTMENT HOUSE**—3 story and base, brick or concrete, \$30,000. Portland, Ore. Architect, none. Owner, T. A. Sutherland, 1084 Hawthorne avenue, Portland. The building will be erected at the southeast corner of Glenn and Hawthorne streets covering an area of 95 by 60 feet. There will be a total of 23 apartments, all of which will have wall beds and private bath rooms. Interior finish will be of pine and elm panels. Some oak floors will be used. Plans provide for steam heat and a hot water supply. Bath rooms will be finished in tile wainscot and composition floors. Tile and marble will be used in the entrance. Exterior of the building will be faced with cement plaster or pressed brick. Plans are being prepared by the owner.

**BANK**—Class A construction, \$400,000. Portland, Ore. Architects, Shelly-Rutan & Coolidge, Boston. Mass. Owners, First National and Security Savings and Trust Co. The building will be erected at the corner of 5th and Stark streets, and will cover a large ground area. Construction will

be of the Class A type with a heavy steel frame. It has been stated that Architect David D. Lewis of Portland would be associated with the Boston firm and would have complete charge of the building. Other than the fact that the design will be the Athenian Parthenon style of architecture no details have been made public. Construction will not be started until January, 1916. Further mention will be made of this work.

**DOCK SHEDS, ETC.**—1 and 2 story, hollow tile construction. Cost not stated. Astoria, Ore. Engineer, F. J. Walsh, Port of Astoria. Owners, Port of Astoria. The building will be 1430 feet long and 90 feet wide, one story high, with a portion of the building, 250 feet long, two stories high. This part will be used for the various offices and passenger accommodations. There will also be platforms on each side, to extend the entire length of the building, 10 feet wide. Provision will also be made for a cold storage platform 350 feet square. The doors and windows will be of steel, while the roofing will be of asbestos, and the walls hollow tile construction.

**CHURCH, SCHOOL AND RESIDENCE**—2 story, brick, \$250,000. Portland, Ore. Architects, Jacobberger & Smith, Board of Trade Bldg., Portland. Owners, Roman Catholic Church. These buildings will be erected on the block bounded by Couch, Davis, 15th and 18th streets. In general, the style followed will be Italian renaissance, with exterior finishing in brick and terra cotta trimmings. The church and residence will be connected and an interior court will be constructed, a cloister and playground for the school children. The school building will be two stories in height, with five class rooms and an office on the first floor, and class rooms and a social hall on the second. The basement will house the manual training department and the boys and girls' lavatories, together with an auditorium for the school. Plans are being prepared.

**ARMORY**—1 and 2 story and base, brick and steel. Cost not stated. Eugene, Ore. Architects, Hunzicker & Preusse, Eugene, Ore. Owners, State of Oregon. The building will cover an area of 132 by 148 feet. There will be a large drill room, occupying the most of the main floor, swimming pool and gymnasium the basement and assembly rooms and locker rooms on the upper floor. Interior will be finished in pine. There will be a maple floor in the drill room. Plans provide for steam heat. Exterior of the building will be faced with pressed brick. Plans are complete and figures will be called for shortly.

**SCHOOL ADMINISTRATION BUILDING**—2 story and base, brick, \$100,000. Eugene, Ore. Architect, W. C. Knighton, State Architect, Salem. Owners, State Board of Regents. The building will be erected on the University grounds, covering an area of 86 by 104 feet. There will be six class rooms on the first floor. A large rotunda will open off of the main entrance and the administration offices will be arranged around this rotunda on the second floor. Interior of the building will be finished in pine and hardwoods. There will be steam heat and modern plumbing.

ing. Exterior of the building will be faced with pressed brick. Plans are complete and figures are being taken. Plans and specifications can be secured from the State Architect or from the Secretary of the Board of Regents, L. H. Johnson, Eugene.

#### SEATTLE AND WASHINGTON.

**COLD STORAGE PLANT**—8 story and base, reinforced concrete, \$210,000. Seattle, Wash. Architect, H. Baetz, associated with Chief Engineer P. P. Whitman, of the Port of Seattle Commission, Seattle. Owners, City of Seattle. The building will be erected at the northwest corner of Spokane and Whatecom streets, covering an area of 147 by 195 feet. Construction will be fireproof throughout with heavy concrete walls, floors and roof slabs. Interior partitions will be of hollow tile. There will be four elevators of 4,000 pounds capacity. Special refrigerating machinery will be installed costing in the neighborhood of \$250,000. Exterior of the building will be faced with cement plaster. Plans are complete and now out for figures. Bids will be opened by the Port of Seattle Commission on September 23rd. Plans and specifications can be secured on application to the Commission at Seattle.

**WAREHOUSE**—3 or 4 story, reinforced concrete, \$75,000. Seattle, Wash. Architect, H. Baetz, associated with Chief Engineer P. P. Whitman, Port of Seattle Commission, Seattle. Owners, City of Seattle. Preliminary studies have been started for a fish storage warehouse to be erected in connection with the municipal dock cold storage plant at Seattle. The intention is to construct a building having a capacity of 2,000,000 pounds with and ice storage plant of 5,000 tons capacity. The structure will be of fireproof construction. Further mention will be made of the work as plans progress.

**LODGE HALL**—4 story and base, reinforced concrete, \$100,000. Tacoma, Wash. Architect, C. Frere, Henry Bldg., Seattle. Owners Tacoma Elks' Hall Association. The building will be erected at the corner of C and 7th streets, and will cover a large ground area. Construction will be fireproof throughout. There will be, besides the social rooms and lodge rooms, office and living apartments. Interior will be handsomely finished in pine and hardwood. Modern mechanical equipment, including elevators, steam heat and vacuum cleaning, will be installed. Exterior of the building will be faced with cement plaster. Competitive plans were submitted, fourteen sets of plans being received. Architect C. H. Lebb of Seattle acted as advisor. Working drawings are now being completed.

#### Contracts Awarded.

**CLUB HOUSE**—4 story and base, hollow tile construction, \$50,000. Bellingham, Wash. Architects, Carl F. Gould and Charles Rebb, Denny Bldg., Seattle. Owner, C. N. Larabee. Contractor, G. W. Hunt, 1267 North 46th street, Seattle. Contract price, \$50,000. Note: When complete the building will be occupied by the Young Men's Christian Association.

Bond, \$7625. Surety, The Actna Accident and Liability Co. Forfeit, \$50.

Limit, till October 3, 1914. Plans and specifications filed.

### GERMANY'S FIGHTING MACHINE.

Kaiser Wilhelm's apparent faith in the strength of Germany's battle arm in the contest with three mighty nations is perhaps in no small degree founded upon the wonderful German military system, the like of which the world has never seen before. The German military system is little understood in this country, where militarism is regarded as a dying relic of barbarous ages.

On January 1 of the year of his twentieth birthday every male German citizen must report to the military head of his district. If not excused because of some physical defect he serves two years in the infantry or three years in the cavalry or artillery.

For his services he receives a small compensation, hardly more than pocket money. Then he is transferred to the first reserve, which requires that he

The appeal is made to vote today for partisan politics. The Chronicle is especially vehement in demanding that all people registered as Republican vote for the Republican candidates who are dyed in the wool party followers. In other words it is an appeal to vote only for those who will take program and who have no political principles outside those that the party bosses require them to have.

Just so long as people vote from batedyed prejudice and fail to exercise any independence, just so long they are traitors to the principles of government that our forefathers established. Whenever a voter trots in the harness of the Grand Old Party simply because Lincoln founded the party that bears the name, and he never inquires who is running that party so long as it bears the fetich of the party, just so far he proves himself to be unfit for citizenship.

It is said that there are citizens down in the Ozarks who are still voting for Andrew Jackson. If there are they probably display more intelligence under the circumstances than the class to which the Chronicle appeals. For Andrew Jackson stood for the common people, as he saw the light, and De Young stands only for the class that seeks to regain control of the party organization for private ends.

If the voters desire to exercise any intelligence in their ballot, if the Direct Primary means anything to them, if they desire all men to have an equal show under the law, if they do not desire to return to the old Southern Pacific machine to power, in a word if they are not corruptionists desiring the old order of things when corporations ruled they will vote exactly the opposite to the dictates of the De Young and Otis organs in the matter of any kind of national or state politics.

serve a month or two each year for a period of five years. The next five years are served in the "Landwehr," and he is required to drill at the order of the military authorities.

Organization details of the entire German fighting force have been worked out to such a detail that 6 million soldiers can be summoned and fully equipped in an incredibly short time. Not only does such an army take the field as a thoroughly trained fighting machine, but there are munitions and supplies in the country's arsenals so that it is equipped in every detail.—Wall Street Journal.

"Germans are in Limburg," a dispatch announces. Usually it is the other way about.

According to newspaper reports another most gruesome murder has been unearthed in the disappearance of the Nelms sisters at San Antonio, Texas. If these facts are proven as Marshall Nelms, the brother of the sisters asserts, it will be another case for Fremont Older, of the Bulletin, to show how society has wronged the poor, unfortunate criminal and forced him to go to such elaborate preparations to commit a diabolical crime.

Hanging six stories of a modern office building from steel girders that are 250 feet in the air and are supported on the steel work of adjacent buildings is a novel feature in building construction recently carried out in New York City. On the site of this work it was planned to erect a 19-story building occupying the whole block, incorporating in the structure a modern 12-story building located near the middle of the block. The foundation of the existing building had been designed for 12 stories and were strong enough to carry the additional seven stories. The steel frame of the new building was run up to its full height of 250 feet on each side of the old. Supported on this frame are eight steel girders, and from these is hung the steel work for six of the additional seven stories.—Popular Mechanics.

From the first class of the "Landwehr" the German soldier graduates into the second class, where he remains until he is 29. At that age becomes a part of the "Landsturm," he called out only in the event of a great national need. At the age of his military service ends.

The German standing army consists of about 600,000 men, and the first reserve about 1 1/2 million. The "Landwehr" totals 2,200,000 and the "Landsturm" brings the grand total to more than 6 million.

### WOMEN IN BUSINESS.

The extent to which women are leaving home to enter the business world is shown by the following figures for the United States. There are:

239,077 stenographers.  
327,635 teachers and professors.  
481,159 in various trades.  
770,655 engaged in agricultural pursuits.

7,300 physicians and surgeons.  
7,395 clergy.  
2,195 journalists.  
1,037 architects, designers, and draughtsmen.  
1,010 lawyers.

429,497 women in various professions.

### THE POWER OF SELF.

One ship drives east, another drives west.

While the selfsame breezes blow;  
'Tis the set of the sails and not the gales.

That bids them where to go,  
Like the winds of the sea are the waves of Fate.

As we voyage along through life,  
'Tis the set of the soul that decides the tide.  
—Ella Wheeler Wilcox.

### THIS WHOLESALE THIEF SHOULD BE PROSECUTED.

The State Railroad Commission rightly has recommended the prosecution of those responsible for the extraction of millions of dollars from the treasury of United Railroads of San Francisco without the return of a cent.

The present management of the railroads has promised its assistance in gathering and presenting evidence.

Veneered Panels that  
ARE good—order  
today from

# White Brothers

5th and Brannan Streets

San Francisco

## A happy family of GOOD Panels "Wybro"

Whoever uses WYBRO Panels once recognizes their superior qualities.

The WYBRO family of 168 varieties of GOOD Panels is a happy one—happy because there are no complaints among the thousands of boosters.

Specify WYBRO Panels on your next job—it will pay you to.

E. H. Williams

#### TRADE AND GOVERNMENT.

If you were in business on a big or little scale and you had a stock of commodities lowered in value by such an untoward emergency as war you would have to take your losses. If, on the other hand, the circumstances gave your commodities an upward value you would feel it your right and your self-obligation to take your unforeseen profits. Whether you did or not, others would. And this would hold especially true in a competitive business where each would feel his powerlessness to control the market by his own ethics or altruism.

It is chiefly this inherent fact or necessary rule of business that makes governmental trade commissions advisable; that justifies congressional actions to supervise the so-called law of supply and demand and to see that that law is not manipulated unfairly. The government is the best available force for doing fairly what a complete private monopoly might do more efficiently but would probably do unfairly.—Kansas City Star.

#### BUILDING TRADES EMPLOYERS' ASSOCIATION HOLDS FIFTH ANNUAL BANQUET.

By Wm. E. Hague.

On Thursday evening, August 27th, the Building Trades Employers' Association held its fifth annual banquet in Hale's Pompeian Cafe. Over 200 members and guests were present, and undoubtedly this was one of the most successful banquets which the organizing building industry of this city has ever seen.

National leaders among the employers and manufacturers of this country were among the speakers of the evening, and their interesting remarks were listened to with a rare attention from all.

Mr. Grant Fee, the newly elected and popular President, spoke briefly at the opening of the program and closed later with a forceful speech on the need of the building business standing together for an improvement in conditions, pointing out the absolute necessity of their exercising their right of franchise to vote and see that the right men are elected to office in the political positions throughout the state.

Mr. Walter Drew, of the National Erectors' Association, gave a concise and forceful history of the work being carried on in the steel and iron industry through the medium of the Na-

tional Association, touching briefly upon the McNamara case and the conviction of the large number of labor leaders at the head of the structural iron workers' union.

Mr. Drew was followed by Mr. Neumacher, of the National Manufacturers' Association, whose humorous and witty remarks created much merriment, and whose closing words upon the need of active interest among the employers in electing political candidates suitable to office were listened to with close attention.

Mr. John Kirby, President of the Dayton Manufacturing Company and Vice-President and director of the National Association of Manufacturers, complimented the building business upon the success of its central organization, and the co-operation evidenced by the large attendance at the banquet.

Mr. James A. Emery, general counsel of the National Association of Manufacturers and national counsel for industrial defenses, proved to be an orator of great ability, and delivered a speech such as the building industry has seldom had an opportunity of listening to, as being directed in its behalf. Mr. Emery was born and raised in San Francisco and is regarded in the east as one of the most enlightened speakers on industrial relations.

Mr. John Macintyre followed Mr. Emery with a few well chosen remarks; President Grant Fee then making his closing address, followed by the entire assemblage rising and singing the Builders' Refrain to the tune of Yale Boole.

Mr. J. W. Schouten was the popular toastmaster of the evening and fulfilled his duties with the Beau Brummel courtesy for which he is celebrated.

During the dinner the Doris De Fides company of sixty juveniles rendered a pleasing program, and in between the speakers Mr. Otis Johnson sang a delightful number, and later on Mr. L. A. Larsen sang a song written by his accompanist and was brought on for two rousing encores.

Much credit for the success of the evening is due to the Committee of Arrangements composed of Messrs. H. J. Hughes, W. B. Kyle and G. S. McCallum.

In the past it has been the custom for a number of those present at a building industry banquet to indulge too freely in the wines offered for consumption. It was worthy of note that on this occasion the wine was sparingly used and all present were able to enjoy in peace the speeches and entertainment which followed the dinner. There were no noisy interruptions and we will hope that this will always be so at our future banquets.

#### THE WOMEN SPEAK.

By Gerald B. Breitigam.

Over the farm lands, plowed and sown.  
 Our men go tramping off to war,  
 Who will reap when the grain is grown?

Why, we. We've reaped before.

Reaper? Why, yes, see our hands are worn.

Our backs are bent, our faces dull.

Our men, you see, are bound ere  
 To keep the armies full.

So, water the stock and till the land  
 Feed the children our men begot  
 Wait for the time expired band—  
 That is the women's lot.

But now the dread we always knew  
 Has sickened all the land with  
 The young, the strong, the old must  
 Ruin and Death draw near.

Our lands are stripped of all our  
 The war kings call the conscript

What for? God knows; not we,  
 then.  
 Who are we, to doubt!

Blood will stain all our rivers  
 The red flame leap across the land  
 Pillage will waste our thin  
 down—

All at the kings' command.

Our driven men with a last despair  
 Go tramping off to war. For we  
 Their children will be fatherless—  
 That is the peasants' lot.

#### ONE-FIFTH OF STATE'S VALUATION HERE.

#### One-third of Population in Bay Area.

The total value of the property in San Francisco County, according to reports of the county auditors, is \$1,057,891. The total for the whole State is \$2,458,804,743. Therefore nearly fifth of the entire value of the State located within the borders of the County of San Francisco. The population of San Francisco is 560,000 while the population of the metropolitan area, or bay region, is 910,000, one-third of the entire population of the State. This is worth talking about.

#### One-fifth of State's valuation found in San Francisco.

#### One-third of State's population found in bay region.

The Riverside Press objects to Exposition Company giving the 900,000 Auditorium to San Francisco claiming that this city should not receive any special favors. The Immigration and Statistical Department of the Chamber of Commerce has gathered a few figures for the benefit of the southern editor. Out of a total of \$17,500,000 raised in the State for Exposition, this city has raised \$5,000,000—five million from a city bond issue, \$7,500,000 raised by popular subscription, and \$1,000,000 as its share of the State bond issue of \$5,000,000. Here are the figures:

Raised in the State for Panama-Pacific Exposition... \$17,500,000  
 San Francisco's share in the above... 13,500,000

The appropriation states the dimensions of the canal and gives the southern terminal of the canal to be Yuba River at a point about ten miles north of this city. Enlow is a civil engineer and hydraulic engineer, formerly of Butte and Plumas Counties, CALIFORNIA, BUTTE CO., CAL.—Several members of the State Highway Commission who are in this city announce that plans and specifications for all of the highway not already under construction in this county will be ready during the coming fall.

will be asked during the winter, and by spring the successful contractors may start to work.

# CHILEAN COMMERCIAL PROGRESS.

[Consul Alfred A. Winslow, Valparaiso.]  
Notwithstanding financial and other difficulties in the Republic of Chile during last year, the country advanced commercially and the outlook for the future is fair. A number of projects for development are contemplated as soon as financial conditions improve. Much interest is manifested in the opening of the Panama Canal, and American interests should avail themselves of this growing market brought so near their doors.

## Lumber Imports and Resources.

Notwithstanding the fact that Chile has extensive forests, there are imported 75,000,000 to 80,000,000 feet of lumber annually, the greater portion coming from the United States. It is claimed that originally there were 75,000 square miles of forests in this country and that fully one-half still remain, but they are fast disappearing, as indicated by the following from a local publication:

The wholesale destruction of forest and, which is proceeding without check year by year in southern Chile and is assuming such serious proportions, has not yet roused the authorities to take preventive action. The "roces," or vast forest fires, have devastated and are still sweeping away thousands of acres of valuable timber, leaving large tracts of country to dry up under the fierce rays of the summer sun; and the agriculturist is clearing further tracts to increase his farm lands. For some time past the press has repeatedly called attention to the danger which threatens the country as a result of this wanton destruction of timber, and many a voice is now raised in warning. What effect will the disappearance of the forests have on the country? Don Vicuña Mackenna, writing on the subject many years ago, stated: "That which is coming to an end in Chile is not only the rain but the rivers, because of the disappearance of the trees overshadowing their sources."

Some of the principal reasons why so much Chilean lumber is consumed are the need of transportation facilities to get it to the market, the difficulty of logging and floating the logs to the mills because the timber is all so heavy, and the almost impossibility of cutting the timber during the winter when the sap is down because of excessive rains. A law has been enacted prohibiting the cutting of dead timber for lumber, or to cut timber when the sap is in it, or to offer for sale lumber within six months after the lumber is cut.

The question of increasing the duty now paid on imported lumber about 25 per cent has been before the Chilean Congress during the past year. Should the increased duty be levied, it is feared that the American lumber trade will suffer, as the present duty seems to be about all it will stand.

## Railway Construction and Operation.

Work was pushed during 1912 on most of the railways under construction. Little new work was begun, and here does not seem to be much in view for 1914. During the year the Longitudinal Railway from Calera to Iquique, a distance of 682 miles, was opened to traffic. The Arica to La Paz line was opened a distance of 272 miles. It is now possible to travel by rail from Iquique in the north via Santiago, a distance of 1,960 miles. About \$15,000,000 was expended on railway construction in Chile during the year, more

than one-half being private capital guaranteed by the Government. English capital controls 867 miles of Chilean railroads at a total investment of \$120,090,168.

A Government commission has been appointed to thoroughly reorganize the operation of the State railways with the view of putting them on a paying basis. In connection with this it is proposed to place a loan for \$24,232,500 to purchase rolling stock, to reorganize the repair shops (see Trade Opportunities No. 11194 published in the Daily Consular and Trade Reports for June 27, 1913), and to complete double-tracking the line from Valparaiso to Santiago. The Government railways have shown a deficit each year for the past five years notwithstanding that freight and passenger rates have advanced more than 30 per cent. For 1913, the deficit was \$2,000,000.

Comparatively little rolling stock was purchased for the Government railways during last year with the result that the service suffered, and the lines are short of equipment. It will pay American manufacturers and exporters of railway supplies to watch this market later in the year, provided an advantageous loan can be negotiated.

The electrification of the first section of the Government railways is still under consideration. It is understood that the plans are completed and only await the financial conditions to improve before putting the machinery in motion. The current is to be supplied by hydroelectric power.

## Public Building & Improvement Scheme

The Chilean Government developed during the year comprehensive public scheme to cover a period of 10 years, beginning with 1914, at a total cost of \$22,395,000. This scheme includes the President's palace at Santiago, several capitals, penitentiaries, customhouses, and many public-school buildings. The Inspeccion General de Arquitectura, at Santiago, Chile, has the matter in hand.

An additional water supply is being provided for Santiago at a cost of about \$5,000,000. The pipe line is about 12 miles long, with the reservoir well up in the Andes. No pumping will be necessary, since the source is about 2,000 feet above the city. An English firm has the contract.

The Government has a reorganization plan that calls for remodeling four repair shops on the Government railway as well as extensive terminal improvements at the port of Valparaiso, which will call for the expenditure of \$8,000,000 to \$10,000,000 and for a large amount of up-to-date machinery and supplies. These improvements are in charge of the Direccion General de los Ferrocarriles del Estado, at Santiago, Chile.

Besides the above are extensive municipal improvements under way at Vina del Mar, a suburb of Valparaiso that are to be completed during 1914 at a total cost of \$1,500,000, and the boulevard and parkway along the beach connecting the cities of Valparaiso and Vina del Mar at a cost of about \$1,200,000.

## Hydroelectric Power Development-Port Improvements.

During last year work progressed on the extension to the hydroelectric power plant in connection with the Braden Copper Co., near Rancagua, Chile, and plans have been under consideration to develop the water power of the Acomeagua River above Valpa-

raiso for the use of the cities in the Andes as well as for Valparaiso where the current is now generated by steam with coal selling at \$6 to \$8 per ton. The current is sold in Valparaiso for lighting purposes at 14 cents per kilowatt-hour. The country is full of fine water-power sites that await capital to turn the waste into electric current for distribution to the cities and towns where are located small plants now run by steam power, where coal costs \$9 to \$12 per ton. It is generally understood that this would be a paying investment from the start, and would be much more profitable when demands for electric power became greater.

Much work was done during 1913 on the extensive port works at Valparaiso and San Antonio, which are to cost about \$17,000,000 and which are to be completed before the close of 1919. There were 700 men employed on these works at the close of the year, assisted by up-to-date machinery. Work at San Antonio is further advanced than at Valparaiso, but it is a much smaller undertaking. Plans are also ready for port works at Arica, Antofagasta, Talcahuano, Lebu, and Valdivia at an estimated cost of \$21,412,000. It is expected work will begin at Antofagasta next, where improvements are so badly needed.

## Wireless Telegraph Stations.—Aviation.

During 1913 the chain of seven wireless stations along the coast of Chile, viz, Arica, Antofagasta, Coquimbo, Valparaiso, Tachhuano, Puerto Montt, and Punta Arenas, were completed, save the station at Puerto Montt, which is under way, and good progress was made on the station on Juan Fernandez Islands to the west of Valparaiso. The Chilean Government has taken steps to put this service at the disposition of the commercial world, and the Director General of Telegraph of the country is authorized to prepare a tariff list and such other regulations as seem best to connect up for commercial purposes with the other 500 stations of the world.

## Studying South American Trade Possibilities.

More Americans visited Chile during 1913 for the purpose of studying the openings for business and investment than in any previous year, with the result that imports from the United States are increasing and more American capital is being invested in mining enterprises, which will call for still more American wares.

Americans are received with open arms, and the better they know South America, and Chile in particular, the clearer they will understand the possibilities for business and investment in this country.

The imports of manufactured products amounted in value from \$120,000,000 to \$125,000,000 annually, of which the United States at present is supplying about \$20,000,000 worth, when at least twice that amount should be supplied from that source. Active propaganda work will count for as much as in Chile as in any other part of the world it not more.

In the effort to extend American trade in Chile it should first be ascertained whether there is sufficient business in a particular line to warrant an active campaign. If so, the best men that can be had should be sent into the field thoroughly equipped, and given ample time to do the work well.

He should speak Spanish, and should not be held down too close with experience allowance. Conditions are such here that a salesman can not successfully push business as at home, so he must bide his time if he expects to sell his goods. If one is not prepared to enter the field in this manner he had better not waste his time and money.

## News In Brief.

**VALLEJO, Solano Co., Cal.**—The work of installing three seventy horsepower boilers for the steam heating plant for the Naval Hospital, at the Navy Yard, has been started under the direction of the Yards and Docks Department. A temporary boiler has been installed to supply steam for the hospital until the new boilers are placed in operation. The work will be completed in about three months.

**LOS ANGELES, Los Angeles Co., Cal.**—Estimates are now being prepared under the supervision of the City Board of Supervisors of the cost and survey of a route for a heavy truck road from Los Angeles to San Pedro Harbor. The proposed road will be twenty miles long and thirty feet wide and will be constructed of concrete.

**OROVILLE, Butte Co., Cal.**—Friedrick Whitton, representing the Interstate Resort Company of New York, is now in this city making preparations for letting of contracts on the new resort to be constructed at Blairsdien. Bids will probably be taken on the wood work immediately, this work costing in the neighborhood of \$30,000. The total cost of the enterprise is estimated at \$100,000. The resort is to consist of a central dining room with log cabins surrounding the main building. Construction throughout will be of rustic.

**ANAHEIM, Orange Co., Cal.**—Plans for the construction of a new City Hall have been presented to the City Trustees for their approval. According to plans submitted every city official will have a separate office. Bids will be called for on the approval of plans.

**STOCKTON, San Joaquin Co., Cal.**—The City Council has awarded a contract to James Mulcahy for the construction of the Sutter street bridge over Mormon Channel. Mulcahy's bid was \$13,680, the lowest of the five submitted. The structure will be 200 feet long and 40 feet wide and will be built principally of concrete.

**DINUBA, Tulare Co., Cal.**—Plans are now being prepared for the construction of a new sub-station for the Mt. Whitney Power Company just east of Tulare, to replace the temporary station which was destroyed by fire some time ago. The building will be constructed entirely of steel and heavy glass and will be absolutely fireproof.

**RICHMOND, Contra Costa Co., Cal.**—All of the old wooden trestles which were built when the tracks of the Santa Fe Railroad were first laid are now being torn away and steel spans are being replaced. A crew of men have started excavating and putting together the steel for a six foot span over the San Pablo Creek at San Pablo. It will be necessary to go fifty feet below the bed of the creek to find hard

pan. The concrete piers and foundations are now being laid. Contractors Schoop & Filler of Los Angeles are doing the work. Each bridge will cost on the neighborhood of \$50,000.

**CHICO, Butte Co., Cal.**—Owing to the growth of business, the Associated Oil Company has decided to establish a depot in this city. Land near the Southern Pacific tracks is being looked over with a view of acquiring a site.

**VALLEJO, Solano Co., Cal.**—Contractor Michael Murphy of Berkeley has been awarded the contract for the extension of sewer No. 2 by the City Council and has started work at the corner of Sutter and Main streets.

**HENDERSON, Shasta Co., Cal.**—Material has arrived for the construction of a bridge across the Pit River at this place. A crew of men are now at work arranging the materials. It is proposed to build a road from this settlement to Bartle, the eastern terminus of the McCloud Railroad. The road, if constructed, will be 18 miles in length.

**NORDBOFF, Ventura Co., Cal.**—The Southern Pacific Company is at work rebuilding the Ojia Valley railroad, which was destroyed by the floods last winter. The new road will follow the old course. Materials are on the ground and the work will be rushed to completion.

## BETTER FIRE PROTECTION NEEDED FOR RICHMOND DISTRICT.

Battalion Chief John R. Maxwell has called Fire Chief Murphy's attention to the fire protection in the Richmond District. He states that on Lake street from 16th avenue to 19th avenue on California from 14th avenue to 15th avenue, also from 24th avenue to the ocean; on Clement from 15th avenue to 20th avenue and on 32nd avenue to the ocean there are no fire hydrants. This district is thickly settled and is chiefly constructed of frame buildings. He recommends that two new cisterns be installed in several parks in the district as there are only two cisterns operating in the district at the present time.

Hearst is lamenting on the horrors of war and commenting upon the fruits of peace and congratulating the United States on the fact that it has kept its head and is a neutral nation. Bryan has been the subject of more criticism and cartoons on the "doves of peace" episode than anything else. And Hearst has long been even resorting to all kinds of methods to discredit the administration on account of its peace program. Now that the wisdom of the President's plan has become evident to everybody Hearst with his usual style fans about and claims credit for the whole thing.

That portion of the Republic of Panama lying between the Canal Zone and Costa Rica is to have railway facilities by which the coffee from the Boquetta district may be readily brought to the coast. A 36-in. gauge road will be constructed from Pedraza to David, 5 miles, and thence to Boquetta, 28 miles. From David a 22-mile branch line will be built to La Concepcion. An American firm will build the road, which will cost about \$1,600,000.

## A CITY'S WASTE.

J. E. Crichton, M. D.

(Continued From Page 11.)

proved successful beyond our fondest anticipation. When first engaged to write an active health work I wrote a paper recommending a form of garbage disposal by plowing this substance on the ground at a slight depth only did not know just what I was advocating excepting from personal knowledge gained from working on the farm when a boy. I knew that organic materials quickly disappeared when plowed to a very slight depth in the soil on the farm where I was employed. My father was a Scotch physician and pronounced ideas as to the proper preparation and fertilization of the soil. Scotch farming means the spading of the soil and not the plowing. To us boys was delegated the task of turning the soil for intensive development. In going over the paper recently I found that the subject was treated at all intelligently, but nevertheless from this thought has come a practical operation of our sanitary for the disposal of mixed waste without the slightest attempt at segregation, and, as I have said before, we are destroying satisfactorily the putrescible substances which naturally accumulate in a great city.

This method will, I trust, prove most economical and satisfactory. I have attempted for the disposal of mixed waste. It will admit of short haul, that portion of waste which costs about eighty cents on the dollar of the garbage levy, the handling of our waste with very fewest employees. By this method we can fill, in many instances, low valueless lands, making them more valuable and, in some cases, leave unsanitary conditions.

These subjects should receive a hands of our officials much closer than is usually given them, for their correct solution depends largely the health and lives of the people. The death rate of a city now asked about as frequently as is the tax levy. Cities can no longer ignore their sanitary conditions and expect to compete with those cities which are clean and free from things which cause physical decay and death.

The fact that John Eshelman received the Republican nomination for Lieutenant Governor seems to indicate that the people who registered as Republicans are likely to exercise judgment in the final ballot. If Eshelman was nominated there is no reason why he should not be elected. Eshelman is elected there is a reason to believe that Johnson will be elected also. For Eshelman has been the head of the Railroad Commission which is the chief means by which Governor Johnson has fulfilled his promise and kicked the Southern Pacific out of the politics of the State. The Lieutenant Governor did not support the Republican nomination and squarely on the Progressive platform. So far as the people are concerned seems that they still have some independent thought and a major part of them are capable of exercising independence and intelligence in following the lead of political bosses who appeal to bat eyed prejudice and the bigotry of partisans.

The problem of lighting is one that confronts everybody and particularly builders. The question of economy coupled with efficiency is the one with which builders have to deal, but after all the real test of efficiency and consequently economy is the effect of lighting systems upon the human eye.

The following editorial from the current number of the *Scientific American* gives the result of an exhaustive and scientific test:

#### Best Light for the Eyes.

Some three years ago the American Medical Association appointed a special committee to make a study of the effect of different lighting systems on the eye. The problem of lighting, as treated by engineers, has been for the most part an attempt to discover the most efficient forms of lighting from the point of view of economy—that is, how to get the most illumination for the least expenditure of energy. The problem of this committee has been to discover the form, distribution, intensity, and quality of light from the point of view of the health of human eyes.

The work of this committee is not yet completed, but preliminary announcements of results are of considerable interest. Among the aspects of lighting that have definite relations to the eye are: (1) evenness of illumination; (2) the angle at which the light falls on the object viewed; (3) the diffuseness of the light; (4) the evenness of surface brightness; (5) the intensity of the illumination; and (6) the quality of the light. The first four of these factors have been found by means of experimentation to be closely connected, although not absolutely uniform in their variation. Together they constitute what the experts call the *distribution* of the light. The ideal condition of distribution is to have the illumination as uniform as possible over the field of vision, with no extremes of surface brightness.

Daylight has been found to be the most satisfactory form of illumination, from the point of view of distribution. Daylight is pretty well diffused by numerous reflections before it reaches the windows. Inside the room, the window or skylight has a comparatively large area of relatively low brilliancy. These two factors contribute to a nearly uniform illumination of diffused light, with absence of extreme surface brightness.

Of the systems of artificial illumination, the so-called indirect is the best. In this system, the source of light is concealed from the eyes, the light being reflected to the ceilings or walls, and from these to the working surface. In direct illumination there is always the danger of having extremely bright spots in the illuminated surface. A system called the "semi-indirect" was found to be little better for the eye than the direct system. In this the light is thrown to the ceiling or walls, as in the direct system; but part of the light is allowed to come through translucent shades.

The relation of the different systems of lighting to the diminishing efficiency of the eyes was brought out in a series of experiments in which daylight was shown to be almost without effect upon the eyes after three or four hours of work; under direct artificial illumination the eye loses working power at a very rapid rate, and

# Important!!

## Announcement of Improved Service of the "BUILDING and INDUSTRIAL NEWS"

With the desire to aid our advertisers and subscribers we announce the appointment of Lloyd C. Comegys, as our advertising manager.

Advertisers will receive his free advice and assistance regarding the advertisements carried in our weekly magazine, in order that they may produce greater results for them, both in advertising trade names and goods, and in getting direct sales and returns.

**Our Weekly has MANY ADVANTAGES for you.**

**Learn about them by sending for**

**Free Sample Copy**

**Building and Industrial News**

**560 Mission St., S. F.**

almost as rapidly with the semi-indirect illumination. The indirect illumination was found to be nearly as harmless as the daylight. Sharpness of vision was also found to be highest, for any given degree of illumination, under daylight, and poorest under direct artificial lighting.

The deteriorating effect of the light upon the efficiency of the eye seems to be due to the fatigue of the muscles, rather than to any action upon the retina. Both the muscles of accommodation and of fixation seem to be affected.

This explains why the work in daylight, under proper distribution of windows, and with sufficient intensity of illumination, is not so tiring as artificial illumination.

Of course this is not the only element that concerns the health of the eyes. The intensity and the quality of the light are also of great importance.

For daylight and the indirect system, a wide range of illumination allows the eye to continue at work for several hours without undue strain, or rather without considerable falling off in efficiency. But with the semi-indirect and the direct system, there is no evidence of fatigue at every intensity of illumination. In the semi-indirect, however, the eye can continue at work comfortably at an illumination represented by something more than two candle-power at the distance of a foot from the working surface. When the intensity is considerably more or less than this, even the semi-indirect illumination soon tires the eye. As most artificial lighting systems give a much greater intensity than this, the semi-indirect systems are as injurious

to the eyes as the direct systems.

However, the safe intensity of illumination for the semi-indirect system is far too low for clear vision in most kinds of work. It is, therefore, impossible to get high acuity and low loss of efficiency with any system of artificial lighting except the indirect, although the semi-indirect will suffice at the safe intensity for the most home work and office work.

#### SAN FRANCISCO'S AUDITORIUM.

San Francisco's million dollar auditorium, when completed will have many features which will make the big assembly hall one of the best of its kind in the country. It will have a capacity of more than 10,000 people; two banquet halls, 56x136; four exhibition rooms, 60x136, and four reception rooms, 24x32. In all there will be ten committee rooms, two 16x18, four 16x22, two 40x64 and two 12x18. There will be moving picture facilities in connection with each of the banquet halls and an immense kitchen. There will be fourteen stairways to the second floor, or balcony, and twenty-two exits. From the main floor of auditorium there will be eleven exits. The lighting and ventilating system will of the finest. Telephone and telegraph exchanges and rooms for checking 7,329 hats, umbrellas and coats will also be provided. The dome of the building, architecturally known as of the low octagonal type, will be the largest of its kind in the world. An immense organ will be installed at the close of the Fair.

# Efficiency and Advertising

by Lloyd C. Comegys

## Points About Advertising Campaigns.

In order to understand how advertising can make money for you it is necessary to understand what advertising is and what it can accomplish. Advertising in its broader sense, is:

### First: PUBLICITY:

Which is that acquainting the public in a general way with the name of a firm or its offerings which does not have the appearance of direct advertising and is largely received by the public as news.

### Second: TRADE NAME ADVERTISING:

Which appears to the public frankly as Advertising. It aims to make known the name of the firm and the goods it carries. Trade name advertising does not count on direct results, relying upon sales being made by its own salesmen or by the other firms and salesmen who are acting or selling for them.

### Third: DIRECT ADVERTISING:

Which is the selecting of definite parties or a definite locality to whom you desire to sell your offerings and getting your proposition, as directly as possible from you to them. In this you can figure the cost of doing so, the total amount realized on the volume of business obtained thereby and your profit on such business. You can submit a definite, concrete offer to them, and provide for a means of closing that offer and realizing your profit. This allows you to pick out a large number of parties, submit your proposition to them and continue to follow up submitting it to them, until you have effected a sale or found that a sale cannot reasonably be made. In other words, advertising and especially direct advertising is that scientific method or aid which can be used in disposing of whatever you have to offer instead of relying entirely upon personal salesmanship as of old. Properly used advertising can make more money for you than possibly any other single business facility that there is.

If you can sell your offering to more than one party try at the same time to sell it to a thousand or more.

To hire salesmen would cost you much and it would be impossible for you to go to each of a thousand within any reasonable time. By advertising you can talk your proposition to the thousand in a single day. You can learn who is interested and who will not take your line.

You eliminate the time of personally seeing those who won't buy.

You eliminate the cost of personally seeing those who won't buy.

Your time is your capital and what is saved is added capital for additional endeavors.

Advertising enlarges your field of action, enabling you to make more money.

Proper direct advertising also accomplishes trade-name advertising.

## Why Some Advertising Does Not Seem To Pay

Advertising does pay. That has been proven conclusively. The accumulating of large fortunes almost entirely through the use of advertising is the convincing evidence. The many detailed records of its use, its cost and its returns, show how it has been used to advantage. Therefore it is not necessary to establish the fact that advertising has been made to pay many, many hundreds of times. It can be made to pay. Why it has not been made to pay more often is the point we are interested in.

The main defects of advertising campaigns seem to be:

First—That the proposition to be advertised is not fully and scientifically analyzed and charted.

Second—That no competent advice is brought to bear as to what can and should be done in the way of advertising.

Third—There is no definite and scheduled plan of the results expected and there is no record kept of what is being accomplished.

Fourth—There are no methods and records for following up the percentage of results and finding out why they have not come up to the scheduled plan.

Under the first point it would seem almost unnecessary to say that the proposition to be advertised should be carefully analyzed and charted from an advertising and selling standpoint. But right here at the very foundation of a proper advertising structure, lies most of the troubles of the campaigns or expenditures that do not seem to pay.

Second—And when parties say that they are competent to do their own advertising, without having spent time in training for the work, it shows the ignorance of not knowing they are ignorant on that particular subject. Whether to use Publicity methods in your advertising campaign and how

much and in what manner; how much Trade Name advertising to do and in what manner; and how much Direct Selling advertising to do and in what manner, are questions that must be thoroughly understood, answered and the answers carefully charted. Without knowledge and training in advertising it is simply impossible for a person to answer these questions properly.

Third—Definite plans should be made and the standards of the results expected should be carefully established and charted.

Fourth—And lastly, but most important is the work of following up the percentage of returns.

## The Advertising Value Of A Trade Journal.

Eliminating the Publicity end of Advertising, it being too advanced a branch of the work for the general public to try and handle, and considering only the TRADE NAME part and DIRECT SELLING part of Advertising, we find:

That for the purpose of acquainting regularly and most surely, a large number of serious minded people with the name and quality of your goods and the name and location of your firm that the Trade Journal or paper is one of the best mediums. And it is right here where the disappointment in a great deal of advertising comes in, because advertisements that are purely Trade Name advertisements are expected to bring in the returns of Direct Selling advertising.

Never figure on trade name advertising alone, but always in connection with a further campaign or effort of advertising or salesmanship along Direct Selling lines.

Trade Name advertising is an important part, but is only a part of an advertising campaign.

Your little ad coming into an office with every issue is the cheapest and best of ways of reminding people of your existence and your goods.

In Direct Selling campaigns, if the particular Trade Journal or paper covers the field or part of the field you wish covered, it can be made to bring you very great results.

Read your Trade Journals and papers and study carefully how you can use their valuable advertising space for your own advantage and profit.

## Editorial Comment.

### HOW BAD IS WAR?

It is noteworthy and really remarkable that the French, amid all their excitement of trying to keep out a foreign invader that forty years ago took their capital, are now on the one hand taking steps to care for the hundreds of thousands of men who have been thrown out of employment in France by the cessation of the American trade, and on the other hand are giving their attention to investigating the stories that their own people are telling about the cruelties of the Germans. Whatever the motives of the French government may be in this last matter, it is one which undoubtedly will be imitated by the impartial people of the rest of the world. In a sense such conventions as those that have gathered at The Hague in the last twenty years and have propounded rules by which the game of war shall be played, are on trial. Can men be anything but brutes when they are out after victory? When they are playing with death, will they be limited by any particular methods of securing death? Will new rules as to exclusion of novel methods of warfare be honored or ignored, when some new method is the only one possible to Kaiser or Czar at a time when they are fighting for what they consider a righteous cause.

It is true that conventions have agreed that things liked poisoned bullets shall not be used in war, and as a fact they are not used. But is it because of the agreement? Would not the use of poisoned bullets be child's play anyhow? Modern warfare can not take notice of anything so merely incidental as the use of a poisoned bullet. Any ordinary bullet is serious and effective enough when well directed. But would any convention agreement excluding the use of aeroplanes from warfare have been lived up to by either French or Germans in this last fortnight's reconnoitering? It is hardly thinkable.

What the French will find out is whether the stories that their own people are telling about German cruelty are true. If confirmed, doubtless the French will use them effectively in their later campaign before the newer and most effective judge, world public opinion.

But the Germans, on the other side, will be able to gather many stories of cruelty committed by French and Belgian and British. Where these are merely acts of manhood, committed incidentally here and there, they will simply go to confirm the general demand for the ending of all war. But where it appears that they are the re-

sult of intentional planning of commanders, or of gross neglect on the part of the warring government, they will go far to add to the world condemnation of one side or the other in the war. Further, they will go to the question as to whether the word of any government will be worth much in attaching its signature to such an agreement as a neutrality treaty or a convention for the limitation of the effects of war.

The censorship is now heavy upon the battlefield of Europe, but in a very short time the fierce light of publicity will shine upon it as it never has before in the world's history. There doubtless was much cruelty in the war of the allies against Turkey, but the Balkans were rather far removed from European attention or sympathy. Belgium as a war scene will be card catalogued and cross indexed very effectively. We will soon not only know that war is hates, but why it is, and how much.—Fresno Republican.

### THE TRADE ROUTES.

The war in Europe has not only interrupted international trade, but it presents serious difficulties which must be surmounted before a normal movement of merchandise is possible along the old trade routes. With this abnormal condition great consumers of wealth abroad, their European supplies having been cut off, are looking to the United States for merchandise.

The American manufacturer is not only prepared to meet these foreign demands, but he is confident that with the establishment of friendly trade relations, he will be able to compete with Europe and retain his new foreign customers after treaties of peace have been signed. This is indicated by the steps which are being taken to develop the new trade routes on a permanent basis, which is evidenced by the many trade-marks which are being registered abroad by citizens of the United States.

The receipts from the Panama canal since it has been opened are said to have not even paid for operating the locks. So that had the coastwise tolls exemption not been repealed there would have been no revenue whatever under present conditions. Whether or not President Wilson anticipated the present world war our situation now is absolutely impartial no matter what may be the outcome of hostilities in Europe.

And as events are now shaping themselves it looks like it will be up to us to supply the world's commerce for the next year or two. In any event the loud criticism of the President by the newspapers that were seeking some thing to criticize is now silent.

# The Planing Mill Construction.

C. D. Gray In The Woodworker

Great changes have been noticeable in the planing mill business during the past few years, and there is every reason to believe the tendencies which have been in evidence will be more emphasized as time goes on. The lot of the planing mill owner is not an easy one, or conditions under which he must work are getting more and more severe all the time.

The fact that stock mill work has been gradually encroaching on the territory of the planing mill man, so that making up goods to specifications is not demanded so often as formerly, is the biggest feature which is affecting the situation. It must be admitted that the planing mill owner, who was once able to show better quality than the concern making large quantities of doors and other mill work could always do, is no longer able to point out defects in the goods of his competitor, and is finding factory goods carried in stock by the retailer hard to beat as to quality and possessing a big advantage as to price.

With the cost of materials generally advancing, and with lumber and labor alike costing more, the builder is looking for all the short cuts he can possibly take advantage of. One of these is the use of stock designs of mill work, which are turned out of the large plants in such immense lots that the cost of production is very much lower than when the planing mill makes up each lot according to the specifications of the architect for that particular job.

The architects themselves have come around to the stock design in a lot of cases. A veteran planing mill man said the other day that some of the best architects in the country, who formerly made their own designs and superintended the construction of their mill work in local planing mills, are now specifying stock doors which have been pushed under trade names by the manufacturers. With the sentiment of the architects changing in this direction the planing mill depending more or less on local custom is again hard pushed to make a showing.

Dull times with many planing mills have resulted in efforts being made to get business in ways that were formerly not thought of. General contracting is one of these. The planing mill man heretofore contented himself with soliciting the contracting carpenter for the mill work he would require on jobs for which he got the contract. If the work happened to go to a contractor with whom the planing mill man was not acquainted, or who had friends of his own in the business, there was little opportunity of getting the job. Losing out in cases of this kind was naturally distasteful, and the aggressive mill work man began to look around for a safer system of getting the business.

The most obvious method that presented itself was the plan of taking general contracts. If the mill owner

were able to get the entire job, he could sublet those parts of the work which he was not in a position to handle, and take care of the carpentry end of it only. If he liked, he could have a contracting carpenter supply the labor for this portion of the work, and simply furnish the material. In this way he would be sure of getting work for his mill, without the necessity of doing anything except the kind of work the concern had specialized in.

This plan has been used by a large number of planing mill owners and has worked out well, as a general rule. Sometimes, it is true, the mill man, lured on by the opportunity of making a "clean-up," decided to handle the other work himself, instead of subletting it, and in some cases of this kind big losses were suffered. But usually one or two experiences were sufficient to show the planing mill manager that the better plan was to sublet all the work except that involving the mill work, and this is the plan which is in general use.

There are a lot of disadvantages connected with the system, of course. One of them is the increased cost of office work. Instead of having estimators figure only on the mill work, it is necessary to get bids from sub-contractors covering all the other items, and check these up with the plans. That means that if a job is lost, the loss involved in figuring and bidding is much greater than it would have been if the concern had confined its interest to the mill work.

Again those who are in the contracting business exclusively, and have no mills, resent the competition of concerns like planing mills, which come in and compete against them. If the exclusive contractors manage to get the business, they are not likely to feel friendly enough to the planing mill which had in a bid on the whole contract to turn any business its way, but usually buy the necessary mill work from a planing mill devoting itself exclusively to that business, without attempting to get into the contracting game.

That limits the possibilities in that direction, and the plan of doing general contracting, if adopted by one mill, is likely to be followed by others in that territory, since competitors usually adopt each other's innovations if they have value. Thus the proposition is likely to be reduced ultimately to its original terms, with competition among the planing mills still in evidence, though covered up by the general contracting system.

The planing mill man who has had a nice little business, operating in a comparatively small territory and handling jobs close at hand, and who, under the stress of increasing competition and restricted business, has been forced to go far afield as a general contractor in order to get sufficient business to keep his plant going, must indeed feel that he has fallen upon evil days, and certainly this business

is not so desirable nor so comfortable as the other kind. Contracting involves big risks, of which credits are not the least. The general contractor, no matter how carefully he secures himself by bonding his sub-contractors, necessarily has a bigger stake in the game than the man whose attention is confined to conducting a planing mill.

On the other hand the planing mill owner who does general contracting gets a profit not only on the mill work furnished for a job, but a percentage on the work of the sub-contractors. Hence the increased earnings on a single job may more than make up for the increased expense and risk. In some cases, however, the mill work manufacturer is so anxious to keep his machines busy and his plant going that he shaves his bid to the lowest possible amount, in order to insure getting the business. In that event he makes little, if anything, more on the whole job than he would have done on the mill work only, handled under ordinary conditions.

"We wouldn't do any general contracting at all if we could get enough work for our mill otherwise," said the general manager of a large plant in an Ohio valley city. "We've got our investment in buildings, machinery and other equipment, and we want to keep our force together. That means that we must get a larger proportion of the building work of our community than we formerly did. The only way we can do that is to go after general contracts, and that is just what we have done. But it's not altogether satisfactory, and we are handling it only as a matter of necessity."

The entrance of concerns like planing mills into the general contracting field has resulted, too, in a strong movement on the part of concrete and brick contractors, heating and roofing concerns and others who ordinarily operate under subcontracts, in favor of having the work let in detail. It is pointed out that the general contractor is too often a broker, who places sub-contracts wherever he can get the work done the lowest, and the argument is made that the interests of the owner would be best served by having the architect let subcontracts and exercise detailed supervision over these. This is another feature which complicates the situation and makes the future of the planing mill uncertain.

The carpenter, the planing mill and the retail lumberman are all pretty close together. The retail lumberman in some cases has undergone a metamorphosis as a result of the increasing demand for building materials other than wood, and has taken on cement, lime, roofing, builders' hardware, paints, etc., carrying lumber merely as one item in a general stock of building supplies. In other instances he has added a carpenter shop and gone into the contracting end of the business, perhaps adding a line of

mill work to fill out his requirements. The carpenter is now cutting up a lot of lumber on his own account, and many cases are carrying as big a load of lumber as the ordinary carpenter, from whom he differs in name rather than anything else. He, too, is doing stock mill work, as his shop will not rise to the dignity of a planing mill, but has only enough equipment to enable material to be cut to size and dressed, no attempt being made to manufacture doors and other jobs requiring more elaborate equipment and greater skill. But this is not very far away from the planing mill, especially the sort of work which is doing carpenter contractor or general contracting as a means of increasing its volume of business, making up for the holes caused by competition of cheaper lines of goods.

Along the line, then, there is a movement in the direction of holding the volume, changing to meet changing conditions, and adapting the business to the demands of the times. This is the only way to insure continued success and even continuance in the field, may be conceded. It will always be need of the service of the mill work man; and while stock designs and low prices of big manufacturers may restrict opportunities of the local plant, machines can nevertheless be kept in use by resorting to one or another of the devices which present themselves to the business man who keeps near to the ground and never goes far from his work.

#### RED CONCRETE HOUSES MEET WITH FAVOR IN AUSTRALIA.

The pouring of concrete into moulds to make houses has, for several years, been the subject of articles in British, United States, and Canadian journals, the name of the foremost inventor of the day has been associated with the development. After conducting extensive experiments, particularly with regard to the mixing plant and the proportions of the ingredients composing the concrete mixture, an Australian builder—S. B. Marchant, of Adelaide—erected a large number of houses in 1913 in his own city, under the patented "Monolyte" process. The success attained by the practical demonstration of his methods has caused the company to be formed to exploit the process in Australia and to dispose of the patent rights held abroad. The company employed by Mr. Marchant is said to be the nearest approach that has yet been made to realize the prophecy of Mr. Edison with regard to concrete building.

For the system has been only used for plain and strong houses, such as men's cottages and buildings of the class, but it is claimed that the monolyte can be utilized in a superior form of dwelling. In the houses erected at Adelaide, the walls and chimneys are monolithic, while the roof floors are of ordinary construction, but the doors and ceilings can be of reinforced materials. The advantages claimed are the speedy and economical construction of cottages for workers, in which lighting,

ventilation, and sanitation are carefully studied, while the cost of maintenance is reduced to a minimum. By improvements in the moulds and their adaptation, a six-roomed house was recently finished complete in 96 hours, the cost (in Australia) being considerably less than brick and almost as cheap as wood. The Commonwealth Government acting under expert advice, recently purchased a Monolyte plant for use in the northern territory.

#### Process Used for Building Concrete Houses in Australia.

The Monolyte system of ferro-concrete structure varies considerably from that practiced by other somewhat similar processes. The moulds are of wood—with inside faces of iron—and stand the full height of the wall. The concrete is mixed dry on the ground and then conveyed by an elevator to flues (above the moulds) fed with water, and the wet concrete is poured into the moulds in one continuous stream until the walls are filled in. Briefly, the Monolyte process is recapitulated thus:

The ingredients used in the mixture are six parts by measure of three-quarter-inch stone screenings, three parts sand and one part cement. These materials are measured out, roughly mixed and placed at the foot of the elevator, which—with its endless chain buckets—lifts it to the mixing trough, situated above the tops of the moulds. In the mixing trough is a revolving spindle, with arms so designed that as the material is mixed it is also moved along and delivered into galvanized iron shoots, which carry it to any desired position. The material is elevated to the mixing trough in a dry state, and there the water is added from an expert concrete mixer. The whole apparatus is worked by an 8 h. p. petrol engine, which elevates, mixes, and delivers the material. The moulds are constructed of framed wood panels, the full height of the wall, held together where they meet by hinges, the pins of which draw out, and thus allow of their being readily locked together or taken apart. These are lined on the inside faces with plain galvanized iron, which gives true surfaces to the walls.

The moulds when taken down are used repeatedly for other buildings, and a certain degree of variety has been introduced into the construction of the houses by using interchangeable parts, which relieves the monotonous appearance of a number of cottages of this class erected close to each other.

When the moulds are removed the surfaces of the walls are scratched with steel combs to give a key for the plaster. The reinforcement for foundations consist of 3/4-inch steel rods, all hooked together at points and turned corners; for the walls 3/4-inch, 5/16-inch, and 1/4-inch rods as desired, placed 1 1/2 inches to 2 feet apart, vertically and horizontally, and wired together at all intersections. These are put together on the ground and lifted bodily into position in the center of the mould space. They are held in place by distancing pieces of wire at necessary intervals,

All cone-shaped plugs for picture mouldings, etc., are placed in position within the mould, also conduit pipes for electric wires, and the material poured around the same. The houses are plastered on the inside (some with fibrous plaster ceilings) and rough-casted on the outside.

#### Concrete Houses With Steel Frames.

One of the Australian problems of the moment—as rents are continually increasing—is to discover the cheapest and most durable dwelling house, and builders have in concrete a material which is being largely experimented with for construction purposes. Some villa homes, with light steel frames imbedded in concrete, are now being erected in Melbourne suburbs. The steel studs, stanchions, and templates are ingeniously lifted without screws or bolts being required. And the window sashes and door frames are adjusted by a similar device. The advantages claimed for this class of construction are the saving of labor and cost of material, thus giving a durable building at a moderate outlay.—Western Canada Contractor.

#### JOHN R. COMMONS ADDRESSES THE GENERAL CONTRACTORS' ASSOCIATION.

The members of the General Contractors' Association listened to a very able talk from John R. Commons, Professor of Economics of the Wisconsin University, last Thursday night at their headquarters, 110 Jessie street.

Mr. Commons is on the Industrial Relations Commission, appointed by President Wilson, now holding sessions in this city.

During his address Mr. Commons told how the State of Wisconsin formed its labor laws. Wisconsin was in a condition very similar to California, in that the Statute Books were crowded with labor laws. Wisconsin at one full swoop wiped out 163 labor laws and appointed commissions from the ranks of the laborers and from the manufacturers, merchants, employment agencies etc., called public hearings and thereby harmonized all conflicting laws. Labor agitators, lawyers, secretaries and professional men were barred from commissions.

Many interesting questions were asked and answered.

All those who were fortunate enough to attend were well paid for the time consumed.

Mr. Commons is practically well having made them a life study, qualified to discuss labor problems.

PALERMO, Butte Co., Cal.—Grinnell Burt, H. P. Burt and Dunning Fowler, large olive growers, are the principal figures in the organization that has been affected for the construction of an olive picking plant at this place. They will be ready for operation this season and the plant will cost about \$12,000.

PORTERVILLE, Tulare Co., Cal.—A petition will be presented at the next meeting of the City Council, asking for the paving of Oak street. The petition has more than the number of signatures required, and it is thought the immediate steps will be taken to have the street improved.

# ADVANCE NEWS

Classified according to Character of Work

## APARTMENT HOUSES.

**SAN FRANCISCO**—Apartment house, 6 story and base, brick and steel or reinforced concrete. Cost not stated. Architect, Carl Geiffuss, 46 Kearny street, S. F. Owner's name withheld. The building will be erected on Powell street in the Fifty Vara District, and will command an excellent view of the entire city and bay. There will be six apartments in the building, each containing seven rooms. The living and dining rooms will be connected by a reception hall. Each apartment will have three chambers, each with a private dressing room and bath. Interiors will be finished to suit the individual taste of the tenants. Plans provide for steam heat, elevator service, electric dumb waiters, hot water system and vacuum cleaning. All bath rooms will be finished in tile. Exterior of the building will be faced with glazed terra cotta. Plans are being prepared.

**SAN FRANCISCO**—Apartment house, 4 story and base, brick and steel. Cost not stated. Architect, Edward E. Young, 251 Kearny street, S. F. Owner, Herman Hogree, 1011 Hyde street, S. F. The building will be erected at the northwest corner of Hyde and Pine streets, covering an area of 37½ by 87½ feet. There will be 21 apartments arranged in two and three room suites. Interiors will be finished in pine with some elm panels. There will be steam heat, elevator service and a hot water supply. Wall beds will be used. Bath rooms will have tile wainscot and composition floors. Exterior of the building will be faced with pressed brick. Plans are complete and in the hands of the owner who will do the work by Day Labor.

**SAN FRANCISCO**—Apartment house, 3 story and base, frame. Cost not stated. Architect, Carl Geiffuss, 46 Kearny street, S. F. Owner's name withheld. The building will be erected on Van Ness avenue near the Exposition grounds, and will cover an area of 30 by 30 feet. There will be six suites of three rooms and six of two rooms. Interiors will be finished in pine with some elm panels and oak floors. All apartments will have wall beds and private baths. Plans provide for steam heat and a hot water supply. Bath rooms will have tile wainscot and composition floors. Tile and marble will be used in the entrance vestibule. Exterior of the building will be covered with cement plaster on metal lath. Plans are now being prepared.

**OAKLAND, CAL.** Apartment house, 3 story and base, frame, \$20,000. Architect, William Wilde 1725 Broadway, Oakland. Owner, R. Pozzi. The building will be erected at the corner of 27th and Harrison streets, and has been designed to contain a number of two and three room apartments. Interior finish will be of pine and red-

wood with some oak floors. All apartments will have wall beds and private bath rooms. Baths will be finished in tile and will have composition floors. Plans provide for steam heat and a hot water system. Entrance will be finished in tile and marble. Exterior of the building will be covered with cement plaster on metal lath. Plans are complete and figures are now being taken.

**SAN FRANCISCO**—Apartment house, 4 story and base, brick and steel. Cost not stated. Architect, G. A. Applegarth, Call Bldg., S. F. Owner, W. Wakefield. The building will be erected at the southwest corner of California and Stockton streets, covering an area of 66 by 105 feet. There will be a total of 44 apartments of two and three rooms. Interior finish will be of pine and hardwood. Plans provide for steam heat and automatic elevator, hot water supply and vacuum cleaning. All bath rooms will be finished in tile. Wall beds are specified. Entrance will be finished in marble and tile. Exterior of the building will be faced with pressed brick trimmed with terra cotta. Plans are complete and figures will be called for at once.

## Contracts Awarded.

**SAN FRANCISCO**—Apartment house, 3 story and base, frame, \$12,500. Architect, C. S. McNally, Mechanics' Institute Bldg., S. F. Owner, P. D. Bernhard. Contractor, H. C. Warwick, Hearst Bldg., S. F. Contract price, \$12,500.

## BATH HOUSES.

**SAN FRANCISCO**—Bath house addition, 3 story and base, reinforced concrete. Cost not stated. Architects, Reid Bros., California-Pacific Bldg., S. F. Owners, Olympic Salt Water Co. This addition will be constructed on property adjoining the present Lurline Baths on the west, and will have a frontage of 70 feet on the north side of Lush street by a depth of 120 feet. The new portion of the building will be used for Turkish and Swedish bath parlors, additional dressing rooms and a completely equipped laundry. Construction will be similar to the present building, although the design will be slightly modified owing to the uses of the new portion. The present system of heating will be extended into the new portion of the building. Interior will be finished in pine and hardwood plaster. Exterior will be faced with cement plaster. Plans are complete and figures are being taken.

## BONDS.

**NORTH SACRAMENTO, SACRAMENTO CO., CAL.** The State Board of Control has purchased \$25,000 of the North Sacramento School bonds. The bonds bear 5 per cent interest, which will be devoted to the State compensation insurance fund.

**GALLATIN SCHOOL DISTRICT, LOS ANGELES CO., CAL.**—Sealed bids will be received by the Board of Supervisors of Los Angeles County for the purchase of the Gallatin School bonds in the sum of \$10,000. Bonds will be 5½ per cent interest per annum. J. LeLande in the County Clerk.

**SAN BERNARDINO, SAN BERNARDINO CO., CAL.**—An election will be held in the Crest School District for the purpose of voting bonds in the sum of \$2,500 to raise funds for the erection of a school building and the purchase of the necessary equipment. Geo. H. Dexter, H. G. Hansen and H. Neils are the School Trustees.

**SANTA CRUZ, SANTA CRUZ CO., CAL.**—A movement has been started here to call a bond election for the construction of a bridge over the San Lorenzo River at Sequel avenue. The proposition is now being considered by the City Council. There is also some talk of the construction of a pipe line from Laguna, and it is thought that bonds for this work will be voted also.

**ORANGE, ORANGE CO., CAL.**—One bid was received here by the City Trustees for the construction of a bridge across the Santiago creek at East Chapman street. The First National Bank of Orange bid par. The matter was taken under advisement. The bridge will be of reinforced concrete construction and will cost in the neighborhood of \$20,000.

**REDONDO, LOS ANGELES CO., CAL.**—A local newspaper in giving 10 minutes of the meeting of the City Council states: "In the matter of the ordinance submitting to the voters Redondo Beach the proposition of incurring an indebtedness in the sum of \$121,000 for the acquisition and construction of a municipal wharf at the foot of Emerald street, came up for final passage. After discussion it was moved that before any further proceedings the clerk write to Mr. Shor regarding the securing of an easement to the approach to wharf No. 1, which was seconded and carried."

**PINER SCHOOL DISTRICT, SONOMA CO., CAL.**—A bond election here carried by a vote of 47 in favor of the issue and 12 against. It is the intention of the school trustees to erect a two-room school house. The bonds were for \$4,000.

**AUBURN, PLACER CO., CAL.**—Attorneys for Torrence Marshall & Co. purchasers of the school bond issue of Auburn and Roseville, have turned down the bonds on account of alleged irregularities in regard to the publication of the notices of sale of the bonds and calling for an election vote the issue. The bonds voted Auburn amounted to \$17,000 and were for the erection of new Grammar School buildings. Those issued Roseville were in the sum of \$45,000 and were for the erection of a High School. Both these buildings will be delayed and it is probable new elections will have to be held.

**PRINCETON, CALIF.**—The \$15,000 school bonds voted here a year ago for the construction of a new grammar school building have been cancelled by the Supervisors. The action of the Supervisors is due to the fact that the life of the bonds had expired. It is probable that another election will be called.

**ALBANY, ORE.**—Bids will be received by the Board of Directors of School District No. 5, Linn County, until October 1st for the purchase of 50,000 bonds, dated 20 years, optional for ten years, with interest at 5 per cent.

Plans for the proposed school building, which will be built as soon as the bonds are sold, are being prepared by Charles Burgraff, architect, of Albany, Ore.

**SHOSHONE, IDAHO.**—The special election held here to vote on the issuance of \$18,000 in bonds to purchase the local water works system and installing filtration plant, resulted in favor of the proposition.

**TACOMA, WASH.**—Bids will be received here until September 19th for the purchase of bonds in the sum of \$5,000 for street railways. John F. leads is the City Comptroller.

**OAKDALE, STANISLAUS CO., CAL.**—At a meeting of the Board of Directors of the Oakdale Irrigation District it was decided to call a special election to decide whether or not an issue of 100,000 shall be made for improvements in this district.

The date of the election has been set for November 5th. The bonds, if issued, will be used to extend the laterals of the system and make other necessary improvements.

**TURLOCK, STANISLAUS CO., CAL.**—The election for park bonds in this city resulted in the voting of 413 votes for the issue and 188 against. The voting of these bonds is in compliance with in order of the State Railroad Commission whereby the Southern Pacific Company is required to erect a new depot in this city at a cost of not less than \$10,000, provided the city acquires and parks block 6, which adjoins the depot site.

**GARTIA SCHOOL DISTRICT, MARIN CO., CAL.**—An election will be held here on September 19th for the voting of bonds in the sum of \$2,500 to provide for the erection of a school building. Mrs. Alice Gamboni, Mrs. E. M. Hardman and Mrs. L. Evans are the school trustees.

**LINDSAY, TULARE CO., CAL.**—A meeting of the citizens held in the council chambers resulted in the favoring of the issuing of bonds in the sum of \$1,000,000. No date as yet has been set for the election.

**TURLOCK, STANISLAUS CO., CAL.**—G. B. Blymeyer & Co. of San Francisco, the successful bidders for the \$15,000 issue of bonds in Turlock for the purchase of additional fire equipment, have notified City Clerk Weber that they will not take the bonds and request that they receive their certified checks. The firm has abandoned the purchase of the bonds owing to a discrepancy in the ordinances calling the election. It is probable that another election will be called.

**CALEXICO, IMPERIAL CO., CAL.**—A petition is now in circulation asking the city officials to call a special bond election for the purpose of rais-

ing funds with which to make improvements to the present irrigation district.

**SUISUN, SOLANO CO., CAL.**—District Attorney J. M. Raines states that he has been assured that the State Board of Control will purchase the \$60,000 High School bonds, which were rejected by a Los Angeles bond broker.

## BRIDGES AND DAMS.

**SAN FRANCISCO**—Pier, bulkhead and shed, creosoted pile and timber construction, \$204,300. Engineer, Assistant State Engineer Newman, Ferry Bldg., S. F. Owners, State of California. Bids opened for the construction of Pier No. 37 together with the adjoining bulkhead wall and pier shed were opened by the Board of Harbor Commissioners on September 3rd. Healy-Tibbitts Construction Co., S. F., submitted the lowest figure at \$204,300 and will be awarded the contract. Four other sets of figures were submitted. A complete list of the bids will be found under San Francisco in this issue.

**RICHMOND, CONTRA COSTA CO., CAL.**—Railroad bridges, 2, steel construction, \$50,000 each. Engineer, G. W. Harris, Kerchoff Bldg., L. A. Owners, Santa Fe Railroad Co. The company is now replacing all timber bridges along its right of way with modern steel structures. Two bridges near Richmond are now being built by Schoop & Filler of Los Angeles, and plans are under-way for several more steel structures.

**FAIRBORTH, COLUSA CO., CAL.**—Reinforced concrete bridge. Cost not stated. Engineer, County Surveyor, Colusa. Owners, Colusa County. Plans and specifications are complete for a reinforced concrete bridge over the drain at Farnsworth Place, and figures are now being taken for the work. Plans and specifications can be secured from the County Clerk at Colusa. Bids will be opened on September 10th.

**MARE ISLAND NAVY YARD, CAL.**—Piles and timber for quay wall. Cost not stated. Engineer, Bureau of Yards and Docks, Washington, D. C. Owners, United States Government. Bids will be opened on September 9th at Washington, D. C., for furnishing piles and timber for constructing the new quay wall at the Mare Island Navy Yard. Plans and specifications can be secured from either the Bureau of Yards and Docks or from the Commandant at Mare Island.

## Contracts Awarded.

**CAMPBELL, SANTA CLARA CO., CAL.**—Retaining wall, earth construction, \$5,000. Engineer, County Surveyor, San Jose. Owners, Santa Clara County. Contractor, M. E. Kilcourse. San Jose. Contract price, \$5,845.

**ESPARTO, YOLO CO., CAL.**—Bridge, reinforced concrete, \$20,000. Engineer, County Surveyor, Woodland. Owners, Yolo County. Contractors, Ross Construction Co., Sacramento. Contract price, \$28,760. Earth work, Sam Schwab, Esparto, 17½¢ per cubic yard for 3,000 yards.

**WALNUT GROVE, SACRAMENTO CO., CAL.**—Bridge, steel and reinforced concrete, \$77,660. Engineer, County Surveyor, Sacramento. Owners, Sacramento County. Contractors, Jenkins & Wells, address in care of Sacramento

County surveyor, Sacramento. Contract price, \$77,660.

**STOCKTON, SAN JOAQUIN CO., CAL.**—Bridge, steel and reinforced concrete, \$75,680. Engineer, County Surveyor, Stockton. Owners, San Joaquin County. Contractor, James Malenich, Stockton. Contract price, \$133,680.

**MERCED, MERCED CO., CAL.**—Bridge, reinforced concrete, \$14,500. Engineer, County Surveyor, Merced. Owners, Merced County. Contractors, Mesmer-Rice, Marsh-Strong Bldg., L. A. Contract price, \$14,700.

**ASTORIA, ORE.**—Docks, 1 and 2 story pile and timber, \$145,425. Engineer, F. J. Walsh, Port of Astoria Commission, Astoria. Owners, City of Astoria. Contractor, C. L. Houston, Astoria. Contract price, \$145,425.

## CHURCHES.

**LOS ANGELES, CAL.**—Church, 1 and 2 story and base, brick and steel, \$100,000. Architect, Frank L. Meline, 6621 Hollywood avenue, L. A. Owners, Fifth Church of Christ, Scientist. The building will be erected on a large lot recently secured at the corner of La Brea and Hollywood Boulevard. Interior will be arranged for a number of lecture rooms, study rooms and reading rooms. Interior finish will be of pine and hardwood with ornamental plaster. There will be a modern system of heating and ventilating. Art glass will be used. Exterior of the building will be faced with pressed brick trimmed with terra cotta. Plans are now being prepared. Further mention will be made of the work.

## COURT HOUSES.

**SAN FRANCISCO**—City Hall carpentry work. Cost not stated. Architects, Bakewell & Brown, 251 Kearny street, S. F. Owners, City and County of San Francisco. Bids opened at the regular Wednesday meeting of the Board of Public Works for the carpentry and mill work in the new City Hall show Monson Bros. low on all three propositions as follows: (1) \$40,768; (2) \$156,818; and (3) \$197,768. A complete list of the bids received for this work will be found under the heading of San Francisco in this issue.

**SAN FRANCISCO**—City Hall elevator work. Cost not stated. Architects, Bakewell & Brown, 251 Kearny street, S. F. Owners, City and County of San Francisco. Bids opened for furnishing and installing the elevator equipment in the new City Hall show Otis Elevator Co. low on Prop. 1 at \$59,755, and the Van Emon Elevator Co. low on Props. 2 and 3 as follows: \$11,400 and \$10,100. Contract has not been awarded.

**NEW WESTMINSTER, B. C.**—Court house addition and completion. Class A construction. Cost not stated. Architect's name not given. Owners, British Columbia. The Public Works Engineer, J. E. Griffith of the Provincial Department of Public Works at Victoria, will receive bids until September 15th for erecting and completing an additional building and making additions to the present court house at New Westminster. Plans, specifications and full information can be had from the Government Agent, New Westminster and Vancouver, or at the Department of Public Works, Victoria, B. C.

## FACTORIES AND WAREHOUSES.

**SAN FRANCISCO**—Factory, 2 story and base. Class C construction, \$30,000. Architect, none. Owners, Moody Estate, Kohl Bldg., S. F. Contractors, H. H. Lasen & Bro., 68 Post street, S. F. Contract price, \$30,000. Note: This building will be occupied by the National Biscuit Co.

**LOS ANGELES, CAL.**—Laundry, 1 story and base, brick and steel, \$35,000. Architect, Fred A. Hale, 624 San Fernando street, L. A. Engineers, Hunter & Hudson, Rialto Bldg., S. F. Owners, Los Angeles Laundry Co. The building will be erected on Yale street, covering an area of 155 by 260 feet. Besides the several large work rooms the building will contain offices of the company. There will be a large amount of special machinery. A complete pumping plant will be installed. Metal window sash and frames and fireproof doors will be used. An automatic sprinkler system will be specified. Exterior of the building will be faced with sand lime brick. Plans are complete and figures are being taken.

### Contracts Awarded.

**SEATTLE, WASH.**—Grain elevator, reinforced concrete, \$197,900. Engineer, Port of Seattle Commission, Seattle. Owners, City of Seattle. Contractors, W. T. Butler Contracting Co., Central Bldg., Seattle. Contract price, \$197,900.

## FIRE HOUSES AND JAILS.

**SAN FRANCISCO**—Detention home, 3 story and base. Class A construction, \$50,000. Architects, City Department of Architecture, Temporary City Hall. Owners, City and County of San Francisco. The first of a new group of buildings which will comprise the new Juvenile Detention Home will shortly be erected on West Mission street between Brady and 13th streets. The building will have a complete steel frame and brick exterior walls. There will be the main administration offices, dormitories, dining room and kitchen and private detention rooms. Interior partitions will be of hollow tile. Pine and hardwood finish will be used. Plans provide for steam heat and a hot water system. Exterior will be faced with pressed brick. The Board of Supervisors has appropriated \$50,000 for this work and next year will appropriate a like amount. Only preliminary plans have been prepared by the Department of Architecture. Further mention will be made of the work.

## FLATS.

**SAN FRANCISCO**—Flats, 2 story and base, frame, \$7,000. Architects, J. E. Kraft & Sons, Phelan Bldg., S. F. Owner, Dr. J. N. Powell. The building will be erected on the west side of 4th avenue south of Irving and has been designed to contain two modern flats of five and six rooms. Interiors will be finished in pine and redwood. Hardwood floors will be used in the principal rooms. There will be open fire places and tile or brick mantels. Bath rooms will have tile wainscot. Exterior of the building will be covered with cement plaster on metal lath. Plans are complete and figures are now being taken.

**OAKLAND, CAL.**—Flats, 2 story and base, frame, \$1,500. Architect, Charles F. Mau, Macdonough Bldg., Oakland. Owner, F. W. Largesen. The building will be erected at the corner of 10th and Magnolia streets and has been designed to contain two modern flats of five and six rooms. There will be hardwood floors in the principal rooms. Interiors will be finished in pine and redwood. Open fire places will be used. Mantels will be of tile or brick. Bath rooms will have tile wainscot. Exterior of the building will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

## GARAGES.

### Contracts Awarded.

**SAN FRANCISCO**—Garage, 1 story and base, reinforced concrete. Cost not stated. Architect, Carl Geiffuss, 46 Kearny street, S. F. Owner, Col. Adolph Huber. Contractors, Camp & Carillon, S. F. Contract price not stated.

## GOVERNMENT WORK & SUPPLIES.

### Medford, Ore., Construction.

The following bids were received by the supervising architect, Treasury Department, Washington, D. C., for the construction, complete, of the U. S. post office at Medford, Ore.:

Bid 1. Fred A. Erickson, Salem, Ore.  
2. Palmberg & Mattson, Astoria, Ore.

3. Welch Bros. & Hannaman, 5th and Jefferson streets, Oakland, Cal.  
4. Wm. O'Neil & Son Co., Faribault, Minn.

5. Sound Construction & Engineering Co., 1009 Lowman Building, Seattle, Wash.

6. John Alm-ter, 309 Railway Exchange Building, Portland, Ore.

7. A. W. Kutsche, 307 Yeon Building, Portland, Ore.

8. King Lumber Co., Charlottesville, Va.

9. R. E. Campbell, Salt Lake City, Utah.

10. J. L. Murphy & Son, Charleston, Wash.

Proposal No. 1 (using limestone for all exterior stonework, except where granite is required)—Bid 1, \$100,882; 2, \$92,686; 3, \$92,697; 4, \$99,741; 5, \$76,789; 6, \$87,277; 7, \$75,645; 8, \$100,000; 9, \$88,600; 10, \$113,680.

Proposal No. 2 (using sandstone for all exterior stonework, except where granite is required)—Bid 1, \$99,882; 2, \$92,686; 3, \$92,697; 5, \$77,000; 6, \$87,177; 7, \$75,445; 8, \$99,400; 9, \$88,400; 10, \$113,680.

For alternate No. 1 (substituting Keene's cement for hard plaster on walls of all finished rooms throughout the building, as specified), add—Bid 1, \$715; 2, \$600; 3, \$600; 4, \$1,000; 5, \$1,762; 6, \$339; 7, \$525; 8, \$2,500; 9, \$1,200; 10, \$3,418.

For alternate No. 2 (painting all plastered surfaces of walls and finishing ceilings in distemper throughout the building, as specified), add—Bid 1, \$1,950; 2, \$2,500; 3, \$1,410; 4, \$2,500; 5, \$1,971; 6, \$2,050; 7, \$1,400; 8, \$2,400; 9, \$2,200; 10, \$3,500.

For alternate No. 3 (substituting concrete for the macadam driveway, as specified), add—Bid 1, \$221; 2, \$300; 3, \$278; 4, \$600; 5, \$242; 6, \$320; 7, \$400; 8, \$700; 9, \$400; 10, \$1,168.

For alternate No. 4 (substituting limestone or sandstone for face brick below the first floor level), add to proposal No. 1—Bid 1, \$1,187; 2, \$800; 3, \$4,640; 4, \$950; 5, \$754; 6, \$1,000; 7, \$750; 8, \$3,000; 9, \$900; 10, \$875.

Add to proposal No. 2—Bid 1, \$987; 2, \$800; 3, \$1,640; 5, \$921; 6, \$640; 7, \$600; 8, \$2,700; 9, \$800; 10, \$875.

For alternate No. 5 (substituting terra-zzo for cement floors in lobby and postmaster's toilet, as specified), add—Bid 1, \$234; 2, \$800; 3, \$365; 4, \$1,000; 5, \$390; 6, \$470; 7, \$200; 8, \$1,000; 9, \$480; 10, \$598.

For alternate No. 6 (for alternate design of elevator inclosure, as specified), add—Bid 1, \$957; 2, \$4,000; 4, \$1,000; 5, \$1,528; 6, \$3,990; 7, \$4,000; 8, \$1,000; 9, \$1,400; 10, \$950.

For alternate No. 7 (for more elaborate finish in the courtroom, as specified), add—Bid 1, \$1,945; 2, \$3,000; 4, \$3,626; 5, \$1,470; 6, \$2,150; 7, \$2,400; 8, \$1,750; 9, \$2,500; 10, \$800.

For changes in lighting fixtures, as required by alternate No. 7, add—Bid 1, \$197; 2, \$275; 4, \$100; 5, \$250; 6, \$357; 7, \$50; 8, \$100; 9, \$180; 10, \$200.

Amount included in the proposal for furnishing and installing of all interior lighting fixtures—Bid 1, \$1,189; 2, \$1,530; 3, \$1,550; 4, \$1,850; 5, \$1,500; 6, \$1,437; 7, \$1,450; 8, \$1,200; 9, \$1,500; 10, \$1,600.

### Fibre Conduit, Okanogan Project.

The following bids were received by the U. S. Reclamation Service, Los Angeles, Cal., for furnishing fibre conduit, etc., for the Okanogan project:

Item 1, 400 feet 2-inch fibre conduit;  
2, loricated conduit and fittings; 3, outlet boxes.

Pacific States Electric Co., Los Angeles, Cal., item 1, \$59.74; 2, \$84.91; 3, \$22.86; deliveries, item 1, San Francisco; 2 and 3, Seattle.

Holabird-Reynolds Electric Co., Los Angeles, Cal., item 2, \$84.63; 3, \$27.50; deliveries, Los Angeles.

Pierson, Roeding & Co., Los Angeles, Cal., item 1, \$89.74; at San Francisco.

H. W. Johns-Manville Co., Los Angeles, Cal., item 1, \$125; at Lakeport, N. Y.

T. P. Foster Co., Los Angeles, Cal., item 1, \$120; 2 days.

### Denver, Colo., Mechanical Equipment.

As previously reported the contract for the mechanical equipment of the U. S. post office at Denver, Colo., was awarded to the Cris Irving Plumbing & Heating Co., Denver, Colo. In the prosecution of the work nonconducing coverings for heating and water piping manufactured by the Johns-Manville Co. will be used.

The following bids were opened by the supervising architect, Treasury Department, Washington, D. C., to

an oil-burning plant for heating boiler in the U. S. post office and custom house at Eureka, Cal.:

Marine Iron Works, Eureka, Cal., \$1,751.50; 30 days.

S. T. Johnson Co., 1337 Mission street, San Francisco, Cal., \$940; time, October 25, 1914.

Fess System Co., San Francisco, Cal., \$995; no time.

T. P. Jarvis, 284 Mission street, San Francisco, Cal., \$1,300; 60 days.

#### Salt River, Earthwork.

The following bids were opened by the U. S. Reclamation Service, Phoenix, Ariz., for earthwork and structures, Wallace Peter Canal, Salt River project, Ariz.:

Item 1, 65,000 cu yds class 1 excavation; 2, 100 yds class 2 excavation; 3, 2,000 rods fence rebuilding; 4, 215 cu yds class 1 reinforced concrete; 5, 60 cu yds class 2 plain concrete; 6, 50 sq yds grouted paving; 7, 150 cu yds excavation for structures; 8, 16,150 ft erecting bridges; 9, laying 160 ft concrete pipe.

D. O. Johnson, Phoenix, Ariz., item 1, 12c; 2, 35c; 3, 25c; 4, 12c; 5, 30c; 6, 25c; 7, \$12; 8, \$9; 9, \$3; total, \$19,538.50.

Martin & Gillis, Tempe, Ariz., item, 1, 11.9c; 2, 11.9c; 3, 40c; 4, 11.9c; 5, 11.9c; 6, 40c; 7, \$19.60; 8, \$15; 9, \$2.50; total, \$21,497.20.

W. H. Mason, Hornbrook, Cal., item 1, 16c; 2, 40c; 3, 50c; 4, 16c; 5, 40c; 6, 50c; 7, \$21; 8, \$20; 9, \$3; total, \$27,641.

Maney Bros., Boise, Idaho, item 1, 17c; 2, 40c; 3, 50c; 4, 17c; 5, 40c; 6, 50c; 7, \$9; 8, \$8; 9, \$3; total, \$25,351.

Grant Bros., Los Angeles, Cal., item 1, 12.5c; 2, 35c; 3, 50c; 4, 12.5c; 5, 35c; 6, 50c; 7, \$14.58; 8, \$14.03; 9, \$1.93; total, \$21,034.75.

George Tisdale, Prescott, Ariz., item 1, \$12.75c; 2, 60c; 3, 40c; 4, 12.75c; 5, 60c; 6, 40c; 7, \$17.50; 8, \$15; 9, 2c; total, \$22,160.

#### Air Brake Switch.

Abstract of proposals received by U. S. reclamation service in connection with advertisement No. 323 for air brake switch for McQueen Well, Salt River project, Arizona, bids opened at Los Angeles, Cal.

Pacific Electric Mfg. Co., \$123.50; delivered San Francisco, Cal.; time, 15 days.

#### Grass Valley, Cal., Post Office.

An additional contract has been made with Welch Brothers, Grass Valley, Cal., for fireproof construction of the first floor and mezzanine and iron stairs in basement and to the mezzanine floor of the U. S. post office at Grass Valley, Cal. The contract price amounted to \$5,900.

#### Reclamation Service, Culverts.

The contract for furnishing corrugated metal culverts for use on the Grand Valley irrigation project, Colorado, has been awarded to the Hardesty Mfg. Co., Denver, Colo., at \$7,031.72.

#### Reclamation Service, Steel Pipes.

The contract for furnishing and erecting riveted steel pipes for the St. Mary's storage unit, Milk River irrigation project, Montana, has been awarded to Chicago Bridge & Iron Works, Chicago, Ill., at \$19,500.

### HALLS AND SOCIETY BUILDINGS.

OAKLAND, CAL.—Auditorium tile and marble work. Cost not stated. Architect, Supervising Architect, J. J. Donovan, Oakland. Owners, City of Oakland. Plans and specifications are complete for the marble and tile work for the Municipal Auditorium. Plans and specifications can be secured from the Supervising Architect. Bids will be opened on September 11th.

SAN MATEO, SAN MATEO CO., CAL.—Lodge hall and stores, 2 story and base, reinforced concrete, \$40,000. Architect, Will D. Shea, 244 Kearny street, S. F. Owners, San Mateo County Knights of Columbus Hall Association. The building has been mentioned here before when the architect was first commissioned to prepare plans. There will be three stores on the ground floor and large lodge rooms, assembly hall and offices on the upper floor. Interior of the second floor will be finished in pine and hardwood with a maple floor in the assembly hall. Plans provide for steam heat and vacuum cleaning. Patent store fronts will be used. Exterior of the building will be faced with cement plaster. Plans are complete and figures are being taken.

#### Contracts Awarded.

LOS ANGELES, CAL.—Lodge hall, 2 story and base, brick and steel, \$25,000. Architects, Dennis & Hewitt, Fay Bldg., L. A. Owners, Westlake Lodge o Masons. Contractors, Hunsberger-Reed Construction Co., Van Nuys Bldg., L. A. Contract price, \$25,000.

### HOSPITALS.

VENTURA, VENTURA CO., CAL.—Hospital, 2 story and base, brick. Cost not stated. Architect, A. C. Martin, Higgins Bldg., L. A. Owners, Ventura County. The building will cover a ground area of 90 by 175 feet, and will contain the administrative section, dining room, kitchens, wards and about sixty rooms for private patients. An asylum will also be connected with the building. A separate building will house the heating system. Interior will be finished in pine and hardwood with pine and tile floors. There will be special plumbing. Steam heat is specified. Exterior of the building will be faced with pressed brick. Plans are complete and figures are now being taken. Plans and specifications can be secured from the architect.

SAN FRANCISCO—Library, 3 story and base, Class A construction, \$1,000,000. Architect, George William Kelham, Sharon Bldg., S. F. Owners, City and County of San Francisco. The Library Trustees have officially approved plans for the new building to be erected in the Civic Center as prepared by Architect George William Kelham. These plans will be submitted to the Supervisors for their approval. Construction cannot be started until the \$300,000 bond issue has been sold.

### HOTELS.

SAN FRANCISCO—Hotel, addition and alteration, brick, \$35,000. Architects, Dunn & Kearns, Monadnock Bldg., S. F. Owners, Normandie Hotel Co., William M. Wise, Lessee. The building at the corner of Gough and Sutter streets will undergo extensive

alterations and the frame dwelling adjoining it will also be altered and connected to the Normandie by an arcade. Included in the work will be new plumbing, painting, electric work, plastering and interior finish. Plans are now being prepared and figures will be called for as soon as working drawings can be completed.

LOS ANGELES, CAL.—Hotel and stores, 11 story and base, Class A construction. Cost not stated. Architect, John J. Fraenfelder, 1116 Story Bldg., L. A. Owner's name withheld. The building will be erected on East 5th street near Los Angeles, and will have a frontage of 50 feet by a depth of 150 feet. There will be two stores besides the hotel lobby on the ground floor and a total of 212 guest rooms with 155 baths on the upper floors. Plans provide for a complete steel frame, brick erected walls and hollow tile interior partitions. Interior will be finished in pine and hardwoods. There will be steam heat, oil burning equipment, freight and passenger elevators, a vacuum cleaning system, hot water supply and metal window sash and frames. Patent store fronts will be used. Bath rooms will be finished in tile. Exterior of the building will be faced with terra cotta and enameled pressed brick. Plans are now being prepared.

OAKLAND, CAL.—Hotel addition, 6 story and base, reinforced concrete, \$65,000. Architect, Clay N. Burrell, Albany Bldg., Oakland. Owner, A. C. Aiken. The present one-story store building at the corner of 15th and Jefferson streets will be added to and the upper floors arranged for a modern hotel. The building will cover an area of 50 by 60 feet, and will contain a large number of single rooms and public baths. Interior finish will be of pine and redwood. There will be steam heat, elevator service and a hot water system. Bath rooms will be finished in tile. Exterior of the building will be faced with cement plaster. A contract will be awarded to F. A. Muller, Syndicate Bldg., and he will let all subcontracts. Plans are complete and subfigures are being taken by Mr. Muller.

#### Contracts Awarded.

LODI, SAN JOAQUIN CO., CAL.—Hotel, 4 story and base, brick and steel, \$108,000. Architect, E. B. Brown, Yosemite Bldg., Stockton. Owners, Lodi Hotel Investment Co. The following contracts have been awarded for the construction of the building: General construction, Ernest Green, Modesto; electric work, F. J. Wallace, Lodi; painting, J. L. Pickering, Lodi; plumbing, Henderson Bros., Lodi; plastering, P. J. Grauman, Stockton; marble work, J. L. Houghton, Fresno; tile work, H. C. Fisher, Stockton; steam heating, Hatley & Hatley, San Francisco; ornamental iron work, Builders' Iron Works, Stockton; face brick, moulded brick and terra cotta, Gladding-McLean, San Francisco; and elevator work, Otis Elevator Co., San Francisco.

### LIBRARIES.

SANTA BARBARA, SANTA BARBARA CO., CAL.—Library, 2 story and base, Class A construction, \$70,000. Architect, Francis W. Wilson, 717 1/2 State street, Santa Barbara. Official approval has been given the design

prepared by Architect Wilson for this building and working drawings will be prepared at once. The building will contain two large reading rooms besides a separate children's room, office of the librarian and stock room. Interior will be finished in pine and hardwoods with maple floor. There will be steam heat and vacuum cleaning. Metal book shelves will be used. Exterior of the building probably will be faced with pressed brick. Plans are being prepared.

### PANAMA—PANIFIC EXPOSITION WORK.

SAN FRANCISCO—Telephone exchange. Cost not stated. Engineer, Director of Works, Service Bldg., S. F. Owners, Panama-Pacific International Exposition. Plans are complete and figures are now being called for installing a telephone exchange in the Food Products Building at the Exposition Grounds. Plans and specifications can be secured from the Director of Works. Bids will be opened on September 11th. An official proposal appears in another column of this issue.

SAN FRANCISCO—Marine Gardens cafe, 1 and 2 story, frame and plaster, \$35,000. Architect, Charles Paff & Co., Merchants Exchange Bldg., S. F. Owners, Marine Gardens Cafe Co. The building will be erected in the concessions section of the Exposition Grounds, and has been arranged for two separate cafes for ladies and gentlemen and a larger cafe for both. There will be complete kitchen equipment. Interior will be finished in pine and ornamental plaster. Special kitchen equipment will be installed. Exterior of the building will be covered with cement plaster on metal lath. Plans are complete and the work is now being done by Day Labor.

SAN FRANCISCO—State exhibit building, 1 story, frame and plaster, \$20,480. Architect's name not given. Owners, State of Arkansas, Contractor, Lester H. Stock, 12 Geary street, S. F. Contract price, \$20,480. Note: The contract price does not include the lumber which will be furnished by the owners.

### Contracts Awarded.

SAN FRANCISCO—Association building, 2 story, frame and plaster, \$25,000. Architect, Julia Morgan, Merchants' Exchange Bldg., S. F. Owners, Young Women's Christian Association. Contractor, John Monk, S. F. Contract price, \$25,000.

### POST OFFICES.

SAN FRANCISCO—Public lighting fixtures. Cost not stated. Architect, Supervising Architect Oscar Wenderoth, Washington, D. C. Owners, United States Government. Bids will be opened in Washington, D. C. on September 21st for installing lighting fixtures in the United States public buildings in the following cities: San Francisco, Minneapolis, Minn.; Muskogee, Okla.; and Boston, Mass. Plans and specifications can be secured from the Supervising Architect.

PORTLAND, ORE.—Post office, 4 story and base, Class A construction, \$1,000,000. Architect, Lewis P. Hobart, Crocker Bldg., S. F. Owners, United

States Government. Competitive plans submitted by Architect Hobart have been approved for the new Federal Building to be erected at Portland. Four other San Francisco firms and one Portland firm were invited in the competition. The building will be of fireproof construction and will contain the Federal offices and the post office. The design is in the classic style. Only preliminary studies have been made and complete details are not as yet available. Further mention will be made of the work.

MEDFORD, ORE.—Post office, 1 and 2 story and base, semi-fireproof construction. Cost not stated. Architect, Supervising Architect Oscar Wenderoth, Washington, D. C. Owners, United States Government. A. W. Kutsche, 317 Yeon Bldg., Portland, Ore., submitted the lowest figure for constructing the new Federal building at Medford, and will probably be awarded the contract although official action has not been taken. His bid was \$75,645 for limestone and \$75,445 for sandstone.

### RAILROAD CONSTRUCTION AND EQUIPMENT.

RICHMOND, CONTRA COSTA CO., CAL.—Railroad station, 1 story, brick. Cost not stated. Architect, Engineering Department Southern Pacific Co., Flood Bldg., S. F. Owners, Southern Pacific Co. Bids will be taken at once for constructing the new Southern Pacific passenger depot at Richmond. Plans have been changed from a frame and plaster structure to a brick building with plastered exterior walls. About \$10,000 will be expended in construction. A freight depot and extensive track work will also be put in.

HIGHLAND, SAN BERNARDINO CO., CAL.—Railroad construction. Cost not stated. Engineer, Chief Engineer Pacific Electric Co., L. A. Owners, Pacific Electric Co. The Pacific Electric Railroad has announced that it will extend its lines into the rich citrus fruit section around Highland. New lines will be built to the packing houses and the old Highland-San Bernardino line will be constructed. This territory has formerly been in control of the Santa Fe Railroad exclusively.

YUBA CITY, YUBA CO., CAL.—Railroad construction. Cost not stated. Engineer's name not given. Owners, Dairy Farm Railroad Co., Yuba City. The Dairy Farm Railroad, operating out of Yuba City, has been granted a right of way through Reclamation District 1001 in Yuba County.

TRUCKEE, NEVADA CO., CAL.—Snow shed construction, \$70,000. Engineer, Engineering Department Southern Pacific Co., Flood Bldg., S. F. Owners, Southern Pacific Co. The S. P. Co. is replacing seven thousand feet of snow sheds in and around Truckee. The company will spend in the neighborhood of \$70,000 on the work.

### RESIDENCES.

SAN FRANCISCO—Residence, 2 story and base, frame, \$7,000. Architect, Albert Fair, Foxcroft Bldg., S. F. Owner, A. Sheehan. The dwelling will be erected in Sea Cliff Terrace, and has been designed to contain seven rooms and bath. Interior will be finished in pine and hardwood. Hardwood floors will be used in the principal rooms.

Bath will have tile wainscot and composition floor. An automatic water heater will be installed. Mantels will be of tile. Exterior will be covered with cement plaster on metal lath. Plans are now being figured.

SAN FRANCISCO—Residence, 2 story and base, frame and plaster. Cost not stated. Architect, Carl Geiffuss, 46 Kearny street, S. F. Owner's name not given. The dwelling will be erected in St. Francis Wood. The first floor will be arranged for a living room, a reception hall, which will open into the living and dining rooms, kitchen, pantry and servants' hall. Upper floor will consist of owner's chamber, son's room and servants' rooms. The three principal chambers will have baths and private dressing rooms. Basement will contain a large billiard room. A garage will be erected in the rear of the lot. An automatic water heater will be installed. Interior of the house will be finished in hardwood with hardwood floors throughout. Brick or tile mantels will be specified. A vacuum cleaning system will also be installed. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are being prepared.

SAN FRANCISCO—Residence, 1½ story and base, frame. Cost, \$10,000. Architect, Henry H. Gutterston, 80 Post street, S. F. Owner, Duncan McDuffie. The dwelling will be erected in St. Francis Wood, and has been designed to contain nine rooms, seven on the first floor and two on the upper floor. Interior will be finished in hardwood and redwood. Hardwood floors will be used in the principal rooms. There will be three baths, all of which will be equipped with showers. There will be furnace heat and open fire places. Mantels will be of brick. Roof will be covered with tile shingles. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are now being figured.

SAN FRANCISCO—Residence, 2 story and base, frame and plaster, \$13,000. Architect, Frederick Boese, 45 Kearny street, S. F. Owner, George A. Clough. The dwelling will be erected on the south side of Francisco street just east of Hyde street. Interior will be finished in pine. Baths will have tile floors and will be equipped with showers. Mantels will be of tile or brick. An automatic water heater will be installed. Hardwood floors will be used in the principal rooms. Exterior of the building will be covered with metal lath and plaster. Plans are now being figured.

SAN FRANCISCO—Residence, 2 story and base, frame, \$2,500. Architect, none. Owner, Oscar Heyman & Bro. The dwelling will be erected on Lincoln Way near 24th avenue and has been designed to contain seven rooms with bath. Interior will be finished in pine with gum in the living and dining rooms. Floors will be of pine and hardwood. Bath will have tile wainscot and composition floor. An automatic water heater will be installed. Exterior of the dwelling will be covered with rustic. The work will be done by Day Labor. Materials are now being purchased.

SAN FRANCISCO—Residence, 2 story and base, frame, \$2,500. Architect, none. Owner, Hanson Walton, S. F. The dwelling will be erected on the west side of 28th avenue south of Cle-

ment street, and has been designed to contain six rooms with bath. Interior will be finished in pine and hardwood. Hardwood floors will be used in the living and dining rooms and reception hall. Mantels will be of brick. Modern plumbing will be installed. Plans are complete and the work will be done under the Day Labor system.

**SAN FRANCISCO**—Residence, 2 story and base, frame, \$10,000. Architect, Matthew O'Brien, Foxcroft Bldg., S. F. The dwelling will be erected at the northeast corner of Fulton and 4th avenue, and will contain in the neighborhood of nine rooms and two baths. Interior will be finished in pine and hardwood. Hardwood floors will be used in the principal rooms. Baths will have tile wainscot and composition floors. There will be furnace heat and open fire places. Mantels will be of tile or brick. An automatic water heater will be installed. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are now being prepared.

**SAN FRANCISCO**—Residence, 2 story and base, frame, \$4,500. Architect, none. Owner, J. M. Peters, S. F. The dwelling will be erected on 19th avenue south of California street, and will contain six rooms and bath. Interior will be finished in pine. Hardwood floors will be used in the principal rooms. There will be furnace heat and open fire places. Exterior of the dwelling will be covered with rustic and metal lath and plaster. The work will be done by Day Labor. Materials are now being purchased.

**BERKELEY, ALAMEDA CO., CAL.**—Residence, 2 story and base, frame. Cost not stated. Architect, W. H. Ratcliff, Jr., First National Bank Bldg., Berkeley. Owner, Miss Margaret Little. The dwelling will be erected in Northbrae, and has been designed to contain seven rooms with bath. Interior will be finished in pine and redwood. Hardwood floors will be used in the principal rooms. There will be furnace heat and open fire places. Mantels will be of brick or tile. An automatic water heater will be installed. Exterior of the dwelling will be covered with cement plaster. Plans are now being figured.

**OAKLAND, CAL.**—Residence, 1 story, frame, \$3,500. Architect, C. C. Dakin, First National Bank Bldg., Oakland. Owners, Oakland Home Corporation, Oakland. The dwelling will contain eight rooms, and will be erected at the southwest corner of Brookdale avenue and Bartlett street. Interior will be finished in pine. Hardwood floors will be used in the principal rooms. Mantels will be of brick or tile. Exterior will be covered with cement plaster on metal lath. Plans are complete and the work will be done by Day Labor. Materials are now being purchased.

**BERKELEY, ALAMEDA CO., CAL.**—Residence, 2 story and base, frame and plaster. Cost not stated. Architect, Geo. W. Patton, 2126 Emerson street, Berkeley. The dwelling will be erected in North Cragmont, Berkeley, and will contain in the neighborhood of seven rooms and bath. Interior will be finished in pine and hardwood. Hardwood floors will be used in the principal rooms. Bath will have tile wainscot and composition floor. Mantel will be of tile or brick. There will

be furnace heat and open fire places. Exterior will be covered with cement plaster on metal lath. Plans are now being figured.

**OAKLAND, CAL.**—Residence, 1 story, frame and plaster, \$5,000. Architect, Chas. F. Mau, Macdonough Bldg., Oakland. Owner, Mrs. B. W. McIntosh. The dwelling will be erected on east Last Shore and Santa Ray avenues, and will contain eight rooms and two baths. Interior will be finished in pine and hardwood with some elm panels. Hardwood floors will be used in the principal rooms. There will be furnace heat and open fire places. Mantels will be of brick or tile. Exterior will be covered with cement plaster on metal lath. Plans are now being figured.

**SACRAMENTO, CAL.**—Residence, 2 story and base, frame and plaster, \$2,500. Architect, none. Owner, H. M. Earle, 2028 Magnolia avenue, Sacramento. The dwelling will be erected on lot 306 in Boulevard Park, and will contain six rooms and bath. Interior will be finished in pine and hardwood. Hardwood floors will be used in the principal rooms. There will be furnace heat and open fire places. Mantels will be of brick. Plans are complete and the work will be done by Day Labor. Materials are now being purchased.

**SAN FRANCISCO**—Residence, 2½ story and base, reinforced concrete, \$20,000. Architect, John Davis Hatch, Humboldt Bank Bldg., S. F. Owner's name withheld. The building will be erected on 32nd avenue in the West Clay Park tract and has been designed to contain ten rooms, three baths and sleeping porch. A garage will also be erected on the property. Interior of the house will be finished in pine and hardwood with some white enamel. Hardwood floors will be used in the principal rooms. There will be a central heating system, probably furnace heat. Open fire places and tile mantels will be used. An automatic water heater will be installed. Bath rooms will be finished in tile. Exterior of the dwelling and garage will be faced with cement plaster. Plans are being figured.

**SAN FRANCISCO**—Residences, 3, 2 story and base, frame, \$3,000 each. Architect, none. Owner, F. Nelson, 20 Presidio Terrace, S. F. These dwellings will be erected on the north side of Parnassus avenue west of Hill street and each has been designed to contain six rooms and bath. Interiors will be finished in pine and redwood. Hardwood floors will be used in the principal rooms. There will be open fire places and tile mantels. Bath rooms and kitchens will have tile wainscot. Exteriors will be covered with rustic and cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor. Materials are now being purchased.

**SAN FRANCISCO**—Residence, 2 story and base, frame, \$6,500. Architects, J. E. Kraft & Sons, Deland Bldg., S. F. Owner, Henry Connahrens. The dwelling will be erected in St. Francis Wood and has been designed for a seven-room house with two baths and sleeping porch. Interior will be finished in pine and redwood with some hardwood veneer. There will be furnace heat and open fire places. Man-

tels will be of tile or brick. Hardwood floors will be used in the living room, dining room and reception hall. There will be an automatic water heater. The wainscot will be used in the bath room. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

**BERKELEY ALAMEDA CO., CAL.**—Bungalow, 1 story and base, frame, \$2,500. Architect, Architectural Designers, First Trust Bldg., Oakland. Owner, C. Haws. The dwelling has been designed for a six room house and will be erected on McGee street. Interior will be finished in pine and redwood. Some oak floors will be used. There will be open fire places and tile mantels. Exterior of the house will be covered with cement plaster on metal lath. Plans are being prepared.

**SAN JOSE, SANTA CLARA CO., CAL.**—Bungalow, 1 story and base, frame, \$3,000. Architect, none. Owner, W. M. Lewis, 210 South 16th street, San Jose. The dwelling has been designed for a six-room house with bath. Interior finish will be of pine and redwood. Some hardwood floors will be used. There will be an open fire place and tile mantel. Exterior will be covered with rustic and cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor.

**FRESNO, FRESNO CO., CAL.**—Residence, 2 story and base, frame, \$18,000. Architect, Ernest J. Kump. The dwelling will be erected on a country estate about five miles out of the city of Fresno and has been designed in the Mission style. There will be in the neighborhood of twelve rooms, several baths and sleeping porches. Interior will be finished in pine and hardwoods. Hardwood floors will be used in the principal rooms. A central heating system will be installed. There will be open fire places and tile mantels. Bath rooms will be finished in tile. Automatic water heaters will be installed. Exterior of the house will be covered with cement plaster on metal lath. A clay tile roof will be used. Plans are complete and work will shortly be started.

**LOS ANGELES, CAL.**—Residence, 2 story and base, frame, \$20,000. Architect, Frank M. Tyler, Black Bldg., L. A. Owner, Mrs. M. Wiley. The dwelling will be erected in Lafayette Square and has been designed to contain fourteen rooms and four baths. Interior finish will be of pine, redwood and hardwoods with white enamel in the chambers. Hardwood floors will be used in the principal rooms. A central heating system will be installed. All bath rooms will be finished in tile and equipped with showers. Open fire places with tile mantels will be used. Art glass is specified. Automatic water heater will be installed. Exterior of the house will be covered with cement plaster on metal lath. A clay tile roof is specified. Plans are being prepared.

**LOS ANGELES, CAL.**—Residence, 2 story and base, brick and plaster, \$20,000. Architects, Morgan, Walls & Morgan, Van Noy Bldg., L. A. Owner, Mrs. L. J. H. Hastings. The dwelling will contain fourteen rooms and four baths. A location has not yet been selected. Interior of the dwelling will be finished in pine and hardwoods with white enamel in the

chambers. Hardwood floors will be used in the principal rooms. There will be a central heating plant, probably hot water. Bath rooms will be finished in tile. Exterior of the house will be faced with cement plaster. Plans are now being prepared.

SACRAMENTO, CAL.—Residences, 1 story, frame. Cost not stated. Architect, none. The following Day Labor jobs are about to be started in Sacramento: R. S. Mackey, 2305 K street, 1 story frame dwelling, \$1,600, and C. Valine, 2117 15th street, Sacramento, 1 story frame, \$1,000.

### SCHOOLS.

FOLSOM, SACRAMENTO CO., CAL.—School, 1 story and base, hollow tile construction, \$30,000. Architects, Geo. C. Sellen and Alden W. Campbell, 1005 K street, Sacramento. Owners, Folsom School District. The building has been designed in the Mission style and will contain eight class rooms and a large assembly hall. Interior will be finished in pine with maple floors in the class rooms. There will be a central heating system, probably a plenum system. Modern school plumbing will be installed. Exterior of the building will be faced with cement plaster. Plans are complete and figures are being taken. Bids will be opened on September 16th. Plans and specifications can be secured from the architects.

BURLINGAME, SAN MATEO CO., CAL.—School, 1 story and base, frame and plaster, \$25,000. Architects, Thomas Edwards and P. L. Norberg, Bank Bldg., San Mateo. Owners, Burlingame Meadows School District. The building will contain eight rooms and office. Interior will be finished in pine with maple floors in the class rooms. A plenum system of heating will be installed. Exterior of the building will be covered with cement plaster on metal lath. A metal tile roof will be used. Plans are complete and figures are being taken. Bids will be opened on September 15th. Plans and specifications can be secured from the architects.

RICHMOND, CONTRA COSTA CO., CAL.—School, 1 story and base, brick or hollow tile construction, \$50,000. Architects, Stone & Wright, 21 South California street, Stockton. Owners, Richmond School District. The building will be erected on Main street and has been designed for a twelve-room school with a large assembly hall, teachers' room and principal's office. Interior will be finished in pine with maple floors in the class rooms. There will be a central heating system and modern school plumbing. Vacuum cleaning and program clocks will be installed. The School Board are considering both the brick and interlocking types of construction, and figures will be taken both ways. Exterior of the building will be faced with pressed brick or cement plaster. Bids are now being taken.

PORTLAND, ORE.—School, 2 story and base, reinforced concrete, \$45,000. Architects, Tourtellotte & Hummel, Rothchild Bldg., Portland. Owners, First Methodist Church Congregation. The building will be erected at the corner of 14th and Taylor streets and has been designed for a Sunday school building. The building will cover an

area of 100 by 60 feet with club rooms on the first floor. Upper floor will contain a number of class rooms and an assembly hall seating 600 people. Interior will be finished in pine throughout. There will be steam heat. Exterior of the building will be faced with cement plaster. Plans are being completed and figures will be called for shortly.

ATHENA, ORE.—School, 2 story and base, brick, \$55,000. Architects, Tourtellotte & Hummel, Rothchild Bldg., Portland. Owners, Athena School District. The building will cover an area of 78 by 125 feet and has been designed to contain ten class rooms, gymnasium and an auditorium seating 500 people. Interior will be finished in pine with maple floors in the class rooms. Furnace heat will be installed and modern plumbing. Plans provide for program clocks and vacuum cleaning. Exterior of the building will be faced with pressed brick. Plans are being prepared.

### Contracts Awarded.

ROSEVILLE, PLACER CO., CAL.—School, 1 story and base, reinforced concrete, \$11,900. Architect, W. H. Weeks, 75 Post street, S. F. Owners, Roseville School District. Contractor, Harvey A. Klyce, S. F. Contract price, \$11,500.

BUENA VISTA, TULARE CO., CAL.—School, 1 story, frame and plaster, \$12,000. Architect's name not given. Owners, Buena Vista School District. Contractor, L. F. Pratt, Tulare. Contract price, \$10,551.

NORTH SACRAMENTO, CAL.—Schools, 2, 1 story frame. Cost not stated. Owners, North Sacramento School District. Contractors, Wall & Parker, Sacramento. Contract prices, \$1,500 and \$5,000.

FRESNO, FRESNO CO., CAL.—School heating. Cost not stated. Architect, W. D. Coates, Fresno. Owners, City of Fresno. Contractors, Robert Dalziel, Jr., Co., S. F. Contract price, \$3,295.

### SEWERS, STREET WORK & WATER SYSTEMS.

CALIFORNIA—State Highway work. Cost not stated. Engineer, State Highway Commission, Forum Bldg., Sacramento. Bids were opened by the State Highway Commission on August 31st for the construction of highways in the following counties: Orange, Los Angeles, Kern, San Luis Obispo, Santa Barbara, Yuba and Colusa. All bids were taken under advisement. A complete list of bids together with the engineer's estimate and the materials furnished by the State will be found under the heading of Stockton, Sacramento and Northern California in this issue.

RICHMOND, CONTRA COSTA CO., CAL.—Elevated sidewalk work. Cost, \$5,000. Engineer, City Engineer, Richmond. Owners, City of Richmond. The Richmond City Council has instructed the City Engineer to secure bids for constructing an elevated sidewalk at the subway on sixteenth street. The work will be of concrete and has been estimated to cost \$5,000.

SAN MATEO, SAN MATEO CO., CAL.—Storm water sewers. Cost not stated. Engineer, City Engineer. Owners, City of San Mateo. A resolution of intention has been passed by the San Mateo City Council for the construc-

tion of a concrete box storm water sewer with brick manholes to be constructed between San Mateo and Burlingame. Bids on this work will be called at once.

SEATTLE, WASH.—Highway construction. Cost not stated. Engineer, City Engineer, Seattle. Owners, Port of Seattle. The proposal of Gen. Chittenden, of the Port of Seattle Commission, to construct a highway from the business district to Lake Washington has been considered by city officials here. Four schemes, varying in cost from \$687,000 to \$1,840,000. The first scheme calls for a 1,800 foot tunnel, 25x10 feet with a terminus at 35th avenue. It would have two tracks with an elevated track for foot traffic. This would cost approximately \$1,840,000. The second scheme calls for a tunnel 25x60 and to cost \$687,000. Schemes 3 and 4 would cost in the neighborhood of \$800,000 and \$950,000.

RED BLUFF, TEHAMA CO., CAL.—Street paving. Cost, \$3,600. Engineer, City Engineer. Owners, City of Red Bluff. An additional contract for street paving in this city has been awarded by the City Council to the Chico Construction Company.

MODESTO, STANISLAUS CO., CAL.—Concrete flume, reinforced concrete, \$55,000. Engineer, Chief Engineer, Modesto Irrigation District, Modesto. Owners, Modesto Irrigation District. The Board of Directors of the Modesto Irrigation District have accepted plans and specifications prepared by the Commonwealth Engineering Company for sewer pumping plant. Cost not stated. Engineer, City Engineer, Fresno. Owners, City of Fresno. Plans for constructing a discharge pipe for sewer pumping plant No. 2, located on Franklin avenue for a reinforced concrete flume to be built at Gasburg. It will be 720 feet in length and will cost \$55,000.

FRESNO, FRESNO CO., CAL.—Disinfection, have been completed. Bids are now being taken and will be opened by the City Council on September 15th. Plans and specifications can be secured from the City Clerk.

SANTA CRUZ, SANTA CRUZ CO., CAL.—Sewer work. Cost not stated. Engineer, City Engineer, Santa Cruz. Owners, City of Santa Cruz. Plans are complete and figures are being taken for constructing a vitrified ironstone pipe sewer with brick manholes along certain streets in Santa Cruz. Bids will be opened on September 14th. Plans and specifications can be secured from the City Clerk.

SAN JOSE SANTA CLARA CO., CAL.—Street paving. Cost not stated. Engineer, City Engineer, San Jose. Bids will be opened on September 14th at 5 o'clock for street paving in San Jose. Plans can be secured from the City from the City Clerk.

POCATELLO, IDAHO—Sewer construction. Cost not stated. Engineer, City Engineer, Pocatello. Owners, City of Pocatello. Bids will be opened on September 17th for constructing sanitary sewers in Pocatello. The work will require 36,585 feet of pipe and ditch, 1,520 feet of 18-inch sewer, 1,120 feet 12-inch sewer, 5,400 feet 30-inch sewer, 320 feet 8-inch sewer. Vitrified catch basins and laterals will be used. The larger sewers will be of concrete pipe. There will be 22 catch-basin covers and 46 manholes. Plans and

HOOD RIVER, ORE.—Highway con-

### Contracts Awarded.

struction. Cost, \$57,758. Engineer, County Surveyor. Owners Hood River County. The contract for the construction of highways in Hood River County has been awarded to the Newport Land and Construction Company of Hermiston Ore., on their bid of \$57,758. Fourteen bids were received, ranging from \$57,758 to \$74,370. Work will start in sixty days.

### STORES AND OFFICES.

SAN FRANCISCO—Undertaking parlors, 1 story and base, frame and plaster. Cost not stated. Architect, Carl Geiffuss, 46 Kearny street, S. F. Owner's name withheld. Working drawings are practically completed for the largest undertaking establishment in the city. The building is designed in the classic style with a large center pediment and ionic columns and will be trimmed with marble. Interior is arranged for five chapels, three of which will be 27 by 33 feet, one 31 by 47 feet and one 22½ by 31 feet, general offices, private office, attendants' quarters and morgue, ladies' parlor and show room. Interior will be finished in natural woods except the morgue which will have tile floor and walls. Each chapel will have a large arched glass dome. The exterior will be covered with cement plaster.

SAN FRANCISCO—Loft addition, 1 story, Class C construction. Cost not stated. Architects, Charles Paff & Co., Merchants' Exchange Bldg., S. F. Owner, Otto Kertz. The addition will be made to a one-story building on Stevenson street between 5th and 6th streets. New portion will be used for a loft. Interior will be finished in pine. There will be metal window sash and frames. Exterior of the building will be faced with stock brick. Plans are complete and in the hands of the owner who will do the work by Day Labor. Materials are now being purchased.

SAN FRANCISCO—Assembly hall, 1 story brick addition, \$10,000. Architect, William H. Crim, Jr., 125 Kearny street, S. F. Owner, J. P. Toullet. An additional story will be erected to the store building now building on the south side of Sutter street west of Larkin. The upper floor will be used for an assembly hall. Interior will be finished in pine and redwood. A maple floor will be used. Modern plumbing and steam heat will be installed. Exterior of the building will be faced with pressed brick. Plans are complete and figures are being taken.

OAKLAND, CAL.—Office, 1 story, frame, \$4,000. Architect, none. Owner, W. E. Whalin, Bacon Bldg., Oakland. An addition of six offices will be made to the one-story frame building at the northeast corner of 4th and Broadway. Interior of the offices will be finished in pine throughout. Exterior

will be covered with cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor. Materials are now being purchased.

BERKELEY, ALAMEDA CO., CAL.—Stores, 1 story and base, brick and reinforced concrete, \$10,000. Architect, Clay N. Burrell, Albany Bldg., Oakland. Owners, Cohn Bros. The building will be erected on Alcatraz east of Adeline, covering an area of 78 by 60 feet. There will be five stores, all of which will have plate-glass windows in patent store fronts. Interiors will be finished in pine and hardwood veneer. Some tile floors will be used. There will be marble wainscot. Exterior of the building will be faced with cement plaster. Plans are being prepared.

OAKLAND, CAL.—Store alterations, brick construction, \$10,000. Architect, William Wilde, 1725 Broadway, Oakland. Owners, Athens Hotel. The ground floor of the building will be altered and five stores put in. There will be patent store fronts and plate glass windows. Interior finish will be of pine and hardwood. Marble and tile wainscot will be used. Plans are now being prepared. Further mention will be made of the work when ready for figures.

SAN JOSE, SANTA CLARA CO., CAL.—Fire escapes, seven buildings. Cost not stated. Architect, none. Owners as follows. Fire escapes have been ordered placed on the following buildings in the city of San Jose: St. John, Oakland, Bristol and Menlo rooming houses, the Hotel Vendome, the Odd Fellows Building and Heald's Business College.

YUBA CITY, SUTTER CO., CAL.—Store, 1 story and base, reinforced concrete, \$10,000. Architect, John J. Foley, 46 Kearny street, S. F. Owners, Diamond Match Co. The building has been designed for a large drygoods store. Interior will be finished in pine. The ceiling will be 20 feet high and a mezzanine floor will probably be constructed. There will be patent store fronts. Exterior will be faced with cement plaster. Plans have been turned over to the owners who will do the work by Day Labor. Materials are now being purchased.

SEATTLE, WASH.—Lofts, 9 story and base, reinforced concrete, \$850,000. Architect, George C. Nimmius, People's Gas Building, Chicago. Owners, Sears-Roebuck Co. This company is about to construct a nine-story building at the corner of First avenue and Utah street, covering a large ground area. Construction will be fireproof. Plans have been completed by the architect and have been forwarded to Seattle for figures. Details of the building have not been made public, but it is stated that bids will be called for at once. The date for opening figures has not been set. Further mention will be made of the work later.

### Contracts Awarded.

SEATTLE, WASH.—Lofts, 9 story and base, reinforced concrete, \$850,000.

Architect's name not given. Owners, The Black Mfg. Co., Seattle. Contractor, D. H. Hofman, Haight Bldg., Seattle. Contract price, \$60,000. Note The contractor is now taking sub figures on the work.

### THEATRES.

#### Contracts Awarded.

SALINAS, MONTEREY CO., CAL.—Theatre, 1 story and base, reinforced concrete. Cost not stated. Architect, William Binder, Rea Bldg., San Jose. Owners, H. P. Brown & Son. Contractor, Ratke, Gilroy. Contract price not stated.

### UP AND DOWN THE COAST.

FALL RIVER MILLS, Shasta Co., Cal.—Fourteen land owners on the west side of the Fall river are making legal publication of a petition asking the Supervisors to call an election that they may vote to form the Fall River Valley West Side District on September 7th. It is proposed to irrigate the land, most of it in the vicinity of Glenburn, by pumping water from Fall river with electric power and then diverting it over the land through ditches and canals. The point of diversion is named in the petition as being Section 26, Township 7S, North Range 4 East.

WEAVERVILLE, Trinity Co., Cal.—Residents of this county are preparing a petition to present to Congress asking for an appropriation to locate and construct a highway in the Trinity National Forest. The proposed road would pass over the "Burrell Survey" and would be about forty-seven miles in length. The petition represents that the proposed route would connect the present road system of Northern California and provide the State with a cross country road.

RICHMOND, Contra Costa Co., Cal.—City Engineer Chapman has been instructed by the City Council to prepare plans and specifications for the improvement of Seventh street to Lucas avenue. A resolution of intention has been passed instructing the City Engineer to prepare plans and specifications for the improvement of Sixteenth street from Ohio street to Cutting Boulevard.

SANTA ROSA, Sonoma Co., Cal.—Building Inspector Charles B. Koles reports that during the month of August twenty-four building permits were issued representing an expenditure of \$12,368.

CALEXICO, Imperial Co., Cal.—County Surveyor C. N. Perry has a force of men at work on the survey of the sand hill route from Holtville to Yuma. The stretch of three miles will occupy about three weeks in which to be completed with a plank road.

SANTA CRUZ, Santa Cruz Co., Cal.—The City Council has decided to call a special election and put it to the people to decide whether they are willing to have bonds issued to construct a reinforced concrete bridge across the San Lorenzo river at Soquel avenue. The bridge, if constructed, will cost in the neighborhood of \$50,000. A petition bearing 400 names has been placed in the hands of the commissioners asking that the matter be submitted to the people.

# PROPOSALS

## Bids Wanted

### PROPOSALS FOR CANAL SUPPLIES.

**PANAMA CIRCULAR 866**—Proposals for Furnishing and Erecting Structural Steel for the Cristobal Coaling Plant Wharf Structure. Sealed proposals will be received at the office of the general purchasing officer, the Panama Canal, Washington, D. C., until 10:30 a. m., September 21, 1914, which time they will be opened in public, for furnishing the above-mentioned articles. Blanks and general information relating to this circular (No. 866) may be obtained from this office or the offices of the assistant purchasing agents, 1036 North Point street, San Francisco, Cal.; also from the U. S. engineer offices in the following cities: Seattle, Wash.; Los Angeles, Cal. F. C. BOGGS, major, corps of engineers, U. S. army, general purchasing officer.

### PROPOSALS FOR WHARF AND SHED

**WHARF AND SHED**—Sealed proposals indorsed "Proposals for Wharf and Wharf shed" will be received at the bureau of yards and docks, Navy Department, Washington, D. C., until 11 o'clock a. m., September 26, 1914, and then and there to be publicly opened, for wharf and wharf shed at the navy torpedo station, Puget Sound, Wash. Plans and specifications may be obtained on application to the bureau or to the commandant of the navy yard, Bremerton, Wash. H. R. STANFORD, chief of bureau.

### NOTICE TO CONTRACTORS.

SEALED bids will be received by W. F. McClure, State Engineer, Capitol Building, Sacramento, California, up to and including 12 o'clock, noon, Monday, September 21, 1914, said bids then and there to be publicly opened and read for furnishing all plant, materials, and labor, and doing the work required for the construction and erection of a building to be known as the "Chambers Cottage, Napa State Hospital, Napa, California, in accordance with the plans and specifications therefor, copies of which may be obtained on application to the State Department of Engineering, Sacramento, California.

Such bids will be received for the Entire Work, and must be submitted on forms prepared and furnished by the State Department of Engineering. Cash, a bidder's bond, or a certified check in the sum of ten per centum (10%) of the amount of bid must accompany each bid.

A deposit of Ten (\$10.00) Dollars will be required for the plans and specifications, the deposit to be returned immediately on the return of the plans and specifications to the State Department of Engineering, Sacramento, California, in good condition.

The State Department reserves the right to reject any and all bids and to waive any informality in any bid received.

All bids must be addressed to W. F. McClure, State Engineer, Sacramento, California, and plainly marked on the envelope, "Proposal for Chambers Cottage, Napa State Hospital, Napa, California."

(Signed) W. F. McCLURE, State Engineer. (\*)

Aug. 26-27, Sept. 2-10.

### NOTICE TO CONTRACTORS.

SEALED bids will be received by W. F. McClure, State Engineer, Capitol Building, Sacramento, California, up to and including 12 o'clock, noon, Wednesday, September 23, 1914, said bids then and there to be publicly opened and read for furnishing all plant, materials, and labor, and doing the work required for the construction and erection of buildings to be known as the "Cottages for Males, Agnew State Hospital, Agnew, California, in accordance with the plans and specifications therefor, copies of which may be obtained on application to the State Department of Engineering, Sacramento, California, in good condition.

Such bids will be received for the Entire Work, and must be submitted on forms prepared and furnished by the State Department of Engineering. Cash, a bidder's bond, or a certified check in the sum of ten per centum (10%) of the amount of bid must accompany each bid.

A deposit of Ten (\$10.00) Dollars will be required on plans and specifications, the deposit to be returned immediately on the return of the plans and specifications to the State Department of Engineering, Sacramento, California, in good condition.

The State Department reserves the right to reject any and all bids and to waive any informality in any bid received.

All bids must be addressed to W. F. McClure, State Engineer, Capitol Building, Sacramento, California, and plainly marked on the envelope, "Proposal for Temporary Cottages for Males, Agnew State Hospital, Agnew, California."

(Signed) W. F. McCLURE, State Engineer. (\*)

Aug. 26-27, Sept. 3-10.

### NOTICE TO CONTRACTORS.

SEALED bids will be received by W. F. McClure, State Engineer, Capitol Building, Sacramento, California, up to and including 12 o'clock, noon, Thursday, September 24, 1914, said bids then and there to be publicly opened and read for furnishing all plant, materials, and labor, and doing the work required for the construction and erection of buildings to be known as "Hospital Cottage" and "Typical Cottages Nos. 1 and 2, California School for Girls, Ventura, California, in accordance with the plans and specifications therefor, copies of which may be obtained on application to the State Department of Engineering, Sacramento, California.

Such bids will be received for the Entire Work, and must be submitted on forms prepared and furnished by the State Department of Engineering. Cash, a bidder's bond, or a certified check in the sum of ten per centum (10%) of the amount of the bid must accompany each bid.

A deposit of Fifteen (\$15.00) Dollars will be required on plans and specifications, the deposit to be returned immediately on the return of the plans and specifications to the State Department of Engineering, Sacramento, California, in good condition.

The State Department reserves the right to reject any and all bids and to waive any informality in any bid received.

All bids must be addressed to W. F. McClure, State Engineer, Sacramento, California, and plainly marked on the envelope, "Proposal for Hospital Cottage and Typical Cottages Nos. 1 and 2, California School for Girls, Ventura, California."

(Signed) W. F. McCLURE, State Engineer. (\*)

### PROPOSALS FOR CANAL SUPPLIES.

**PANAMA CIRCULAR 867**—Proposals for Furnishing and Erecting Structural Steel for the Cristobal Coaling Plant Wharf Structure. Sealed proposals will be received at the office of the general purchasing officer, the Panama Canal, Washington, D. C., until 10:30 a. m., September 14, 1914, which time they will be opened in public, for furnishing the above mentioned articles. Blanks and general information relating to this circular (No. 867) may be obtained from this office or the office of the assistant purchasing agent, 1036 North Point street, San Francisco, Cal.; also from the U. S. engineer offices in the following cities: Seattle, Wash.; Los Angeles, Cal. F. C. BOGGS, major, corps of engineers, U. S. army, general purchasing officer.

**PROPOSALS FOR QUAY WALL.**  
**QUAY WALL**—Sealed proposals, indorsed "Proposal for Pile and Lumber Work for Reconstructing Quay Wall," will be received at the bureau of yards and docks, Navy Department, Washington, D. C., until 11 o'clock a. m., September 9, 1914, and then there publicly opened, for pile and lumber work for reconstructing quay wall at the navy yard, Mare Island, Cal. Plans and specifications may be obtained on application to the bureau or to the commandant of the navy yard, Mare Island, Cal. H. R. STANFORD, chief of bureau.

### PROPOSALS.

**OFFICE OF THE BOARD OF PUBLIC WORKS OF THE City and County of San Francisco.**

Sealed proposals will be received at this office between the hours of 10 o'clock p. m. and 3 o'clock p. m., on Wednesday, the 30th day of September, 1914, for doing the following public work, including the furnishing of the necessary labor and materials therefor to wit:

The construction of a tunnel with approaches and appurtenances thereunder the elevation known as the Twin Peaks Ridge in the City and County of San Francisco.

Progressive payments will be made. Said work must be done in accordance with the plans and specification on file in the office of the Board of Public Works, to which reference is hereby made, and must be commenced within fifteen (15) calendar days and completed within six hundred (600) calendar days from the date of the contract to be made and entered into therefor.

The amount of bond for faithful performance of contract has been fixed at \$500,000.00.

All proposals offered must be accompanied by a check certified by a responsible bank, payable to the order of the Clerk of the Supervisors, for an amount not less than ten per cent of the aggregate of the proposals.

Printed proposal forms will be furnished gratuitously upon application at the office of the City Engineer, and proposals must be made upon such forms.

The Board of Public Works reserves the right to reject any and all bids, by order of the Board of Public Works.

F. J. CHURCHILL, Secretary.

### NOTICE TO CONTRACTORS.

### PANAMA-PACIFIC INTERNATIONAL

**TELEPHONE EXHIBITION.**  
SEALED PROPOSALS will be received by the Buildings and Grounds Committee of the Panama-Pacific International Exposition Company at Room 1115, in the Service Building, Filmore and Chestnut Streets, San Francisco, California, at 9:00 A. M., Friday, September 11th, 1914, for Constructing Telephone Exchange, Power Plant and Building, in accordance with plans and specifications on file in the office of the Director of Works.

Each proposal must be accompanied by a certified check payable to the order of the Panama-Pacific International Exposition Company in the sum of ten (10) per cent of the amount bid, or the same will not be considered. When the award of contract is made all checks will be returned to the respective bidders, except that bid which the accepted proposal or bid which check will be returned upon the successful bidder signing the contract and filing the required bond. A bond in the sum of fifty (50) per cent of the contract price will be required for the faithful performance of the contract; the sureties thereon must be satisfactory to the Buildings and Grounds Committee of the Panama-Pacific International Exposition Company.

Progressive payments will be made. The right is reserved to reject any and all bids and to waive technical defects if in the interest of the Exposition Company.

Plans and specifications for the work may be obtained from the Director of Works, Room 207, Service Building, Fillmore and Chestnut Streets, San Francisco, by depositing \$10.00, such amount will be refunded to contractors submitting bona fide bids. All persons taking out plans and failing to submit bona fide bids will forfeit the deposit of Ten Dollars to the Exposition Company.

By order of the Buildings and Grounds Committee.

WILLIAM H. CROCKER,  
Chairman. (•)

PROPOSALS FOR LIGHT FIXTURES.

LIGHT FIXTURES—Treasury Department, Office of the Supervising Architect, Washington, D. C.—Sealed proposals to be received here until September 21, 1914, for installing light fixtures in the U. S. public buildings at Minneapolis, Minn.; Muskogee, Okla.; Boston, Mass., and San Francisco, Cal. For further information address the supervising architect.

WHAT AND WHERE ARGENTINA BUYS AND SELLS.

A foreign trade of nearly a billion dollars a year is enough to make the exporters and importers of the United States sit up and take notice of any country, and Argentina crowded that figure last year. To be a bit more exact, it was about \$850,000,000. That is nearly \$125 per capita. The foreign trade of the United States is about \$44.20 per capita. Evidently Argentina is some trading nation, and the questions What and from whom does that country buy? and what and to whom does it sell? are just now of peculiar importance. This Pan-European war is stirring up the business interests of the United States as they have never been stirred before, and they want to know a number of things.

In this connection the Pan American Union, Washington, D. C., publishes in the July number of its Monthly Bulletin a detailed review of the commerce of Argentina for 1913 which reveals some very important facts. For instance, we find that in textiles, including manufactures of silk, wool, cotton, and other fibres, Argentina imported nearly \$90,000,000 worth; iron, steel and manufactures thereof, to the value of \$50,000,000; railway cars, automobiles, and other vehicles, worth over \$37,000,000; earths, stone, coal, etc., nearly \$37,000,000; building materials nearly \$36,000,000; and food products \$35,000,000. These are but six of the

Who sold Argentina the goods? The 19 major classifications given in detail, following are the amounts in round numbers of the imports from each of the leading six countries, given in Argentine dollars and an Argentine dollar is worth about 97 cents in United States money: From the United King-

dom (Great Britain not including Canada, Australia, or other possessions) \$130,900,000; Germany, \$71,000,000; United States, \$62,000,000; France, \$38,000,000; Italy, \$35,000,000; Belgium, \$22,000,000. Of the total imports the United Kingdom furnished 31.1 per cent; Germany, 16.9 per cent; United States, 14.7; France, 9; Italy, 8.3; Belgium, 5.2. In other words over 54 per cent of Argentina's imports in 1913 came from four of the European countries now busily engaged in trying to exterminate one another.

The second question, What and to whom does the country sell? is about as important as the first. If Argentina can't sell her products she can't get the money to buy. That's a pretty plain proposition. Now, what does she sell? Preeminently food products, needed just now by the warring nations as perhaps never before. Last year Argentina sold over \$200,000,000 worth of agricultural products, consisting principally of corn, \$112,000,000; wheat, \$102,000,000; linseed, \$50,000,000; oats, \$20,000,000; barley, \$1,000,000; rye, \$567,000; potatoes, fruits, hay, etc. in smaller quantities.

Of live animals and meat products she sold \$166,000,000 worth. Of frozen beef over 321,000 tons went to the United Kingdom; 3,415 tons to Italy; 2,322 tons to the United States; and 767 tons to France. Of frozen mutton 45,131 tons went to the United Kingdom, 254 tons to France, and 243 tons to the United States.

Food products like those mentioned will be in such demand that ways and means will be found to transport them to Europe, and if there should be any surplus doubtless the United States will be glad to be a larger purchaser. Other products, however, may not be so easily disposed of. For instance, of the exports of salt cattle hides, over 30,000 tons went to Germany; 14,000 to the United Kingdom; 11,000 tons to the United States; 7,000 tons to Belgium, etc. Of flint cattle hides, nearly 11,000 tons went to the United States; 4,300 tons to Germany; 2,650 tons to Italy; over 1,300 to Belgium, etc. Of unwashed wool over 40,000 tons went to Germany; 37,000 tons to France; 18,500 tons to the United Kingdom; 10,000 tons to Belgium and 9,900 tons to the United States. Quebracho logs and Quebracho extract (for tanning purposes) were exported to the amount of about \$10,000,000. The question for the consumers of such products as these in the United States will be how much of them can this country buy? The greater the imports into the United States from Argentina, the greater will be the amount of exports to that country. Both sides of the question must be considered.

BUILDING CONSTRUCTION SINCE FIRE SHOW HEALTHY FIGURES.

From May, 1906, to August 31st, 1914, Report Shows \$257,920,309 Invested in Building Construction.

An interesting report showing what building construction has been carried on throughout the city and county since the conflagration of 1906, has been prepared by the Bureau of Building Inspection of the Board of Public Works.

The report shows that since May, 1906, to August 31st, 1914, there were

Management. Chester W. Kelley

51,864 buildings erected at an estimate cost of \$257,920,309. This amount does not include construction of city railways, sewer work, street improvements and tunnels and does not include work done by the United States Government in the construction of docks, schools, etc., or work undertaken by the State Board of Harbor Commissioners.

From May, 1906, to August 31st, 1914, the report shows there were 173 Class "A" buildings erected at an expenditure of \$33,287,654; 199 Class "B" buildings at \$14,679,186; 2747 Class "C" buildings at \$81,741,818; 25,341 frames at \$96,333,536; 23,355 alterations at \$18,240,175; 61 Exposition Buildings at \$9,360,277, and 8 public buildings at \$1,277,663, making a total of 51,864 buildings at an estimate cost of \$257,920,309.

REDDING, Shasta Co., Cal.—Surveyors for the Anderson-Cottonwood Irrigation District have practically decided that the water that is to irrigate 5,000 acres of land down the valley will be diverted from the Sacramento river near the head of Pine street at what is commonly known as the wheel ditch. It has also been decided that it would be cheaper and better to dig a canal under Redding than to dig a canal on the sidewalk around the city. The canal tunnel will be 2,200 feet long and 80 feet by 6 feet in size, to carry the requisite amount of water. The tunnel, it is thought, will be completed. The lower end of the tunnel-canal will be near the west end of the free bridge, and from that point down the valley the aqueduct will be an open canal.

# ADVANCE NEWS

Classified according to Location

## SAN FRANCISCO.

**TELEPHONE EXCHANGE**—Cost not stated. San Francisco. Engineer, Director of Works, Service Bldg., S. F. Owners, Panama-Pacific International Exposition. Plans are complete and figures are now being called for installing a telephone exchange in the Food Products Building at the Exposition Grounds. Plans and specifications can be secured from the Director of Works. Bids will be opened on September 11th. An official proposal appears in another column of this issue.

**MARINE GARDENS CAFE**—1 and 2 story, frame and plaster, \$35,000. San Francisco. Architect, Charles Paff & Co., Merchants Exchange Bldg., S. F. Owners, Marine Gardens Cafe Co. The building will be erected in the concessions section of the Exposition Grounds, and has been arranged for two separate cafes for ladies and gentlemen and a larger cafe for both. There will be complete kitchen equipment. Interior will be finished in pine and ornamental plaster. Special kitchen equipment will be installed. Exterior of the building will be covered with cement plaster on metal lath. Plans are complete and the work is now being done by day labor.

**APARTMENT HOUSE**—6 story and base, brick and steel or reinforced concrete. Cost not stated. San Francisco. Architect, Carl Geilfuss, 46 Kearny street, S. F. Owner's name withheld. The building will be erected on Powell street in the Fifty Vara District, and will command an excellent view of the entire city and bay. There will be six apartments in the building, each containing seven rooms. The living and dining rooms will be connected by a reception hall. Each apartment will have three chambers, each with a private dressing room and bath. Interiors will be finished to suite the individual taste of the tenants. Plans provide for steam heat, elevator service, electric dumb waiters, hot water system and vacuum cleaning. All bath rooms will be finished in tile. Exterior of the building will be faced with glazed terra cotta. Plans are being prepared.

**APARTMENT HOUSE**—1 story and base, brick and steel. Cost not stated. San Francisco. Architect, Edward E. Young, 251 Kearny street, S. F. Owner, Herman Hofrege, 1011 Hyde street, S. F. The building will be erected at the northwest corner of Hyde and Pine streets, covering an area of 37 1/2 by 57 1/2 feet. There will be 21 apartments arranged in two and three room suites. Interiors will be finished in pine with some elm panels. There will be steam heat, elevator service and a hot water supply. Wall beds will be used. Bath rooms will have tile wainscot and composition floors. Exterior of the building will be faced with pressed brick. Plans are complete and in the hands of the owner

who will do the work by Day Labor.

**APARTMENT HOUSE**—3 story and base, frame. Cost not stated. San Francisco. Architect, Carl Geilfuss, 46 Kearny street, S. F. Owner's name withheld. The building will be erected on Van Ness avenue near the Exposition Grounds, and will cover an area of 30 by 90 feet. There will be six suites of three rooms and six of two rooms. Interiors will be finished in pine with some elm panels and oak floors. All apartments will have wall beds and private baths. Plans provide for steam heat and a hot water supply. Bath rooms will have tile wainscot and composition floors. Tile and marble will be used in the entrance vestibule. Exterior of the building will be covered with cement plaster on metal lath. Plans are now being prepared.

**PIER, BULKHEAD AND SHED**—Crescote pile and timber construction. \$204,300. San Francisco. Engineer, Assistant State Engineer Newman, Ferry Bldg., S. F. Owners, State of California. Bids opened for the construction of Pier No. 37 together with the adjoining bulkhead wall and pier shed were opened by the Board of Harbor Commissioners on September 3rd. Healy-Tibbitts Construction Co., S. F., submitted the lowest figure at \$204,300 and will be awarded the contract. Four other sets of figures were submitted. A complete list of the bids will be found under the heading of San Francisco in this issue.

**CITY HALL CARPENTRY WORK**—Cost not stated. San Francisco. Architects, Bakewell & Brown, 251 Kearny street, S. F. Owners, City and County of San Francisco. Bids opened at the regular Wednesday meeting of the Board of Public Works for the carpentry and mill work in the new City Hall show Monson Bros. low on all three propositions as follows: (1) \$10,768, (2) \$156,818 and (3) \$197,768. A complete list of the bids received for this work will be found under the heading of San Francisco in this issue.

**CITY HALL ELEVATOR WORK**—Cost not stated. San Francisco. Architects, Bakewell & Brown, 251 Kearny street, S. F. Owners, City and County of San Francisco. Bids opened for furnishing and installing the elevator equipment in the new City Hall show Otis Elevator Co. low on Prop. 1 at \$29,755 and the Van Emon Elevator Co. low on Props. 2 and 3 as follows: \$11,400 and \$10,400. Contract has not been awarded.

**DETENTION HOME**—3 story and base. Class A construction, \$50,000. San Francisco. Architects, City Department of Architecture, Temporary City Hall. Owners, City and County of San Francisco. The first of a new group of buildings, which will comprise the new Juvenile Detention Home, will shortly be erected on West Mission street, between Brady and 13th streets. The building will have a complete steel frame and brick exterior

walls. There will be the main administration offices, dormitories, dining room and kitchen and private detention rooms. Interior partitions will be of hollow tile. Pine and hardwood finish will be used. Plans provide for steam heat and a hot water system. Exterior will be faced with pressed brick. The Board of Supervisors has appropriated \$50,000 for this work and next year will appropriate a like amount. Only preliminary plans have been prepared by the Department of Architecture. Further mention will be made of the work.

**FLATS**—2 story and base, frame, \$7,000. San Francisco. Architects, J. E. Kraft & Sons, Phelan Bldg., S. F. Owner, Dr. J. N. Powell. The building will be erected on the west side of 4th avenue south of Irving, and has been designed to contain two modern flats of five and six rooms. Interiors will be finished in pine and redwood. Hardwood floors will be used in the principal rooms. There will be open fire places and tile or brick mantels. Bath rooms will have tile wainscot. Exterior of the building will be covered with cement plaster on metal lath. Plans are complete and figures are now being taken.

**RESIDENCE**—2 story and base, frame, \$7,000. San Francisco. Architect, Albert Farr, Foxcroft Bldg., S. F. Owner, J. Sheehan. The dwelling will be erected in Sea Cliff Terrace and has been designed to contain seven rooms and bath. Interior will be finished in pine and hardwood. Hardwood floors will be used in the principal rooms. Baths will have tile wainscot and composition floor. An automatic water heater will be installed. Mantels will be of tile. Exterior will be covered with cement plaster on metal lath. Plans are now being figured.

**RESIDENCE**—2 story and base, frame and plaster. Cost not stated. San Francisco. Architect, Carl Geilfuss, 46 Kearny street, S. F. Owner's name not given. The dwelling will be erected in St. Francis Wood. The first floor will be arranged for a living room, a reception hall, which will open into the living and dining rooms, kitchen, pantry and servants' hall. Upper floor will consist of owner's chamber, son's room and servants' room. The three principal chambers will have baths and private dressing rooms. Basement will contain a large billiard room. A garage will be erected in the rear of the lot. An automatic water heater will be installed. Interior of the house will be finished in hardwood with hardwood floors throughout. Brick or tile mantels will be specified. A vacuum cleaning system will also be installed. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are being prepared.

**RESIDENCE**—2 story and base, frame, \$2,500. San Francisco. Architect, none. Owner, Hansen Walton, S. F. The dwelling will be erected on

the west side of 28th avenue south of Clement street, and has been designed to contain six rooms with bath. Interior will be finished in pine and hardwood. Hardwood floors will be used in the living and dining rooms and reception hall. Mantels will be of brick. Modern plumbing will be installed. Plans are complete and the work will be done under the Day Labor system.

**RESIDENCE**—2 story and base, frame, \$10,000. San Francisco. Architect, Matthew O'Brien, Foxcroft Bldg., S. F. The dwelling will be erected at the northwest corner of Fulton and 4th avenue and will contain in the neighborhood of nine rooms and two baths. Interior will be finished in pine and hardwood. Hardwood floors will be used in the principal rooms. Baths will have tile wainscot and composition floors. There will be furnace heat and open fire places. Mantels will be of tile or brick. An automatic water heater will be installed. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are now being prepared.

**RESIDENCE**—2 story and base, frame, \$4,500. San Francisco. Architect, none. Owner, J. M. Peters, S. F. The dwelling will be erected on 19th avenue south of California street and will contain six rooms and bath. Interior will be finished in pine. Hardwood floors will be used in the principal rooms. There will be furnace heat and open fire places. Exterior of the dwelling will be covered with rustic and metal lath and plaster. The work will be done by Day Labor. Materials are now being purchased.

**RESIDENCE**—1½ story and base, frame, \$10,000. San Francisco. Architect, Henry H. Guttererson, 50 Post street, S. F. Owner, Duncan McDuffie. The dwelling will be erected in St. Francis Wood and has been designed to contain nine rooms, seven on the first floor and two on the upper floor. Interior will be finished in hardwood and redwood. Hardwood floors will be used in the principal rooms. There will be three baths, all of which will be equipped with showers. There will be furnace heat and open fire places. Mantels will be of brick. Roof will be covered with tile shingles. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are now being figured.

**RESIDENCE**—2 story and base, frame and plaster, \$13,000. San Francisco. Architect, Frederick Boese, 45 Kearny street, S. F. Owner, George A. Clough. The dwelling will be erected on the south side of Francisco street just east of Hyde street. Interior will be finished in pine. Baths will have tile floors and will be equipped with showers. Mantels will be of tile or brick. An automatic water heater will be installed. Hardwood floors will be used in the principal rooms. Exterior of the building will be covered with metal lath and plaster. Plans are now being figured.

**RESIDENCE**—2 story and base, frame, \$2,500. San Francisco. Architect, none. Owners, Oscar Heyman & Bro. The dwelling will be erected on Lincoln Way near 24th avenue, and has been designed to contain seven rooms with bath. Interior will be finished in pine with gum in the living and dining rooms. Floors will be of pine and hardwood. Bath will have tile

wainscot and composition floor. An automatic water heater will be installed. Exterior of the dwelling will be covered with rustic. The work will be done by Day Labor. Materials are now being purchased.

**BATH HOUSE ADDITION**—3 story and base, reinforced concrete. Cost not stated. San Francisco. Architects, Reid Bros., California-Pacific Bldg., S. F. Owners, Olympic Salt Water Co. This addition will be constructed on property adjoining the present Lurline Baths on the west, and will have a frontage of 70 feet on the north side of Bush street by a depth of 120 feet. The new portion of the building will be used for Turkish and Swedish bath parlors, additional dressing rooms and a completely equipped laundry. Construction will be similar to the present building although the design will be slightly modified owing to the uses of the new portion. The present system of heating will be extended into the new portion of the building. Interior will be finished in pine and hardwood plaster. Exterior will be faced with cement plaster. Plans are complete and figures are being taken.

**APARTMENT HOUSE**—4 story and base, brick and steel. Cost not stated. San Francisco. Architect, G. A. Applegarth, Call Bldg., S. F. Owner, F. W. Wakefield. The building will be erected at the southwest corner of California and Stockton streets, covering an area of 66 by 105 feet. There will be a total of 14 apartments of two and three rooms. Interior finish will be of pine and hardwood. Plans provide for steam heat, an automatic elevator, hot water supply and vacuum cleaning. All bath rooms will be finished in tile. Wall beds are specified. Entrance will be finished in marble and tile. Exterior of the building will be faced with pressed brick trimmed with terra cotta. Plans are complete and figures will be called for at once.

**HOTEL ADDITION AND ALTERATION**—brick, \$35,000. San Francisco. Architects, Dunn & Kearns, Monadnock Bldg., S. F. Owners, Normandie Hotel Co., William M. Wise, lessee. The building at the corner of Gough and Sutter streets will undergo extensive alterations and the frame dwelling adjoining it will also be altered and connected to the Normandie by an arcade. Included in the work will be new plumbing, painting, electric work, plastering and interior finish. Plans are now being prepared and figures will be called for as soon as working drawings can be completed.

**PUBLIC BUILDING LIGHTING FIXTURES**—Cost not stated. San Francisco. Architect, Supervising Architect Oscar Wenderoth, Washington, D. C. Owners, United States Government. Bids will be opened in Washington, D. C., on September 21st or installing lighting fixtures in the United States public buildings in the following cities: San Francisco, Minneapolis, Minn.; Muskogee, Okla.; and Boston, Mass. Plans and specifications can be secured from the Supervising Architect.

**RESIDENCE**—2½ story and base, reinforced concrete, \$20,000. San Francisco. Architect, John Davis Hatch Humboldt Bank Bldg., S. F. Owner's name withheld. The building will be erected on 32nd avenue in the West Clay Park Tract and has been designed to contain ten rooms, three

baths and sleeping porch. A garage will also be erected on the property. Interior of the house will be finished in pine and hardwood with some white enamel. Hardwood floors will be used in the principal rooms. There will be a central heating system, probably furnace heat. Open fire places and tile mantels will be used. Automatic water heater will be installed. Bath rooms will be finished in tile. Interior of the dwelling and garage will be faced with cement plaster. Plans are being figured.

**RESIDENCES**—2, 2 story and base, frame, \$3,000 each. San Francisco. Architect, none. Owner, E. Nelson, 30 Presidio Terrace, S. F. These dwellings will be erected on the north side of Parnassus avenue west of Hill street, and each has been designed to contain six rooms and bath. Interiors will be finished in pine and redwood. Hardwood floors will be used in the principal rooms. There will be open fire places and tile mantels. Bath rooms and kitchens will have tile wainscot. Exteriors will be covered with rustic and cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor. Materials are now being purchased.

**RESIDENCE**—2 story and base, frame, \$6,500. San Francisco. Architects, J. E. Kraft & Sons, Phelan Bldg., S. F. Owner, Henry Connabren. The dwelling will be erected in St. Francis Wood and has been designed for a seven-room house with two baths and sleeping porch. Interior will be finished in pine and redwood with some hardwood veneer. There will be furnace heat and open fire places. Mantels will be of tile or brick. Hardwood floors will be used in the living room, dining room and reception hall. There will be an automatic water heater. Tile wainscot will be used in the bath room. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

**UNDERTAKING PARLORS**—1 story and base, frame and plaster. Cost not stated. San Francisco. Architect, Carl Geiffuss, 46 Kearny street, S. F. Owner's name withheld. Working drawings are practically completed for the largest undertaking establishment in the city. The building is designed in the classic style with a large center pediment and ionic columns and will be trimmed with marble. Interior is arranged for five chapels, three of which will be 27 by 33 feet, one 31 by 17 feet and one 22½ by 31 feet, general offices, private office, attendants' quarters and morgue. Ladies' parlor and show room. Interior will be finished in natural woods except the morgue which will have tile floor and walls. Each chapel will have a large art glass dome. The exterior will be covered with cement plaster.

**LOFT ADDITION**—1 story. Class C construction. Cost not stated. San Francisco. Architects, Charles Paff & Co., Merchants' Exchange Bldg., S. F. Owner, Otto Kertz. The addition will be made to a one-story building on Stevenson street between 5th and 6th streets. New portion will be used for a loft. Interior will be finished in pine. There will be metal window sash and frames. Exterior of the building will be faced with stock brick. Plans are complete and in the

hands of the owner who will do the work by Day Labor. Materials are now being purchased.

**ASSEMBLY HALL.**—1 story brick addition, \$10,000. San Francisco. Architect, William H. Crim, Jr., 425 Kearny street, S. F. Owner, J. P. Trouillet. An additional story will be erected to the store building now building on the south side of Sutter street west of Larkin. The upper floor will be used for an assembly hall. Interior will be finished in pine and redwood. A maple floor will be used. Modern plumbing and steam heat will be installed. Exterior of the building will be faced with pressed brick. Plans are complete and figures are being taken.

**LIBRARY.**—3 story and base. Class A construction, \$1,000,000. San Francisco. Architect, George William Kelham, Sharon Bldg., S. F. Owners, City and County of San Francisco. The Library Trustees have officially approved plans for the new building to be erected in the Civic Center as prepared by Architect George William Kelham. These plans will be submitted to the Supervisors for their approval. Construction cannot be started until the \$900,000 bond issue has been sold.

**SEWER CONSTRUCTION.**—Cost not stated. Pocatello, Idaho. Engineer, City Engineer, Pocatello. Owners, City of Pocatello. Bids will be opened on September 17th for constructing sanitary sewers in Pocatello. The work will require 36,545 feet of pipe and ditch, 1,520 feet of 48-in. sewer, 1,120 feet 42-in. sewer, 5,100 feet 30-in. sewer, 920 feet 24-in. sewer. Vitrified catch basins and laterals will be used. The larger sewers will be of concrete pipe. There will be 22 catch-basin covers and 46 manholes. Plans and specifications can be secured from the Mayor.

### Contracts Awarded.

**APARTMENT HOUSE.**—3 story and base, frame, \$12,500. San Francisco. Architect, C. S. McNally, Mechanics' Institute Bldg., S. F. Owner, P. D. Bernhard. Contractor, H. C. Waynick, Hearst Bldg., S. F. Contract price, \$12,500.

**FACTORY.**—2 story and base. Class C construction, \$50,000. San Francisco. Architect, none. Owners, Moody Estate, Kohl Bldg., S. F. Contractors, H. H. Larsen & Pro., 68 Post street, S. F. Contract price, \$50,000. Note: This building will be occupied by the National Biscuit Co.

**ASSOCIATION BUILDING.**—2 story, frame and plaster, \$25,000. San Francisco. Architect, Julia Morgan, Merchants' Exchange Bldg., S. F. Owners, Young Women's Christian Association. Contractor, John Monk, S. F. Contract price, \$25,000.

**STATE EXHIBIT BUILDING.**—1 story, frame and plaster, \$20,150. San Francisco. Architect's name not given. Owners, State of Arkansas. Contractor, Lester H. Stock, 12 Geary street, S. F. Contract price, \$20,150. Note: The contract price does not include the lumber which will be furnished by the owners.

**GARAGE.**—1 story and base, reinforced concrete. Cost not stated. San Francisco. Architect, Carl Giffiss, 66 Kearny street, S. F. Owner, Col. Adolph Huber. Contractors, Camp & Carillon, S. F. Contract price not stated.

## City Bids Opened.

### Bids Opened For Carpentry and Mill Work on New City Hall and For Elevators in Same.

Of the bids opened by the Board of Public Works at their regular Wednesday afternoon meeting, those submitted for the carpentry work on the new City Hall were the most numerous. Bids were also opened at the same meeting for the elevators at the City Hall, for additions and alterations to the Donohue Fountain and for well drilling on the school lot on Balboa street. Following is a complete list of the figures received:

#### Carpentry, New City Hall.

Brunswick-Balke-Collender Co. (1) \$—; (2) \$198,450; (3) \$—; unit (a) \$—; unit (b) \$33,600.

William Bateman (1) \$19,500; (2) \$176,495; (3) \$225,995; unit (a) \$11,700; unit (b) \$27,150.

Clinton Fireproofing Co. (1) \$49,500; (2) \$—; (3) \$—; unit (a) \$3,000; unit (b) \$—.

L. & E. Emanuel (1) \$—; (2) \$177,000; (3) \$—; unit (a) \$—; unit (b) \$37,500.

Grant Fee (1) \$68,000; (2) \$183,000; (3) \$250,000; unit (a) \$16,350; unit (b) \$30,000.

Brockhage, Foley & Green (1) \$56,050; (2) \$172,000; (3) \$430,066; unit (a) \$18,500; unit (b) \$27,500.

Pacific Manufacturing Co. (1) \$—; (2) \$167,154; (3) \$—; unit (a) \$—; unit (b) \$28,408.

Monson Bros., (1) \$40,768; (2) \$156,818; (3) \$197,768; unit (a) \$1,500; unit (b) \$26,162.

R. Brandline. All bids void.

#### Elevator, City Hall.

Pacific Gurney Elevator Co. (1) \$—; (2) \$51,000; (3) \$41,500.

Oris Elevator Co. (1) \$59,755; (2) \$15,950; (3) \$42,255.

Van Emon Elev. Co. (1) \$66,000; (2) \$11,400; (3) \$40,400.

#### Additions to Donohue Fountain.

## Receive Bids For Another New Pier.

State Board of Harbor Commissioners Open Figures For Pier No. 37. Healy-Tibbitts Co. Low.

Five bids were opened by the State Board of Harbor Commissioners at the meeting held Thursday, September 3rd,

for constructing Pier No. 37 with its adjoining bulkhead wall and pier shed. Healy-Tibbitts Constr. Co. were low at \$204,300, just \$400 lower than the San Francisco Bridge Co. Pier No. 37 will be erected at the foot of Kearny street. Following is a complete list of the bids received:

#### Constructing Pier No. 37.

Thomson Bridge Co.....\$219,000  
San Francisco Bridge Co.....204,700  
F. A. Koeltitz.....224,750  
F. Rolandi.....232,300  
Healy-Tibbitts Constr. Co., 204,300

### OAKLAND AND ALAMEDA COUNTY.

**APARTMENT HOUSE.**—3 story and base, frame, \$20,000. Oakland, Cal. Architect, William Wilde, 1725 Broadway, Oakland. Owner, R. Pozzi. The building will be erected at the corner of 23rd and Harrison streets, and has been designed to contain a number of two and three room apartments. Interior finish will be of pine and redwood with some oak floors. All apartments will have wall beds and private bath rooms. Baths will be finished in tile and will have composition floors. Plans provide for steam heat and a hot water system. Entrance will be finished in tile and marble. Exterior of the building will be covered with cement plaster on metal lath. Plans are complete and figures are now being taken.

**RESIDENCE.**—2 story and base, frame. Cost not stated. Berkeley, Alameda Co., Cal. Architect, W. H. Ratcliff, Jr., First National Bank Bldg., Berkeley. Owner, Miss Margaret Little. The dwelling will be erected in Northbrae and has been designed to contain seven rooms with bath. Interior will be finished in pine and redwood. Hardwood floors will be used in the principal rooms. There will be furnace heat and open fire places. Mantels will be of brick or tile. An automatic water heater will be installed. Exterior of the dwelling will be covered with cement plaster. Plans are now being figured.

**RESIDENCE.**—1 story, frame, Cost, \$3,500. Oakland, Cal. Architect, C. C. Lakin, First National Bank Bldg., Oakland. Owners, Oakland Home Corporation, Oakland. The dwelling will contain eight rooms and will be erected at the southwest corner of Brookdale avenue and Bartlett street. Interior will be finished in pine. Hardwood floors will be used in the principal rooms. Mantels will be of brick or tile. Exterior will be covered with cement plaster on metal lath. Plans are complete and the work will be done by Day Labor. Materials are now being purchased.

**RESIDENCE.**—2 story and base, frame. Cost not stated. Berkeley, Alameda Co., Cal. Architect, Geo. W. Patton, 2126 Emerson street, Berkeley. The dwelling will be erected in North Cragmont, Berkeley, and will contain in the neighborhood of seven rooms and bath. Interior will be finished in pine and hardwood. Hardwood floors will be used in the principal rooms. Bath will have tile wainscot and composition floor. Mantels will be of tile or brick. There will be furnace heat and open fire places. Exterior will be covered with cement plaster on metal lath. Plans are now being figured.

**RESIDENCE.**—1 story, frame and

COURT OF PALMS EXPOSITION GROUNDS  
San Francisco

Panama-Pacific International Exposition

TOWER OF JEWELS EXPOSITION GROUNDS  
San Francisco

Panama-Pacific International Exposition

laster, \$5,000. Oakland, Cal. Architect, Charles F. Mau, Macdonough Bldg., Oakland. Owner, Mrs. E. W. McIntosh. The dwelling will be erected on East Lake Shore and Santa Fe avenues, and will contain eight rooms and two baths. Interior will be finished in pine and hardwood with some in panels. Hardwood floors will be used in the principal rooms. There will be furnace heat and open fire places. Mantels will be of brick or tile. Exterior will be covered with cement plaster on metal lath. Plans are now being figured.

**RESIDENCE**—2 story and base, frame and plaster, \$2,500. Sacramento, Cal. Architect, none. Owner, T. M. Earle, 3028 Magnolia avenue, Sacramento. The dwelling will be erected on lot 206 in Boulevard Park and will contain six rooms and bath. Interior will be finished in pine and hardwood. Hardwood floors will be used in the principal rooms. There will be furnace heat and open fire places. Mantels will be of brick. Plans are complete and the work will be done by Day Labor. Materials are now being purchased.

**FLATS**—2 story and base, frame, \$5,000. Oakland, Cal. Architect, Charles F. Mau, Macdonough Bldg., Oakland. Owner, F. W. Lagersen. The building will be erected at the corner of 10th and Magnolia streets, and has been designed to contain two modern flats of five and six rooms. There will be hardwood floors in the principal rooms. Interiors will be finished in pine and redwood. Open fire places will be used. Mantels will be of tile or brick. Bath rooms will have tile wainscot. Exterior of the building will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

**AUDITORIUM TILE AND MARBLE WORK**—Cost not stated. Oakland, Cal. Architect, Supervising Architect J. J. Donovan, Oakland. Owners, City of Oakland. Plans and specifications are complete for the marble and tile work for the new Municipal Auditorium. Plans and specifications can be secured from the Supervising Architect. Bids will be opened on September 14th.

**LODGE HALL AND STORES**—2 story and base, reinforced concrete, \$0,000. San Mateo, San Mateo Co., Cal. Architect, Will D. Shea, 241 Kearny street, S. F. Owners, San Mateo Knights of Columbus Hall Association. The building has been mentioned here before when the architect was first commissioned to prepare plans. There will be three stores on the ground floor and large lodge rooms, assembly hall and offices on the upper floor. Interior of the second floor will be finished in pine and hardwood with maple floor in the assembly hall. Plans provide for steam heat and vacuum cleaning. Patent storefronts will be used. Exterior of the building will be faced with cement plaster. Plans are complete and figures are being taken.

**BUNGALOW**—1 story and base, frame, \$2,500. Berkeley, Alameda Co., Cal. Architect, Architectural Designers, First Trust Bldg., Oakland. Owner, C. C. Haws. The dwelling has been designed for a six-room house and will be erected on McGee street. Interior will be finished in pine and redwood. Some oak floors will be used. There will be open fire places and tile

mantels. Exterior of the house will be covered with cement plaster on metal lath. Plans are being prepared.

**OFFICE**—1 story, frame, \$1,000. Oakland, Cal. Architect, none. Owner, W. E. Whalin, Bacon Bldg., Oakland. An addition of six offices will be made to the present one-story frame building at the northeast corner of 21th and Broadway. Interior of the offices will be finished in pine throughout. Exterior will be covered with cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor. Materials are now being purchased.

**STORES**—1 story and base, brick and reinforced concrete, \$10,000. Berkeley, Alameda Co., Cal. Architect, Clay N. Burrell, Albany Bldg., Oakland. Owners, Cohn Bros. The building will be erected on Alcatraz east of Adeline, covering an area of 75 by 60 feet. There will be five stores, all of which will have plate glass windows in patent storefronts. Interiors will be finished in pine and hardwood veneer. Some tile floors will be used. There will be marble wainscot. Exterior of the building will be faced with cement plaster. Plans are being prepared.

**STORE ALTERATIONS**—Brick construction, \$10,000. Oakland, Cal. Architect, William Wilde, 1725 Broadway, Oakland. Owners, Athens Hotel. The ground floor of the building will be altered and five stores put in. There will be patent store fronts and plate glass windows. Interior finish will be of pine and hardwood. Marble and tile wainscot will be used. Plans are now being prepared. Further mention will be made of the work when plans are ready for figures.

**HOTEL ADDITION**—4 story and base, reinforced concrete, \$65,000. Oakland, Cal. Architect, Clay N. Burrell, Albany Bldg., Oakland. Owner, A. C. Aiken. The present one-story store building at the corner of 15th and Jefferson streets will be added to and the upper floors arranged for a modern hotel. The building will cover an area of 50 by 50 feet and will contain a large number of single rooms and public baths. Interior finish will be of pine and redwood. There will be steam heat, elevator service, and a hot water system. Bath rooms will be finished in tile. Exterior of the building will be faced with cement plaster. A contract will be awarded to F. A. Muller, Syndicate Bldg., and he will let all subcontracts. Plans are complete and subfigures are being taken by Mr. Muller.

## SAN JOSE AND THE SANTA CLARA VALLEY.

**SEWER WORK**—Cost not stated. Santa Cruz, Santa Cruz Co., Cal. Engineer, City Engineer, Santa Cruz. Owners, City of Santa Cruz. Plans are complete and figures are being taken for constructing a vitrified ironstone pipe sewer with brick manholes along certain streets in Santa Cruz. Bids will be opened on September 14th. Plans can be secured from the City Clerk.

**STREET PAVING**—Cost not stated. San Jose, Santa Clara Co., Cal. Engineer, City Engineer, San Jose. Owners, City of San Jose. Bids will be opened on September 14th at 5 o'clock

for street paving in San Jose. Plans and specifications can be secured from the City Clerk.

**STORM WATER SEWERS**—Cost not stated. San Mateo, San Mateo Co., Cal. Engineer, City Engineer. Owners, City of San Mateo. A resolution of intention has been passed by the San Mateo City Council for the construction of a concrete box storm water sewer with brick manholes to be erected between San Mateo and Burlingame. Bids on this work will be called at once.

**BUNGALOW**—1 story and base, frame, \$5,000. San Jose, Santa Clara Co., Cal. Architect, none. Owner, W. M. Lewis, 240 South 16th street, San Jose. The dwelling has been designed for a six-room house with bath. Interior finish will be of pine and redwood. Some hardwood floors will be used. There will be an open fire place and tile mantel. Exterior will be covered with rustic and cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor.

**SCHOOL**—1 story and base, frame and plaster, \$25,000. Burlingame, San Mateo Co., Cal. Architects, Thomas W. Edwards and F. L. Norberg, Bank Bldg., San Mateo. Owners, Burlingame Meadow School District. The building will contain eight rooms and office. Interior will be finished in pine with maple floors in the class rooms. A plenum system of heating will be installed. Modern school plumbing will be installed. Exterior of the building will be covered with cement plaster on metal lath. A metal tile roof will be used. Plans are complete and figures are being taken. Bids will be opened on September 15th. Plans and specifications can be secured from the architects.

**FIRE ESCAPES**—Seven buildings. Cost not stated. San Jose, Santa Clara Co., Cal. Architect, none. Owners as follows: Fire escapes have been ordered placed on the following buildings in the city of San Jose: St. John, Oakland, Bristol and Menlo rooming houses, the Hotel Vendome, the Odd Fellows Building and Heald's Business College.

## Contracts Awarded.

**RETAINING WALL**—Earth construction, \$5,000. Campbell, Santa Clara Co., Cal. Engineer, County Surveyor, San Jose. Owners, Santa Clara County. Contractor, M. E. Kilecourse, San Jose. Contract price, \$5,845.

**THEATRE**—1 story and base, reinforced concrete. Cost not stated. Salinas, Monterey Co., Cal. Architect, William Binder, Rea Bldg., San Jose. Owners, H. P. Brown & Son, Contractor, Ratke, Gilroy. Contract price not stated.

## MARIN, CONTRA COSTA AND SONOMA COUNTIES.

**RAILROAD BRIDGES**—2, steel construction, \$50,000 each. Richmond, Contra Costa Co., Cal. Engineer, G. W. Harris, Kerchoff Bldg., L. A. Owners, Santa Fe Railroad Co. The company is now replacing all timber bridges along its right of way with modern steel structures. Two bridges near Richmond are now being built by Schoop & Filler of Los Angeles, and plans are underway for several more steel structures.

**PILES AND TIMBER FOR QUAY WALL.**—Cost not stated. Mare Island Navy Yard, Cal. Engineer, Bureau of Yards and Docks, Washington, D. C. Owners, United States Government. Bids will be opened on September 9th at Washington, D. C. for furnishing piles and timber for constructing the new quay wall at the Mare Island Navy Yard. Plans and specifications can be secured from either the Bureau of Yards and Docks or from the Commandant at Mare Island.

**ELEVATED SIDEWALK WORK.**—Cost, \$5,000. Richmond, Contra Costa Co., Cal. Engineer, City Engineer, Owners, City of Richmond. The Richmond City Council has instructed the City Engineer to secure bids for constructing an elevated sidewalk at the subway on Sixteenth street. The work will be of concrete and has been estimated to cost \$5,000.

**RAILROAD STATION.**—1 story, brick. Cost not stated. Richmond, Contra Costa Co., Cal. Architect, Engineering Department Southern Pacific Co., Flood Bldg., S. F. Owners, Southern Pacific Co. Bids will be taken at once for constructing the new Southern Pacific passenger depot at Richmond. Plans have been changed from a frame and plaster structure to a brick building with plastered exterior walls. About \$70,000 will be expended in construction. A freight depot and extensive track work will also be put in.

**SCHOOL.**—1 story and base, brick or hollow tile construction, \$50,000. Richmond, Contra Costa Co., Cal. Architects, Stone & Wright, 24 South California street, Stockton. Owners, Richmond School District. The building will be erected on Main street and has been designed for a twelve room school with a large assembly hall, teachers' room and principal's office. Interior will be finished in pine with maple floors in the class rooms. There will be a central heating system and modern school plumbing. Vacuum cleaning and program clocks will be installed. The School Board is considering both the brick and interlocking types of construction and figures will be taken both ways. Exterior of the building will be faced with pressed brick or cement plaster. Bids are now being taken.

## FRESNO, MODESTO STANISLAUS AND CENTRAL CALIFORNIA.

**RESIDENCE.**—2 story and base, frame, \$18,000. Fresno, Fresno Co., Cal. Architect, Ernest J. Kump, Fresno Owner, Ernest J. Kump. The dwelling will be erected on a country estate about five miles out of the city of Fresno and has been designed in the Mission style. There will be in the neighborhood of twelve rooms, several baths and sleeping porches. Interior will be finished in pine and hardwoods. Hardwood floors will be used in the principal rooms. A central heating system will be installed. There will be open fire places and tile mantels. Bath rooms will be finished in tile. Automatic water heaters will be installed. Exterior of the house will be covered with cement plaster on metal lath. A clay tile roof will be used. Plans are complete and work will shortly be started.

**CONCRETE FLUME.**—Reinforced concrete, \$55,000. Modesto, Stanislaus

Co., Cal. Engineer, Chief Engineer Modesto Irrigation District, Modesto. Owners, Modesto Irrigation District. The Board of Directors of the Modesto Irrigation District have accepted plans and specifications prepared by the Commonwealth Engineering Company for a reinforced concrete flume to be built at Gasburg. It will be 720 feet in length and will cost \$55,000.

### Contracts Awarded.

**BRIDGE.**—Reinforced concrete, \$14,700. Cressy, Merced Co., Cal. Engineer, County Surveyor, Merced. Owners, Merced County. Contractors, Messmer-Rice, Marsh-Strong Bldg., L. A. Contract price, \$14,700.

**SCHOOL.**—1 story, frame and plaster, \$12,000. Buena Vista, Tulare Co., Cal. Architect's name not given. Owners, Buena Vista School District. Contractor, L. F. Pratt, Tulare. Contract price, \$10,554.

**SCHOOL HEATING.**—Cost not stated. Fresno, Fresno Co., Cal. Architect, W. D. Coates, Fresno. Owners, City of Fresno. Contractors, Robert Dalziel, Jr., Co., S. F. Contract price, \$3,395.

**DISCHARGE PIPE FOR SEWER PUMPING PLANT.**—Cost not stated. Fresno, Fresno Co., Cal. Engineer, City Engineer, Fresno. Owners, City of Fresno. Plans for constructing a discharge pipe for sewer pumping plant No. 2 located on Franklin avenue have been completed. Bids are now being taken and will be opened by the City Council on September 15th. Plans and specifications can be secured from the City Clerk.

## SACRAMENTO, STOCKTON AND NORTHERN CALIFORNIA.

**REINFORCED CONCRETE BRIDGE.**—Cost not stated. Farnsworth, Colusa Co., Cal. Engineer, County Surveyor, Colusa. Owners, Colusa County. Plans and specifications are complete for a reinforced concrete bridge over the drain at Farnsworth Place, and figures are now being taken for the work. Plans and specifications can be secured from the County Clerk at Colusa. Bids will be opened on September 10th.

**STREET PAVING.**—Cost, \$2,600. Red Bluff, Tehama Co., Cal. Engineer, City Engineer. Owners, City of Red Bluff. An additional contract for street paving in this city has been awarded by the City Council to the Chico Construction Company.

**RAILROAD CONSTRUCTION.**—Cost not stated. Yuba City, Yuba Co., Cal. Engineer's name not given. Owners, Dairy Farm Railroad Co., Yuba City. The Dairy Farm Railroad, operating out of Yuba City, has been granted a right of way through Reclamation District 1001 in Yuba County.

**SNOW SHED CONSTRUCTION.**—\$70,000. Truckee, Nevada Co., Cal. Engineer, Engineering Department S. P. Co., Flood Bldg., S. F. Owners, Southern Pacific Co. The S. P. Co. is replacing seven thousand feet of snow sheds in and around Truckee. The company will spend in the neighborhood of \$70,000 on the work.

**SCHOOL.**—1 story and base, hollow tile construction, \$30,000. Folsom, Sacramento Co., Cal. Architects, George C. Seddon and Alden W. Campbell, 1005 K street, Sacramento. Owners, Folsom School District. The building has been

designed in the Mission style and will contain eight class rooms and a large assembly hall. Interior will be finished in pine with maple floors in the class rooms. There will be a central heating system, probably a plenum system. Modern school plumbing will be installed. Exterior of the building will be faced with cement plaster. Plans are complete and figures are being taken. Bids will be opened on September 16th. Plans and specifications can be secured from the architect.

**STORE.**—1 story and base, reinforced concrete, \$10,000. Yuba City, Sutter Co., Cal. Architect, John J. Foley, 4 Kearny street, S. F. Owners, Diamond Match Co. The building has been designed for a large drygoods store. Interior will be finished in pine. The ceiling will be 20 feet high and mezzanine floor will probably be constructed. There will be patent storerooms. Exterior will be faced with cement plaster. Plans have been turned over to the owners who will do the work by Day Labor. Material are now being purchased.

**STATE HIGHWAY WORK.**—Cost not stated. California. Engineers, State Highway Commission, Forum Bldg., Sacramento. Bids were opened by the State Highway Commission on August 21st for the construction of highway in the following counties: Orange, Los Angeles, Kern, San Luis Obispo, Santa Barbara, Yuba, Sacramento and Colusa. All bids were taken under advertisement. A complete list of bids together with the engineer's estimate and the materials furnished by the State will be found under the heading of Stockton, Sacramento and Northern California in this issue.

### Contracts Awarded.

**BRIDGE.**—Reinforced concrete, \$30,000. Esparto, Yolo Co., Cal. Engineer, County Surveyor, Woodland. Owners, Yolo County. Contractors, Ross Construction Co., Sacramento. Contract price, \$28,760. Earth work, San Schwab, Esparto, 17½c per cubic yard or 2,600 yards.

**BRIDGE.**—Steel and reinforced concrete, \$77,660. Walnut Grove, Sacramento Co., Cal. Engineer, County Surveyor, Sacramento. Owners, Sacramento County. Contractors, Jenkins & Wells, address in care of Sacramento County Surveyor, Sacramento. Contract price, \$77,660.

**BRIDGE.**—Steel and reinforced concrete, \$13,680. Stockton, San Joaquin Co., Cal. Engineer, County Surveyor, Stockton. Owners, San Joaquin County. Contractor, James Mulcahy, Stockton. Contract price, \$13,680.

**HOTEL.**—4 story and base, brick and steel, \$108,000. Lodi, San Joaquin Co., Cal. Architect, E. B. Brown, Yosemite Bldg., Stockton. Owners, Lodi Hotel Investment Co. The following contracts have been awarded for the construction of the building: General construction, Ernest Green, Modesto; electric work, F. J. Wallace, Lodi; painting, J. L. Pickering, Lodi; plumbing, Henderson Bros., Lodi; plastering, J. J. Grauman, Stockton; marble work, J. L. Houghton, Fresno; tile work, H. C. Fisher, Stockton; steam heating, Hatley & Hatley, San Francisco; ornamental iron work, Builders' Iron Works, Stockton; face brick, moulded brick and terra cotta work, Gladding McBean, San Francisco, and elevator

work, Otis Elevator Co., San Francisco.

SCHOOL—1 story and base, reinforced concrete, \$11,900. Rossville, Placer Co., Cal. Architect, W. H. Weeks, 75 Post street, S. F. Owners, Rossville School District. Contractor, Harvey A. Klyce, S. F. Contract price, \$41,500.

RESIDENCES—1 story, frame. Cost not stated. Sacramento, Cal. Architect, none. The following Day Labor jobs are about to be started in Sacramento: R. S. Mackey, 2305 E street, 1 story frame dwelling, \$1,600 and C. Valine, 2417 15th street, Sacramento, 1 story frame, \$1,000.

## Highway Commission Open Many Figures.

**Bids Received for Constructing State Highways in Nine California Counties at Last Meeting.**

SACRAMENTO, CAL.—Bids were opened on August 31st by the State Highway Commission for constructing State Highways in nine counties. This work is to be done in the following counties: Orange, Los Angeles, Kern, San Luis Obispo, Santa Barbara (two pieces), Yuba, Sacramento and Colusa. Following is a complete list of the bids received together with the engineer's estimate and a list of materials furnished by the State:

**Orange Co., Div. 7, Route 2, Sec. C.**  
H. E. Cox, Pasadena.....\$47,149.20  
Lynn S. Atkinson, L. A.....47,137.00  
O. & C. Construction Co., Fullerton.....16,926.30

Geo. Wiegand, La Manda Park 39,643.50  
White & Gaskill, Long Beach 37,933.50  
Brashers-Burns Co., L. A.....45,902.90  
Engineer's estimate, \$47,926.62.

Materials furnished by the State: Pipe railing, reinforcing steel, corrugated iron pipe and Portland cement. Total, \$17,374.50.

**Los Angeles Co., Div. 7, Route 4, Sec. B.**  
Marsh Bros. & Gardener, San Francisco.....\$129,437.00  
Lynn S. Atkinson, L. A.....209,336.10

Lee Moor Contracting Co., Neneach.....148,501.35  
A. C. McLean Constr' Co., S. F. 191,642.20

C. H. Hudson, Los Angeles.....129,979.05  
John Mulligan, Yuma, Ariz.....150,600.04  
Shattuck-Edinger Co., S. F.....181,182.15  
Rice & Dutcher, Imperial.....180,667.30  
J. W. Calback, San Diego.....118,094.10  
Tooley & Johnson, Phoenix, Ariz.....171,235.60

Mahoney Bros., S. F.....123,178.10  
Engineer's estimate, \$191,055.83.

Materials furnished by the State: Pipe railing, reinforcing steel, corrugated iron pipe and Portland cement. Total, \$8,058.25.

**Kern Co., Div. 6, Route 1, Sec. A.**  
A. C. McLean Constr' Co., San Francisco.....\$ 68,001.00

F. Rolandi, S. F.....108,920.00  
S. H. Millen, Wasco.....71,536.00  
Shattuck-Edinger Co., S. F.....90,715.00  
Lynn S. Atkinson, L. A.....93,125.00  
Engineer's estimate, \$86,125.23.

Materials furnished by the State: Pipe railing, reinforcing steel, corru-

gated iron pipe and Portland cement. Total, \$1,235.90.

**San Luis Obispo Co., Div. 5, Route 2, Sec. B.**

H. L. Peterson & A. J. Grier, San Francisco.....\$51,925.25  
Lynn S. Atkinson, L. A.....97,182.95  
Rogers Bros. Co., L. A.....79,168.85  
J. W. Calback, San Diego.....79,294.20  
Engineer's estimate, \$71,709.10.

Materials furnished by the State: Pipe railing, reinforcing steel, corrugated iron pipe, Portland cement and sand and coarse aggregate. Total, \$56,736.10.

**Santa Barbara Co., Div. 5, Route 2, Sec. C, and 1.**

Lynn S. Atkinson, L. A.....\$156,503.90  
Brashers-Burns Co., L. A.....89,166.90  
Shattuck-Edinger Co., S. F.....165,161.80  
Mahoney Bros., S. F.....137,611.50  
A. C. McLean Constr' Co., S. F. 111,922.50  
J. W. Calback, San Diego.....118,870.00  
C. H. Hudson, L. A.....93,513.40  
Marsh Bros. & Gardener, S. F. 161,913.15  
F. Rolandi, S. F.....113,186.25  
E. L. Burr, S. F.....118,119.00  
Engineer's estimate, \$71,243.60.

Materials furnished by the State: Pipe railing, reinforcing steel, corrugated iron pipe and Portland cement. Total, \$8,691.70.

**Santa Barbara Co., Div. 5, Route 2, Sec. A.**  
Rogers Bros. Los Angeles.....\$19,523  
Engineer's estimate, \$8,072.77.

Materials furnished by State: Pipe railing, reinforcing steel, corrugated iron pipe, Portland cement, sand and coarse aggregate. Total \$22,899.45.

**Yuba Co., Div. 3, Route 3, Sec. A.**  
E. M. Whitlock, S. F.....\$24,362.80  
Engineer's estimate, \$19,943.07.

Materials furnished by State: Pipe railing, reinforcing steel, corrugated iron pipe, Portland cement, sand and coarse aggregate. Total, \$14,573.16.

**Sacramento Co., Div. 3, Route 2, Sec. A.**  
Joe Lawrence, Broderick.....\$11,495  
Engineer's estimate, \$35,506.05.

Materials furnished by State: Pipe railing, reinforcing steel, corrugated iron, Portland cement, sand and coarse aggregate. Total, \$24,749.58.

**Colusa Co., Div. 3, Route 7, Sec. B.**  
C. L. Schaad, Williams.....\$67,119.20  
Arthur W. Gorrill, Oakland.....76,697.20  
Engineer's estimate, \$67,815.27.

Materials furnished by State: Pipe railing, reinforcing steel, corrugated iron pipe, Portland cement, sand and coarse aggregate. Total \$65,143.84.

### BIDS OPENED FOR FIRE PLUGS.

SACRAMENTO, CAL.—Bids as follows were received by the City Commission on September 3rd for furnishing the city with seventy-five fire plugs:

Miller-Enwright Co.....\$2,416  
R. E. Miller.....2,125  
Crane Co.....2,286  
Sacramento Pipe Works.....2,176

All bids were taken under advisement.

### LOS ANGELES AND SOUTHERN CALIFORNIA.

CHURCH—1 and 2 story and base, brick and steel, \$100,000. Los Angeles, Cal. Architect, Frank L. Meline, 6631 Hollywood avenue, L. A. Owners, Fifth Church of Christ, Scientist. The building will be erected on a large lot recently secured at the corner of La Brea and Hollywood Boulevard. Inter-

iors will be arranged for a number of lecture rooms, study rooms and reading rooms. Interior finish will be of pine and hardwood with ornamental plaster. There will be a modern system of heating and ventilating. Art glass will be used. Exterior of the building will be faced with pressed brick trimmed with terra cotta. Plans are now being prepared. Further mention will be made of the work.

LAUNDRY—1 story and base, brick and steel, \$35,000. Los Angeles, Cal. Architect, Fred A. Hall, 621 San Fernando street, L. A. Engineers, Hunter & Hudson, Rialto Bldg., S. F. Owners, Los Angeles Laundry Co. The building will be erected on Yale street, covering an area of 155 by 260 feet. Besides the several large work rooms the building will contain offices of the company. There will be a large amount of special machinery. A complete pumping plant will be installed, cold window sash and frames and three-proof doors will be used. An automatic sprinkler system will be specified. Exterior of the building will be faced with sand limebrick. Plans are complete and figures are being taken.

HOTEL AND STORES—11 story and base. Class A construction. Cost not stated. Los Angeles, Cal. Architect, John J. Fraenkel, 1116 State Bldg., L. A. Owner's name withheld. The building will be erected on East 5th street near Los Angeles, and will have a frontage of 50 feet by a depth of 150 feet. There will be two stores besides the hotel lobby on the ground floor and a total of 242 guest rooms with 155 baths on the upper floors. Plans provide for a complete steel frame, brick erected walls and hollow tile interior partitions. Interior will be finished in pine and hardwoods. There will be steam heat, oil burning equipment, freight and passenger elevators, a vacuum cleaning system, hot water supply and metal window sash and frames. Patent store fronts will be used. Bath rooms will be finished in tile. Exterior of the building will be faced with terra cotta and enameled pressed brick. Plans are now being prepared.

HOSPITAL—2 story and base, brick. Cost not stated. Ventura, Ventura Co., Cal. Architect, A. C. Martin, Higgins Bldg., L. A. Owners, Ventura County. The building will cover a ground area of 30 by 175 feet and will contain the administration section, dining room, kitchens, wards and about sixty rooms for private patients. An asylum will also be connected with the building. A separate building will house the heating system. Interior will be finished in pine and hardwood with pine and tile floors. There will be special plumbing. Steam heat is specified. Exterior of the building will be faced with pressed brick. Plans are complete and figures are now being taken. Plans and specifications can be secured from the architect.

LIBRARY—2 story and base. Class A construction, \$50,000. Santa Barbara, Santa Barbara Co., Cal. Architect, Francis W. Wilson, 717 1/2 State street, Santa Barbara. Official approval has been given the design prepared by Architect Wilson for this building and working drawings will be prepared at once. The building will contain two large waiting rooms besides a separate children's room office of the H-

be of finished black room. Interior will be finished in pine and hardwoods with maple floor. There will be steam heat and vacuum cleaning. Metal book shelves will be used. Exterior of the building will probably be faced with pressed brick. Plans are being prepared.

**RAILROAD CONSTRUCTION**—Cost not stated. Highland, San Bernardino Co., Cal. Engineer, Chief Engineer Pacific Electric Co. The Pacific Electric Railroad has announced that it will extend its lines into the rich citrus fruit section around Highland, San Bernardino County. New lines will be built to the packing houses and the old Highland-San Bernardino line will be constructed. This territory has formerly been in control of the Santa Fe Railroad exclusively.

**RESIDENCE**—2 story and base, frame, \$20,000. Los Angeles, Cal. Architect, Frank M. Tyler, Black Bldg., 1, A. Owner, Mrs. M. Wiley. The dwelling will be erected in Lafayette Square, and has been designed to contain fourteen rooms and four baths. Interior finish will be of pine, redwood and hardwoods with white enamel in the chambers. Hardwood floors will be used in the principal rooms. A central heating system will be installed. All bath rooms will be finished in tile and equipped with showers. Open fire places with the mantels will be used. Art glass is specified. Automatic water heater will be installed. Exterior of the house will be covered with cement plaster on metal lath. A clay tile roof is specified. Plans are being prepared.

**RESIDENCE**—2 story and base, brick and plaster, \$30,000. Los Angeles, Cal. Architects, Morgan Walls & Morgan, Van Nuys Bldg., 1, A. Owner, Mrs. L. J. H. Hastings. The dwelling will contain fourteen rooms and four baths. A location has not yet been selected. Interior of the dwelling will be finished in pine and hardwoods with white enamel in the chambers. Hardwood floors will be used in the principal rooms. There will be a central heating plant, probably steam or hot water. Bath rooms will be finished in tile. Exterior of the house will be faced with cement plaster. Plans are now being prepared.

#### Contracts Awarded.

**LODGE HALL**—2 story and base, brick and steel, \$25,000. Los Angeles, Cal. Architects, Dennis & Hewitt, Fay Bldg., 1, A. Owners, Westlake Lodge of Masons. Contractors, Hunsberger-Reed Construction Co., Van Nuys Bldg., 1, A. Contract price, \$25,000.

#### PORTLAND AND OREGON.

**HIGHWAY CONSTRUCTION**—Cost \$57,758. Hood River, Ore. Engineer, County Surveyor. Owners, Hood River County. The contract for the construction of the highways in Hood River County has been awarded to the Newport Land and Construction Company of Hermiston, Ore., on their bid of \$57,758. Fourteen bids were received, ranging from \$57,758 to \$74,370. Work will start in sixty days.

**POST OFFICE**—4 story and base, Class A construction, \$1,000,000. Portland, Ore. Architect, Lewis E. Hobart, Crocker Bldg., 8, E. Owners, United States Government. Competitive plans

submitted by Architect Hobart have been approved for the new Federal Building to be erected in Portland. Four other San Francisco firms and one Portland firm were invited in the competition. The building will be of fireproof construction, and will contain the Federal offices and the post office. The design is in the classic style. Only preliminary studies have been made and complete details are not as yet available. Further mention will be made of the work.

**POST OFFICE**—1 and 2 story and base, semi-fireproof construction. Cost not stated. Medford, Ore. Architect, Supervising Architect Oscar Wenderoth, Washington, D. C. Owners, United States Government. A. W. Kutsche, 317 Yeon Bldg., Portland, Ore., submitted the lowest figure for constructing the Federal Building at Medford and will probably be awarded the contract although official action has not been taken. His bid was \$75,645 for limestone and \$75,445 for sandstone.

**SCHOOL**—2 story and base, reinforced concrete, \$45,000. Portland, Ore. Architects, Tourtellotte & Hummel, Rothchild Bldg., Portland. Owners, First Methodist Church Congregation. The building will be erected at the corner of 14th and Taylor streets and has been designed for a Sunday school building. The building will cover an area of 100 by 60 feet with club rooms on the first floor. Upper floor will contain a number of class rooms and an assembly hall seating 600 people. Interior will be finished in pine throughout. There will be steam heat. Exterior of the building will be faced with cement plaster. Plans are being completed and figures will be called for shortly.

**SCHOOL**—2 story and base, brick, \$55,000. Athena, Ore. Architects, Tourtellotte & Hummel, Rothchild Bldg., Portland. Owners, Athena School District. The building will cover an area of 78 by 128 feet, and has been designed to contain ten class rooms, gymnasium and an auditorium seating 700 people. Interior will be finished in pine with maple floors in the class rooms. Furnace heat will be installed and modern plumbing. Plans provide for program clocks and vacuum cleaning. Exterior of the building will be faced with pressed brick. Plans are being prepared.

#### Contracts Awarded.

**DOCKS**—1 and 2 story, pile and timber, \$115,425. Astoria, Ore. Engineer, F. J. Walsh, Port of Astoria Commission, Astoria. Owners, City of Astoria. Contractor, C. L. Houston, Astoria. Contract price, \$115,425.

#### SEATTLE AND WASHINGTON.

**HIGHWAY CONSTRUCTION**—Cost not stated. Seattle, Wash. Engineer, City Engineer, Seattle. Owners, Port of Seattle. The proposal of Gen. Chittenden of the Port of Seattle Commission to construct a highway from the business district to Lake Washington has been considered by city officials here. Four schemes, varying in cost from \$657,000 to \$1,840,000, have been proposed. The first scheme calls for a 1,800 foot tunnel 25x10 feet with a

terminus at 35th avenue. It would have two tracks with an elevated track for foot traffic. This would cost approximately \$1,840,000. The second scheme calls for a tunnel 25x60 and to cost \$687,000. Schemes 3 and 4 would cost in the neighborhood of \$800,000 and \$950,000.

**COURT HOUSE ADDITION AND COMPLETION**—Class A construction. Cost not stated. New Westminster, B. C. Architect's name not given. Owners, British Columbia. The Public Works Engineer, J. E. Griffith, of the Provincial Department of Public Works, at Victoria, will receive bids until September 15th for erecting and completing an additional building and making additions to the present court house at New Westminster. Plans, specifications and full information can be had from the Government Agent, New Westminster and Vancouver, or at the Department of Public Works, Victoria, B. C.

**LOFTS**—9 story and base, reinforced concrete, \$850,000. Seattle, Wash. Architect, George C. Nimmo, People's Gas Bldg., Chicago. Owners, Sears-Roebuck Co. This company is about to construct a nine-story building at the corner of First avenue and Utah street, covering a large ground area. Construction will be fireproof. Plans have been completed by the architect and have been forwarded to Seattle for figures. Details of the building have not been made public but it is stated that bids will be called for at once. The date for opening figures has not been set. Further mention will be made of the work later.

#### Contracts Awarded.

**GRAIN ELEVATOR**—Reinforced concrete, \$197,900. Seattle, Wash. Engineer, Port of Seattle Commission, Seattle. Owners, City of Seattle. Contractors, W. T. Butler Contracting Co., Central Bldg., Seattle. Contract price, \$197,900.

**LOFTS**—3 story and base, reinforced concrete, \$60,000. Seattle, Wash. Architect's name not given. Owners, The Black Mfg. Co., Seattle. Contractor, D. H. Tolman, Haight Bldg., Seattle. Contract price, \$60,000. Note: The contractor is now taking subfigures on the work.

#### UP AND DOWN THE COAST.

**MERCED**, Merced Co., Cal.—Bids opened in this city by the County Board of Supervisors for the construction of a bridge across the Merced river has been awarded to Cressey Mesner & Co. on their bid of \$14,700. This will make the sixth Class "A" bridge built in Merced county within the past two years across the Merced and San Joaquin rivers. Work on the structure will start at an early date.

**COLUSA**, Colusa Co., Cal.—Plans and specifications have been accepted by the County Board of Supervisors for a number of reinforced concrete bridges to be constructed at various points throughout the county. Bids will be received for them until September 10th by W. J. Kim, Clerk of the Board of Supervisors. Plans and specifications may be obtained from the County Surveyor at Colusa.

## News In Brief.

**COPPER CITY, Shasta Co., Cal.**—A movement has been started here by mining men of this district for building a road to connect with the State highway. A meeting will be held in the near future to discuss the project.

**YUBA CITY, Sutter Co., Cal.**—The Dairy Farm Railroad has been granted a right of way through Reclamation District 1001. The permit was granted subject to the approval of the Civil Engineer and Attorney for the District.

**SANTA BARBARA, Santa Barbara Co., Cal.**—Andrew Carnegie has offered his city a library to cost \$50,000. The Chamber of Commerce has taken up the task of raising \$20,000 additional for the site of the proposed structure.

**GRASS VALLEY, Nevada Co., Cal.**—Bids will be received by the Supervisors for the excavation, laying pipe and filling 1360 feet of sewer pipe on Whitney and Le Duc streets. Plans and complete information can be obtained from the City Clerk's office at Grass Valley.

**SONORA, Tuolumne Co., Cal.**—The old school building in Groveland has been sold at public auction and will be removed from its location to make way for the new school building to be erected here.

**FRESNO, Fresno Co., Cal.**—Plans and specifications for the State Normal school to be erected in this city are nearing completion and figures will soon be taken. The proposed building will cost in the neighborhood of \$370,000. Plans are being prepared by State Architect George B. McDougall.

**PITTSBURGH, Contra Costa Co., Cal.**—The contract for the new Grammar school to be erected here has been let to J. O. Kuykendall of San Francisco at \$49,955.

**RICHMOND, Contra Costa Co., Cal.**—Frank Aguilar has been awarded the contract for paving of Soto avenue at \$4,221.04. Work will start immediately. South Sixteenth street from Ohio Potrero through the Santa Fe District, in this city, will be paved at once. The city Council having passed resolutions of intention. The date for opening the bids has not been set as yet. The county also plans to open its street under the Santa Fe enactment between Chanslor and Ohio which will furnish a direct route from McDonald avenue to the bay.

**LOS ANGELES, Los Angeles Co., Cal.**—The Buckeye Manufacturing Co. of Anderson, Ind., has recently purchased six acre site near this city and are contemplating the erection of a brick factory building which will cost in the neighborhood of \$50,000, exclusive of machinery. The company is devoted to the manufacture of tractors and other farming implements. Final details are now being made by J. E. Lambert, the general manager and owner of the company, who has been west for this special purpose.

**OROVILLE, Butte Co., Cal.**—The State Highway Commission has de-

# Important!!

## Announcement of Improved Service of the "BUILDING and INDUSTRIAL NEWS"

With the desire to aid our advertisers and subscribers we announce the appointment of Lloyd C. Comegys, as our advertising manager.

Advertisers will receive his free advice and assistance regarding the advertisements carried in our weekly magazine, in order that they may produce greater results for them, both in advertising trade names and goods, and in getting direct sales and returns.

**Our Weekly has MANY ADVANTAGES for you.**

**Learn about them by sending for**

### Free Sample Copy

**Building and Industrial News**

**560 Mission St., S. F.**

cided upon the route for the Oroville lateral from the main trunk highway from a point near Richvale. The lateral will be nine miles in length.

A copy of the resolution has been transmitted to the Butte County Supervisors calling them to obtain the necessary rights of way, to build fences and all necessary bridges. This will call for a big bridge across the Feather river which will probably cost \$60,000.

**MONTAGUE, Siskiyou Co., Cal.**—Workmen are employed erecting a temporary building on the school grounds here, to be used until the new school building can be built. The building will be 16x50 and will be divided into two rooms. Work on the new building will be started the middle of this month.

**VALLEJO, Solano Co., Cal.**—The City Council and several San Francisco companies are looking over a site in this city for the purpose of establishing an incinerator. Commissioner of Public Health, Wm. P. Blake, states that plans and specifications will soon be prepared for the plant, which will cost in the neighborhood of \$8,000.

**OAKDALE, Stanislaus Co., Cal.**—Supervisor Robert T. Holmes, of the County Board of Supervisors, stated that active operations in tearing up, regrading and rebuilding a number of roads in the Oakdale District has started. Work will be completed before the rains set in. Among the streets to be improved are Chestnut, School, Cleveland and Bidwell avenues.

**YUBA CITY, Sutter Co., Cal.**—The vacant lot adjoining the Bremmer Hardware Company, on Second street, has been purchased by Walter Packard of Chico. He plans the erection of a large department store.

**TACOMA, Wash.**—The main plant of the Carstens Packing Company has been destroyed, entailing a loss of between \$70,000 and \$1,000,000. Thos. Carstens is the President of the company.

**SANTA BARBARA, Santa Barbara Co., Cal.**—The West Coast Engineering Company has abandoned their contract on the State highway north of Los Alamos. The contract for the paving was first awarded to the Bondive Co., who, after working a short time were forced to give up the work on account of financial difficulties. The company, after a year's delay, turned the contract over to the West Coast Engineering Company. Walter C. Howe, division engineer of the Highway Commission, is now taking the matter up with the Commission.

**SACRAMENTO, Cal.**—Asserting that his company can develop for Sacramento a flow of 20,000,000 gallons of well water per day, an engineer has asked the City Commission to give the Lyre & Bowler Corporation, of San Jose, a chance to demonstrate its plans. Roberts stated that his company has sunk a well for the Alameda Sugar Company near Woodland with a flow of between five and six million gallons daily. His company has also developed water for the 1915 Exposition Company and for irrigation districts in Southern California.

# Efficiency and Advertising

by Lloyd C. Comegys

## The Greatest of Business Problems.

The greatest of business problems is the obtaining of NET PROFITS. All other matters are details toward the attainment of this end.

It is the object of the business man, and he is succeeding or failing in accordance with the amount of his NET PROFITS. That's what he is in business for.

In seeking to obtain NET PROFITS, certain ways have been learned to be more successful than others, and it is these MORE SUCCESSFUL WAYS, SPECIAL METHODS and DEVICES for attaining NET PROFITS that have been given the designation of EFFICIENCY.

**Efficiency is the Scientific Method of Securing Increased NET PROFITS.**

Efficiency is new. Very little of it has been written down in books. As a general tendency it is everywhere, but as a **system of thought**, it exists only in the minds of a comparatively small number of men.

Those in business, as owners or employees, who understand Efficiency, are inclined to keep this valuable new knowledge to themselves, just as the gold miner, who has struck a rich vein of yellow treasure, is inclined to be secretive about his good luck.

And there are only a few men, as yet, who are practicing as a profession, the installing of Efficiency in offices, business houses, plants and factories.

**What Efficiency is NOT.**

Efficiency is not a new name for an old truth so far as it relates to industry and to individual success. It is an absolutely new point of view in the business world.

It is not Expert Accounting, for the reason that accounting deals only with records and not with methods.

It is not Economy, for the reason that mere saving is often the most suicidal of all business policies.

It is not Energy, for the reason that misdirected energy is the most universal of all industrial wastes.

It is not Slave-driving, for the reason that one of its main benefits is to elevate and profit the wage-workers, not to degrade or oppress them.

And it is not System, for the reason that the most useless and wasteful actions can be done in the most systematic way. There can easily be too much system, but there can never be too much Efficiency.

Efficiency will get a greater percentage of results for you, without adding to expense, and will reduce costs without lessening results.

Efficiency is needed in the one-man business, as in the concern employing thousands of men. It is as important to the one, as to the other, to increase NET PROFITS.

LOOK INTO THIS SUBJECT OF EFFICIENCY.

It means greater NET PROFITS for YOU!

## Efficiency Methods.

As applied to business, and considering individuals only as one of the parts of business used to produce the NET PROFITS desired, Efficiency approaches the particular firm it is called in to assist from every angle, large and small.

Almost the first matter to be considered is the question of OVERHEAD CHARGES. This subject, though almost the controlling feature as to whether or not the firm is to make NET PROFITS,—is probably the most neglected and wrongly handled of all business subjects. The subject is a difficult one and in consequence many avoid looking at it squarely in the face, as soon as they have made a semblance of settling upon a percentage for their firm.

Efficiency takes hold of this subject and in a scientific way lines the facts about it up in connection with the other features of the business.

Another difficult problem is Salesmanship and the other one advertising. These are constructive and productive forces and the most valuable.

Here it is that Efficiency gains greater results without increased costs, and lesser costs without reducing results.

And the modern Salesmanager and Advertising manager approaches his work from an Efficiency standpoint.

## The Small Firm.

The small firm having less margin in the way of expense for a large office force, needs to utilize the time of its employees to the very best advantage. This means that without the employee working harder or longer, that the results he produces may be made much greater, simply by a change of his methods of Work or the Facilities to work with. The small firm therefore needs EFFICIENCY Methods as much, if not actually more than the larger ones.

## What Trade Name Advertising can do as Efficient Sales Co-operation.

It can give general publicity to your trade name and goods in the locality you desire to cover, through the use of newspaper, magazine, program, mail and bill-board advertising. The results would come to you through the sales made by your representatives or selling-houses in those localities. Such advertising so establishes the character and value of your offerings or products as to largely relieve your selling-houses, representatives and salesmen from so establishing or informing regarding you who are among the general lines that you offer.

This leaves the salesmen or selling houses free to devote their entire time to actual sales making and eliminate a large amount of waste effort on their part in connection with your offerings.

Advertising may be very profitably used in obtaining inquiries regarding your offerings and getting in touch with live prospects or those whose minds have already been directed or centered upon taking your proposition. These inquiries or leads to prospect may then be turned over to your representatives or salesmen, who thus can produce many times the results that they otherwise could if left alone to scatter their efforts in a general way. **GOOD WILL:**

The good will of a firm that is established through advertising coming directly from the house is the most valuable kind, in that it cannot be materially affected by the presence or absence of any particular salesman.

**ADVERTISING:**

In plain words means explaining to possible customers of whatever you have to offer, who you are, and what you have to offer. Notice, I say to possible customers and it is right here where so much money is lost in advertising, even when it is properly done and contains real pulling or selling power. Be sure you are advertising to possible customers of your particular offerings and not to the general public or to those who would under most circumstances not want them. A trade magazine is one of the very best mediums for reaching the exact people in your line.

## Editorial Comment.

The Los Angeles Times, the power behind Captain Fredericks, is out already in an attack on the Direct Primary law. It assumes that the next legislature will be Republican and says:

"The first duty of the new Legislature will be to expunge the Direct Primary Law from the Codes of California. If the Legislature is Republican, as is probable, this duty will unquestionably receive immediate and effective attention, and party candidates will again be selected by nominating conventions."

The contention of the reactionaries is that it takes so much money to run at the primaries that a candidate will pledge his support to corporations in order to obtain the necessary funds. This is a strange situation. It may cost a good deal to make a winning race at the Primaries, but who would believe that the Los Angeles Times is concerned over the fact that the corporations might control a candidate.

The good old days of Herrin, Parker and Ruef saw the nomination of candidates in all parties that would do the bidding of the corporations. Those were the days when Harrison Grey Otis was in his glory the favored of the powers that were. And those are the days that are sought to be returned through the election of Fredericks.

There are some defects to be remedied in the new Primary Law. There are usually some defects in every new law. But it is right in principle. Part of the defects will automatically adjust themselves. Some amendments will have to be made by the legislature, but the people, if they have intelligence enough to deserve the ballot will never put the power in the hands of the bosses again to tell them who to vote for.

The Chronicle presents the picture of Captain Fredericks on its editorial page with the inscription that under his leadership the Republican Party will unite. If the De Young-Otis-Spreckels bunch are the Republican party then they have no doubt chosen a representative man. For so far as Fredericks is concerned he has done nothing that should endear him to the people and his reputation is not such that the common people should vote for him.

Governor Johnson has opened his campaign for re-election. The issue is plain. In the language of the Governor it is this:

"The present Administration presents in concrete form definite policies which have been adopted and are in process of execution, and it asks the endorsement or rejection of those policies."

It asks to be judged by its labor and the fruits of its labor. It demands that it be approved or condemned upon its merits or its demerits, and that every citizen weigh well its achievement and pronounce his verdict upon that achievement. There is the issue."

The language of the Governor needs no explanation. He puts the situation in concrete form. Every citizen who is honest enough to be entitled to a vote should hear what he has to say. Then if he wants to vote for the candidate of the Grand Old Party, follow the lead of bat-eyed prejudice and the old political ring it is his privilege.

Some bewildered politicians who derive their support from corporation allies are sending forth large gusts of heated air to the effect that it is the policy of the present administration to create offices and pay large salaries to the office holders. Particularly do they refer to Jack Eshelman, President of the Railroad Commission, and say that he never saw \$8,000 a year before he became head of the Railroad Commission.

That may or may not be true. Judging from its source it is probably not. But granting that it is true will anybody say that Eshelman is not an efficient officer or that he is not worth \$8,000 a year to the State of California.

If Eshelman had been employed by some thieving corporation and paid \$50,000 a year to break the laws of the land; if he had been the political head of some railroad and used criminal means to corrupt public officials; if he had been the head of some department to skin the laborers employed by his corporation of their birthright, then these same bewildered and loud mouthed gentlemen would have considered him a great man and bemoaned the fact that he was so patriotic as to give his abilities to the State for such a paltry sum.

Before these reforms that have been accomplished by the present administration were effected it is a notorious fact that the heads of the corporations who received the big salaries, received them chiefly because they could be trusted to do any kind of crooked work. That was the synonym of ability with the old guard. And men like Jack Eshelman and Governor Johnson, who considered liberty cheap at any price were not the high salaried servants of the powers that were.

The present Railroad Commission works. Its employees receive living wages, upon which they can exist and be independent and in return they give to the State the best that is in them. If any body doubts this let him visit the office of the Commission and investigate for himself. Then will he understand the loud talk and the unfounded assertions of the political founders who criticize the present commission and the work it has done.

# Mission Architecture

From The Redwood, Santa Clara College, May, 1914.

Development follows civilization. Astonishing discoveries and necessary inventions are the fruits of development. Development has altered the character of great cities, and has overcome the many inconveniences of country life. "Necessity," it is said, "is the mother of invention." Long felt vacancies have been filled, profitable and pleasing ends attained; for frequently where nature has combined unusual resources with natural disadvantages, producing thereby uncommon and untold effects, the arduous hand of man has succeeded in fashioning many of his most incredible and yet appropriate accomplishments.

Beginning at home, we have the massive undertaking of the construction of the now famous Los Angeles aqueduct, bringing its nourishing waters for miles to the semi-arid fields of the Los Angeles valley. Crude canals may have satisfied the wants of the early pioneers, but with wider development of the soil, a greater abundance of water becomes a necessity. Millions of dollars have gone out from the United States treasury, and millions are yet to be paid for the opening of the Panama Canal,—another fruit of what in our day is termed a necessity.

But going back several hundred years to the days of the "Padres and Bows," to the golden days of California "before the gringo came," what necessity do we find confronting the early Spanish explorers? Man's first instinct is to preserve life, and against the warring elements he seeks shelter, so for the colonists from Spain after leaving their cumbersome ships, shelter on land became the first question.

Looking about for material with which to construct such dwellings, it was seen that both timber and stone were truly at a premium. Trees covered the distant hills and stone might be found in the canyon's depths, but the means of transportation were crudely primitive. Roads were to those founders of a new country but a possibility of the future, and clumsy ox-carts could not supply the demand of material which must necessarily be brought from great distances. Something more convenient must be had, and the soil was next examined. Here then was found that clay, which would lend itself to be moulded into a suitable shape for building purposes. "Adobe," the Spaniards called such bricks, deriving the word from the Spanish verb *adobar*, to mend, or to daub. Casts were made and experimented with until it was found that such crude blocks of sun-dried clay could be so placed together as to stand the stress due to heavy roofs and wide arches.

Thus to such a humble beginning may the modern Mission Style of Architecture trace its origin. Low, tile-roofed, of a rambling nature it remains even today. The walls were necessarily low, for the material itself was none of the best for high buildings, and the additional labor of carrying

each separate brick to its place was hereby avoided. These adobe bricks took the general form of building bricks of today, but were equal in size to five or six of the modern bricks. These were cemented together with wet clay and covered over on the exterior with a mixture of native cement to prevent the gradual washing away of the clay by the winter rains. The walls were of adequate thickness both to assure warmth and coolness in the alternating seasons, and to be fully able to support the heavy roofs of red tile. Proportionately low were the doors and windows, all in keeping with the remainder of the building.

Ornaments of a gorgeous nature were indeed few, for the buildings which the Francisco Padres—and these good men were the real vanguard of civilization in California,—found it necessary to construct at various distances in this new territory, from which they could direct their zealous activities. Hence, since their work was to convert and civilize, not to erect masterpieces of architecture, they must do away with all impeding decorations and raise such structures as would best bring to the minds of the savages, some idea of the solemn greatness and glory of their Creator.

Patiently, they took the crude Indian as they found him, and after disappointments innumerable, instructed him in the most fundamental principles of construction, and after more years of untiring training taught him more perfectly "to hew the shaft, and lay the architrave." Theirs was no easy task. Materials such as they had were as yet untried, the workmen untrained, and tools exceedingly scarce. Students of early California history will readily recall what annoying setbacks the Padres experienced over and over again from some greedy or self-important **commandante**. Yet the buildings such as they had seen in their native country of Spain must act as models for present purposes, and copy these buildings in general outline they did, not failing, however, to add their own touch of originality.

From the pens of some modern superficial critics we have the information that this variation from true Spanish tradition was not originality but ignorance. Let such but consider the disadvantages under which the Padres labored, and the fact that they must instill into the naturally slow minds of their neophytes the very first principles of building, and let them compare such workmen with those professional laborers of the time in Europe who had been schooled in the mathematical precision of rearing a wall or constructing a roofing-tree and then let them cast a glance at some of California's well-known Mission churches. They will find the arches as mathematically correct, and the curves employed semi-circular or elliptical, which are carried out to the utmost precision. And yet the workmen who constructed such arches had been but a short time previously, merest sav-

ages, ignorant of the simplest mathematical problem.

Now in order to obtain a somewhat definite idea of the style of the old missions, it is well to first understand their general appearance. The mission buildings were, as a rule, rectangular in shape, of a single story in height, with roofs of red tile. The central and principal portion of the front elevation or *fachada* was formed by the church proper, while the somewhat lower and minor section of the frontage, together with the wings of the buildings, served as the residence of the priests, as guest rooms, the quarters of the Indians and servants, workshops, and store rooms, as well as places of instruction for the newly converted Christians. All these buildings enclosed a garden or patio, with a well or fountain in the center, and all rooms entered onto this court as well as onto the front. The walls enclosing the patio were without columns or arches, yet Mission San Luis Rey forms a notable exception to this general rule.

To examine more minutely the *fachada* or front elevation, we can take the example offered by the *fachada* of the Santa Barbara Mission, since it is perhaps regarded as the most popular of the missions and the most architecturally perfect. Most striking in this *fachada* is the semi-circular entrance, flanked on either side by three half columns. These are unmistakably of the Grecian type as regards their entablatures, surmounted by ionic capitals, the simple triangular pediment peculiar to this mission would bespeak Grecian influence were other signs to fail. The under side of the cornice has heavy dentals and is further ornated by a statue set in a niche.

Santa Barbara is also one of the two California missions which boasts of two bell towers. These towers are full three stories in height, surmounted by a semi-spherical dome. The first story rises firmly from the foundations without any ornament or windows whatsoever, and supports the second story, set back about half the thickness of the wall, forming a step over a plain cornice. In like manner the third story rises, the walls of these latter two being perforated by four arched apertures to serve for bells. To relieve the severity of the corners of the walls, these corners are chamfered. Roofed with a composition cement like that found in the Texas missions, the dome supports the lantern and cross. A covered veranda adjoins the church, stretching away to the left and faced by twelve stately arches, while to the right, the patio is enclosed by a simple wall of adobe. Certainly the men who planned and reared such a structure were possessed of a liberal knowledge of architecture, and are entitled to more praise than some narrow minds of today begrudgingly attribute to them.

Architecture, however, is ever seeking to construct buildings laying some claim to originality. So must it have

been at the time of the Padres, for the fachadas of the different missions are by no means alike. Mission San Luis Rey, the second California mission to have two towers, has suffered greatly from age and neglect, and only one tower now remains intact. It resembles greatly the general outlines exhibited in the construction of the Santa Barbara mission, but we have only to journey to Tucson, Arizona, to find an entirely different detail in ornamentation and design.

The towers of this mission rise to approximately the same height as those found in California, but the second story, while having its four arched apertures, is set sufficiently far back to form a platform above the cornice. At the corners of this platform high square posts are set firmly in the adobe and connected by a balustrade. The third story, octagonal in shape, has its arched openings, and though somewhat higher than the second, is of the same width and again serves to support the dome. True, the wooden tower of the San Juan Bautista mission is undoubtedly fashioned after the towers of San Xavier's, for the platform, octagonal third story, balustrade and all, point to a likeness to the Arizona mission, yet this tower is of a more recent date, and cannot said to have been built by the earlier Padres. No greater dissimilarity in the arrangement of bell towers could be had than that between the three former missions and those of San Gabriel and Santa Inez. The towers of these two missions consist of merely a low massive wall of masonry pierced by bell apertures, built in proportion to the bells which they were to contain. The campanile of the San Antonio is lower than either of those at San Gabriel or Santa Inez, and differs also in that it is made of burned brick. Unlike any to far named, San Carlos mission has for its heltry, an egg-shaped dome resting on an octagonal base, entirely different from the pyramidal, red-tiled roof of the Presidio Church at Monterey.

Most original, as well as unique, the campanile at San Antonio de Pala Asistencia profers rare beauty of design and commanding appearance, gaining in grandeur and reverence from its time-worn exterior. Separated from the nearby structures, it stands upon its base which may be simply described as a vertically elongated pediment, its sediment curves, concave, with no steps. Of but two stories in height, each having four bell apertures, the monotony of the facade is broken by three cornices, one crossing the first story at the base of the arched opening, the second and third at the division lines between and over the different stories.

Coming to the pediments, Mission San Luis Rey affords the most graceful and pleasing, and well deserves its ever increasing popularity as a model for the modern Mission Architect. This pediment if a flat top, upon which rests the lantern, is stepped, and employs both convex and concave curves. San Carlos, better known as Carmel-by-the-Sea, gives the impression of an arch, consisting as it does of a long arch decreasing in curvature as it approaches the base and adorned with a scroll at the top. San Antonio de Padua brick is used in the construction, stepped off near the top, followed

by a concave curve and step where it rests on a horizontal plane, ending in two more concave curves. Examples found at other missions are of minor detail.

The arch, however, is considered by all to be the most salient feature in Mission architecture. In fact, so far reaching is its importance, that many regard the mission house of today incomplete without its arches. Since the arch holds so conspicuous a place in the public mind, it must be examined in some of its details and variations. The favoritism shown to the semi-circular arch is perhaps due to the presence of the reproduction of this style in present day structures. And well may this be so, for it is the most extensively used curve in the mission buildings themselves. Its simplicity lends grace, and we notice it in the larger missions of Santa Barbara, San Luis Rey and San Antonio de Padua, as well as in all towers and campaniles.

Another popular opinion assumes that those arches of any other type than the semi-circular are not strictly mission. Erroneous, indeed,—for at San Juan Capistrano an excellent example of the elliptical arch has been preserved for us. Mission San Juan Bautista employs the ellipse on its fachada, and the doorway leading to the Santa Margarita chapel not only has this elliptical curve, but varies the curvature of the arch, in such a way that the outer side becomes greater than the inner. Recessed and rounded, it adds beauty and grace to its substantial qualities. Since it has not the high crown of the semi-circular curve, it is particularly adapted to the low adobe models, and bids fair, because of its harmonious effect, to establish for itself an important place in Modern Mission style.

The square arch is found in every mission, but it is rarely employed outside of the main wall of a building. It served its purpose most satisfactorily in the construction of doors and windows, where the sides widened towards the outer side, supporting heavy wooden lintels. Not unfrequently to relieve the strain on the lintel, another beam of the same or even greater length than the lintel itself, was embedded in the wall a foot or more above the lintel. These arches were without ornament of any kind, and were employed for service rather than for architectural decoration. Only once do we find the square arch decorated, and this in a manner scarcely ever reproduced in commercialized Mission architecture. At the Capistrano mission, we find a highly ornated arch, exhibiting the same skillful workmanship that characterizes this entire mission, with the keystone projecting fully four inches, and carved upon it an eight-pointed floral design, with immediately above it, a decorated entablature crowned by a massive cornice.

Doorways at times seemed to be apparently the reproduction of those of some Spanish edifice, for Moorish and Gothic principles being joined together, as were many of the edifices in Spain at that period, lent themselves to the mission style, and the entrance to the chapel of the Sacred Heart of Jesus at San Carlos Mission, may be regarded as one of the most elaborate pieces of detail work to be found in any of the Missions.

As in the arches, pediments and towers,

etc., so also variety is likewise enjoyed in the columns used. At the San Francisco (Holores) Mission are found both columns and half-columns, having the essentials of the Doric order. In the recesses of the mortuary chapel at San Luis Rey we find columns and half-columns of the composite order, while Doric half-columns adorn the entrance to the patron, with pilasters of a most ornate classic style gracing the side entrances.

This variety in decoration served but to lend dignity and grace to a style of architecture which points to the mean adobe house as the origin. Nowhere do we find among the mission buildings, structures of great height, nor does this peculiar style readily lend itself to such. Yet we doubt not, that were all things taken into consideration, the opportunity may yet be afforded, by which this style may be made suitable to taller buildings just as the American architect has done with the classic types. It is in the field of lower structures, however, that manifold opportunities are offered, and it is here that the most noteworthy achievements have been wrought.

Churches, municipal buildings, schools, museums and hotels, and above all the medium and larger sized residences have repeatedly been rendered in this modern mission style. From the fact that this style has come into vogue so rapidly, and enjoys such universal popularity, we may appreciate the rare and simple beauty which the old ruins must have held in their day, as well as the value of this style now offers from a commercial standpoint. Church buildings need undergo little or no change, since the mission style was originally ecclesiastical; however, in other buildings, the peculiar purpose must determine the architecture.

We note as a rare example of mission architecture used in commercial lines, the Glenwood Mission Inn, at Riverside, California. It was undoubtedly modeled from the San Gabriel Mission, and the sentiments which characterized the old missions are the most successfully commercialized.

Municipal buildings can be just as appropriately rendered in this style as in any other, for towers, pediments and arches all adapt themselves readily.

To the residences should be given the becoming proportions of the old adobe house, and there will still remain ample opportunity to insert numerous mission peculiarities to good advantage. The low structure gives the idea of durability and solidity, nor need it be adjudged squatly if properly proportioned and planned. The courtyard or patio will be most welcome; towers may at times be resorted to with some slight modifications, pediments may be readily used, a series of arches should adorn the piazzas; while columns, half-columns and pilasters if judiciously placed, will produce a most desirable effect.

In short, as the pioneers found it, the Mission Style is undoubtedly becoming to California's equable climate and its picturesque landscape. It portrays the Spanish traditions, and characterizes the fervent sentiment of the people, while above all it connects in a way truly interesting, California's early romantic history with its commercial importance of today.

# ADVANCE NEWS

Classified according to Character of Work

## APARTMENT HOUSES.

**SAN FRANCISCO**—Apartment house, 1 story and base, reinforced concrete, \$30,000. Architect, Charles J. Rousseau, Monadnock Bldg., S. F. Owner, John Kincannon. The building will be erected on the south side of Post street east of Van Ness avenue, and will have a frontage of 27½ feet by a depth of 120 feet. There will be a total of twenty suites arranged in apartments of two and three rooms. Interior will be finished in pine throughout, except in the lobby and main halls, which will be finished in blue gum. Hardwood floors will be used throughout. Plans provide for steam heat, an automatic elevator, hot water supply and portable vacuum cleaners. An oil burning equipment will be installed. All apartments will have wall beds and private bath rooms. Tile floors and wainscot will be used in the baths. Exterior of the building will be faced with pressed brick. Entrance will be finished in marble. Plans are complete and segregated figures are taken.

**SACRAMENTO, CAL.**—Apartment house, 2 story and base, frame, \$5,000. Architect, none. Owner, William R. Saunders, 2810 I street, Sacramento. The building will be erected on P street, and has been designed to contain four apartments of four rooms and bath. Interior finish will be of pine and redwood. There will be wall beds and a hot water supply. Bath rooms will be finished in tile with composition floors. Exterior of the building will be covered with rustic and cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor.

**SAN FRANCISCO**—Apartment house, 6 story and base, steel and brick, \$100,000. Architect, C. O. Clausen, Hearst Bldg., S. F. Owner, George Bennett. The building will be erected on the south side of Eddy street near Leavenworth, having a frontage of 50 feet and a depth of 137½ feet. There will be a complete steel frame with reinforced brick walls. Plans provide for a total of sixty suites of two and three rooms. Interior will be finished in pine, blue gum and Chippendale walnut, with hardwood floors in the principal rooms. There will be steam heat, elevator service, electric dumb waiters, a vacuum cleaning system and hot water supply. All suites will have wall beds. Bath rooms will have tile floors and wainscot. Entrance will be finished in marble and tile. Exterior of the building will be faced with pressed brick, granite and Colusa sandstone. Plans are complete and segregated figures are being taken.

**SAN FRANCISCO**—Apartment house, 3 story and base, frame, \$20,000. Architect, Joseph Cohen, 15 Kearny St., S. F. Owners, Joseph Cohen and I. Rosenberg. The building will be erected on the south side of Sacramento street west of Scott, and has been de-

signed to contain twelve suites of three and four rooms. Interior will be finished in pine and hardwood veneer. Oak floors will be used in the principal rooms. Each apartment will have a large open air sleeping porch. Plans provide for steam heat and a hot water system. All suites will have wall beds and private bath rooms. Tile wainscot and composition floors will be used in the bath rooms. Entrance will be finished in marble and tile. Exterior of the building will be covered with cement plaster on metal lath. Plans are complete and segregated figures will be called for at once.

**SAN FRANCISCO**—Apartment house, 3 story and base, frame, \$17,000. Architect, C. O. Clausen, Hearst Bldg., S. F. Owner, Dr. J. J. Arberry. The building will be erected on 11th avenue near Lincoln Way in the Sunset District, and will cover a ground area of 32 by 100 feet. There will be twelve suites of three and four rooms. Interior will be finished in pine throughout. Some hardwood floors will be used. Plans provide for steam heat and a hot water system. Bath rooms will have tile wainscot and composition floors. Exterior of the building will be covered with cement plaster on metal lath. Plans are now being prepared.

**SAN FRANCISCO**—Apartment houses, 2, 3 story and base, frame, \$10,000 each. Architect, Edward E. Young, 950 Kearny street, S. F. Owner, Herman Hoge, 1011 Kearny street. These two buildings will be erected on Hyde street north of Pine, and each has been designed to contain six apartments of three rooms each. Interiors will be finished in pine and redwood with some elm panels. Hardwood floors will be used in the principal rooms. There will be a hot water supply and open fire places. Mantels will be of tile. Bath rooms will be finished in tile. Wall beds are specified. Exteriors of the buildings will be covered with cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor. Materials are now being purchased.

## BRIDGES AND DAMS.

**MARYSVILLE, YUBA CO., CAL.**—Bridge, reinforced concrete, \$135,000. Engineer, County Surveyor, Marysville. Owners, Yuba County. Nine sets of figures were opened by the Board of Supervisors for the construction of the D street bridge over the Yuba River. The lowest figure was received from the Clinton Fireproofing Co., of San Francisco, at \$134,000. All bids were taken under advisement. A complete list of the bids as opened will be found under the heading of Sacramento, Stockton and Northern California in this issue.

**MARLE, YUBA CO., CAL.** Bridge, reinforced concrete, \$5,000. Engineer, County Engineer, Marysville. Owners, Yuba County. Jenkins & Holmes of

Chico presented the lowest figure at \$1,770 for constructing the new bridge over the Honcut Creek near Mahle Crossing. Three bids in all were received. No contract has been awarded. A complete list of the bids will be found under the heading of Sacramento, Stockton and Northern California in this issue.

**OAKLAND, CAL.**—Bridge repairs, pile and steel construction, \$30,000. Engineer, County Surveyor P. A. Haviland, Oakland. Owners, Alameda County. County Surveyor P. A. Haviland has been instructed to prepare plans for repairs to three bridges which span the Oakland Estuary, connecting Oakland and Alameda. This work is estimated to cost \$30,000. Bids will be called for as soon as plans and specifications can be completed.

**SAN FRANCISCO**—Piers, 2, creosoted pile and concrete. Cost not stated. Engineer, Assistant State Engineer Newman, Ferry Bldg., S. F. Owners, State of California. The State Board of Harbor Commissioners have asked the State Board of Control to publish an official proposal calling for figures for the construction of two new piers on the San Francisco water front. Piers Nos. 16 and 18 are to be constructed at once, and will be located between Mission and Howard streets. Creosoted piles and concrete bulkheads will be used. Each pier will be 200 feet wide and 800 feet long.

Plans for the subpost office to be erected by the State Harbor Commission and leased to the Government have also been approved and will be advertised at once. This building will be erected south of the present Union Ferry Building.

**RIO VISTA, SOLANO CO., CAL.**—Bridge, steel and concrete. Cost not stated. Engineer's name not given. Owners, Solano and Sacramento Counties. Plans and specifications for the proposed bridge over Chipps Island at Rio Vista have been received at Washington, D. C. It is stated that the plans will be changed only in as much as the draw will be moved over near the Rio Vista side. Final action will be taken shortly by the Washington authorities.

**COLUSA, COLUSA CO., CAL.**—Bridges and culverts, reinforced concrete. Cost not stated. Engineer, County Surveyor, Colusa. Owners, Colusa County. Plans have been completed for a number of reinforced concrete culverts and reinforced concrete bridges to be erected in Colusa County. Several of the bridges and culverts may be combined in one bid, but unit prices for each must be stated. There will be three bridges and in the neighborhood of seven culverts. Complete information relative to this work can be secured from the County Clerk at Colusa. Bids will be opened on September 23rd.

**RICHMOND, CONTRA COSTA CO., CAL.**—Bridges, steel construction. Cost not stated. Engineer, County Surveyor, Martinez. Owner, Contra Costa Coun-

ty. Plans prepared by the County Surveyor for three road bridges to be erected along the new State Highway in Contra Costa County have been completed and the county will advertise for bids within a few days. All three bridges are to be of steel construction.

## FACTORIES AND WAREHOUSES.

**CHICO, BUTTE CO., CAL.** Cannery, 1 story, frame and galvanized iron, \$10,000. Architect, W. E. Coffman, Chico. Owners represented by O. E. Tracy, Main street, Chico. Complete working drawings for a large building designed for a modern cannery have been completed. The project is to be financed by a stock company promoted by O. E. Tracy, who is now endeavoring to raise \$25,000. Further mention will be made of the work shortly.

## FIRE HOUSES AND JAILS.

**ALTURAS, MODOC CO., CAL.**—Jail cells, steel construction. Cost not stated. Architect, De Longchamps, Reno, Nev. Owners, Modoc County. The Board of Supervisors at Alturas will open bids on September 21st for furnishing and installing five steel cells in the new county jail building. Bids will also be considered for removing two old steel cells and placing them in the new building. Plans and specifications can be secured from the County Clerk.

## FLATS.

**SAN FRANCISCO**—Flats, 2 story and base, frame, \$5,000. Architect, none. Owner, P. D. Taylor, 1921 Oak street, S. F. The building will be erected on the south side of Lake street west of 16th avenue, and has been designed to contain two modern flats of five rooms each. Interiors will be finished in pine and redwood. Hardwood floors will be used in the principal rooms. There will be open fire places and tile mantels. Bath rooms will have tile wainscot. Exterior of the building will be covered with rustic. Plans are complete and in the hands of the owner who will do the work by Day Labor. Materials are now being purchased.

**SAN FRANCISCO**—Flat alterations, 2 story, frame, \$2,500. Architect, none. Owner, Mrs. L. A. Collins, 1932 Hyde street, S. F. The work will consist of raising and adding a story to the present two story building. The ground floor will be occupied by stores. Included in the work will be new interior trim, plumbing, electric work, plastering and painting. Open fire places and tile mantels will be used. Exterior will be covered with rustic. Plans are complete and work will be done by Day Labor.

**SAN FRANCISCO**—Flats, 2 story and base, frame, \$6,800. Architect, C. O. Clausen, Hearst Bldg., S. F. Owner, Adam Becker. The building will be erected on Guerrero street near Cumberland and has been designed to contain two modern flats of five rooms each besides a private garage in the basement. Interior of the flats will be finished in pine with some hardwood floors. There will be open fire places and tile mantels. Tile wainscot will be used in the bath rooms. Wall beds are also specified. Exterior

of the building will be covered with shiplap. Plans are now being prepared.

## GOVERNMENT WORK & SUPPLIES.

### San Diego, Cal., Coal Tower.

The following bids were received by the chief of the bureau of yards and docks, Navy Department, Washington, D. C., for constructing a coal-hoisting tower at the U. S. naval coal depot, San Diego, Cal.:

The Meade-Morrison Mfg. Co., East Boston, Mass., \$11,245.

McMyler Interstate Co., Bedford, Ohio, \$45,100.

The Robbins Conveyor Belt Co., 13 Park Row Building, New York City, \$12,676.

The C. W. Hunt Co., Inc., 45 Broadway, New York City, \$14,827; add conditionally \$1,140.

### Okanogan Project, Pipe.

The following bids were opened by the U. S. Reclamation Service, Los Angeles, Cal., for furnishing riveted steel pressure pipe for the Okanogan project:

Item 1, 3 riveted steel pressure pipe, 2, erection of same.

Lacy Mfg. Co., Los Angeles, Cal., item 1, \$1,571.76; Los Angeles, 30 days.

Western Pipe and Steel Co., San Francisco, Cal., item 1, \$1,672.20; Richmond, Cal., 10 days.

Willamette Iron & Steel Works, Portland, Ore., item 1, \$2,300; Portland, 75 days; 2, \$1,250.

Llewellyn Iron Works, Los Angeles, Cal., item 1, \$2,300; Los Angeles, 60 days.

Union Iron Works, Spokane, Wash., item 1, \$2,500; Spokane, 20 days; 2, \$1,185.

Perine Machinery Co., Seattle, Wash., item 1, \$2,616; Seattle, 25 days.

Fulton Engine Works, Los Angeles, Cal., item 1, \$2,781; Los Angeles, 50 days.

### Puget Sound, Exciter.

The bid of the Ker Turbine Co., Real Estate Trust Building, Philadelphia, Pa., \$1,562 in amount, has been accepted for furnishing one 40-K. W. turbine-driven exciter for the power plant at Puget Sound.

### Alameda, Cal., Telephone System.

The contract for installing a multiple intercommunicating telephone system in the U. S. post office building at Alameda, Cal., has been awarded to the Alameda Electric Co., 1325 Park street, Alameda, Cal., at \$65.

### Timber, Seattle Engineer.

The Union Lumber Co., of Union Mills, Wash., will furnish the timber called for under bids opened July 23 by the U. S. engineer, Seattle, Wash., for the sum of \$23,158.94.

### Electrical Apparatus, McQueen Well.

The following bids were received by the U. S. Reclamation Service, Los Angeles, Cal., for furnishing electrical apparatus for McQueen Well:

Item 1, one 75-H. P., 2,200-volt, 25-cycle, 750 r. p. m., vertical, square, C motor, 1, one automatic controller and oil s. w., complete, for motor; 2, one 75 k. v. a. transformer, 4, one 2 k. v. a. transformer.

Allis-Chalmers Mfg. Co., Milwaukee,

W. I., item 1, \$725; 2, \$690; 3, \$775; 4, \$10; at East Norwood, Ohio.

Westinghouse Electric & Mfg. Co., East Pittsburgh, Pa., item 1, \$747; 2, \$725; 3, \$553; 4, \$18.40; at East Pittsburgh, Pa.

Crocker-Wheeler Co., Los Angeles, Cal., item 1, \$814; 2, \$960; 3, \$1,000; 4, \$49; items 1, 3 and 4 at Ampere, N. J.; 2, at Los Angeles, Cal.

Wagner Electric Co., St. Louis, Mo., item 1, \$867; 3, \$835; 4, \$16.50; at St. Louis, Mo.

General Electric Co., Schenectady, N. Y., item 1, \$947; 2, \$645; 3, \$751; 4, \$55; items 1 and 2 at Schenectady; 3 and 4, at Pittsfield, Mass.

Moloney Electric Co., St. Louis, Mo., item 3, \$648; 4, \$49; at St. Louis.

Pittsburgh Transformer Co., Pittsburgh, Pa., item 3, \$889; 4, \$18; at Pittsburgh, Pa.

### Denver, Colo., New Toilet, Etc.

The contract for constructing a new toilet, etc., in the U. S. Mint (new), at Denver, Colo., has been awarded to F. H. Cowell at \$1,252.55.

### Portland, Ore., Roof Repairs.

The contract for repairs to the roof of the U. S. custom house at Portland, Ore., has been awarded to J. C. Bayor at \$1,050.

### Pipe and Fittings.

The following bids were received by the U. S. Reclamation Service, Los Angeles, Cal., under specification No. 327, for furnishing pipe, valves, and pipe fittings for the Shoshone project, Wyo.: American Steel Pipe & Tank Co., Los Angeles, Cal., \$522.17; Los Angeles, 3 weeks.

Crane Co., Los Angeles, Cal., \$542.12; Los Angeles, 3 weeks.

Western Pipe & Steel Co., Los Angeles, Cal., \$573; Los Angeles, 10 days.

### Denver, Colo., Mechanical Equipment.

The contract for mechanical equipment work in the U. S. Mint at Denver, Colo., has been awarded to F. H. Cowell at \$619.

### V. & D. Cold Storage Plant, Pearl Harbor.

The following bids were received by the chief, bureau of yards and docks, Navy Department, Washington, D. C., for building and equipping an ice-making and cold-storage plant at the naval station, Pearl Harbor, H. T.:

Item 1, net price for the ice-making and cold storage plant with all appurtenances and accessories, complete, in accordance with plans and specification; item 2, net price for the ice making and cold storage plant, complete, in all details as contemplated by item 1, conforming to the intent of this specification, but with such modifications of detail as are clearly defined under a special heading entitled "Exceptions"; item 3, net price for the ice making machinery and cold storage plant erected, complete, in accordance with plans and specification as described in paragraphs 24 to 43, inclusive; item 4, net price for furnishing and erecting the building in accordance with the plans and specification as described in paragraphs 44 to 52 inclusive; item 5, net price for furnishing and erecting the building, conforming to the intent of this specification, but with such modifications of details as are clearly described in the proposal

under a heading entitled "Exceptions," item 6, net price for the electric lighting in accordance with the plans and specification, as described in paragraph 53; item 7, net price for furnishing and installing one additional ammonia compressor conforming to this specification, as described in paragraph 24; item 8, net deduction in price for the omission of 1-inch cor board insulation from the outside walls, partition walls, and ceiling of cold storage rooms; item 9, net deduction in price for the alternative arrangement of partition walls marked "1P" of the cold storage rooms as shown on plans; item 10, net deduction for substituting a type of insulation as clearly described and guaranteed in the proposal in lieu of the corkboard insulation specified; item 11, net deduction from items 1 and 2 for omitting the electric lighting as described in paragraph 53.

The Vilter Mfg. Co., Milwaukee, Wis., item 1, \$18,690; 2, \$18,440; 3, \$11,800; 4, \$7,000; 5, no modifications; 6, \$1,000; 7, \$1,780; 8, \$320; 9, \$100; 10, \$580; 11, \$850.

The Mayer Ice Machine & Engineering Co., Jersey City, N. J., item 2, \$16,200.

The Frick Co., Waynesboro, Pa., item 1, \$25,775; 2, \$18,360; 7, \$2,880.

#### Logan, Utah, Paving Driveway.

The following bids were received by the custodian, U. S. post office, Logan, Utah, recently for paving driveway at the above building:

Hawks & Johnson, Logan City, Utah, \$2,385; September 28, 1914.

J. E. Wilson, Jr., 128 S. 1st East street, Logan, Utah, \$2,574; September 25, 1914.

Grohne Contracting Co., Joliet, Ill., \$2,194; October 1, 1914.

#### Gates and Gate Stands.

The following bids were received by the U. S. Reclamation Service, Great Falls, Mont., for furnishing structural steel and cast iron sluice and regulator gates, gate frames, gate stands, and accessories for projects in the northern division:

Bid 1. Fulton Engine Works, Box 296, Los Angeles, Cal.

2. The Hinman Hydraulic Mfg. Co., Denver, Colo.

3. Minneapolis Steel & Machinery Co., Minneapolis, Minn.

4. Coffin Valve Co., Neponset, Mass.

5. Chicago Bridge & Iron Works, 105 Thorp street, Chicago, Ill.

6. Caird Engineering Works, Helena, Mont.

7. Coast Culvert & Flume Co., Columbia Boulevard, Kenton, Ore.

8. Wm. F. Garbe, 721 E. Magnolia street, Fort Collins, Colo.

#### Schedule No. 1.

Item 1. Two structural steel gates and frames—Bid 1, \$368; 2, \$454.50; 3, \$375; 5, \$367.

Item 2. Three do—Bid 1, \$291; 2, \$326.80; 3, \$550; 5, \$263.30.

Item 3. Eight do—Bid 1, \$197; 2, \$235.82; 3, \$190; 5, \$209.

Item 4. Eight do—Bid 1, \$155.50; 2, \$182.81; 3, \$155; 5, \$122.

Item 5. Four do—Bid 1, \$141.50; 2, \$193.07; 3, \$141.50; 5, \$111.

Item 6. Six do—Bid 1, \$111; 25; 2, \$186.50; 3, \$131; 5, \$104.

Item 7. Four do—Bid 1, \$120.50; 2, \$170.10; 3, \$115; 5, \$84.

Item 8. One do—Bid 1, \$133; 2, \$211.05; 3, \$102; 5, \$95.

Item 9. Five do—Bid 1, \$130.50; 2, \$165.95; 3, \$98; 5, \$66.

Item 10. Eight do—Bid 1, \$125.50; 2, \$126.04; 3, \$95; 5, \$66.

Item 11. One do—Bid 1, \$120; 2, \$160.80; 3, \$95; 5, \$56.

Item 12. All metal work, except hand rails in operating bridge—Bid 1, \$68; 2, \$60.45; 3, \$37; 5, \$48.

Item 13. Two structural steel gates and frames—Bid 1, \$375; 2, \$458.40; 3, \$273; 5, \$186.

Item 14. Three structural steel gates—Bid 1, \$77.75; 2, \$92; 3, \$25; 5, \$51.

Total—Bid 1, \$9,337.25; 2, \$11,348.09; 3, \$8,186; 5, \$7,170.03.

Freight—Bid 1, \$682.70; 2, \$619.75; 3, \$572.75; 5, \$682.50.

#### Grass Valley, Cal., Post Office.

The contract for the construction, complete, of the U. S. post office at Grass Valley, Cal., was awarded to Welsh Bros., 15th and Jefferson streets, Oakland, Cal., at \$42,474.

#### Portland, Ore., Painting.

The contract for painting in the U. S. customs house building at Portland, Ore., has been awarded to Grocock & Son, Portland, Ore., at \$2,760.

#### Accumulators for Stock and Stores.

The following bid was received by the light house inspector, 18th district, San Francisco, Cal., for accumulators for stock and stores:

American Gas Accumulator Co., Philadelphia Pa., f. o. b. San Francisco, \$1,230; f. o. b. Philadelphia, \$1,150, accepted.

SAN FRANCISCO—Bachelors' quarters, 2 story and base, brick. Cost not stated. Architect, Constructing Quartermaster's Office, Fort Mason. Owners, United States Government. Bids opened for this work show Frank M. Garden Co., 251 Kearny street, low on the entire work at \$21,178. A contract has not been awarded. A complete list of figures showing all subfigures appears under the heading of San Francisco in this issue.

#### HALLS AND SOCIETY BUILDINGS.

TACOMA, WASH.—Lodge hall, 4 story and base, reinforced concrete, \$100,000. Architect, E. F. Champney, Hay Bldg., Seattle. Owners, Tacoma Elks' Hall Association. The building will cover a large ground area and has been designed for a fireproof structure. There will be stores on the first floor. Upper floors will be arranged for lodge rooms, offices and living apartments for the members. Interior will be handsomely finished in pine and hardwoods. Maple floor will be used in the ball room. Plans provide for steam heat, hot water system, vacuum cleaning and elevator service. Marble and tile will be used extensively. Exterior of the building will be faced with terra cotta. Plans are now being prepared.

The building has been designed for a district school, and will be erected about two miles east of Fowler. There will be two class rooms. Interior will be finished in pine throughout. Stoves will be used for heating. Exterior of the building will be covered with cement plaster on metal lath. Plans are complete and out for figures. Bids will be opened on September 19th.

## SEWERS, STREET WORK & WATER SYSTEMS.

**SAN RAFAEL, MARIN CO., CAL.**—Water system. Cost not stated. Engineer's name not given. Owners, Marin Water and Power Co., San Rafael. A. W. Foster, of the Marin Water and Power Co., has gone on record as wishing to build the proposed dam at Tamalpais, which is to furnish practically all of Marin County with a water supply. Considerable opposition to the Tamalpais dam site exists among members of the "New Water District Association," who favor what is known as the Alpine site on Lagunitas Creek. If Mr. Foster's proposition is accepted by the district, provision is made whereby the district may, at any future time take over the Tamalpais dam on payment of its actual cost of construction.

**VALLEJO, SOLANO CO., CAL.**—Street paving. Cost not stated. Engineer, City Engineer, Vallejo. Owners, City of Vallejo. Plans and specifications have been completed and figures will be opened on September 17th for paving Georgia street. The work will require a four-inch concrete base with a two inch bituminous top, concrete curbs and six-inch concrete gutters. Plans and specifications can be secured from the City Engineer.

**CALIFORNIA**—State Highway work. Cost not stated. Engineer, State Highway Commission, Forum Bldg., Sacramento. Owners, State of California. Bids will be opened on October 5th for highway work in the following counties: Humboldt County, grade, 3.7 miles Humboldt County, grade, 4.3 miles; Alameda County, Portland cement concrete, 5.9 miles; San Luis Obispo County, grade, 3.6 miles; Santa Barbara County, Portland cement concrete, 3.7 miles; Imperial County, Portland cement concrete, 6.0 miles. At 3:30 p. m.—San Luis Obispo County, Portland cement concrete, 10 miles; Sacramento County, Portland cement concrete, 6.8 miles; Solano County,

Portland cement concrete, 8.2 miles, and Santa Barbara County, Portland cement concrete, 3.6 miles.

**WASHINGTON RECLAMATION DISTRICT, YOLO AND SACRAMENTO COUNTIES, CAL.**—Permanent levee improvements. Cost not stated. Engineer's name not given. Owners, Washington Reclamation District. Homer Lee, one of the Trustees of the Washington Reclamation District, located in Yolo and Sacramento Counties, states that plans for permanent levee improvements in the Washington District have been submitted to the State Reclamation Board for approval. Two different schemes are provided. Full particulars can be secured by addressing the State Reclamation Board, Nicholas Bldg., Sacramento.

**SANTA BARBARA, SANTA BARBARA CO., CAL.**—Sanitary sewer system. Cost not stated. Engineer, City Engineer George P. Robinson, Santa Barbara. Owners, City of Santa Barbara. City Engineer George P. Robinson of Santa Barbara is preparing preliminary plans for a new and adequate sewer system for Santa Barbara. The present system, with its outfall into the ocean, was not built to meet the rapid growth of the city, and a new and much more complete system is an absolute necessity.

**COALINGA TO MARTINEZ, CAL.**—Pipe line. Cost not stated. Engineer's name not given. Owners, The Valley Pipe Line Co. The pipe line from the Coalinga oil fields to Martinez will be built by the Valley Pipe Line Co., a Dutch-Shell subsidiary. The company has applied to the Railroad Commission to issue \$5,318,400 in common stock.

The San Mateo County Board of Supervisors awarded road contracts in San Mateo County as follows: Woodruff Creek to San Gregario, grading, awarded to Blanchard & Brown, 660 Market street, S. F., for \$22,494.50, and Halfmoon Bay to Tunitas, grading and macadamizing, awarded to James Willison, \$54,131.

**PASADENA, LOS ANGELES CO., CAL.**—Store and office, 2 story and base. Class C construction, \$6,000. Architects, Buchanan & Brockway, Pasadena. Owners, O. L. and F. B. Braddock. Contractor, O. C. Williams, Pasadena. Contract price, \$6,000.

## TEARS AND BLOOD.

If you have an immigrant girl in your kitchen—and most of the girls in our kitchens are immigrants—you are likely to find her crying over some letter from Europe announcing that her brother, sweetheart or father has been called to the war. Multiply the sorrow of that girl by thirty or forty millions, and you have some measure of the outpouring of women's tears in Europe at this moment. Measure the ignorance of that girl of the causes and purposes of the war against the equal ignorance of her mother and sisters in Europe and realize that this is the intellectual state of most of the population of Europe, and you will have some understanding of the meaningless mystery of the horror which is overwhelming the women of Europe. For a cause which they cannot know, and to a purpose which has no meaning to them, the men of their families have been called away to war, in unknown regions against an unknown foe, as a part of an incomprehensible catastrophe. There will be more tears shed in Europe than blood, and the tears will be the tears of women, mostly ignorant and helpless peasant women. —Fresno Republican.

It is this ability of kings to send men to war to glut a personal ambition, to sacrifice them on the altar of patriotism without their consent that the world deplores. If the war does nothing else than to depose the robber barons who work upon their own and other nations as belonging to a select few it will not have been in vain. Too long has this mediaeval oligarchy lined off the labors of the common people and sacrificed them for their own selfish ambition.

Egypt is adopting modern agricultural machinery after using the most primitive kinds for thousands of years.

Altogether Ohio has seventy-eight miles of concrete roads, 440 miles of brick roads, 12,000 of macadam and 15,600 of gravel.

Flumes of the V type are extensively used in California, transporting annually about 110,000,000 feet of lumber from the mountains to the valley. Some of those in the southern Sierras are sixty miles in length. Such flumes are said to cost between \$4,000 and \$5,000 per mile.

Hoboken, N. J., has a new lacemaking plant costing \$250,000.

# PROPOSALS

## Bids Wanted

### PROPOSALS FOR CANAL SUPPLIES.

**PANAMA CIRCULAR 867-A**—Proposals for Lumber.—Sealed proposals will be received at the office of the general purchasing officer, the Panama Canal, Washington, D. C., until **September 18, 1914**, at which time they will be opened in public for furnishing lumber. Blanks and general information relating to this circular (No. 867-A) may be obtained from this office or the office of the assistant purchasing agent, 1086 North Point street, San Francisco, Cal.; also from the U. S. engineer offices in the following cities: Seattle, Wash.; Los Angeles, Cal.; F. C. BOGGS, major, corps of engineers, U. S. army, general purchasing officer.

### PROPOSALS.

**SEALED BIDS FOR SUPPLYING** machinery for the Polytechnic High School will be received in open session of the Board of Education to be held at **2:30 p. m. Tuesday, September 22nd, 1914**.

Specifications may be had on application to the undersigned.

M. R. NORRIS,  
Secretary Board of Education.

### STATE OF CALIFORNIA.

### DEPARTMENT OF ENGINEERING. CALIFORNIA HIGHWAY COMMISSION

#### NOTICE TO CONTRACTORS.

**SEALED PROPOSALS** will be received at the office of the California Highway Commission, 515 Forum Building, Sacramento, Cal., until the times hereinafter noted, at which times they will be publicly opened and read, for construction in accordance with the specifications therefor, to which special reference is made, portions of State Highway as follows:

**Unit 2—Oroville, N. M., October 5, 1914.**

Humboldt County from Shively to Jordan Creek (I-Hum-1-D), about 3.7 miles in length, to be graded.

Humboldt County from Lolo to Beatrice (I-Hum-1-G), about 4.3 miles in length, to be graded.

Alameda County from the easterly county boundary to Altamont (IV-Ala-5-A), about 5.9 miles in length, to be built of Portland cement concrete.

San Luis Obispo County from San Luis Obispo Creek to Cuesta (V-S. L. O-2-D), about 3.6 miles in length, to be graded.

Santa Barbara County from Zaca Station to Los Alamos (V-S. B-2-C), about 8.7 miles in length, to be built of Portland cement concrete.

Imperial County from Myers Creek to Coyote Wells (VII-imp-12-A), about 6.0 miles in length, to be built of Portland cement concrete.

**Unit 4—Oroville, N. M., October 5, 1914.**

San Luis Obispo County from Marsadero Creek to Paso Robles (V-S. L. O-2-B), about 10.0 miles in length to be built of Portland cement concrete.

Sacramento County from Folsom to the easterly county boundary (II-Sac-11-A), about 6.8 miles in length, to be built of Portland cement concrete.

Solano County from Vacaville to Batavia (III-Sol-7-D), about 8.2 miles in length, to be built of Portland cement concrete.

Santa Barbara County from Divide to Orcutt (V-S. B-2-A), about 3.6 miles in length, to be built of Portland cement concrete.

Santa Barbara County from Stony Creek to El Capitlan Creek (V-S. B-2-G & I), about 10.2 miles in length, to be graded.

Plans may be seen, and forms of proposal, bonds, contract and specifications may be obtained at the said office, and they may be seen at the office of the Division Engineers at Los Angeles and San Francisco, and at the

office of the Division Engineer of the division in which the work is situated. The Division Engineers' offices are located at Whitts, Dunsmuir, Sacramento, San Francisco, San Luis obispo, Fresno, and Los Angeles.

No bid will be received unless it is made on a blank form furnished by the Commission. The special attention of prospective bidders is called to the "Notice to Contractors" annexed to the blank form of proposal, for full directions as to bidding, quantities of work to be done, etc.

The Department of Engineering reserves the right to reject any or all bids or to accept the bid deemed for the best interests of the State.

CHARLES D. BLANEY,  
NEWELL D. DARLINGTON,  
CHAIRMAN & SECRETARY,  
California Highway Commission.  
AUSTIN B. FLETCHER,  
Highway Engineer.

CHARLES C. CARLETON,  
Acting Secretary.

Dated Sept. 2, 1914.

\*Sept. 10-17-24, Oct. 1

#### NOTICE TO CONTRACTORS.

### PANAMA-PACIFIC INTERNATIONAL EXPOSITION.

**SEALED PROPOSALS** will be received by the Buildings and Grounds Committee of the Panama-Pacific International Exposition Company at Room 213, in the Service Building, Fillmore and Chestnut Streets, San Francisco, at **9:00 A. M., Thursday, September 17th, 1914, for Waste Concourse, South Gardens**. In accordance with plans and specifications on file in the office of the Director of Works.

The right is reserved to reject any and all bids and to waive technical defects if in the interest of the Exposition Company.

Plans and specifications for the work may be obtained from the Director of Works, Room 207, Service Building, Fillmore and Chestnut Streets, San Francisco. Any other information may be had from the Chief of Construction, Room 211, Service Building.

### PROPOSALS.

**OFFICE OF THE BOARD OF PUBLIC WORKS** of the City and County of San Francisco.

Sealed proposals will be received at this office between the hours of **2 o'clock p. m. and 3 o'clock p. m., on Wednesday, the 30th day of September, 1914**, for doing the following public work, including the furnishing of the necessary labor and materials therefor to wit:

The construction of a tunnel with approaches and appurtenances thereto under the elevated roadway known as the Twin Peaks Ridge in the City and County of San Francisco.

Progressive payments will be made. Said work must be done in accordance with the plans and specifications on file in the office of the Board of Public Works, to which reference is hereby made, and must be commenced within five (5) calendar days and completed within six hundred (600) calendar days from the date of the contract to be made and entered into therefor.

The amount of bond for faithful performance of contract has been fixed at \$500,000.00.

All proposals offered must be accompanied by check certified by a responsible bank, payable to the order of the Clerk of the Supervisors, for an amount not less than ten per cent of the aggregate of the proposal.

Printed proposal forms will be furnished gratuitously upon application at the office of the City Engineer, and all proposals must be made upon such forms.

The Board of Public Works reserves the right to reject any and all bids. By order of the Board of Public Works, F. J. CHITCHILL, Secretary.

### PROPOSALS FOR LIGHT FIXTURES.

**LIGHT FIXTURES**—Treasury Department, Office of the Supervising Architect, Washington, D. C.—Sealed proposals will be received here until **September 21, 1914**, for installing light fixtures in the U. S. public buildings at Minneapolis, Minn.; Muskogee, Okla.; Boston, Mass.; and San Francisco, Cal. For further information address the supervising architect.

### PROPOSALS FOR CANAL SUPPLIES.

**PANAMA CIRCULAR 866**—Proposals for Furnishing and Erecting Structural Steel for the Cristobal Coaling Plant Wharf Structures.—Sealed proposals will be received at the office of the general purchasing officer, the Panama Canal, Washington, D. C., until **10:30 a. m. September 24, 1914**, at which time they will be opened in public, for furnishing the above-mentioned articles. Blanks and general information relating to this circular (No. 866) may be obtained from this office or the office of the assistant purchasing agents, 1086 North Point street, San Francisco, Cal.; also from the U. S. engineer offices in the following cities: Seattle, Wash.; Los Angeles, Cal.; F. C. BOGGS, major, corps of engineers, U. S. army, general purchasing officer.

#### NOTICE TO CONTRACTORS.

**SEALED bids** will be received by W. F. McClure, State Engineer, Capitol Building, Sacramento, California, **up to and including 12 o'clock, noon, Monday, September 21, 1914**, said bids then and there to be publicly opened and read for furnishing all plant, materials, and labor, and doing the work required for the construction and erection of a building to be known as the Chambers Cottage, Napa State Hospital, Napa, California, in accordance with the plans and specifications therefor, copies of which may be obtained on application to the State Department of Engineering, Sacramento, California.

Such bids will be received for the entire work, and must be submitted on forms prepared and furnished by the State Department of Engineering. Cash, a bidder's bond, or a certified check in the sum of ten per centum (10%) of the amount of bid must accompany each bid.

A deposit of Ten (\$10.00) dollars will be required on plans and specifications, the deposit to be retained by the State Department of Engineering, in accordance with the return of the plans and specifications to the State Department of Engineering, Sacramento, California, in good condition.

The State Department reserves the right to reject any and all bids and to waive any informality in any bid received.

All bids must be addressed to W. F. McClure, State Engineer, Sacramento, California, and be duly marked on the envelope, "Proposal for Chambers Cottage Napa State Hospital, Napa, California."

(Signed) W. F. McCLURE,

State Engineer. (\*)

Aug. 26-27, Sept. 1-10.

### PROPOSALS FOR WHARF AND SHED

**WHARF AND SHED**—Sealed proposals, indorsed "Proposals for Wharf and Wharf shed" will be received at the Bureau of yards and docks, Navy Department, Washington, D. C., until **11 o'clock a. m. September 26, 1914**, and then and there publicly opened for a wharf and wharf shed at the Navy Torpedo station, Puget Sound, Wash. Plans and specifications may be obtained on application to the bureau or

W. R. BRODE, Pres. LOUIS R. HOLM, Sec. R. J. BRODE, Vice-Pres.

## BRODE IRON WORKS

Established 1886—Incorporated 1913  
Tel. Kearny 2464.

Fabricators and Contractors of Structural Steel and Ornamental Iron Work

Office & Works: 31-37 Hawthorne St., bet. Howard & Folsom Sts., San Francisco, Cal.

to the commandant of the navy yard, Bremerton, Wash. H. R. STANFORD, chief of bureau.

The State Department of Engineering reserves the right to reject any and all bids and to waive any informality in any bid received.

All bids must be addressed to W. F. McClure, State Engineer, Sacramento, California, and plainly marked on the envelope: "Proposals for 'Hospital Cottage' and 'Typical Cottages Nos. 1 and 2,' California School for Girls, Ventura, California."

(Signed) W. F. McClure, (\*) State Engineer.

#### CONSTRUCTION WORK ABROAD.

##### CANADA.

[Consul Abraham E. Smith, Victoria, British Columbia.]

##### General Construction Work.

The new \$80,000 city jail at Victoria is to be constructed at once, provision being made for an additional story; J. C. M. Keith, architect. Architect T. D. Sedger has closed contract for erection of a \$50,000 business block to contain 16 store rooms. Other proposed new work includes a \$150,000 hospital, L. P. Rixford, architect; \$50,000 curling rink, and \$40,000 courthouse at Duncan, architects, Coates & Fleet; \$18,000 apartment, H. T. Whitehead, architect; and \$300,000 bridge, city engineer, architect. The \$50,000 Patricia Bay wharf contract was awarded to Mr. Doe, office Sayward Block, Victoria.

Buildings under construction include a \$250,000 drill hall and \$13,500 apartment house by Paritt Bros., contractors; \$100,000 department store, British Columbia Construction Co.; \$17,490, \$16,500, and \$50,000 school buildings, Loney Bros., contractors; \$10,000 theatre and \$25,000 brick stores, Dunsdale & Malcolm, contractors; \$175,000 post office, McAlpine-Robertson Co., contractors; \$52,000 church, Stevens Bros., contractors; \$25,000 residence, P. McKechnie, contractors; \$115,000 residence, William Drysdale, contractor;

\$20,000 residence, C. C. Johnson, contractor; \$12,000 residence, W. A. Gleason, contractor; \$20,000 residence, Grayson & Son, contractors; \$30,000 building, T. H. Brown, contractor, CHINA.

[The Far Eastern Review.]

#### A Belt Railway for Peking—Tramways.

The Chinese Ministry of Communications has at last arrived at an arrangement with the Peking city authorities whereby they will be able to connect the terminals of the Peking-Kalgan, the Peking-Mukden, the Peking-Tungchow, and the Peking-Hankow Railways. Later a Peking Central Railway Station will be built. The line will be about 7 miles in length and will hug the wall the whole way.

To facilitate the handling of traffic in and out of the city two tunnels will be bored through the wall on either side of the existing arch forming the Chien-men. One will be utilized for the proposed tramways, while the other will be used for passenger traffic.

#### New Bank Buildings.

The development of the foreign banking interests in China is necessitating the erection of adequate foreign buildings adapted to banking purposes in the capital for those institutions which have not yet accommodated themselves in this respect and improved premises elsewhere.

At present time both the Chartered Bank of India, China, and Australia and the Banque de l'Indo-Chine are carrying on active operations in the erection of suitable modern premises at Peking, and it is reported that the Banque Industrielle de Chine and certain Chinese banks are arranging for the erection of buildings on the ground at present occupied by the Ministry of Finance, near the Legation Quarter.

The Hongkong & Shanghai Banking Corporation, the Russo-Asiatic Bank, and the Yokohama Specie Bank have been in their own premises for some years, but others doing business in Peking have been forced to do the best they could with any houses available. Business is growing so fast that makeshift premises can no longer be tolerated, and we would not be surprised to see the International Bank, the Bank Sino-Belge, and others soon following the steps being taken by the Chartered and French banks.

The Banque de l'Indo-Chine is erecting its new premises on the site which it has always occupied, in Legation Street, opposite the Russian Legation, while the chartered Bank of India, China, and Australia has purchased a site at the corner of Legation Street, opposite the entrance of the American Legation.

#### New Treasury Building. Concrete Work at Port.

The Minister of Finance will now definitely have a new building at Peking for his offices. The construction of the building is to be undertaken by a German engineer and architect, who guarantees to complete the work at a cost of \$100,000.

The Chinese Maritime Customs Administration has decided to construct at Tientsin a bund of reinforced concrete in front of the customs house similar to that of the French bund. This improvement will have about 200 feet frontage, and the contract has been secured by the Syndikat Industriel et Commercial.

# ADVANCE NEWS

Classified according to Location

## SAN FRANCISCO.

**APARTMENT HOUSE**—4 story and base, reinforced concrete, \$30,000. San Francisco. Architect, Charles J. Rousseau, Monadnock Bldg., S. F. Owner, John Kincaannon. The building will be erected on the south side of Post street east of Van Ness avenue, and will have a frontage of 27½ feet by a depth of 120 feet. There will be a total of twenty suites arranged in apartments of two and three rooms. Interior will be finished in pine throughout, except in the lobby and main halls, which will be finished in blue gum. Hardwood floors will be used throughout. Plans provide for steam heat, an automatic elevator, hot water supply and portable vacuum cleaners. An oil burning equipment will be installed. All apartments will have wall beds and private bath rooms. Tile floors and wainscot will be used in the baths. Exterior of the building will be faced with pressed brick. Entrance will be finished in marble. Plans are complete and segregated figures are being taken.

**PRIVATE EXHIBIT BUILDING**—1 story, frame and plaster, \$10,000. San Francisco. Architects, Ward & Blohm, Alaska Commercial Bldg., S. F. Owners, M. A. Gunst Co. The building will be designed to contain an extensive display of the company's methods, including an interesting exhibit of the tobacco industry from its growing to completed product. Interior will be finished in pine with ornamental plaster. Exterior will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

**FLATS**—2 story and base, frame, \$5,000. San Francisco. Architect, none. Owner, P. D. Taylor, 1921 Oak street, S. F. The building will be erected on the south side of Lake street west of 16th avenue, and has been designed to contain two modern flats of five rooms each. Interiors will be finished in pine and redwood. Hardwood floors will be used in the principal rooms. There will be open fire places and tile mantels. Bath rooms will have tile wainscot. Exterior of the building will be covered with rustic. Plans are complete and in the hands of the owner who will do the work by Day Labor. Materials are now being purchased.

**FLAT ALTERATIONS**—2 story, frame, \$2,500. San Francisco. Architect, none. Owner, Mrs. L. A. Collins, 1032 Hyde street, S. F. The work will consist of raising and adding a story to the present two story building. The ground floor will be occupied by stores. Included in the work will be new interior trim, plumbing, electric work, plastering and painting, open fire places and tile mantels will be used. Exterior will be covered with rustic. Plans are complete and work will be done by Day Labor.

**BACHELORES' QUARTERS**—3 story and base, brick. Cost not stated. San Francisco. Architect, Constructing Quartermaster's office, Fort Mason.

Owners, United States Government. Bids opened for this work show Frank M. Garden Co., 251 Kearny street, low on the entire work at \$21,175. A contract has not been awarded. A complete list of figures showing all sub-figures appears under the heading of San Francisco in this issue.

**RESIDENCE**—2 story and base, frame, \$5,000. San Francisco. Architect, Edward E. Young, 251 Kearny street, S. F. Owner, Thomas Seoble, 263 11th avenue, S. F. The dwelling will be erected on the east side of Jordan avenue south of Euclid, and has been designed for a seven-room house with bath. Interior will be finished in pine and hardwood with hardwood floors in the living room, dining room and reception hall. There will be furnace heat and open fire places. Mantels will be of tile or brick. Bath room will be finished in tile. An automatic water heater will be installed. Exterior of the dwelling will be covered with rustic and cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor. Materials are now being purchased.

**RESIDENCE**—2 story and base, frame, \$3,000. San Francisco. Architect, none. Owner, F. Nelson, 30 Presidio Terrace, S. F. The dwelling will be erected on the east side of 10th avenue north of Fulton, and has been designed for a six-room house with bath. Interior finish will be of pine and redwood. Hardwood floors will be used in the principal rooms. There will be a large open fire place in the living room. Mantel will be of tile. Bath room and kitchen will have tile wainscot. Exterior of the house will be covered with rustic and cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor.

**RESIDENCE**—2 story and base, frame, \$10,000. San Francisco. Architect, Milton Lichtenstein, 111 Ellis street, S. F. Owner, Rose Hoffman. The dwelling will be erected on Clay street near Laurel, and has been designed to contain eight rooms, two baths and sleeping porch. A garage will be erected on the rear of the lot. Interior of the dwelling will be finished in pine and hardwoods. Hardwood floors will be used in the principal rooms. There will be a central heating system and open fire places. Mantels will be of tile or brick. Bath rooms will be finished in tile. An automatic water heater will be installed. Exterior of the house and garage will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

**MUSIC CONCOURSE**—Frame construction. Cost not stated. San Francisco. Engineer, Director of Works, Service Bldg., S. F. Owners, Panama-Pacific International Exposition Co. Plans for constructing a music concourse have been completed and received the approval of the building

committee. Bids are now being taken and will be opened on September 17th. Plans and specifications can be secured on application to room 267, Service Bldg. An official proposal appears in another column of this issue.

**CONCESSION BUILDING**—Frame and plaster. Cost not stated. San Francisco. Architect, Director of Works, Service Bldg., S. F. Owners, Panama-Pacific International Exposition. Plans are complete for a number of concession buildings to be erected on the Avenue of Palms in the Exposition grounds. Bids for this work will be opened by the Buildings and Grounds Committee on September 22nd. Plans and specifications can be secured from the office of the Director of Works, Service Bldg. An official proposal appears in another column of this issue.

**APARTMENT HOUSE**—6 story and base, steel and brick, \$100,000. San Francisco. Architect, C. O. Clausen, Hearst Bldg., S. F. Owner, George Bennett. The building will be erected on the south side of Eddy street near Leavenworth, having a frontage of 59 feet and a depth of 137½ feet. There will be a complete steel frame with reinforced brick walls. Plans provide for a total of 60 suites of two and three rooms. Interior will be finished in pine, blue gum and Circassian walnut with hardwood floors in the principal rooms. There will be steam heat, elevator service, electric dumb waiters, a vacuum cleaning system and hot water supply. All suites will have wall beds. Bath rooms will have tile floors and wainscot. Entrance will be finished in marble and tile. Exterior of the building will be faced with pressed brick, granite and Colusa sandstone. Plans are complete and segregated figures are being taken.

**APARTMENT HOUSE**—3 story and base, frame, \$20,000. San Francisco. Architect, Joseph Cahen, 45 Kearny street, S. F. Owners, Joseph Cahen and I. Rosenberg. The building will be erected on the south side of Sacramento street west of Scott, and has been designed to contain twelve suites of three and four rooms. Interior will be finished in pine and hardwood veneer. Oak floors will be used in the principal rooms. Each apartment will have a large open air sleeping porch. Plans provide for steam heat and a hot water system. All suites will have wall beds and private bath rooms. Tile wainscot and composition floors will be used in the bath rooms. Entrance will be finished in marble and tile. Exterior of the building will be covered with cement plaster on metal lath. Plans are complete and segregated figures will be called for at once.

**APARTMENT HOUSE**—3 story and base, frame, \$17,000. San Francisco. Architect, C. O. Clausen, Hearst Bldg., S. F. Owner, Dr. J. J. Aherny. The building will be erected on 11th avenue near Lincoln Way in the Sunset District, and will cover a ground area of 32 by 100 feet. There will be twelve

suites of three and four rooms. Interior will be finished in pine throughout. Some hardwood floors will be used. Plans provide for steam heat and a hot water system. Bath rooms will have tile wainscot and composition floors. Exterior of the building will be covered with cement plaster on metal lath. Plans are now being prepared.

**PIERS**—2, creosoted pile and concrete. Cost not stated. San Francisco. Engineer, Assistant State Engineer Newman, Ferry Bldg., S. F. Owners, State of California. The State Board of Harbor Commissioners have asked the State Board of Control to publish an official proposal calling for figures for the construction of two new piers on the San Francisco water front. Piers Nos. 16 and 18 are to be constructed at once, and will be located between Mission and Howard streets. Creosoted piles and concrete bulkheads will be used. Each pier will be 200 feet wide and 500 feet long.

Plans for the subpost office to be erected by the State Harbor Commission and leased to the Government have also been approved and will be advertised at once. This building will be erected south of the present Union Ferry Building.

**FLATS**—2 story and base, frame, \$6,500. San Francisco. Architect, C. O. Clausen, Hearst Bldg., S. F. Owner, Adam Becker. The building will be erected on Guerrero street near Cumberland, and has been designed to contain two modern flats of five rooms each besides a private garage in the basement. Interior of the flats will be finished in pine with some hardwood floors. There will be open fire places and tile mantels. Tile wainscot will be used in the bath rooms. Wall beds are also specified. Exterior of the building will be covered with shiplap. Plans are now being prepared.

**RESIDENCE**—2 story and base, frame, \$3,000. San Francisco. Architect, none. Owner, Thomas Hamill, 268 25th avenue, S. F. The dwelling will be erected on 20th avenue south of Anza, and has been designed for a six-room house with bath. Interior will be finished in pine and redwood. Hardwood floors will be used in the principal rooms. There will be open fire place and tile or brick mantel. Exterior of the dwelling will be covered with rustic. Plans are complete and the work will be done by Day Labor. Materials are being purchased.

**STORE AND OFFICE ALTERATION**—Cost not stated. San Francisco. Architect, J. R. Miller, Lick Bldg., S. F. Owner, Claus Spreckels. Plans are being prepared for extensive alterations to the first and second floors of the old Call Building at the corner of Third and Market streets. The work will include new interior finish, store fixtures, electric work, plastering, painting and plumbing. Bids will be taken shortly.

**APARTMENT HOUSES** 2, 3 story and base, frame, \$10,000 each. San Francisco. Architect, Edward E. Young, 251 Kearny street, S. F. Owner, Herman Hozrefe, 1011 Kearny street, S. F. These two buildings will be erected on Hyde street north of Pine, and each has been designed to contain six apartments of three rooms each. Interiors will be finished in pine and redwood with some chip panels. Hardwood floors will be used in

the principal rooms. There will be a hot water supply and open fire places. Mantels will be of tile. Bath rooms will be finished in tile. Wall beds are specified. Exterior of the buildings will be covered with cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor. Materials are now being purchased.

**RESIDENCE**—2 story and base, brick and frame, \$7,000. San Francisco. Architect, Joseph A. Leonard, 85 Cerritos avenue, S. F. Owners, Urban Realty Co. for Edward L. Nolan. The dwelling will be erected on Serritos avenue west of Ocean avenue, and has been designed for an eight-room house with two baths and sleeping porch. Interior will be finished in pine, redwood and hardwood with white enamel in the bed chambers. There will be hardwood floors in the principal rooms. Plans provide for furnace heat and open fire places. Mantels will be of tile or brick. An automatic water heater will be installed. Bath rooms will be finished in tile. Exterior of the house will be covered with wire-cut brick veneer. Plans are complete and the work will be done by Day Labor under the direction of the architect. Materials are now being purchased.

## Additional Bids On Bachelors' Quarters.

Bids for Plumbing, Heating, Electric Work and Oil Burning Equipment On New Quarters.

## OAKLAND AND ALAMEDA COUNTY.

**BRIDGE REPAIRS**—Pile and steel construction, \$30,000. Oakland, Cal. Engineer, County Surveyor P. A. Haviland. Oakland. Owners, Alameda

County. County Surveyor E. A. Haviland has been instructed to prepare plans for repairs to three bridges which span the Oakland Estuary, connecting Oakland and Alameda. The work is estimated to cost \$20,000. Bids will be called for as soon as plans and specifications can be completed.

### SAN JOSE AND THE SANTA CLARA VALLEY.

**BUNGALOW**—1 story and base, frame, \$3,000. San Jose, Santa Clara Co., Cal. Architect, none. Owner, L. Wolf, 131 Coe avenue, San Jose. The dwelling will be erected on Hathorn Way, and has been designed for a six-room house. Interior will be finished in pine and redwood with hardwood floors in the living room and dining room. There will be furnace heat and open fire places. Mantels will be of tile. The wainscot will be used in the bath room and kitchen. Exterior of the house will be covered with rustic and cement plaster. Plans are complete and the work will be done by Day Labor.

### MARIN, CONTRA COSTA AND SONOMA COUNTIES.

**PIPE LINE**—Cost not stated. Coal-ing to Martinez. Engineer's name not given. Owners, The Valley Pipe Line Co. The pipe line from Coal-ing oil fields to Martinez will be built by the Valley Pipe Line Co., a Dutch-Shell subsidiary. The company has applied to the Railroad Commission to issue \$5,318,400 in common stock.

**BRIDGE**—Steel and concrete. Cost not stated. Rio Vista, Solano Co., Cal. Engineer's name not given. Owners, Solano and Sacramento Counties. Plans and specifications for the proposed bridge over Chipps Island at Rio Vista have been received at Washington, D. C. It is stated that the plans will be changed only in as much as the draw will be moved over nearer the Rio Vista side. Final action will be taken shortly by the Washington authorities.

**ROUNDHOUSE AND TRACK WORK**—Reinforced concrete. Cost not stated. Sausalito, Marin Co., Cal. Engineer, Engineering Department Northwestern Pacific, Phelan Bldg., S. F. Owners, Northwestern Pacific Railroad Co. Plans are being prepared for filling by dredger the big mud flats in Sausalito adjoining Mason Malt Distillery and constructing thereon a large reinforced concrete roundhouse. Additional switch yards and other track-work will also be constructed. The roundhouse will be of fire-proof construction. Exterior will be faced with cement plaster. Plans are now being prepared.

**WATER SYSTEM**—Cost not stated. San Rafael, Marin Co., Cal. Engineer's name not given. Owners, Marin Water and Power Co., San Rafael. A. W. Foster, of the Marin Water and Power Co., has gone on record as wishing to build the proposed dam at Tamalpais, which is to furnish practically all of Marin County with a water supply. Considerable opposition to the Tamalpais dam site exists among members of the "New Water District Association," who favor what is known as the Alpine site on Lagunitas Creek. If

Mr. Foster's proposition is accepted by the district, provision is made whereby the district may, at any future time, take over the Tamalpais dam on payment of its actual cost of construction.

**STREET PAVING**—Cost not stated. Vallejo, Solano Co., Cal. Engineer, City Engineer, Vallejo. Owners, City of Vallejo. Plans and specifications have been completed and figures will be opened on September 17th for paving Georgia street. The work will require a four-inch concrete base with a two-inch bituminous top, concrete curbs and six-inch concrete gutters. Plans and specifications can be secured from the City Engineer.

**BRIDGES**—Steel construction. Cost not stated. Richmond, Contra Costa Co., Cal. Engineer, County Surveyor, Martinez. Owners, Contra Costa County. Plans prepared by the County Surveyor for three road bridges to be erected along the line of the new State Highway in Contra Costa County have been completed and the county will advertise for bids within a few days. All three bridges are to be of steel construction.

### FRESNO, MODESTO STANISLAUS AND CENTRAL CALIFORNIA.

**SCHOOL HEATING AND VENTILATING**—Cost not stated. Bakersfield, Kern Co., Cal. Architect, Orville L. Clark, Brower Bldg., Bakersfield. Owners, Bakersfield School District. Bids will be opened on September 21st for furnishing and installing a heating and ventilating system in the Emerson school. Plans and specifications can be secured from the architect.

**SCHOOL TOILETS AND PLUMBING**—Cost not stated. Bakersfield, Kern Co., Cal. Architect, Orville L. Clark, Brower Bldg., Bakersfield. Owners, Bakersfield School District. Plans for constructing toilets and furnishing and installing plumbing equipment in same have been completed. The buildings in which plumbing is to be installed are as follows: Emerson, Bryant, Hawthorne, Lincoln, Washington and Tenth Street schools. Bids are now being taken and will be opened by the Board of Education on September 21st. Plans and specifications can be secured from the architect.

**RESIDENCE**—2 story and base, frame, \$12,000. Fresno, Fresno Co., Cal. Architect, Eugene Mathewson, Forsythe Bldg., Fresno. Owner, O. J. Woodward. The dwelling will be erected on Mariposa street and has been designed to contain ten rooms, three baths and sleeping porch. Interior will be finished in pine and hardwood veneer. Hardwood floors will be used in the principal rooms. There will be furnace heat and open fire places. Mantels will be of tile. Bath rooms will be finished in tile. Automatic water heaters will be installed. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

**SCHOOL**—1 story, frame. Cost not stated. Fowler, Fresno Co., Cal. Architect, C. K. Kirby, Jr., Fresno. Owners, Magnolia School District. The building has been designed for a district school and will be erected about two miles east of Fowler. There will be two class rooms. Interior will be finished in pine throughout. Stoves

## Nearest to Everything

will be used for heating. Exterior of the building will be covered with cement plaster on metal lath. Plans are complete and out for figures. Bids will be opened on September 19th.

### SACRAMENTO, STOCKTON AND NORTHERN CALIFORNIA.

**JAIL CELLS**—Steel construction. Cost not stated. Alturas, Modoc Co., Cal. Architect, De Longchamps, Reno, Nev. Owners, Modoc County. The Board of Supervisors at Alturas will open bids on September 21st for furnishing and installing five steel cells in the new county jail building. Bids will also be considered for removing two old steel cells and placing them in the new building. Plans and specifications can be secured from the County Clerk.

**POST OFFICE**—1 and 2 story, semi-fireproof construction, \$75,000. Willows, Glenn Co., Cal. Architect Supervising Architect Oscar Wendroth, Washington, D. C. Owners, United States Government. R. A. McNally, representing Congressman Kent, is the authority for the statement that bids will be called for within the next three weeks for constructing the new post office at Willows. An appropriation of \$75,000 is available for this work.

**APARTMENT HOUSE**—2 story and base, frame, \$5,000. Sacramento, Cal. Architect, none. Owner, William R. Saunders, 2819 J street, Sacramento. The building will be erected on J street, and has been designed to contain four apartments of four rooms and bath. Interior finish will be of

pine and redwood. There will be wall beds and a hot water supply. Bath rooms will be finished in tile with composition floors. Exterior of the building will be covered with rustic and cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor.

**BRIDGE**—Reinforced concrete, \$125,000. Marysville, Yuba Co., Cal. Engineer, County Surveyor, Marysville. Owners, Yuba County. Nine sets of figures were opened by the Board of Supervisors for the construction of the D street bridge over the Yuba River. The lowest figure was received from the Clinton Fireproofing Co. of San Francisco at \$124,000. All bids were taken under advisement. A complete list of the bids opened will be found under the heading of Sacramento, Stockton and Northern California in this issue.

**BRIDGE**—Reinforced concrete, \$5,000. Mahle, Yuba Co., Cal. Engineer, County Engineer, Marysville. Owners, Yuba County. Jenkins & Holmes of Chico presented the lowest figure at \$4,770 for constructing the new bridge over the Honcut Creek near Mahle Crossing. Three bids in all were received. No contract has been awarded. A complete list of the bids will be found under the heading of Sacramento, Stockton and Northern California in this issue.

**CANNERY**—1 story, frame and galvanized iron, \$10,000. Chico, Butte Co., Cal. Architect, W. E. Coffman, Chico. Owners represented by O. E. Tracy, Main street, Chico. Complete working drawings for a large building designed for a modern cannery have been completed. The project is to be financed by a stock company promoted by O. E. Tracy, who is now endeavoring to raise \$25,000. Further mention will be made of the work shortly.

**BRIDGES AND CULVERTS**—Reinforced concrete. Cost not stated. Colusa, Colusa Co., Cal. Engineer, County Surveyor, Colusa. Owners, Colusa County. Plans have been completed for a number of reinforced concrete culverts and reinforced concrete bridges to be erected in Colusa County. Several of the bridges and culverts may be combined in one bid, but unit prices for each must be stated. There will be three bridges and in the neighborhood of seven culverts. Complete information relative to this work can be secured from the County Clerk at Colusa. Bids will be opened on September 22nd.

**STATE HIGHWAY WORK**—Cost not stated. California. Engineer, State Highway Commission, Forum Bldg., Sacramento. Owners, State of California. Bids will be opened on October 5th for highway work in the following counties: Humboldt County, grade, 3.7 miles; Humboldt County, grade, 4.3 miles; Alameda County, Portland concrete cement, 5.9 miles; San Luis Obispo County, grade, 3.6 miles; Santa Barbara County, Portland cement concrete, 7 miles; Imperial County, Portland cement concrete, 6 miles. At 3:30 p. m. San Luis Obispo County, Portland cement concrete, 10 miles; Sacramento County, Portland cement concrete, 6.5 miles; Solano County, Portland cement concrete, 8.2 miles; and Santa Barbara County, Portland cement concrete, 3.6 miles.

**PERMANENT LEVEE IMPROVEMENTS**—Cost not stated. Washington Reclamation District, Yolo and Sacramento Counties, Cal. Engineer's name not given. Owners, Washington Reclamation District. Homer Lee, one of the Trustees of the Washington Reclamation District, located in Yolo and Sacramento Counties, states that plans for permanent levee improvements in the Washington District have been submitted to the State Reclamation Board for approval. Two different schemes are provided. Full particulars can be secured by addressing the State Reclamation Board, Nicolaus Bldg., Sacramento.

**BUNGALOW**—1 story and base, frame, \$2,000. Sacramento, Cal. Architect, none. Owner, H. Goldman, 924 4th street, Sacramento. The dwelling has been designed for a six-room house with bath, and will be erected at the corner of West and 32nd avenue. Interior finish will be of pine and redwood with some hardwood floors. There will be an open fire place and tile mantel. Tile wainscot will be used in the bath room and kitchen. Exterior of the dwelling will be covered with rustic and cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor.

## Bids Opened For Marysville Bridge.

Big Concrete Structure Attracts Nine Bidders. Clinton Fireproofing Co. Low Men on Job.

Nine sets of figures were received by the Yuba County Board of Supervisors for constructing the D street bridge over the Yuba River at Marysville. The structure will be of the reinforced concrete type costing in the neighborhood of \$135,000. The Clinton Fireproofing Co. of San Francisco were low at \$134,000. All bids have been taken under advisement. Following is a complete list of the bids:

### D Street Bridge, Marysville.

Leach & De Camp, S. F.	\$211,700
Shattuck-Edinger Co., S. F.	187,500
Ross Constr. Co., Sacramento.	166,720
Van Sant-Houghton Co., S. F.	163,000
F. Rolandi, S. F.	155,000
Mathews Con. Co., Sacramento.	149,500
I. C. Evans, Marysville.	118,680
F. A. Koeltz, S. F.	138,895
Clinton Fireproofing Co., S. F.	134,000

Bids were also opened at the same meeting for construction of a smaller reinforced concrete bridge over the Honcut Creek near Mahle Crossing, between Yuba and Butte Counties. These figures were also taken under advisement. Figures ran as follows:

### Honcut Bridge.

F. D. Groh & Son, Marysville.	\$7,500
Chico Constr. Co., Chico.	4,770
Jenkins & Holmes, Chico.	3,873

## LOS ANGELES AND SOUTHERN CALIFORNIA.

**RESIDENCE**—2 story and base, cement plaster, \$25,000. Los Angeles, Cal. Architect, Joseph J. Blicke, Dodworth Bldg., Pasadena. Owner, Paul Harwood Mexican Petroleum Co., L. A. The dwelling will be erected in Wind-

sor Square and has been designed in the Spanish style. The dwelling will contain in the neighborhood of fourteen rooms, several baths and sleeping porch. Interior will be finished in pine and hardwood with white enamel in the chambers. Plans provide for furnace heat and open fire places. Mantels will be of tile. Bath rooms will be finished in tile. Automatic water heaters will be installed. Exterior of the dwelling will be covered with cement plaster on metal lath. A clay tile roof will be used. Plans are now being prepared.

**SCHOOL**—2 story and base, hollow tile, \$43,000. Holtville, Imperial Co., Cal. Architects, Allison & Allison, Hibernian Bldg., L. A. Owners, Holtville School District. The building will cover an area of 61 by 152 feet, and has been designed to contain twelve class rooms, an assembly hall and principal's office. Interior will be finished in pine with some maple floors. There will be a central heating system and modern school plumbing. Exterior of the building will be faced with cement plaster. Plans are complete and figures are being taken. Bids will be opened on September 24th. Plans and specifications can be secured from the architects.

**SCHOOL GROUP**—1 and 2 story, Class C construction, \$90,000. Alhambra, Los Angeles Co., Cal. Architect, Norman F. Marsh, Broadway Central Bldg., L. A. Owners, Alhambra High School District. The buildings will consist of the Mechanics, Physical, Education and Science Buildings, and will be erected on the site of the present building. Separate bids will be received on the general contract, plumbing, electric wiring, painting, heating and ventilating and program clocks. The buildings will be of the Class C type with concrete foundations, blue brick exterior facing, composition roofing, frame interior construction, pine trim, maple floors, toilets, lavatories, shower baths, lockers, etc. Plans are complete and figures are being taken. Bids will be opened on September 29th. Plans and specifications can be secured from the architect.

**SANITARY SEWER SYSTEM**—Cost not stated. Santa Barbara, Santa Barbara Co., Cal. Engineer, City Engineer George P. Robinson, Santa Barbara. Owners, City of Santa Barbara. City Engineer George P. Robinson of Santa Barbara is preparing the preliminary plans for a new and adequate sewer system for Santa Barbara. The present system, with its outfall into the ocean, was not built to meet the rapid growth of the city, and a new and much more complete system is an absolute necessity.

**EMPLOYEES' QUARTERS AND STABLES**—Frame and plaster, \$50,000. Beverly Hills, Los Angeles Co., Cal. Architect, W. J. Dodd, Marsh-Strong Bldg., L. A. Owner, J. M. Panziger. The buildings will be part one and part two story structures with exteriors covered with cement plaster on metal lath. Clay tile roofs will be used. Besides the quarters there will be buildings for the blooded stock, cow barns and kennels. Interiors will be finished in pine throughout. In the employees' quarters several baths will be installed. Plans are now being prepared.

**SCHOOL**—1 story and base, hollow tile, \$10,000. Hawthorne, Los Angeles Co., Cal. Architect, W. C. Pencil, Baker-Detwiler Bldg., L. A. Owners, Hawthorne School District. The building will contain four class rooms and a large auditorium designed to seat 500 people. Interior will be finished in pine with hardwood floors in the class rooms. There will be a central heating system. Modern school plumbing will be installed. Exterior of the building will be faced with cement plaster. Plans are complete and bids will be called as soon as bonds can be voted.

## SEATTLE AND WASHINGTON.

**SUBPOST OFFICE**—2 story and base, mill construction, \$20,000. Seattle, Wash. Architects, Webster & Ford, Lyon Bldg., Seattle. Owners, Great Northern Railroad Co. A new building will be erected by the railroad company and leased to the Government. The new building will be built on the site of the present subpost office adjoining the Great Northern Co.'s main passenger depot in Seattle. Construction will be of the slow burning type. The building will cover an area of 80 by 120 feet. Exterior will be faced with pressed brick. Plans are complete and in the hands of the railroad company who are now taking figures on the work.

**LODGE HALL**—4 story and base, reinforced concrete, \$100,000. Tacoma, Wash. Architect, E. F. Champney, Hay Bldg., Seattle. Owners, Tacoma Elks' Hall Association. The building will cover a large ground area and has been designed for a fireproof structure. There will be stores on the first floor. Upper floors will be arranged for lodge rooms, offices and living rooms for the members. Interior will be handsomely finished in pine and hardwoods. A maple floor will be used in the ball room. Plans provide for steam heat, hot water system, vacuum cleaning and elevator service. Marble and tile will be used extensively. Exterior of the building will be faced with terra cotta. Plans are now being prepared.

## Contracts Awarded.

**APARTMENT HOUSE ALTERATION**—Frame construction, \$8,000. San Francisco. Architects, O'Brien Bros., Clunie Bldg., S. E. Owner's name not given. Contractors, Robert Dewar & Son, 180 Jessie street, S. E. Contract price, \$8,000.

**FLATS AND STORE**—3 story and base, frame, \$6,000. San Francisco. Architect, C. O. Clausen, Hearst Bldg., S. E. Owner, C. A. Spillane. Contractors, Hansen & Borman, S. E. Contract price, \$6,000.

**ROAD CONSTRUCTION**—Cost not stated. Redwood City, San Mateo Co., Cal. Engineer, County Surveyor, Redwood City, Owners, San Mateo County.

The San Mateo County Board of Supervisors awarded road contracts in San Mateo County as follows: Woodruff Creek to San Gregorio, grading, 194.50, and Halfmoon Bay to Tunitas, grading and macadamizing, awarded to James Willison for \$54,110.

**STORE AND OFFICE**—2 story and base, Class C construction, \$6,000. Pasadena, Los Angeles Co., Cal. Architects, Buchanan & Brockway, Pasadena. Owners, O. L. and F. B. Brad-

dock. Contractor, O. C. Williams, Pasadena. Contract price, \$6,000.

**HOTELS**—1 story and base, "Class A" construction, \$65,000. Los Angeles, Cal. Architect, none. Owner, Francis A. Jerunian. Contractor, E. T. Flaherty, Knickerbocker Bldg., L. A. Contract price, \$65,000.

**SCHOOL**—1 story and base, frame and plaster, \$22,716. Pasadena, Los Angeles Co., Cal. Architects, Marston & Van Pelt, Chamber of Commerce Bldg., Pasadena. Owners, Altadena School District. Contractors, Wopshall Bros., 100 East Colorado street, Pasadena. Contract price, \$22,716.

## WHAT AND WHERE CHILE BUYS.

The longest way round is not the shortest way home when it comes to transporting merchandise. To get there quickest with the best goods, other things being equal, means commercial success, and that's what the Panama Canal will enable the manufacturing and other commercial interests of the United States to do along the 5,000 miles of Pacific coast line of South America. Of that coast line nearly 3,000 miles are taken up by the Republic of Chile. Wherefore Chile is in the commercial limelight just now, and bids far to remain there for a good many years to come, for her importance in the business world is steadily increasing and her future prospects are remarkably bright.

Complete details of Chile's foreign trade for 1913 are not available, but from some advance figures just received by the Pan American Union, Washington, D. C., some interesting facts may be gleaned which should claim the attention of those interests in the United States seeking to enter the Latin American field. In the first place, Chile's foreign trade in 1913 exceeded all previous records notwithstanding a general and almost worldwide financial depression. The total amounted to \$265,000,000, of which the imports were valued at \$120,000,000 and the exports at nearly \$145,000,000.

In this connection it is interesting to note that the United States has made very perceptible gains on her two chief rivals, the United Kingdom and Germany, in the total Chilean trade since 1909. Of Chilean imports in 1913 the United States supplied nearly 17 per cent against only 10 per cent in 1909; the United Kingdom 30 per cent against 32 per cent in 1909; and Germany just held her own with 24 per cent. The United States gained 7 per cent in five years without the Panama canal. How much should the gain be during the next five years with the canal open for business?

Now what does Chile buy? According to values the five leading classifications for 1913 were: Textiles (including cotton, wool, other fibres, and silk), over \$25,000,000 worth; mineral products (including iron and steel manufactures, carths and stones, precious metals and jewelry), \$22,275,000; coal, oils, etc., nearly \$20,000,000; machinery, \$15,000,000; vegetable products (including food products, fruits and grains, woods and manufactures, etc.), nearly \$14,000,000, and animal products, nearly \$8,000,000.

Under the above classification, in the line of textiles the United States made a very poor showing. The United Kingdom sold the Chileans over \$11,768,000 worth; Germany, nearly \$6,882,000; France, \$2,500,000; Belgium, over \$1,000,000, and the United States only \$311,000 worth. With the European war engrossing the attention of the four countries enumerated, and with the Panama Canal doing business, surely the manufacturers of cotton and wool textiles in the United States will get busy and make a better showing henceforth.

Under the mineral products are found such manufactures of steel and iron as wire, granite cooking utensils, pipes, tubing, and connections, nails, railway spikes, fishplates, steel rails, car wheels, structural steel, etc., and of the total Germany sold \$8,120,000 worth, the United Kingdom, \$6,148,000 worth; United States, \$1,428,000; Belgium, \$2,500,000.

Under coal, oils, etc., the details of the 1913 imports are not yet available, but we find that the United Kingdom sold Chile over \$7,869,000 worth, while the United States came second with about \$6,000,000 worth. In 1912 the United Kingdom sold the Chileans \$7,116,000 worth of coal alone, Australia sold nearly \$3,000,000 worth, and the United States but \$500,000. Under machinery (which included railway cars, automobiles, hardware, etc.), Germany sold nearly \$5,500,000 worth, the United Kingdom over \$4,510,000, and the United States, \$3,334,000. From all of which it may be inferred that it is time for the manufacturers of the United States to get in the game in earnest.

## USE AND CONSERVATION.

Get this doctrine of Secretary Franklin K. Lane's:

"Use! Use! Use! That's the word I emphasize—use! We have too much land that is not used, and too much water, and too many people who think they belong by divine right to the class Kipling describes as 'the sons of Mary.' The world and the things therein belong to the people who use them, not to the people who want to speculate with them or to monopolize them, and to allow their own personal fortunes to be the one test as to how and when they shall be used."

That was one of the fine things Secretary Lane said, as reported finely by Mr. Samuel G. Blythe in the Saturday Evening Post.

Evidently a utilitarian, this Secretary of the Interior. And as is the case with true utilitarians, a man of vision, of foresight, of idealism.

"The earth belongs in usufruct to the living," said an earlier utilitarian idealist—named Thomas Jefferson. "The rights of the user are paramount to the rights of the owner," said another—a judge of the Kansas Supreme Court, named Frank Foster. His "owner" in that case was the monopolist, the franchise owner, controlling natural resources that the people needed to use.

"The world and the things therein belong to the people who use them, not to the people who want to speculate with them or to monopolize them." That is of the essence of conservation. It is of the essence of political and economic freedom.—Kansas City Star.

Contractor, F. W. Arnold, 206 21th St.,  
Sacramento.  
COST, \$300

THE PROPHECY OF HUGO—MAY IT  
BE FULFILLED!

Victor Hugo's prophecy is called to  
mind by the monstrous crime of the  
ages now being perpetrated in Europe  
in the shape of an unreasonable and  
an unnecessary war:  
A day will come when the only bat-  
tlefield will be the market open to  
commerce and the mind opening to  
new ideas.  
A day will come when bullets and  
bombs will be replaced by votes,  
by the universal suffrage of Nations,  
by the venerable arbitration of a  
great sovereign Senate, which will be  
to Europe what the Parliament is to  
England, what the Diet is to Germany,  
what the Legislature Assembly is to  
France.  
A day will come when a cannon will  
be exhibited in public museums, just  
as an instrument of torture is now, and  
people will be astonished how such a  
thing could have been.  
A day will come when these two im-  
mense groups, the United States of  
America and the United States of  
Europe, shall be seen joined in  
presence of each other, extending the  
hand of fellowship across the ocean.  
Let us all hope the horrors of the  
present conflict will speed the coming  
of that day!

NEW USES FOR QUICKSILVER.

The quicksilver production of the world during 1913 is estimated at 1,171 metric tons, against 4,262 tons in 1912,

and 4,983 tons in 1911. The countries of production last year were, United States, 688 tons; Austria-Hungary, 855 tons; Italy, 288 tons; Spain, 1,130 tons; Mexico and others, 159 tons. These figures were gathered by the United States Geological Survey.

Quicksilver is used mainly in the manufacture of fulminate for explosive caps, of drugs, of electric appliances and scientific apparatus, and in the recovery of precious metals, especially gold, by amalgamation. A new use in Scotland is the floating of lights of lighthouses upon a body of quicksilver. A use in England, in the United States, and possibly elsewhere is the coating of ships' bottoms with a paint containing quicksilver to prevent organic growth. Mercuric oxide (red oxide of mercury) is the active poison in antifouling paint successfully used on ships' bottoms. The metal appears to be but little employed in silvering mirrors, as nitrate of silver is now chiefly used for the purpose. Increasing use of quicksilver is probably to be expected in the manufacture of electrical appliances and of fulminates, and possibly of paints for protective coatings on metals. The demand for quicksilver for amalgamating gold and silver has greatly decreased, as is well known, with the decreased supply of free milling ores and the increased application of cyanidation to gold and silver ores. Industrial chemistry and inventive genius are to be looked to for increasing the demand.

The peace demonstration at Berkeley on the Anniversary Day of the Star Spangled Banner would have been of more value if William Randolph Hearst had kept his nose out of it. For self respecting people hesitate to take up a thing which is shouldered by him and where he will claim all the credit if anything good happens to come of it or will immediately turn around and censure it if it fails. Nothing in this world can happen unless the name of Hearst is blazoned across the face of it like the whiskey advertisement on the face of a granite mountain.

LIME FIRST USED 4688 AGO.

The use of lime as binding material for mortar originated in the remote past. It is probable that some savages when using limestone rocks to confine their fire noticed that the stones were changed by the action of heat. A passing shower may have slaked the lime to a paste, and they discovered that the paste was smooth and sticky and was a better material than clay to fill the crevices in their crude dwellings. From this discovery it was but a step to add sand to the paste in order to produce mortar.

U. S. Geological Survey.

Engineers estimate the available water power of Oregon as more than 12,000,000 horsepower.

Java last year produced 2,788,000 pounds of gold.

The rate of growth of mahogany is shown in southern Nigeria, where the site of a town destroyed sixty years ago has been covered with a forest containing mahogany trees, some of which are more than ten feet in diameter.

The awful consequence of the present war are too appalling to speculate upon. Most of us had come to believe that such a thing as the present strife was impossible. It has been forced upon us, however, by the robber barons of Europe and the common people are now engaged in a life and death struggle brought on by the machinations of mediaeval kings. That it may not be death of progress is devoutly to be hoped. That the foundations of moral progress are developed in the human race is the opinion expressed by the Editor of the Scientific American in an editorial in the current issue which is here submitted and which is entitled

### THE GREAT PARADOX.

The huge war now raging in Europe is the inevitable outcome of the unsymmetrical development of the mind of man. Perhaps the leading country of the world in the sciences and the arts is Germany. Certainly the leading country in the world in developing an aggressive and militarist policy is Germany. She is at once the most enlightened and the most reactionary of the greater nations of the earth. She is, above all other countries, the living embodiment of that monstrous paradox we call the advancement of science. Our progress in the control of nature for the benefit of mankind has been equalled only by the splendid intelligence with which we have perfected means of slaying one another. We learn how to abolish a disease and simultaneously invent a dreadnought. As scientific men, while half of us work for the establishment of heaven upon earth, the other half strengthens the possibilities of an increasingly ghastly hell. We approach the millennium and Armageddon along parallel roads.

This towering paradox will now be resolved. The destructive half of mankind have beaten their brethren in the race. The war lords triumph over the apostles of peace. For the moment the service of the devil takes precedence over the service of God. But only for the moment. Clever and energetic as they have been, the destroyers have not been clever and energetic enough. The foundations of peace are too firmly laid. The fear that civilization is now rocking to its fall is a fear without justification. The war will progress from horror to horror and with it the disgust and anger of the people will deepen. The foolishness of war! More and more will this thought permeate the consciousness of the whole world. Already this view is clearly expressed by countless men throughout Europe. As they suffer more they will see more clearly, and when this war ends there will be no more wars. We are not witnessing the triumph of the destroyers. We are witnessing their vast collective suicide. As ruthless as they have been in war, so shall we be ruthless for peace. At present we play their game; we fight, because fight we must. But after — there shall be no more war lords. The paradox will be resolved. Science shall no longer ignominiously serve the forces of destruction, but, released from this dire bondage, shall bend all its energies to the task of making this fair world more beautiful and more secure. The savage, trained and equipped, shall no

longer preside at our councils. His day is over. His last and greatest attempt at dominance shall result in his utter overthrow and destruction, whatever be his nationality; and the race of the future will be a race of civilized men, united by the bonds of mutual interest and appreciation and developing their powers in concord in the security accorded by an agreed and permanent world-peace.

Referring to the effective operation of the Workmen's Compensation Acts, the report of the joint commission of the National Civic Federation and the American Federation of Labor, gives ample proof of their wisdom. According to the statement of Chairman Crownhart of the Wisconsin Industrial Commission, although the law in that State is elective, for the month of December 1913, 95.9 per cent of all accidents happening in the industries of Wisconsin were under compensation.

Everywhere, a good compensation law attracts both employers and employees. Twenty-four states have the system. Only three have a compulsory act—California, Ohio and New York, the latter for certain dangerous employments only. The others have "elective acts"—acts which apply only where the workers and employers choose to come in and be bound by them. The report of the commission above referred to (printed by the federal government) says:

"Even elective acts have been so generally accepted by employers and employees in states where they are in force that in those instances a vast majority of industrial accidents are covered."

Of another important point, the commission's report says:

"Litigation so far as accidents to workmen are concerned, has been practically eliminated in the states in which compensation acts have been generally accepted by employers. About 2 per cent only of the compensation cases are disputed so as to require arbitration; not more than ten cases out of ten thousand compensation cases have gone into the courts. The payments of compensation to employees are prompt and usually commence at the end of the second or third week, and where arbitration is had the payments are not delayed on an average more than three or four weeks."

This is certainly a contrast with the laws delays in the trial courts, the varying opinion of judges, the appeals and defenses of contributory negligence, the fellow servant rule and assumption of risks and the hundred and one other impediments that tack on useless costs to the expense of recovery.

The Germans put pride in the fact that their splendid military machine has been built up with little cost to the common citizen. This can be explained to a certain extent by the fact that in Germany the Government itself has control of most industries and that its bureaucracy is highly efficient. And that the resources of the country have been administered for the purpose of building up the German army and making it the foremost military nation of the world.

In this country the resources have

been developed for the benefit of certain privileged classes. If the tremendous fortunes that have gone into the hands of private individuals had one to the government there would have been enough money to build a navy greater than any other nation. We have succeeded in a great measure in removing the domination of landlords and corporations in our governmental control. In Europe the military class has had the whip hand, and having the control in one country impelled every other country to keep up a like standard or run chance of being gobbled up at a moment's notice. It is to be devoutly hoped that the recent war will forever put the rusher on this standard of militarism and compel nations to observe the true standard of morality that they exact of individuals.

Philadelphians last year consumed 15,000,000,000 gallons of water.

Servia has \$12,900,000 invested in industrial enterprises.

#### THE RECOVERY OF SECONDARY METALS.

**Metal Recovered from Waste and Scrap In United States to the Value of Nearly \$73,000,000 in 1913.**

The value of the "secondary metals," exclusive of gold, silver, platinum and iron, recovered in the United States in 1913 was \$72,845,000, according to J. L. Dunlop, of the United States Geological Survey. Even this large figure is a decrease compared with 1912, when the value was \$77,396,000.

"Secondary metals" are those recovered from scrap metal sweepings, kimmings, drosses, etc., and are so called to distinguish them from the metals derived from ore, which are termed "primary metals." The distinction does not imply that secondary metals are of inferior quality. The reports to the Survey do not include the very large quantity of old iron and steel remelted, neither do they include the precious metals. In fact, while the data given in this statement cover a large field and form an essential addition to the reports on primary metals, the scope of the inquiry made by the survey reveals only in a partial way the vast extent of the waste trade industry, which yearly becomes greater and better organized.

The value of iron and steel remelted probably exceeds that of remelted brass, and the value of the old rubber and paper stock utilized amounts annually to many millions of dollars. The Survey's inquiry was extended in 1913 to cover secondary aluminum and the result appears to have justified the extra effort. The values given for the secondary metals are arbitrary and are based on the approximate average value of the primary metal for the year. While the junk dealer buys small and scattered quantities of scrap metals at low prices which enable him

to resell the material at a substantial profit regardless of the changing value of primary metal, the keen competition for large quantities of drosses and carefully assorted scrap metals results in good prices being paid for such waste materials. In fact, it appears that in 1913 the decline in metal prices and the slackening trade conditions, combined with sharp competition, raised comparative prices of scrap and drosses until the margin of the large jobbers, smelters, and refiners handling this material was too small to permit very profitable operation. Although the quantity of reclaimed metal compared favorably with that of former years, stocks of metal derived from scrap and drosses were much larger at the end of 1913 than of 1912.

After remelting or refining, these secondary metals, selling at only slightly lower prices than new metal, displace an equivalent quantity of primary metals and must be considered in an estimate of stocks available for consumption in any year. For a few purposes requiring especial purity of material, it is necessary to employ primary or virgin pig metal, but as a general rule secondary metals can be used in whole or in part. In fact, most foundries, in order to compete for business successfully, must and do use secondary material, at least in part, and hence they purchase scrap metal and remelt it with primary pig metal or with composition ingot. The secondary smelters, by handling large quantities of all kinds of scrap, are able to classify their material so as to produce continuously alloy metals of uniform composition suitable for use in work of different classes, such composition ingots are being purchased and used in increasing quantities by many foundries and other manufacturers in place of primary metals or mixtures of new and scrap metals. It is asserted that the use of properly made and suitable composition ingot is more economical and produces better and more uniform products than the use of virgin metal or of mixed scrap and virgin metals in making alloys.

It has so far proved impossible to separate the statistics for secondary metal recovered from clean scrap made in the ordinary course of manufacture from the statistics of metal recovered from drosses and ashes and from scrap or old metal that had entered the trade as manufactured articles and been discarded. An estimate of the clean copper and brass scrap on the basis of replies from the larger secondary smelters and refiners, but no classification made by many of the dealers or smelters is available.

The use of magnetic separators to free scrap from iron, the recovery of metal from cinders and molting sand, and the use of machines to briquet small scrap in order to reduce the losses in melting continued to increase. Dealers and jobbers in scrap metal realize the necessity of combining to insure better grading of waste metals and more efficient methods of packing in order to obtain lower shipping rates. The larger smelters and refiners of waste metals and drosses, many of whom conduct a business amounting to millions of dollars yearly, recognize the importance of proper separation and grading of metal wastes and of selling alloys of guaranteed composition, but the smaller manufacturers

and metal buyers have not been so careful if they might have been in view of the undoubted fact that the larger portion of all waste material is collected by junk men and jobbers, who resell the material to the smelters, refiners or manufacturers. The use of old metals has extended rapidly, and any cooperation that will remedy trade objections to the use of secondary metals in any branch of manufacturing, as well as any saving that lowers the cost of treating waste products, must result in a broader market and prices more nearly approaching those for virgin metal.

It is impracticable to segregate the statistics relating to the refining, remelting and reuse of secondary metals according to States, but over 90 per cent of the refining and smelting of drosses and scrap metals in the United States is confined to the territory east of St. Louis and north of Ohio River. Reports were made by approximately 550 users of secondary material, of which about 150 were in Pennsylvania and West Virginia, 130 in New York, New Jersey, Connecticut, Maryland and Massachusetts, and 150 in Ohio, Indiana, Illinois and Michigan. Over 60 per cent of the secondary aluminum was reported from the States of Ohio, Illinois and Michigan. Smelters and refiners in St. Louis, Chicago, Cincinnati, New York and Philadelphia recovered over 80 per cent of the aluminum in alloys. The larger portion of the secondary tin was refined by plants in Pennsylvania, New Jersey and New York. The recoveries of lead, zinc and copper were more generally distributed. The greater number of the larger smelters or refiners of secondary metals are located at or near New York, Philadelphia, Pittsburgh, Tottenville (N. Y.), Chicago, Cincinnati, St. Louis, Detroit and Cleveland, though there are many large plants at other places.

#### Nearly 110,000 Tons of Copper Recovered.

The total amount of secondary copper recovered in 1913, on the assumption that the brass remelted had an average copper content of 70 per cent, was 136,500 tons, of price 18,661 tons (about 1,000 tons more than in 1912) was recovered by plants refining primary metals, and the remainder by plants treating only secondary materials. The copper produced by smelters of the latter class includes 36,716 tons of pig copper, 11,603 tons of copper in alloys other than brass, and 69,529 tons of copper in remelted brass. These figures indicate a decrease for 1913 of about 6,100 tons of pig copper, and 1,500 tons of copper in brass and an increase of about 2,300 tons in alloys other than brass.

At least 45,000 tons was recovered from clean scrap made in the course of manufacture of copper and brass ware so that only about 91,500 tons was obtained from ashes, cinders and scrap, or from material that had actually been used and discarded. The value of the copper, both as metal and in alloys, is computed at the average yearly price quoted for casting copper by the "American Metal Market." According to the Bureau of Foreign and Domestic Commerce, the exports of scrap brass in only for remanufacturing, for the calendar year 1913, were 9,912 tons and the imports were 3,295 tons. While many railways sell or turn in the

larger portion of their brass and copper scrap and other metal waste to dealers in part payment for new material, the reports received show that the railroads utilize in their own shops and foundries over 12,570 tons of brass, in addition to 200 tons of copper and 2,825 tons of copper in alloys other than brass.

The production of copper from secondary sources in 1913 was equal to about 17 per cent of the refinery output of primary copper in the United States from all sources, or about 22.4 per cent of the primary copper smelted from domestic ore.

#### **Increase in Lead Recovery.**

The secondary lead recovered in 1913 amounted to 72,831 tons, or about 5,700 tons more than in 1912. The secondary lead recovered as pig lead increased about 2,500 tons a normal increase in view of the fact that the average lead price was nearly the same in 1912 and 1913. The recovery of lead in alloys increased 2,900 tons compared with 1912. The increase of 2,800 tons of pig lead from secondary material was due wholly to the increased recoveries made by those regular smelters whose product is mainly primary metal. The increase was reported to the survey in the quantity of lead in alloys, much of which is derived from remelted babbit and bearing metals, was doubtless due in part to a more careful canvass of the scrap-metal dealers, who not only act as brokers and middlemen, but frequently re-melt and sell babbit, lead pipe, and spelter.

Other important sources of secondary lead were old pipe, lead linings of acid tanks, and drosses from white-metal alloys. Regular smelters reported the recovery of 9,328 tons of lead from lead and antimonial lead scrap. The total output of secondary lead was equal to 15.2 per cent of the refined lead produced in the United States in 1913, compared with 13.5 per cent in 1912, or to 16.7 per cent of the refined lead produced from domestic ores in 1913. It was exceeded by the domestic lead output of only two States, Missouri and Idaho, and only one other State, Utah, had an output of lead nearly as large as the secondary lead recoveries.

#### **Small Decrease in Secondary Spelter.**

The output of secondary zinc (including that in brass) amounted to 73,570 tons and equaled 13 per cent of the total production of primary spelter in the United States in 1913, compared with 24.1 per cent in 1912. The zinc recovered in alloys other than brass amounted to 2,745 tons, compared with 3,912 tons in 1912. Of the 5,000 tons of secondary zinc recovered as spelter, 25,391 tons were obtained by the redistribution from drosses, skimmings, etc. In addition to the large quantity of spelter recovered, it is estimated that over 15,000 tons of zinc chloride was made from drosses, skimmings, etc., and likewise several thousand tons of the zinc pigment lithopon.

The quantity of spelter recovered by redistributing drosses, skimmings, etc., was about the same in the years 1912 and 1913. Two zinc smelters in New Jersey and Pennsylvania, which recover spelter entirely from drosses, skimmings, etc., used together over 1,000 pounds of the material of the small one, and by smelter treating ore mixed with drosses. A large portion of

the secondary spelter reported recovered was reported to be of high grade, ranking about 99 per cent pure and equal in practically every respect to the spelter made from ore. The quantity of secondary spelter produced by smelters having an output derived mainly from ores increased about 1,800 tons. This would apparently indicate that the practice of mixing zinc concentrates and drosses is extending. Although prices of spelter were much lower in 1913 than in 1912, the exports of zinc drosses amounted to only 28 tons, compared with 205 tons in 1912 and 4,246 tons in 1911.

#### **Larger Domestic Production of Secondary Antimony and Decreased Imports of Antimony.**

The production of secondary antimony, of which all but 45 tons was recovered in alloys, increased from 2,504 short tons in 1912 to 2,705 tons in 1913. The value given is arbitrary and is based on the average yearly price for Cookson's antimony given by the "American Metal Market." The only antimony ore of domestic origin smelted in the United States in 1913 was 116 tons from Nevada, which was mined prior to 1912. The regular smelters reported the recovery of 92 tons of antimony contained in antimonial lead scrap. The principal materials refined or remelted which contained antimony as an alloy were hard lead drosses, babbit, solder, pewter, and type metal, in ore, or as oxide amounted to 7,692 tons, and the recovery from secondary sources was equal to 33.1 per cent of the imports. The secondary recoveries of antimony were 500 tons more than the antimony content of antimonial lead or antimony ores of domestic origin smelted in 1913.

#### **Recovery of Old Tin Important Factor in Supply.**

Apparently there were no domestic tin ores smelted in the United States in 1913, though some tin concentrates were shipped from Nome, Alaska, Gaffney, S. C., and Spearfish, S. Dak., to Great Britain for treatment. This condition makes secondary tin an important factor in supplying domestic consumption.

The secondary tin recovered in 1913 was equal to 27.2 per cent of the tin, as metal or as oxide, imported into the United States during the year (32,141 short tons). Secondary tin recoveries decreased from 15,491 tons, valued at \$14,201,368, in 1912, to 14,178 tons, valued at \$12,567,379, in 1913. The quantity recovered as tin was 9,415 tons and that in alloys and chemical compounds 7,563 tons. The value of the recovered tin here given is arbitrary and is based on the yearly average price given by the "American Metal Market." It will be noted that the secondary tin in alloys increased about 700 tons, an increase similar to that of lead in alloys.

The secondary pig tin decreased about 2,900 tons for although the reports showed that the recoveries from clean tin scrap, tin foil, and tin pipe were appreciably less in 1913 than in 1912. This condition was natural, for the use of tin foil and black tin pipe has not expanded and the recoveries from these sources are relatively small. The quantity of clean tin scrap treated was considerably less in 1913 than in 1912. This was partly

due to the burning of the Vulcan Detinning Co.'s electrolytic plant at Seawaren, N. J., and to decreased operations of several other users of clean scrap tin. There was no great incentive to treat tin scrap which had been contracted for or purchased at prices that precluded much profit at the prevailing lower prices of pig tin in 1913. The recovered tin includes the tin content of products made by several plants from scrap tin. These included some tin oxide, putty powder, etc., but consisted mainly of tin chloride. The production of these compounds is calculated as metal and not separately stated, in order to avoid disclosing confidential information. As the products are made from scrap tin and thus conserve the primary metal, they are properly regarded as recovered tin. Two forms of tin chloride are handled commercially—stannic and stannous salts. Stannic chloride is usually sold either as a water solution called bichloride of tin, or as anhydrous sirupy liquid, termed tetrachloride of tin, and is used principally in the silk industry. Stannous chloride is sold in the form of crystals and is used in dyeing and calico printing.

Most of the tin oxide, tetrachloride, THIRTEEN SEPT 11 HOYT and other products were made from clean tin-plate clippings or from tin liquors left in dyeing or weighting silks. The dry chlorine process was used to recover the tin from the clippings in some places. In others reverberatory furnaces were used to remove the tin coating, and a large quantity of tin was recovered in the form of a tin powder by the electrolytic treatment of clean scrap, the powder being sent to secondary smelters. The largest recoveries of tin were made from the scruff and drosses that occur in making tin andterne plate and amounted to over 5,000 tons. Only firm reported using old tin containers, from which the tin and solder were first sweated and the black plate remelted to make sash weights. Comparatively large quantities of tin scrap and old tin cans are used in the western mining regions for the precipitation of copper from mine waters. Such scrap is plentiful, cheap, and fairly well adapted for the purpose. However the tin coating of the scrap does not enter into the reaction and is lost entirely.

The principal alloys in which secondary tin was recovered were babbit and other bearing metals, bronze, solder, pewter, and electrolyte metal.

#### **Aluminum Recovery.**

For the first time the survey obtained statements of the quantity of secondary aluminum recovered as pig aluminum or in alloys, and while the inquiry may not have reached all producers, the result showed that the percentage of secondary aluminum used compared with virgin metal was fully as large as in other non-ferrous metals. The recoveries in 1913 amounted to 1,651 tons valued at \$2,193,480. Of the 1,651 tons the quantity recovered in alloys amounted to 2,456 tons, and over 90 per cent of this was an alloy of 92 per cent aluminum and 8 per cent copper, used for making sand castings. It is probably that a large part of the secondary pig aluminum was recovered from clean clippings and borings and that it also was utilized in making castings.

## News In Brief.

**MARYSVILLE,** Yuba Co., Cal.—Darlington Christopher of Oakland has purchased fifteen acres of land in the northern portion of this city which he proposes to divide into building lots and place them on the market. If the plans carry an inducement will be offered the Northern Electric Company to extend their street car tracks to that section and to Knight Recreation Park, owned by the City of Marysville.

**PLACERVILLE,** El Dorado Co., Cal.—A storage dam is now under construction across Webber Creek. The dam will be of reinforced concrete construction and will be used to store water for the use of the Missouri Flat ranches. The construction work is under the supervision of Clifford B. Rushmer and will be completed in about three weeks.

**FRUITVALE,** Alameda Co., Cal.—On motion of Supervisor J. M. Kelley the Board of Supervisors instructed County Surveyor P. A. Haviland to prepare plans and specifications for the repair of three bridges which cross the estuary, connecting Oakland and Alameda. It is estimated that the work will cost in the neighborhood of \$10,000.

**SANTA BARBARA,** Santa Barbara Co., Cal.—The survey of the seventy-nine miles of road through the Cuyama from the Foxen canyon road in the north to the Kern county line is complete and Engineer J. H. Kincaid, who was in charge, has returned to the county surveyor's office where he will make out his field notes preparatory for the plans which are to be submitted to the Board of Supervisors.

**RIO VISTA,** Solano Co., Cal.—An ordinance granting to the Standard Oil Company permission to locate, build, operate and maintain a warehouse, or for tankage and the erection of other necessary buildings has been passed to print by the Board of Trustees of Rio Vista.

**SANTA ANA,** Orange Co., Cal.—That the Orange County Highway Commission has more than half of its work done toward completing the project under which \$1,276,000 bonds were voted in this county is shown in a report by Chief Engineer S. H. Finley of the County Highway Commission.

There are 107 miles of road provided for in the original good roads plan for which bonds were issued. So far 35.07 miles of road have been completed. Including the roads finished there are 51.20 miles of concrete base laid, and including the roads finished and those upon which concrete base only has been laid 60.33 miles have been put to grade ready for the concrete base. Including all roads finished or under way, 82.36 miles of road have been let to contract.

**PALO ALTO,** Santa Clara Co., Cal.—Supervisor MacPain is preparing plans and specifications for the improvement of Oak Grove avenue. It will have an asphalt surface and a concrete base.

**SACRAMENTO,** Sacramento Co., Cal.—A resolution ordering the improvement of U street from Eighth to Nineteenth has been adopted by the City Commission.

**LODI,** San Joaquin Co., Cal.—City Engineer Barzelotti has established a grade for the new reclamation dis-

**560 Mission St., S. F.**

trict near the Telegraph School west of Woolbridge. The ditch will be one mile in length and will turn the surface of the water into the ditch along the Herminour road where it will be delivered to the tide water flats.

**CHICO,** Butte Co., Cal.—The materials for the construction of the bridge over Butte creek near Durham have arrived and work will commence in a few days. The bridge will be of steel and concrete.

#### CITY DEPARTMENT OF ARCHITECTURE KEPT BUSY.

**More City Improvements Will Be Underway Shortly.**

Plans and specifications for work to be done by the City and County are now under way in the Bureau of Architecture of the Board of Public Works and bids will be called for as soon as they receive the approval of the Board.

The following is a report on the condition of plans and specifications at the present time:

Plans and full size details are being prepared as the work progresses upon the following buildings: Washington Irving School, Oriental School, Department of Electricity shop building, Central Fire Alarm Station, San Francisco Hospital yard work, City and County Jail, public square of the Civic Center, power plant of the Civic Center, Donahue Fountain and Marshall School.

Department of Electricity Shop Building—Plans and specifications 97 per cent complete and will be ready for figuring shortly.

Corporation Yard Office Building—Plans and specifications complete and ready for estimating.

City and County Jail—Plans and specifications for the electrical work and heating and ventilating 90 per cent complete.

Polytechnic High School—Plans and specifications for finish plumbing and plastering complete and ready for estimating; for electrical work 96 per cent complete, and for general interior finish, 85 per cent.

Donahue Fountain—Plans and specifications complete and contract awarded.

Power Plant, Civic Center—Plans and specifications being completed. will be ready for estimates shortly.

#### PLANS ADOPTED FOR LIBRARY BUILDING.

**Architect G. W. Kelham's Plans Are Approved.**

Plans for the New Public Library to be erected in the Civic Center at the southeast corner of McAllister and Larkin streets, have been approved by the Library Trustees and forwarded to the Supervisors with the recommendation of adoption and an award of contract. The plans were prepared by Architect G. W. Kelham. City bonds voted, but unsold, to the amount of \$500,000 will have to be disposed of before a sufficient sum of money can be realized to build.

#### REMOVAL NOTICE.

COMMARTY-PETERSON CO., have removed to the Bankers' Investment Bldg., 742 Market Street, Rooms 409-11.

## How To Efficiently Prepare Copy For The Printer.

### THE DUMMY.

Is a duplication of the size of the card, folder, circular or other thing you wish to have printed. It may be of any grade or style of paper, as long as it originally contains no printing or other matter and is of the size of the thing that you wish. If you wish a card printed 2 inches x 4 inches, a sheet of paper cut to size 2 inches x 4 inches will constitute the dummy. If it be a four-page folder, 6 inches x 9 inches, then a sheet of paper folded together and cut to size of pages 6 inches x 9 inches and showing four sides of a page will constitute the dummy.

On the dummy you may then block off by making dotted or wavy lines the space about the size of the type that you wish used for the heading, the place and about the size of the space that you wish for the principal matter to occupy, the place and size of any cut to be printed therein and the size and position of the name and address of the firm. These various blockings may be lettered A, B, C, etc., and then written out in good size on separate slips of paper under the corresponding letters A, B, C, etc. From the dummy the printer can at once tell the exact size of the thing that you wish printed. From the blockings consisting of dotted lines or lines ruled around the space to be occupied, he can tell how much room he will have for the particular matter, cut, heading or name you wish printed therein and can use the proper size and style of type accordingly. By having the actual matter to be inserted, written on separate sheets, it may be written very large and plain and thus avoid mistakes being made in the words or spelling while at the same time the printer can tell from the dummy the size of type he will have to use to get all of said matter on that particular slip into the space you have designated on your dummy.

If you desire the matter contained on your card, folder, etc., surrounded or enclosed by ruled lines or border design, it should be specified under the head or border, and where possible it is best to paste a sample of the size of rule or style of border that you wish onto your sheet or dummy.

In ordinary printing, the printer will usually use his best judgment in giving you a type suitable for your matter. In small offices this is governed largely by the faces of type that he has in his office. If you desire a particular kind of type for particular parts of your ad, cut out sample lines of the various styles from some paper or magazine and paste it at the side of the sheet opposite to the matter that you wish in that particular style of type.

## What Advertising Can Do For the Retail Firm.

### NEWSPAPERS, MAGAZINES, PROGRAMS, BILLBOARDS:

The newspapers, magazines, programs and bill boards of your locality can give you general publicity for the purpose of establishing the name and location of your firm and the general line of the goods it carries. They can also, and this refers specially to newspapers, advertise your prices and different lines of goods, and call attention to special sales, bargains and reductions.

### LETTERS, POST CARDS, FOLDERS, CIRCULARS:

These may be used to great advantage, by carefully compiling a list of persons who would be desirable customers and who would reasonably have patronage you wish to go after. If a letter, post card, circular or folder is so worded as to convey the idea to the receiver, that you consider them a friend and client of your establishment, much impression will be added to your offers and you can build up a family of followers, that I personally believe, could not be accomplished by any amount of newspapers, magazines, bill boards or general publicity. Of course, the treatment of such parties when they come to your store in response to such personal invitations, must bear out your attitude toward them. Your salesmen must understand that if such customer in any way hint or disclose that they have come in response to such letter or printed invitation, that they must be made to feel that they are getting a special attention. I do not disparage the use of newspapers, magazines, program or bill board advertising, but my point is that other mediums as letters, post cards, circulars, folders may be used hand-in-hand, under a proper apportionment of your entire expenditure, to you very great financial advantage.

Compiling lists and mailing out matter entails much more labor and attention, than inserting ads in publications, but the additional effort expended in this way, if your advertising matter is properly prepared to meet the view point of its receiver and contains the necessary pulling power, will be worth the trouble and should result in satisfactory returns to you.

## About Advertising In Dull Times.

Men have their good days and bad days. They feel better at times than they do at other times. Business is much the same. On the good days for the man or the good periods or times for business, there is a go-a-head spirit and energy which creates initiative and starts new work and enterprises. This accounts in degree why in good times there is so much more work, activity and business.

And when the bad times come in business, the tendency is to slow down and consequently there is actually less business.

When there is less business the competition for it becomes keener and then not only loses a businessman have to figure to fight harder to get new business, but he has to take into consideration the very great efforts that are being made by his competitors to take away from him the business that he already has.

It then becomes necessary to take advantage of every business aid, and efficient advertising and selling methods are of the most valuable that may be obtained. This is necessary not only to gain new business, but as a part of protective and defensive tactics. Even if you gain no new business you must throw up bulwarks to protect the business you already have from the increased and more intensive competition.

Using more greatly efficient advertising and selling methods become insurance against loss of business, as well as investment to secure new business.

In dull times expenses are cut, every detail is watched more carefully and greater effort is made to produce results. Advertising and selling methods are not expense but an investment from which you figure and expect additional profit. As you do more work, do it more carefully and make every part of your business produce better results in hard times, so then should you use and work harder the modern business facility known as efficient advertising and selling methods. A proper scientific and careful utilization of efficient advertising and selling methods will redound to your financial benefit and once started will never be abandoned by you. It has been made to pay others in large amounts so why not use it and get the benefits for yourself?

## Editorial Comment.

The initial month of the world war shows the building industry in the United States about maintaining an even standard. At a time when the financial shock is such as to stop all about 75 cities throughout the country made to the American Contractor, general investments it is at least gratifying to see that permits issued and contracts entered into for building construction show that industry to be at least in a normal condition. This may be explained in part by the fact that before the war began business generally was at a pretty low ebb. At any event official reports from Chicago, show a loss of only about 4 per cent as compared to August, 1913. The following is the tabulated list:

	August, 1914.	August, 1913.

The political situation may now be expected to resolve itself along definite lines. We may confidently expect the old guard to employ all the old and time honored political tricks to gain votes. Chief among them will be the sacred unity of the Republican party. For that party which causes the sun to shine and the grass to grow and the rain to fall upon the just and unjust alike, the great appeal will be made. And the ancestral pride will be invoked, the shade of the father who was the compatriot of Lincoln will be resurrected and the political platforms of 1860 will be referred to in the same manner that the bosses used to wave the bloody shirt.

Already the affidavit men are getting busy. Governor Johnson is to be accused of employing chinamen in order to alienate the anti-chinese vote. Every heeler that has a scheme to throw mud and stir up a personal muddle finds an opportunity. And the question will be fought out between those who believe in practical reform and equal justice in the state's administration on the one hand, and those who blindly follow the fetich of political prejudice and believe in special privilege on the other.

Certainly the Fredericks contingent have an affrontery equal to that of William Randolph Hearst. After fighting every reform that the Johnson Administration has instituted they now come out and claim the credit for every reform. And for this reason they ask the people to vote for the men and the bosses that were kicked out of office four years ago.

## Problems of Highway Construction.

Difficulties in the Work of the California Highway Commission in Building the State Highway.

By Austin B. Fletcher, Highway Engineer.

From the California Highway Bulletin.

The State Highway Act, under which the state roads are being constructed, provides in no uncertain words that the State is to maintain the roads after they are built. The Motor Vehicle Act, through the fees which it specifies for the registration of motor vehicles, will provide the money, since one-half of the net receipts goes to the counties for the maintenance of county roads and the balance to the state highways for their upkeep. Estimating conservatively, there should be available from this source for the state highways during the year 1914 from \$350,000 to \$400,000.

The chief immediate use which the Commission has for a maintenance fund is for placing gravel or macadam shoulders along the paved portions of the roads built and to be built. In many localities the natural soil under and beside the paved portion of the roadway is not sufficiently stable during wet weather to sustain even the occasional wheel which gets upon it, and it is of course necessary that at times the shoulders of the roads should be able to carry some traffic.

It did not seem possible to provide for such shoulders in the original construction because of the cost of such work and the necessity for conserving as much as possible of the eighteen million dollar appropriation for construction purposes. The maintenance fund also permits of the purchase of equipment for repairing and maintaining the roads, which is costly and cannot be rented economically. Maintenance problems and those of construction, in highway work particularly, are almost inseparable, and in choosing a type of road or pavement the future must be reckoned with.

The greatest problem of all confronting the California Highway Commission is how to build nearly two thousand seven hundred miles of state highway with eighteen million dollars in such a manner that the people will be reasonably satisfied, and so that the roads will not cost excessively for maintenance. This means that on the average, including administration expenses, the roads must not cost more than six thousand six hundred dollars per mile, which is obviously too little if the whole system is to be paid for.

As a result of much deliberation the Commission adopted as a standard type of paving to meet the average conditions a Portland cement concrete roadway fifteen feet wide, protected by a thin surfacing of asphaltic oil combined with stone screenings. This does not mean that all of the state roads are to be so constructed, for some of the roads have already been paved to a width of twenty-four feet, where the traffic seemed to require it, and surfaced with asphaltic concrete. Nor does it mean that all of the roads will be paved, for in some of the mountain counties such a treatment would be absurd under present traffic conditions.

There are now under contract about

three hundred fifteen miles of concrete road on which the thin top is to be placed. About fifty miles of the thin top has been put on, and on all but a very few miles it is giving admirable service.

The history of the thin top or carpet is interesting. For many years, and until about the year 1906, the broken stone road first developed in England by John L. Macadam, and perfected for American requirements by William E. McClinton of Massachusetts, was considered the last word in rural road building. The Eastern States were all constructing their state highways of that type and the road builders were a self-satisfied lot. In 1906 the writer was chosen by the Government Office of Public Roads to prepare a bulletin on the subject, and he well remembers his feeling of pride when he was told that over two hundred thousand copies of his bulletin were to be printed and distributed. The writer also well remembers that but two years later at a road meeting at Buffalo he was obliged to confess that "the macadam road is a thing of the past" because of the ubiquitous automobile.

The case, however, turned out to be not so bad as was then predicted, for after experimenting with applications of hot asphaltic oil or refined tars and sand spread upon the cleaned macadam roadways, a method which the French probably discovered, it was found that a thin bituminous carpet from one-fourth to one-half an inch in thickness was developed, which served to prevent the raveling of the stones composing the pavement. There are thousands of miles of macadam road in the Eastern States treated in this manner, which are now giving ample satisfaction even to that most captious critic, the automobile owner.

In the year 1908, almost simultaneously in Ann Arbor, Michigan, and in Spencer, Massachusetts, sections of concrete roadway were covered with a similar bituminous carpet of refined tar and stone screenings. In the Massachusetts case, with which the writer is more familiar since the work was done under his direction, the bituminous covering was applied to lessen the roughness of a section of concrete pavement built by the Hassam process. Both the Ann Arbor experiment and that in Massachusetts were successful, and the carpets gave good service, lasting two years and more with almost no expense until it came time to renew them by precisely similar applications of tar and screenings. Within the last few years many thousands of square yards of concrete have been so covered with bituminous carpets, and the Ann Arbor engineer who thought out the scheme has even applied for letters patent on the process. The patent has not been granted yet, so far as the writer is aware.

It was these experiments in the Eastern States which led the California Highway Commission to consider the bituminous carpets for the Cali-

fornia roads. The only essential difference between the work in the East and that here lies in the use of heavy asphaltic oil instead of tar. It was not possible to use coal tar in California without long railroad carriage and correspondingly high cost, for it is not produced here in any considerable quantity. The writer, however, has no regret on that account. The bituminous carpets, using California asphaltic oil on ninety per cent of the work already done, are far superior in his judgment to the tar and screening carpets of the East which he has inspected. They are also far superior to the bituminous carpets usually applied to the macadam roads in the East, and he asserts, after more than twenty years' experience in state highway work, that no Eastern State is today getting its state highway constructed so cheaply, so thoroughly, or surfaced so satisfactorily as in California.

Two trips made by the writer to England and France during the past five years have convinced him also that in the construction of our roads we can learn little there. They are still laying the bituminous carpets on water-bound macadam roads, or where the traffic is heavy, mixing tar with slag or broken stone and forming a crude bituminous macadam road-crust not nearly so good, in the writer's opinion, as the asphaltic concrete work done in California. As to maintenance problems, that is another story.

California started late with its state highways. Its people, with the changed conditions of traffic brought about by the automobile, are demanding what to all intents and purposes is city street work out in the country. And California is getting it, to all intents and purposes.

The Commission has had some poor work foisted upon it. In Sonoma County there was some concrete thinner than called for by the specifications, but that has not been paid for, and the poor work will be done over before the road is completed. In Santa Clara County the writer made the error of allowing some asphaltic oil of too heavy grade to be used, which, because of the climatic conditions at the time of its application, did not make the bituminous carpet of the thickness and quality desired or expected.

Based upon these instances the report has been circulated widely that the state highways are crumbling; that they are a laughing stock. Almost any expression of contempt has served. It has even been said—God save the mark!—that they have been hastily built. Mark Twain said somewhere: "The chief difference between a cat and a lie is that the cat has only nine lives."

The people on the peninsula do not believe such nonsense, nor do the people in the San Joaquin Valley, nor in Los Angeles County nor in San Diego. Nor, indeed, do the people of the State generally, or their actions belie their

deeds. They believe in the kind of roads the Commission is building to such an extent that since October, 1912, they have financed the construction by purchasing state highway bonds to the extent of nearly seven million dollars.\*

The Commission has had some difficulty in making the people of some localities believe that the law [State Highways Act] means what it so plainly says. Many hearings have been given and much time consumed in listening to advocates for particular routes who wished the course of the state highway diverted from what the Commission considered to be the most direct and practical lines. It is believed that the people of the State have now come to a better understanding of this matter and realize that the State Highway is to be built for all of the people and that it can not be diverted from its course for purely local requirements.

The writer, in closing, feels that it is but fair to recite briefly some of the other achievements of the Commissioners in the promotion of state highway work, for which he thinks that they are entitled to the everlasting thanks of the people of California:

They have brought about the policy that the counties shall furnish without cost to the State all land needed for the right of way of the State Highway.

They have induced the counties to build and pay for all new bridges exceeding twenty feet in span along the line of the State Highway.

They have caused the cities and incorporated towns along the route to agree that the streets within their corporate limits should be paved and maintained by the municipalities.

They have induced the railroads, over which hundreds of thousands of tons of materials must be transported, to reduce their freight charges so that such materials will be moved at approximately one-half rate.

They have saved many thousands of dollars by purchasing road materials in large quantities.

They have, by careful studies of the location of the State Highway, obviated crossings with railroads at grade in many places. In Ventura County alone, within a length of twelve miles, nine grade crossings will be abolished.

They have provided for two trunk lines between San Francisco and Los Angeles, one by the coast and the other by the valleys, the first requiring about three hundred and eighty-four miles of construction and the latter three hundred and twenty-three miles, which will be paved, and which will nowhere have a grade in excess of six and one-half per cent and not more than two or three miles in excess of six per cent.

\*Extracts from a paper read before the Commonwealth Club of San Francisco, March 14, 1911, on "Some of the Problems and Accomplishments of the California Highway Commission."

\*\*The sale of state highway bonds made possible through the co-operation of California counties and banks amounted on June 15, 1911, to a total of \$7,565,000.00. There is not at this date a market demand at par for the bonds because they yield but 4 per cent interest.

## FEATURES OF THE STATE HIGHWAY.

### Conquering Oldtime Barriers, Opening Rich Sections for Motor Truck Traffic, and Other Benefits Considered in Highway Construction.

By N. D. Darlington, Member, California Highway Commission.

The State Highway is primarily designed to meet the commercial needs of the State of California and to provide better means of communication than is afforded by our present road system. In planning highway construction under the authorization of the State Highways Act, and with the foregoing in mind, there have been developed, of course, features of special interest in road building. There are as well other features only indirectly allied to the state highway work, but which are important to the people of California.

In conquering the mountain barriers changes are required to produce a modern highway which may be considered features of the state highway work. The Commission has met several problems of this sort in different parts of California, and has endeavored to solve them with a maximum grade of 6 per cent where practical, or, at the most,  $6\frac{1}{2}$  or 7 per cent. This policy has been criticized, but no doubt the critics have not fully realized that the word "permanent" is prominent in the mandates of the Highways Act, and that the roads as laid out must be planned to be good roads for years in the future.

Our mountain ranges heretofore have been veritable barriers to travel on account of the excessive grades on the present roads. These obstructions to the flow of traffic have been overcome by replacing the present tortuous roads with their steep grades with modern highways of good alignment and easy grades. Bailey's Hill, at the northern entrance to California, has had such a road winding down from Oregon; it will be supplanted by a highway with a grade not over 6 to 7 per cent, and the Oregon road builders have taken California's standard and are coming over the Siskiyou mountains to our state line with a 6 per cent maximum. In the Santa Cruz mountains a splendid road with no steep or dangerous grades with form part of the State Highway. Across the range between the San Joaquin Valley and Southern California the new highway will eliminate many miles of distance as well as bad grades, and will offer a magnificent panoramic road. The dangerous Castias Pass is supplanted by the sea-level Rincon route along the coast between Santa Barbara and Los Angeles, a feature in which the state highway work has been materially aided by public spirited citizens. The road from El Centro to San Diego will furnish those living in Imperial Valley with a direct outlet to the coast over a road which will be unsurpassed for beauty and interest.

The mountain roads of the State Highway will prove more valuable, I believe, in their purely commercial aspect than in the pleasure they give to tourists. The commercial motor vehicle is a most important factor, and

it development has but started. In Los Angeles County, following the establishment of a comprehensive system of good roads, the number of motor trucks increased from 61 to 3,200 in four years, and the best informed motor truck men of Los Angeles regard 6,000 trucks as a normal number for use in that county. A similar, although not so rapid increase, is to be observed in all parts of California. The State Highway will make the motor truck an adjunct of the rancher, and thus will come an important development of California's resources. The same thing is true of the county highway systems which are planned in this State.

During the past rainy season numerous ranchers found it necessary to make three and four trips on unimproved roads as far as the State Highway, where they piled the loads until they had enough for one load to take into town on the paved highway. That experience demonstrated the commercial value of a good road. There are numerous rich sections of California where hauling economically all winter is out of the question without a road that will give good service in bad weather—when it is most needed.

A feature of special importance is the shortening of routes between sections of the State. The Yolo causeway across the by-pass of the Sacramento River west of Sacramento is a feature of this sort. It will require about three miles of concrete trestle, but will be of service to the entire State and will materially shorten the distance between Sacramento and the San Francisco bay cities.

In opening up a permanent route through the redwoods to Humboldt and Del Norte counties there will be provided an important feature of the State Highway. In addition to advancing the commercial interests of the Northern California coast the route will provide a magnificent touring attraction. It will run for miles through stately redwoods, giant trees several thousand years old, where at times the sun is obscured by the forest, making a trip to be remembered. This is a feature of California which by all means should be preserved. The redwoods of Northern California tell the magnificent proportions of the State's resources in so stately a way that a state park ought to be planned comprehensively while it is feasible to do this, and it should be planned so that the tourists who take the route of the State Highway should realize the importance of this feature of touring in California. This is a matter of conservation and beautification which the women of California should take up through their various organizations and carry to an achievement.

The greatest feature about California's State Highway is that the expenditure of eighteen millions as a precursor of the State's complete road development fits into the new era of California so remarkably. We cannot realize the development California has just ahead, and yet in all parts of the State preparations are being made now for that development. The State Highway will be completed just at a time when it will prove an invaluable factor to the communities and counties in facilitating the development of the next decade.

Classified according to Character of Work

## APARTMENT HOUSES.

**SAN FRANCISCO**—Apartment house, 6 story and base. Class C construction, \$25,000. Architects, Rousseau & Rousseau, Monadnock Bldg., S. F. Owner, Mr. Pomme. The building will be erected on the south side of Turk street east of Polk, and will contain a number of two and three room suites besides one store. Interior finish will be of pine and elm panels. There will be steam heat, an automatic elevator and hot water supply. All apartments will have wall beds and private bath rooms. Tile wainscot and composition floors will be used in the bath rooms. Entrance will be finished in marble. Plans provide for patent store fronts. Exterior of the building will be faced with pressed brick. Plans are complete and segregated figures are being taken.

**SAN FRANCISCO**—Apartment house, 7 story and base. Class A construction, \$150,000. Architect, Houghton Sawyer, Shreve Bldg., S. F. Owner, Mr. Morehead. The building will be erected at the northwest corner of California and Mason streets, covering an area of 66 by 70 feet, and will be a fireproof building throughout. The upper two floors will be fitted up for the exclusive use of the owner, while each of the five lower floors will contain one apartment each. Interior will be finished to suit the tenants. Among the many features of the building will be a swimming tank, roof garden and billiard hall. Interior will be finished in pine and mahogany with Caen stone in the halls. There will be steam heat, elevator service, electric dumbwaiters and vacuum cleaning system. Bath rooms will be finished in tile. Exterior of the building will be faced with cement plaster in imitation of cut stone. Plans are complete and figures are being taken.

**SAN FRANCISCO**—Apartment house, 4 story and base, reinforced concrete, \$20,000. Architects, Smith & Stewart, 244 Kearny street, S. F. Owners, Smith & Stewart, 244 Kearny street, S. F. The building will be erected at the northeast corner of Pacific and Taylor streets, covering an area of 32½ by 54 feet. Interior has been arranged for a total of 15 suites of two rooms each. Pine, mahogany and white enamel will be used for interior finish. All rooms will have hardwood floors. There will be steam heat, an automatic electric elevator, hot water system and vacuum cleaning. All apartments will have wall beds and private baths. Bath rooms will be finished in tile. Exterior of the building will be faced with cement plaster. Plans are complete and segregated figures will be taken at once.

**SAN FRANCISCO**—Apartment house, 4 story and base, frame, \$15,000. Architect, C. A. Meussdorffer, Humboldt Bank Bldg., S. F. Owner's name withheld. The building will be erected on the north side of Chestnut street east

of Hyde, and has been designed to contain twelve suites of two and three rooms. Interior will be finished in pine, redwood and elm panels. Some hardwood floors will be used. There will be steam heat and a hot water system. All apartments will have wall beds and private bath rooms. Entrance will be finished in tile and marble. Exterior of the building will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

**BERKELEY, ALAMEDA CO., CAL.**—Apartment house alteration, 2 story frame, \$3,000. Architects, Thomas & Oliver, Pantages Theatre Bldg., Oakland. Owner, Mrs. McGill. This work will consist of altering the two-story frame dwelling located on Durant Way near Ellsworth into modern apartments. There will be five suites in the building of two, three, four and five rooms. The work will require new interior finish, painting, plumbing, plastering, electric work and finish hardware. Furnace heat will be installed. Exterior of the building will be covered with shingles. Plans are nearly ready for figures.

**SAN FRANCISCO**—Apartment house, 2 story and base, frame, \$14,000. Architect, Albert Schroeffer, 68 Post street, S. F. Owner, Edwin S. Persson. The building will be erected at the southeast corner of Church and 24th streets, covering an area of 100 by 40 feet. There will be five stores on the first floor and a total of four suites of three and four rooms on the upper floor. Interior finish will be of pine and redwood with some elm panels. Hardwood floors will be used. There will be steam heat and a hot water system. All apartments will have wall beds and private baths. Tile wainscot and composition floors will be used in the bath rooms. Exterior of the building will be covered with brick veneer and cement plaster on metal lath. Plans are complete and the work will be done by Day Labor. Materials are now being purchased.

**OAKLAND, CAL.**—Apartment house, 2 story and base, frame, \$6,000. Architect, none. Owner, John A. Bischoff, 351 Crafon avenue, Oakland. The building will be erected on the south side of Harwood avenue east of College, and has been designed to contain sixteen suites of two and three rooms. Interior will be finished in pine and redwood with some elm panels and hardwood floors. There will be furnace heat and a hot water system. Bath rooms will be finished in tile. There will be wall beds and private bath rooms. Exterior of the building will be covered with cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor.

## BANKS

**LOS ANGELES, CAL.** Bank and offices, 7 story and base. Class B. Cost

not stated. Architects, Krempel & Erkes, Henne Bldg., L. A. Owner, Mrs. Lucy Hauerwaas. The building will be erected at the corner of Pine and Broadway, covering an area of 50 by 150 feet. There will be a complete steel frame with brick exterior walls. The entire first floor will be occupied by the Marine Commercial and Savings Bank. Each of the upper floors will be arranged for twenty offices. Interior finish will be of pine and hardwood with ornamental plaster in the banking room. A tile floor and marble wainscot will also be used. Special bank fixtures and vaults will be installed. Plans provide for steam heat, a hot water system, vacuum cleaning, metal window sash and frames and elevator service. Exterior of the building will be faced with pressed brick and terra cotta. Working drawings are complete and figures will be taken at once.

## Contracts Awarded.

**BERKELEY, ALAMEDA CO., CAL.**—Apartment house, 3 story and base, frame, \$20,000. Architect, Olin S. Grove, 2911 Telegraph avenue, Berkeley. Owner, Dr. Crawfis. Contractor, George W. Patton, 2156 Emerson street, Berkeley. Contract price, \$20,000. Note: The contractor is now taking sub-figures on the work.

## BONDS.

**COLUSA, COLUSA CO., CAL.**—No bids were received here for the State Highway bonds amounting to \$125,000. The funds were to be used in the construction of the State Highway through Colusa County. The bonds will probably be readvertised.

**TURLOCK, STANISLAUS CO., CAL.**—City Attorney A. Johnson has informed the Board of Supervisors that the election held September 1st, when the \$16,000 park bonds were voted on, was illegally held, and that the bonds could not be sold. It appears that an error was made in the printing of the ballots, and that election will probably be called.

**VISALIA, TULARE CO., CAL.**—The Supervisors have decided that the Alpaugh Irrigation District proposition was defeated at the election held on August 26th. In the election 35 votes were cast, 22 in favor and 13 against. The proposition failed to carry by six votes.

**TURLOCK IRRIGATION DISTRICT, STANISLAUS CO., CAL.**—A special election will be held in this district on October 9th for the purpose of voting bonds in the sum of \$155,698. The funds will be used for defraying the expenses of the care, operation, management and repair of the portions of the canal works of the district.

**WATSONVILLE, SANTA CRUZ CO., CAL.**—An ordinance calling for a special election to be held in this city on September 29th for the purpose of voting bonds for a bridge and the pur-

chase of a fire engine and the necessary equipment. The bridge bond issue will be for \$20,000 and the fire equipment and engine for \$12,000. The proposed bridge will be of concrete and steel and will be constructed across the Pajaro River. S. W. Coeman is the City Clerk of Watsonville.

**WATSONVILLE, SANTA CRUZ CO., CAL.**—A movement is underway in this city for the purpose of calling a special bond election to better the school facilities. At the present time the schools are housing many more pupils than accommodations can be made for. Superintendent of Schools A. J. Henessey and District Attorney F. W. Sargeant are interested in the matter.

**NAMPA, IDAHO.**—Nampa Meridian directors have called election for October 10th to vote \$500,000 in bonds to build drainage system in the district, co-operating with the government. Principal ditches to drain section up Five-mile creek N. of Meridian and tract W. of Nampa.

**GREAT FALLS, MONT.**—The Board of County Commissioners are considering, and a decision will be made in the near future, the advisability of asking the county taxpayers to vote on a bond issue of \$250,000 at the general election to be held in November, for the construction of good roads throughout the county.

**SEATTLE, WASH.**—Providing that sufficient bonds can be sold in time the Cascade Irrigation District, Ellensburg, of which R. Lee Barnes of that city is secretary, about \$200,000 worth of construction work will be done for that company this winter. About \$85,000 worth of work has already been done under the direction of R. W. Rea, chief engineer for the company. The work will consist of 18,000 feet of metal flume, 9 feet 6 inches in diameter, driving three tunnels, one rock and two cement gravel, about 687 feet, all to be lined with concrete, lining another 550 feet tunnel with concrete, laying 2,000 feet of concrete flume, 8 feet by 4 feet 6 inches, and the construction of the headworks, etc. When the bonds are sold bids will be called for this work.

**BURNS, ORE.**—Bonds in the sum of \$100,000 for construction of water and sewerage systems will be voted here shortly.

**POCATELLA, IDAHO.**—The election held here to vote on the issuance of \$100,000 bonds for the purchase or installation of water works system resulted in favor of the proposition.

**MILWAUKEE, ORE.**—The Milwaukee Council has instructed Recorder Mathews to provide for the issuing of improvement bonds to the amount of \$27,000 for the improvement of Front street. The improvement will cost \$44,000. The Recorder stated that the \$24,000 water bonds bid in by the Portland Lumbermen's Trust Co. have not been called for and are still in possession of the town.

**SACRAMENTO, CAL.**—At the meeting of the Board of Supervisors of Sacramento County a resolution was passed setting October 10th as the date for the bond election for the building of the roads.

Some criticism has been induced because sufficient publicity was not given to the kind of roads to be built and

to the amount to be expended for each particular road, but it has been shown that there was no desire at any time on the part of the Highway Commission of the County to conceal any of the work of the Board.

## BRIDGES AND DAMS.

**OAKLAND, CAL.**—Wharf improvements. Cost not stated. Engineer's name not given. Owner, De Fremery Wharf and Land Co., Oakland. The Railroad Commission has granted the De Fremery Wharf and Land Co. permission to bond the company's property for \$110,000 in order that certain improvements to the company's Oakland wharves may be made at once.

**LOS GATOS, SANTA CLARA CO., CAL.**—Bridge, reinforced concrete. Cost not stated. Engineer, County Surveyor, San Jose. Owners, Santa Clara County. Plans have been completed and approved for constructing a reinforced concrete bridge over Los Gatos Creek at the Infirmary Road. The bridge will be of the arch type. Bids are now being taken and will be opened on October 5th. Plans and specifications can be secured from the County Surveyor at San Jose.

**OAK BAY AND PORT TOWNSEND BAY, WASH.**—Canal construction, \$75,000. Engineers, United States Engineers, Burke Bldg., Seattle. Owners, United States Government. Plans have been completed by the United States Engineers for a canal 1,800 feet long, connecting these two bays. Bids for this work are now being taken and will be opened on October 16th. The project also calls for two jetties, each 600 feet long of cross-tied piling, brush and stone. There will also be a 2,000 foot bulkhead. The canal will be 75 feet wide at the bottom and 15 feet deep at low water, and will call for the removal of about 255,000 cubic yards of materials. Plans and specifications together with complete details can be had by addressing the United States Engineers, Burke Bldg., Seattle.

**NICOLAUS, SUTTER CO., CAL.**—Bridge and road construction, \$270,000. Engineer, County Surveyor, Yuba City. Owners, Sutter County. The Sutter County Board of Supervisors has taken up the matter of the proposed Nicolaus bridge, which will connect Yuba City with Sacramento, and urge that early action be taken on the matter. The proposed bridge will cost \$150,000 and a road to connect with the bridge will cost \$120,000.

## Contracts Awarded.

**OLYMPIA, WASH.**—Bank, 2 story and base, reinforced concrete, \$30,000. Architect, W. P. White, Walker Bldg., Seattle. Owners, P. M. Troy and F. W. Stocking. Contractors, Fouts Construction Co., 815 Pike street, Seattle. Contract price, \$20,000.

**SEATTLE, WASH.**—Bulkhead work excavating and cross-tied piles, \$12,460. Engineer, W. J. Roberts, Tacoma. Owners, Inter-counties River Improvement Association. Contractors, Bearance & Cleaver, American Bank Bldg., Seattle. Contract price, \$13,460. The work provides for the following: 250,000 cubic yards of excavation work, 6,000 feet of piles, 30,000 feet of lumber, 7,500 pounds of iron and steel, 2 acres of clearing and grubbing and 600 cords of driftwood removed.

## COURT HOUSES.

**OROVILLE, BUTTE CO., CAL.**—Hall of Records, 2 story and base, reinforced concrete, \$10,000. Architect, Charles S. Kaiser, Mechanics' Institute Bldg., S. F. Owners, Butte County. The building will be designed in the classic style and will be of fireproof construction with reinforced concrete floors, walls and interior partitions of metal lath and hollow tile. Interior will be finished in pine, hardwood and metal. There will be steam heat and a vacuum cleaning plant. Metal furniture and shelves will be specified. Plans also provide for fireproof vaults. Exterior of the building will be faced with cement plaster. Plans are being prepared.

## FACTORIES AND WAREHOUSES.

**SAN JUAN, SAN BENITO CO., CAL.**—Cement plant reconstruction, \$250,000. Engineers, Hunt Engineering Co., Kansas City, Mo. Owners, Old Mission Portland Cement Co. It is probable that the cement plant of the old Mission Portland Cement Co., located at San Juan in San Benito County, will be reconstructed and again put in operation. Frank L. Brown of San Francisco, together with representatives of the Hunt Engineering Co., of Kansas City, Mo., visited the works last week. The Hunt Engineering Co. agrees to install \$250,000 worth of modern machinery and will carry stock in the company.

## FIRE HOUSES AND JAILS.

**SAN FRANCISCO.**—Fire house electric work. Cost not stated. Architects, City Department of Architecture, Temporary City Hall Bldg., S. F. Owners, City and County of San Francisco. Plans have been completed for the installation of a conduit system and other electric work in connection with the building of the central fire alarm station in Jefferson Square. Bids for this work are now being taken and will be opened by the Board of Public Works on September 30th. Plans and specifications can be secured from the Department of Architecture.

## FLATS.

**SAN FRANCISCO.**—Flats, 2 story and base, frame, \$3,000. Architect, none. Owner, John J. Binet Co., 68 Ramona avenue, S. F. The building will be erected on the south side of 23rd street west of Kansas, and has been designed to contain two modern flats of five rooms each. Interiors will be finished in pine and re-dwood with some oak floors. There will be open fire places and tile mantels. The wainscot will be used in the bath rooms and kitchens. Exterior will be covered with rustic and shiplap. Plans are complete and in the hands of the owners who will do the work by Day Labor. Materials are now being purchased.

## GOVERNMENT WORK & SUPPLIES.

### Building, Pearl Harbor.

#### Painting.

The contract for repairs and painting at the U. S. mint, San Francisco, Cal., has been awarded to Wagner Bros. at \$768.

### HALLS AND SOCIETY BUILDINGS.

OAKLAND, CAL.—Auditorium marble and tile work. Cost not stated. Architect, Supervising Architect J. J. Donovan, Oakland. Owners, City of Oakland. Bids opened for this work show Joseph Musto Sons-Keenan Co., S. F., low at \$21,770. Only two other figures were presented. A contract has not as yet been awarded. A complete list of the bids will be found under the heading of Oakland and Alameda County in this issue.

#### Contracts Awarded.

BAKERSFIELD, KERN CO., CAL.—Auditorium, 2 story and base, brick, \$52,000. Architect, Orville L. Clark, Brower Bldg., Bakersfield. Owners, Kern County. Contractors, Trewthitt &

Shields, Fresno. Contract price, \$32,000.

### HOSPITALS.

ELDRIDGE, SONOMA CO., CAL.—Epileptic cottage, 1 story, frame and concrete. Cost not stated. Architect, State Architect George B. McDougall, Sacramento. Owners, State of California. Plans have been completed for an "Epileptic Cottage for Girls," which will be erected at the Sonoma State Home. Construction will be of frame and concrete. Interior will be finished in pine throughout. Exterior of the building will be covered with either shakes or cement plaster on metal lath. Bids will be opened on October 19th. Plans and specifications can be secured from the State Department of Engineering at Sacramento. An official proposal appears in another column of this issue.

### HOTELS.

OAKLAND, CAL.—Hotel and stores, 7 story and base. Class C construction. Cost not stated. Architect, George W. Patton, 2126 Emerson street, Berkeley. Owner, O. J. Meade. The building will be erected at the corner of Clay and Tenth streets and will cover an area of 50 by 100 feet. There will be eight stores on the ground floor besides the hotel lobby. Upper floors will contain in the neighborhood of 110 rooms, a large percentage of which will have private baths. Interior will be finished in pine and hardwood veneer. Some ornamental plaster will be used in the lobby. Patent store fronts will be specified. Plans provide for steam heat, elevator service and a hot water supply. Tile wainscot and composition floors will be used in the bath rooms. Exterior of the building will be faced with pressed brick. Plans are being prepared.

LOS ANGELES, CAL.—Hotel, 4 story and base. Class C construction. Cost not stated. Architects, Bordeaux-Johnson Architectural Co., Ferguson Bldg., L. A. Owner, Patrick Noble. The building will be erected on San Pedro street near Second, covering an area of 50 by 100 feet. There will be the main lobby and two stores on the first floor. Upper floors will contain 72 guest rooms and six baths. Interior finish will be of pine throughout. Plans provide for steam heat, elevator service and a hot water supply. There will be patent store fronts. Exterior of the building will be faced with pressed brick. Plans are complete and figures are being taken.

NORTH BEND, ORE.—Hotel, 4 story and base, brick and steel, \$100,000. Architect, J. E. Tourtellotte, Rothechild Bldg., Portland. Owner's name withheld. The building will be erected on a corner lot having frontages of 92 and 120 feet respectively. There will be five stores besides the hotel lobby, dining room and billiard room on the first floor. Upper three floors will contain in the neighborhood of 80 guest rooms, nearly all of which will have private baths. Interior will be finished in pine and hardwood. There will be steam heat, a passenger elevator and hot water system. Bath rooms will be finished in tile. Patent store fronts will be used. Exterior of the building will be faced with pressed brick. Plans are complete and sub-

figures will be taken at once. The brick and carpentry work will be done by Day Labor.

#### Contracts Awarded.

LOS ANGELES, CAL.—Hotel, 7 story and base, reinforced concrete, \$70,000. Architect, L. L. Jones, Central Bldg., L. A. Owner, Charles W. Howard. Contractors, Hunziker & Berger, Hollingsworth Bldg., L. A. Contract price, \$70,000.

### LIBRARIES.

BERKELEY, ALAMEDA CO., CAL.—Library, 1 story and base, brick and frame, \$10,000. Architect, W. H. Ratcliff, Jr., First National Bank Bldg., Berkeley. Owners, City of Berkeley. The building has been designed in the classic style and will be erected at the corner of San Pablo and University avenues. Interior will be arranged for a large reading room, librarian's office and stack room. There will be a maple floor and metal book stacks. Interior will be finished in pine. A central heating system, probably furnace heat, will be installed. Exterior of the building will be faced with cement plaster. Plans are now being prepared.

SANTA CRUZ, SANTA CRUZ CO., CAL.—Library, 1 story and base, reinforced concrete. Cost not stated. Architect, W. H. Weeks, 75 Post street, S. F. Owners, City of Santa Cruz. The building will be erected in Garfield Park, and has been designed in the classic style. There will be two large reading rooms, office and stack and work rooms. Interior finish will be largely of pine with some hardwood veneer. Maple floors will be used. A central heating system will be installed. Metal book shelves will be specified. Exterior of the building will be faced with cement plaster. Plans are complete and figures are being taken. Bids will be opened on October 5th. Plans can be secured from the architect.

### PANAMA-PACIFIC EXPOSITION WORK.

SAN FRANCISCO — Telephone exchange. Cost not stated. Engineer, Director of Works, Service Bldg., S. F. Owners, Panama-Pacific International Exposition Co. Plans are complete and figures will be opened on September 29th for furnishing and installing a complete telephone exchange system in the Food Products Building at the Exposition Grounds. This work was formerly figured but all bids received were regarded in excess of the cost and were rejected. Plans and specifications can be secured from the office of the Director of Works. An official proposal appears in another column of this issue.

SAN FRANCISCO — State exhibit buildings, 2, 1 story, frame and plaster. Cost not stated. Architect, State Architect R. B. Spencer, Jackson, Miss. Owners, States of Alabama and Mississippi. Commissioners from both Mississippi and Alabama are in the city completing arrangements for the construction of the buildings to be erected at the Panama-Pacific International Exposition. R. B. Spencer is the State Architect of Mississippi. Each of these States will expend in the neighborhood of \$25,000 for their buildings.

## RAILROAD CONSTRUCTION AND EQUIPMENT.

SEATTLE, WASH.—Railroad tunnel, \$2,200,000. Engineer's name not given. Owners, Bridge Belt Railroad and Navigation Co., represented by A. P. Gillies, Henry Bldg., Seattle. Councilman Fitzgerald will introduce an ordinance in the city council granting a franchise for the Bridge Belt Railway and Navigation Co. to construct a tunnel under the city. The ordinance is now in the councilman's possession, and, after passage, work on the structure will not be delayed. The ordinance calls for the construction of a concrete lined tunnel from Virginia and Elliott, along Elliott to Cedar, thence to Clay, to Broad and along Broad to Lake Union. The tunnel will be either 17 by 22 feet or 20 by 25 feet in diameter, lined with concrete and will cost \$500,000 per mile, making a total cost for the three miles over \$2,000,000.

## RESIDENCES.

SAN FRANCISCO—Residence, 2 story and base, frame, \$5,000. Architect, none. Owner, P. P. Quinn, 110 Jessie street, S. F. The dwelling will be erected on the east side of 10th avenue north of Fulton, and has been designed for a seven-room house with bath. Interior will be finished in pine, redwood and some hardwood veneer. Hardwood floors will be used in the living room, dining room and reception hall. There will be furnace heat and open fire places. Mantels will be of tile or brick. An automatic water heater will be installed. Bath room will have tile wainscot. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor. Materials are now being purchased.

SAN FRANCISCO—Residence, 2 story and base, frame, \$2,500. Architect, none. Owner, M. A. Donovan, 430 Sanchez street, S. F. The dwelling will be erected on the west side of 21st avenue south of California, and has been designed to contain six rooms and bath. Interior finish will be of pine and redwood. Hardwood floors will be used in the two principal rooms. There will be an open fire place in the living room with tile or brick mantel. The wainscot will be used in the bath room. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor.

SAN FRANCISCO—Residence, 2 story and base, frame, \$3,000. Architect, none. Owner, Ernest W. Elliott, 155 Alma street, S. F. The dwelling will be erected on the east side of 41st avenue near Balboa street, and has been designed to contain seven rooms and bath. Interior will be finished in pine and redwood with some elm panels. Hardwood floors will be used in the principal rooms. There will open fire places and tile or brick mantels. Bath room will be finished in tile. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor.

OAKLAND, CAL.—Bungalows, 2, 1 story and base, frame, \$3,000 each. Ar-

chitect, Clay N. Burrell Albany Bldg., Oakland. Owner, Mr. Charleston. These two houses will be erected at the corner of Fruitvale avenue and Claremont street, and each has been designed to contain six rooms and bath. Interiors will be finished in pine, redwood and elm panels. Hardwood floors will be used in the living rooms, dining rooms and reception halls. There will be furnace heat and open fire places. Mantels will be of tile or brick. Bath rooms will be finished in tile. Automatic water heaters will be installed. Exteriors will be covered with cement plaster on metal lath. Plans are being prepared and when complete the work will be done by Day Labor.

PIEDMONT, ALAMEDA CO., CAL.—Residence, 2 story and base, frame, \$6,000. Architect, Charles W. McCall, Central Bank Bldg., Oakland. Owner, Mr. Thayer. The dwelling will be erected on Mountain avenue and has been designed for an eight-room house with two baths and sleeping porches. Interior finish will be of pine and white enamel. Hardwood floors will be used in the living room, dining room and reception hall. There will be furnace heat and open fire places. Mantels will be of tile or brick. An automatic water heater will be installed. Bath rooms will be finished in tile. Exterior of the house will be covered with cement plaster on metal lath. Plans are now being prepared.

OAKLAND, CAL.—Residence, 2 story and base, frame, \$5,000. Architect, Leo L. Nichols, First Trust Bldg., Oakland. Owner, T. W. Moran. The dwelling will be erected on the south side of Perry street near Crescent, and has been designed for an eight-room house with bath. Interior will be finished in pine and redwood with some white enamel. Hardwood floors will be used in the principal rooms. Plans provide for furnace heat and open fire places. Mantels will be of tile or brick. An automatic water heater will be installed. Bath room will be finished in tile. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and figures are now being taken by the architect.

OAKLAND, CAL.—Residence, 2 story and base, frame, \$5,000. Architects, Hutchinson Bros., 470 13th street, Oakland. Owner's name withheld. The dwelling will be erected in the Mount Aarat Tract and has been designed to contain seven rooms and bath. A garage will be erected in the rear of the property. Interior of the house will be finished in pine and redwood. Hardwood floors will be used in the principal rooms. There will be furnace heat and open fire places. Mantels will be of tile. An automatic water heater will be installed. Bath room will be finished in tile. Exterior of the house will be covered with cement plaster on metal lath. Plans are now being prepared.

BERKELEY, ALAMEDA CO., CAL.—Residence, 2 story and base, frame, \$2,000. Architects, Milwain Bros., Delger Bldg., Oakland. Owner, C. M. Hodgkin. The dwelling will be erected on San Bonito Road near Spruce street, and has been designed to contain seven rooms, bath and sleeping porch. Interior finish will be largely of pine and redwood. Hardwood floors will be used in the living room, dining room and reception hall. Plans pro-

vide for furnace heat and open fire places. Mantels will be of tile or brick. The wainscot and floors will be used in the bath room. An automatic water heater will be installed. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are now complete and figures are being taken by the Architects.

STOCKTON, SAN JOAQUIN CO., CAL.—Bungalows, 2, 1 story and base, frame, \$2,500 each. Architect, Chester H. Miller, Dalziel Bldg., Oakland. Owner, Chester H. Miller. These dwellings will each contain six rooms and bath and will be erected in the Yosemite Terrace Tract. Interior will be finished in pine and redwood. Some hardwood floors will be used. Each living room will have a large open fire place and tile or brick mantel. The wainscot will be used in the bath rooms and kitchens. Exteriors will be covered with cement plaster on metal lath. Plans are being prepared and when complete the work will be done by Day Labor.

AYENA, SAN JOAQUIN CO., CAL.—Bungalow, 1 story and base, frame, \$2,000. Architect, Chester H. Miller, Dalziel Bldg., Oakland. Owner, Roy H. Fish. The dwelling has been designed for a six-room house with bath, and will be finished entirely in pine and redwood. Some oak floors will be used. There will be a large open fire place and tile mantel in the living room. Bath room and kitchen will have tile wainscot. Exterior of the house will be covered with rustic. Plans are being prepared and when complete the work will be done by Day Labor.

SAN JOSE, SANTA CLARA CO., CAL.—Bungalow, 1 story and base, frame, \$2,000. Architect, Charles McKenzie, Bank of San Jose Bldg., San Jose. Owner, A. Lesta. The dwelling will be erected on George street near Poplar, and has been designed to contain five rooms and bath. Pine and redwood interior trim will be used throughout. There will be an open fire place and tile or brick mantel. Bath room will be finished in tile. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor.

SAN JOSE, SANTA CLARA CO., CAL.—Bungalow, 1 story and base, frame, \$1,500. Architect, none. Owner, Mrs. R. B. Harner, 178 North 4th street, San Jose. The dwelling will be erected on North 4th street, and has been designed for a five-room house with bath. Interior will be finished in pine and redwood with some hardwood floors. There will be an open fire place and tile mantel. Exterior of the dwelling will be covered with rustic and cement plaster. Plans are in the hands of the owner who will do the work by Day Labor.

SANTA CRUZ, SANTA CRUZ CO., CAL.—Residence, 1 story and base, frame, \$2,000. Architect, Clay N. Burrell, Albany Bldg., Oakland. Owner, D. S. Dunphy. This dwelling has been designed for a summer home and will contain five rooms and bath. Interior will be finished in pine and redwood. Some hardwood floors will be used. There will be open fire places and tile or brick mantels. Bath rooms and kitchen will have tile wainscot. An automatic water heater will be installed. Exterior of the house will be

covered with shingles. Plans are being prepared.

**SAN FRANCISCO**—Residence, 2 story and base, frame, \$2,500. Architect, none. Owners, Oscar Heyman & Bro., 712 Market street, S. F. The dwelling will be erected on the south side of Lincoln way east of 21th avenue, and has been designed to contain six rooms and bath. Interior will be finished in pine and redwood. Some hardwood floors will be used. There will be an open fire place and tile or brick mantel. Tile wainscot will be used in the bath room and kitchen. Exterior of the house will be covered with ship-lap. Plans are complete and in the hands of the owners who will do the work by Day Labor.

**PIEDMONT, ALAMEDA CO., CAL.**—Residence, 1½ story and base, frame, \$3,500. Architect, Claude B. Barton, First Trust Bldg., Oakland. Owner, H. P. Houston. The dwelling has been designed to contain six rooms, bath and sleeping porch, and will be erected in Piedmont Manor. Interior will be finished in pine, redwood and white enamel. Hardwood floors will be used in the principal rooms. There will be furnace heat and open fire places. Mantels will be of tile. Tile wainscot will be used in the bath room. An automatic water heater will be installed. Exterior of the house will be covered with cement plaster on metal lath. Plans are being prepared.

**SACRAMENTO, CAL.**—Bungalow, 1 story and base, frame, \$2,000. Architect, none. Owner, G. T. Landis, 2517 26th street, Sacramento. The dwelling will be erected on Y street and has been designed to contain five rooms and bath. Interior finish will be of pine and redwood. Some oak floors will be used. There will be an open fire place and tile mantel. Exterior of the dwelling will be covered with rustic and cement plaster. Plans are complete and in the hands of the owner who will do the work by Day Labor.

**PORTLAND, ORE.**—Residence, 2½ story and base, brick and frame, \$12,000. Architects, Whitehouse & Foulhoux, Wilcox Bldg., Portland. Owner, O. B. Stubbs. The dwelling will be erected at the corner of 22rd and Stephens streets and will be designed in the Colonial style. Interior finish will be of pine and hardwood with hardwood floors in the principal rooms. Chambers will be finished in white enamel. There will be steam heat and a hot water system. Open fire places and tile or brick mantels will be used. Bath rooms will be finished in tile and equipped with showers. A garage will be erected on the rear of the lot. Exterior of the dwelling will be covered with a veneer pressed brick and cement plaster. Plans are complete and figures are being taken.

**SAN FRANCISCO**—Residence, 2 story and base, frame, \$2,500. Architect, none. Owner, Walter Greig, 2907 Mission street, S. F. The dwelling will be erected on Newton street and has been designed to contain six rooms and bath. Pine and redwood interior finish will be used. There will be an open fire place in the living room. Mantel will be of tile. Tile wainscot will be used in the bath. Exterior of shingles and rustic. Plans are complete and in the hands of the owner who will do the work by Day Labor.

**SAN FRANCISCO**—Residence, 2 story

and base, frame, \$4,000. Architect, Joseph A. Leonard, 85 Corritos avenue, S. F. Owners, Urban Realty Co., for Karl Dietsenbach. The dwelling will be erected on Urbano Drive and has been designed to contain seven rooms bath and sleeping porch. Interior will be finished in pine and hardwood. Hardwood floors will be used in the living and dining rooms. There will be furnace heat and open fire places. Mantels will be of tile or brick. Bath room will have tile wainscot and floor. An automatic water heater will be installed. Exterior of the house will be covered with shingles and klinker brick veneer. Plans are complete and the work will be done by Day Labor. Materials are now being purchased by the architect.

**SAN FRANCISCO**—Residence, 2 story and base, frame, \$3,500. Architect, none. Owner, Peter D. Polodoni, 638 Cole street, S. F. The dwelling will be erected on the east side of Belvedere, south of Parnassus avenue, and has been designed for a seven-room house with bath. Interior will be finished in pine and redwood. Hardwood floors will be used in the living room, dining room and reception hall. Plans provide for furnace heat and open fire places. Mantels will be of tile or brick. Bath room will have tile wainscot. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor. Materials are now being purchased.

#### Contracts Awarded.

**PORTLAND, ORE.**—Residence, 2 story and base, brick and tile, \$12,000. Architect's name not given. Owner, H. F. Kalvelage. Contractor, A. W. Horn, 690 Market street, Portland. Contract price, \$12,000.

#### SCHOOLS.

**BURLINGAME, SAN MATEO CO., CAL.**—School, 1 story and base, frame and plaster, \$25,000. Architects, Thomas Edwards and Ernest Norberg, Bank Bldg., Burlingame. Owners, Burlingame School District. A note has been sent out stating that the opening of bids for this work has been postponed until September 22nd. A complete list of the figures will be found in the next issue of the Building and Industrial News.

**PALO ALTO, SANTA CLARA CO., CAL.**—Gymnasium, 1 story and base, brick and steel. Cost not stated. Architects, Bakewell & Brown, 25 Kearny street, S. F. Owners, Leland Stanford, Jr., University. Plans for the Men's gymnasium to be erected on the Campus of the University have been completed. The building will have a frontage of 310 feet and will vary in depth. Interior will be finished in pine with maple floors. There will be complete mechanical and gymnasium equipment. A large swimming tank will be installed. Steam heat and vacuum cleaning are specified. Exterior of the building will be faced with pressed brick. Plans are now out for figures.

**FRESNO, FRESNO CO., CAL.**—School, 2 story and base, brick and reinforced concrete. Cost not stated. Architects, Coates & Traver, Rowell

Bldg., Fresno, and Head Bldg. S. F. Owners, Fresno School District. The building will be the largest of the new Fresno schools which are being erected out of the \$1,500,000 bond issue, and will be erected in the Webster District. Plans show a modern school containing fifteen class rooms, principal's office, teachers' rooms, assembly hall and domestic science and manual training departments. Interior will be finished in pine with maple floors. There will be a steam heating system, complete oil burning equipment, program clocks and vacuum cleaning system. Exterior of the building will be faced with cement plaster. Plans are complete and figures are being taken. Bids will be opened on October 23rd. Plans and specifications can be secured from the architects.

**PORTLAND, ORE.**—Parish school, 2 story and base, brick, \$25,000. Architects, Whitehouse & Foulhoux, Wilcox Bldg., Portland. Owners, Roman Catholic Church. The first building of a group to be erected at 17th and Davis streets will be a combination school and parish house, covering an area of 45 by 129 feet. Interior will be finished in pine and hardwood with some hardwood floors. There will be a central heating system, probably steam heat. Modern school plumbing will be used. Exterior of the building will be faced with pressed brick. Plans are complete and figures for this work are now being taken.

**SAN BERNARDINO, SAN BERNARDINO CO., CAL.**—School group, 5, 1 and 2 story, brick and hollow tile, \$240,000. Architect, Norman F. Marsh, Broadway Central Bldg., L. A. Owners, San Bernardino Union High School District. The Administration building will be 152 by 70 feet, with a rear wing, 72 by 130 feet, to contain the auditorium; the science hall and classics building will each be 72 by 132 feet, home economics building, 70 by 112 feet, physical culture building will be 60 by 120 feet, and manual training building, 157 by 112 feet. The latter building will also contain a central building which will be one story and a mezzanine floor, and the other buildings each two stories in height. There will be brick and hollow tile exterior walls, cement plaster or pressed brick exterior finish, asbestos, slate or tile roofing in the three main buildings, composition roofs on the others. There will be pine trim, pine and maple floors, lavatories, heating system, etc. Plans are complete and figures are being taken. Bids will be opened on October 17th. Separate bids will be received as follows: On the general work, plumbing, painting, heating and ventilating, electric wiring and program clocks.

**SAN FRANCISCO**—Mission house, 3 story and base, frame, \$10,000. Architect, W. J. Wythe, Central Bank Bldg., Oakland. Owners, Board of Home Missions of the Methodist Episcopal Church. The building will be erected on Pine street near Larkin, and will contain class rooms and living apartments. Interior will be finished in pine throughout. There will be a central heating system and hot and cold running water. Exterior of the building will be covered with rustic. Plans are complete and figures are now being taken for the work.

# SEWERS, STREET WORK & WATER SYSTEMS.

CALIFORNIA.—Pumping plants, 17, 1 story, steel and corrugated iron. Cost not stated. Engineers, Sanderson & Porter, Nevada Bank Bldg., S. F. Owners, American Pipe Line Co., 313 Sansome street, S. F. Seventeen pumping plants will be erected along the line of the American Pipe Line from the Coalinga oil fields to Martinez. These buildings will have a complete steel frame, cement floor and exterior covered with corrugated iron. The equipment will be designed for raising the pressure and heating the oil as carried through the line.

## STORES AND OFFICES.

BERKELEY, ALAMEDA CO., CAL.—Stores, 1 story and base, brick and frame, \$5,000. Architect, James W. Plachek, Acheson Bldg., Berkeley. Owner, J. E. Wheeler. The building will be erected on Adeline street near Ashby, and will cover an area of 30 by 68 feet. There will be several retail stores. Interiors will be finished in pine. Patent store fronts and plate glass windows will be installed. Exterior will be covered with pressed brick and cement plaster. Plans are complete and figures are being taken.

## THEATRES.

SAN FRANCISCO.—Theatre, 1 story and base, Class A construction. Cost not stated. Architects, Rousseau & Rousseau, Monadnock Bldg., S. F. Owner's name withheld. The building will be erected on Van Ness avenue near Sacramento. The building will be a fireproof structure with a seating capacity of 1,500 people. Interior will be finished in ornamental plaster. There will be special electric work and a modern system of ventilation. Exterior will be faced with cement plaster. Plans are nearly complete and figures will be called for shortly.

SPOKANE, WASH.—Theatre alteration. Class A building, \$60,000. Architect, E. Marcus Pretica, Empire Bldg., Seattle. Owner, Alex. Pantagos. The entire front of the building will be torn out and faced with pressed brick and terra cotta. The interior will also be plastered and decorated. A large amount of ornamental plaster will be used.

## AT THE COST OF ETERNAL PAIN.

The World Will Never Recover From The Effects of Europe's War.

From Collier's Weekly.  
Now Armageddon has a real meaning—now we have roaring in our ears the thunder of the captains and the shouting of a continent in conflict. If this be not Armageddon, we shall never suffer that final death grip of the nations. "For they are the spirits of devils, working miracles, which go forth unto the kings of the earth and of the whole world, to gather them to the battle of that great day of God Almighty."

Civilization itself stands in jeopardy. The nations which are at war are the custodians of enlightenment for the earth, and they are entrapped into

treason to their trust. For, after all has been said on the side of the virtues developed by war, we know that these peoples will not be the same peoples after this tornado has swept them. For the destruction of a Galveston, the shaking and burning of a San Francisco, the overwhelming of a Dayton, the wrecking of an Omaha or the inundating of a Johnstown there is a remedy in mutual help and intensified industry and enterprise. Those calamities come from man's defeat at the hands of Nature; but this infernal thing in Europe is man's defeat of himself. The index number of everything good will stand lower after it is over. The pressure gauge of efficiency will fall when it is over. Indeed, it will never be over.

The long climb to the uplands of the soul, toward which mankind struggles, is not gained by sudden leaps; and a long, tragic slip like this must be regained by effort which would otherwise be unnecessary. A thousand years from now the world will be suffering morally and spiritually from the effects of this unthinkable thing which has come upon us. We may have gained heights, but they will be lower than the levels upon which we should have stood if the villain Berchthold had not thought he could bluff the imbecile Nicholas.

How will it affect the United States? Morally we shall suffer with the rest of the world. We shall not be so deeply imbued as we might be if we plunged our own hands in the blood of our fellows as our poor brethren in Europe are doing; but we, too, shall be degraded by the blood lust turned loose upon the world's psychology. No man liveth unto himself alone nor dieth unto himself alone. We are members one of another. More than ever before in the world's history are the nations members one of another. These peoples are our fathers and mothers, as well as our brethren. Every drop of blood shed is blood flowing in the veins of Americans. From the breast of every man in arms there run the threads of consanguinity to us. We shall feel thrilling, from man to man and from family to family, the hatreds let loose across the water. This is a part of the spiritual penalty we shall pay as members of the white race for this white man's suicidal war.

## NEW SUPERINTENDENT OF THE BONDING DIVISION OF THE ROYAL INDEMNITY COMPANY.

The Royal Indemnity Company has appointed Jesse M. Whited as Superintendent of the Bonding Division with offices in the Royal Insurance Building, Pine and Sansome streets.

The Royal Indemnity Company is as solid as the "Rock of Gibraltar," and any business intrusted in Mr. Whited's care will be carefully and promptly attended to.

## AT NAPOLEON'S TOMB.

"A little while ago I stood by the grave of Napoleon—a magnificent tomb of gilt and gold, fit almost for a deity dead—and gazed upon the sarcophagus of rare and nameless marble, where rest the ashes of that restless man. I leaned over the balustrade and thought about the career of the greatest soldier of the modern world.

I saw him walking upon the banks of the Seine, contemplating suicide. I saw him at Toulon—I saw him putting down the mob in the streets of Paris—I saw him at the head of the army of Italy—I saw him crossing the bridge of Lodi with the tricolor in his hand—I saw him in Egypt in the shadow of the pyramids—I saw him at Marengo and Ulm and Austerlitz. I saw him in Russia, where the infantry of the snow and the calvary of the wild blast scattered his legions like winter's withered leaves. I saw him at Leipzig in defeat and disaster—driven by a million bayonets back upon Paris—clutched like a wild beast—banished to Elba. I saw him escape and retake an empire by the force of his genius. I saw him upon the frightful field of Waterloo, where Chance and Fate combined to wreck the fortunes of their former King. And I saw him at St. Helena, with his hands crossed behind him, gazing out upon the sad and solemn sea.

"I thought of the orphans and widows he had made—of the tears that had been shed for his glory, and of the only woman who ever loved him, pushed from his heart by the cold hand of ambition. And I said I would rather have been a French peasant and worn wooden shoes. I would rather have lived in a hut with a vine growing over the door, and the grapes growing purple in the amorous kisses of the autumn sun. I would rather have been that poor peasant, with my loving wife by my side, knitting, as the day died out of the sky—with my children upon my knees and their arms about me—I would rather have been that man, and gone down to the tongueless silence of that dreamless dust, than to have been that imperial impersonation of force and murder known as Napoleon the Great."—Robert G. Ingersoll.

## AFTER 100 YEARS.

It is an interesting fact that just one hundred years ago this month the Congress of Vienna met to remake the map of Europe after it had been unmade by Napoleon. It is also still more interesting and much more important to be reminded that of all the things which come out of that Congress of Vienna, the only one which has lasted, because the only one founded in justice and in the real interest of humanity, is the American Monroe Doctrine. The dominant element in that Congress of Vienna was the so-called holy alliance of the emperors of Russia and Austria and the king of Prussia, which concealed behind plausible pretexts its real purpose of antagonizing the growth of democracy throughout the world. Most of the purposes of the holy alliance defeated themselves, but one of the things which it called forth was the Monroe Doctrine, whose intent was to keep the holy alliance and its plots out of the American continent. Everything else in the Congress of Vienna finally went to pieces and now, a hundred years later, everything left of all the successors of that congress is now going to pieces and the Monroe Doctrine, its incidental offshoot, is the only guarantee of the only peace now left in the world.—Fresno Republican

# PROPOSALS

## Bids Wanted

### PROPOSALS FOR CANAL WORK.

**CANAL WORK**—Department of the Interior, U. S. Reclamation Service, Washington, D. C.—Sealed proposals will be received at the office of the United States Reclamation Service, Malta, Mont., until 2 o'clock p. m. **October 13, 1914**, for the construction of Nelson reservoir outlet canals, dikes and controlling works, involving about 67,500 cubic yards of earth excavation, 1,200 square yards of rock paving and 50 cubic yards of reinforced concrete. The work is situated about 1½ miles north of Ashfield Station on the main line of the Great Northern Railway. For particulars address the United States Reclamation Service, Washington, D. C., Great Falls, Mont. or Malta, Mont. **F. H. NEWELL**, director.

### PROPOSALS FOR CANAL SUPPLIES.

**PANAMA CIRCULAR 568**—Proposals for Steel Wire Cable,FILES, Drill Sleeves, Stock and Pins, Taps, Twist Drills, Hoec, Metallic Tapes, Manila Rope, Rubber Packing, Cotton Sheet- ing, Cotton Canvas, Coal Tar, Linseed Oil, Japan Drier, Orange Shellac, Varn- ish, Burnt Umber and Acetone.—Sealed proposals will be received at the office of the general purchasing officer, the Panama Canal, Washington, D. C., until **10:30 a. m. September 30, 1914**, at which time they will be opened in public for furnishing the above mentioned arti- cles. Blanks and general information relating to this circular (No. 568) may be obtained from this office or the of- fice of the assistant purchasing agent, 1039 North Point street, San Francisco, Cal.; also from the engineer offices in the following cities: Seattle, Wash.; Los Angeles, Cal.; F. C. BOGGS, major, corps of engineers, U. S. army, general purchasing officer.

### PROPOSALS FOR WATER HEATER.

**WATER HEATER**—Sealed proposals indorsed "Proposals for Filtering Feed-Water Heater" will be received at the bureau of yards and docks, Navy Department, Washington, D. C., until **11 o'clock a. m. October 3, 1914**, and then and there publicly opened, for furnishing and installing feed- water heater at the naval hospital, Las Animas, Colo. Specifications may be obtained on application to the bureau. **H. R. STANFORD**, chief of bureau.

### PROPOSALS FOR COAL PLATFORM.

**COAL PLATFORM AND FLUME**—Sealed proposals indorsed "Proposals for Extension to Coal Platform and Flume" will be received at the bureau of yards and docks, Navy Department, Washington, D. C., until **11 o'clock a. m. October 10, 1914**, and then and there publicly opened, for extension to coal platform and flume at the naval coal depot, San Diego, Cal. Plans and spec- ifications may be obtained on applica- tion to the bureau or to the officer in charge, naval coal depot, San Diego, Cal. **H. R. STANFORD**, chief of bureau.

### PROPOSALS FOR STEEL.

**STEEL**—U. S. Engineer Office, Room 707, Army Building, New York, N. Y.—Sealed proposals for structural steel for Philippine Island will be received at this office until **12 o'clock m. Sep- tember 28, 1914**, and then publicly opened and read in accordance with U. S. W. ROESSLER, colonel, engineers.

### PROPOSALS FOR ENGINES.

**ENGINES** Sealed proposals will be received at the office of the light house commission, San Francisco, Cal., until **2 o'clock p. m. September 29, 1914**, and

then opened, for furnishing duplicate internal combustion engines, with direct connected air compressors, about 30 horsepower each. Blank proposals and particulars may be obtained by addressing the light house inspector, San Francisco, Cal.

### NOTICE TO CONTRACTORS.

**SEALED BIDS** will be received by **W. F. McClure, State Engineer, Capitol Building, Sacramento, California**, up to and including **12 o'clock, noon, Mon- day, October 19th, 1914**, said bids then and there to be publicly opened and read for furnishing all plant, mate- rials, and labor, and doing the work required for the construction and erec- tion of a building to be known as **Cottage for Epileptic Girls, Sonoma State Home, Eldridge, California**, in accord- ance with the plans and specifications therefor, copies of which may be ob- tained on application to the State De- partment of Engineering, Sacramento, California.

Such bids will be received for the Entire Work, and must be submitted on forms prepared and furnished by the State Department of Engineering. Cash, a bidder's bond, or a certified check in the sum of ten per centum (10%) of the amount of the bid must accompany each bid.

A deposit of **Five (\$10) Dollars** will be required on plans and specifications, the deposit to be returned immediately on the return of the plans and spec- ifications to the State Department of Engineering at Sacramento, Califor- nia, in good condition.

The State Department of Engineer- ing reserves the right to reject any and all bids and to waive any irregu- larity in any bid received.

All bids must be addressed to **W. F. McClure, State Engineer, Sacramento, California**, and plainly marked on the envelope: "Proposals for Cottage for Epileptic Girls, Sonoma State Home, Eldridge, California."  
(Signed) **W. F. McCLURE,**  
State Engineer.

### STATE OF CALIFORNIA.

### DEPARTMENT OF ENGINEERING.

### CALIFORNIA HIGHWAY COMMISSION.

### NOTICE TO CONTRACTORS.

**SEALED PROPOSALS** will be received at the office of the California High- way Commission, 315 Forum Building, Sacramento, Cal., until the times here- inafter noted, at which times they will be publicly opened and read, for con- struction in accordance with the spec- ifications therefor, to which special reference is made, portions of State Highway as follows:

**October 5, 1914.**  
**Humboldt County**, from Shively to **Jordan Creek (I-Hum-1-D)**, about 2.7 miles in length, to be graded.

**Humboldt County** from Loloita to **Patrice (I-Hum-1-D)**, about 4.5 miles in length, to be graded.

**Alameda County** from the easterly county boundary to Altamont (IV-Ma- 3-A), about 3.9 miles in length, to be built of Portland cement concrete.

**San Luis Obispo County** from San Luis Obispo Creek to Cuesta (V-S. L. O 2-D), about 3.6 miles in length, to be graded.

**Santa Barbara County** from Zaca Station to Los Alamos (V-S. B-2-C), about 8.7 miles in length, to be built of Portland cement concrete.

**Imperial County** from Coyote Creek to Coyote Wells (VII-Imp-12-A), about 6.0 miles in length, to be built of Port- land cement concrete.

**October 23, 1914.**  
**San Luis Obispo County** from Ana- tozo Creek to Paso Robles (V-S. L. O 2-D), about 10.0 miles in length to be built of Portland cement concrete.

**Sacramento County** from Folsom to

the easterly county boundary (III-Sac- 11-A), about 8.5 miles in length, to be built of Portland cement concrete.

**Solano County** from Vacaville to Ba- tavia (III-Sol-7-D), about 8.2 miles in length, to be built of Portland cement concrete.

**Santa Barbara County** from Divide to Orcutt (V-S. B-2-A), about 3.6 miles in length, to be built of Portland cement concrete.

**Santa Barbara County** from Stony Creek to El Capitan Creek (V-S. B-2- G & I), about 10.2 miles in length, to be graded.

Plans may be seen, and forms of proposal, bonds, contract, and specifi- cations may be obtained at the said office, and they may be seen at the of- fices of the Division Engineers at Los Angeles and San Francisco, and at the office of the Division Engineer of the division in which the work is situated. The Division Engineers' offices are lo- cated at Willets, Dunsmuir, Sacra- mento, San Francisco, San Luis Obispo, Fresno, and Los Angeles.

No bid will be received unless it is made on a blank form furnished by the Commission. The special attention of prospective bidders is called to the "Notice to Contractors" annexed to the blank form of proposal, for full di- rections as to bidding, quantities of work to be done, etc.

The Department of Engineering re- serves the right to reject any or all bids, or to accept the bid deemed for the best.

**CHARLES D. BLANEY,**  
**NEWELL D. DARLINGTON,**  
**CHARLES F. STERN,**  
California Highway Commission.  
**AUSTIN B. FLETCHER,**  
Highway Engineer.  
**CHARLES C. CARLETON,**  
Acting Secretary.

Dated Sept. 2, 1914.  
\*Sept. 10-17-24, Oct. 1

### NOTICE TO CONTRACTORS.

### PANAMA-PACIFIC INTERNATIONAL EXPOSITION.

**SEALED PROPOSALS** will be received by the Buildings and Grounds Com- mittee of the Panama-Pacific Interna- tional Exposition Company at Room 213, in the Service Building, Fillmore and Chestnut Streets, San Francisco, California, at **9:00 A. M., Tuesday Sep- tember 29, 1914**, for **Constructing Telephone Exchange, Food Products Building**, in accordance with plans and specifications on file in the office of the Director of Works.

Each proposal must be accompanied by a certified check payable to the order of the Panama-Pacific Interna- tional Exposition Company in the sum of ten (10) per cent of the amount of bid, or the same will not be considered. When the award of contract is made all checks will be returned to the res- pective bidders, except that filed with the accepted proposal or bid, which check will be returned upon the suc- cessful bidder, signing the contract and filing the required bond. A bond in the sum of fifty (50) per cent of the contract price will be required for the faithful performance of the contract; the sureties thereon must be satisfac- tory to the Buildings and Grounds Committee of the Panama-Pacific In- ternational Exposition Company.

Progressive payments will be made. The right is reserved to reject any and all bids and to waive technical de- fects if in the interest of the Ex- position Company.

Plans and specifications for the work may be obtained from the Di- rector of Works, Room 207, Service Building, Fillmore and Chestnut Streets, San Francisco, by depositing \$10.00, which amount will be refunded to contractors submitting bona fide bids. All persons taking out plans and failing to submit bona fide bids will forfeit the deposit of Ten Dollars

W. R. BRODE, Pres. LOUIS R. HOLM, Sec. R. J. BRODE, Vice-Pres.

**BRODE IRON WORKS**

Established 1886—Incorporated 1913

Tel. Kearny 2464.

Fabricators and Contractors of Structural Steel and Ornamental Iron Work

Office &amp; Works: 31-37 Hawthorne St., bet. Howard &amp; Folsom Sts., San Francisco, Cal.

to the Exposition Company.

By order of the Buildings and Grounds Committee.

WILLIAM H. CROCKER,  
Chairman. (\*)**NOTICE TO CONTRACTORS.**

SEALED bids will be received by W. F. McClure, State Engineer, Capitol Building, Sacramento, California, up to and including 12 o'clock, noon, Thursday, September 24, 1914, said bids then and there to be publicly opened and read for furnishing all plant, materials, and labor and doing the work required for the construction and erection of buildings to be known as "Hospital Cottages" and "Typical Cottages Nos. 1 and 2," California School for Girls, Ventura, California, in accordance with the plans and specifications therefor, copies of which may be obtained on application to the State Department of Engineering, Sacramento, California.

Said bids will be received for the Entire Work, and must be submitted on forms prepared and furnished by the State Department of Engineering. Cash, a bidder's bond, or a certified check in the sum of ten per centum (10%) of the amount of the bid must accompany each bid.

A deposit of fifteen (\$15.00) Dollars will be required on plans and specifications, the deposit to be returned immediately on the return of the plans and specifications to the State Department of Engineering, at Sacramento, California, in good condition.

The State Department of Engineering reserves the right to reject any and all bids and to waive any informality in any bid received.

All bids must be addressed to W. F. McClure, State Engineer, Sacramento, California, and plainly marked on the envelope: "Proposal for 'Hospital Cottages' and 'Typical Cottages Nos. 1 and 2,' California School for Girls, Ventura, California."

(Signed) W. F. MCCLURE,  
State Engineer. (\*)**PROPOSALS FOR WHARF AND SHED**

WHARF AND SHED—Sealed proposals Indorsed "Proposals for Wharf and Wharf Shed" will be received at the bureau of yards and docks, Navy Department, Washington, D. C., until 11 o'clock a. m. September 26, 1914, and then and there publicly opened, for a wharf and wharf shed at the nava' torpedo station, Puget Sound, Wash. Plans and specifications may be obtained on application to the bureau or to the commandant of the navy yard, Bremerton, Wash. H. R. STANFORD, chief of bureau.

**LUMBER PRODUCTION IN 1913.**

The production of lumber in the United States in 1913 was about three-quarters of a billion board feet less than in 1912, according to the official figures just issued by the United States department of agriculture.

In 1913, 21,591 mills reported a production of 38,387,069,000 board feet, as against 39,154,414,000 feet reported by 26,649 mills in 1912.

Washington heads the list with a cut of slightly more than four and one-half billion feet. California is thirteenth, with a production of 1,183,880,000 feet.

Timber to the amount of 57,607,000 board feet, valued at \$121,012.58, was cut from the national forests in California during the fiscal year ending June 30, 1914.

Of this amount 8,416,000 board feet was granted free to local residents for

domestic use, and 593,000 board feet cut by settlers and farmers for use in developing their farms and homesteads. The latter was sold at rates of 25 cents per cord or 50 cents per thousand board feet, which represents the actual cost to the forest service of administering the sales. The remainder of the timber cut—amounting to 48,598,000 board feet, was sold for the general market at commercial rates.

The total cut and value from each of the nineteen national forests within the State was as follows:

Angeles	1,411,000	\$ 2,293.08
California	1,151,000	2,402.59
Cleveland	165,000	232.22
Eldorado	1,126,000	2,435.59
Inyo	1,896,000	4,249.09
Kern	1,118,000	2,041.12
Klamath	1,880,000	2,120.02
Lassen	1,054,000	2,751.62
Modoc	3,760,000	7,203.98
Mono	684,000	2,199.35
Monterey	280,000	986.22
Plumas	8,491,000	26,137.44
Santa Barbara	243,000	1,058.06
Sequoia	2,407,000	4,534.14
Shasta	6,615,000	13,241.76
Sierra	8,482,000	14,538.98
Stanislaus	3,222,000	6,964.50
Tahoe	11,081,000	20,741.73
Trinity	2,438,000	4,551.99

Totals ..... 57,607,000 \$121,012.58

**PRODUCTION OF SILICA IN 1913.**

The marketed production of silica in the United States in 1913, as reported to the U. S. Geological Survey, was 232,192 short tons, valued at \$953,822. The general term silica includes vein quartz, sand and crushed sandstone, tripoli, and diatomaceous earth. The marketed production of quartz in 1913 was 97,902 short tons, valued at 201,488, against 97,874 short tons valued at \$191,683 in 1912. There was a total production in 1913 of 106,857 short tons of sand and sandstone used in paint fillers, polishing powders, scouring materials, etc., valued at \$466,523. The production of tripoli in 1913 was 29,831 short tons, valued at \$215,617. The total output of diatomaceous earth in 1913 was 6,602 short tons, valued at \$69,304.

The principal uses of silica, as stated by Frank J. Katz in a chapter from "Mineral Resources of the United States for 1913" just published by the U. S. Geological Survey, are in the manufacture of pottery, paints, scouring soaps, as a wood filler, and as a polisher.

The material known commercially in the United States as tripoli yields an excellent grade of pulverized silica, which is used for the same purposes as silica powder. Diatomaceous (infusorial) earth is also used to make polishing powder for purposes similar to those for which quartz, sand, and tripoli powders are used, but diatomaceous earth has somewhat different properties and finds for the most part different application.

Quartz crushed and graded to various sizes is used in the manufacture of sandpaper and sand belts, as a scouring agent, and for "frothing" glass with sand-blast apparatus, etc. Quartz and quartzite are used in the chemical industry as a filler for acid towers and as a flux in copper smelting.

Crystalline quartz and also sand have been used in the manufacture of silicon and of alloys of silicon with iron, copper, and other metals in the electric furnace. Quartz may be fused in the electric furnace to make chemical apparatus, such as tubes, crucibles, and dishes.

A copy of the report may be obtained free on application to the Director of the Geological Survey, Washington, D. C.

**COULD EXPORT CEMENT AT ONCE.**

The United States imports relatively little hydraulic cement, only 81,630 barrels having been imported in 1913, whereas the domestic production in that year was nearly 32,000,000 barrels. There is little or no need to import any cement, for all parts of the country are now fairly well supplied with mills for the manufacture of Portland cement, and the supply of raw materials is practically inexhaustible. A significant feature of the cement industry, however, is the fact that, though only about 80 per cent of the normal cement-producing capacity of the country is employed at the maximum, there is often an overproduction; yet the exports of hydraulic cement have scarcely exceeded 1,200,000 barrels in any year, this amount being only about 5 per cent of the total output—not sufficient to take care of the surplus production in a year of great activity.

There seem to be excellent reasons for stimulating the export trade in cement as rapidly as possible, for, although the export of a relatively bulky and low-priced material such as cement does not promise large direct profits to an individual producer, indirectly the creation and maintenance of an export trade should benefit the industry at large through the opportunity afforded of disposing of surplus stocks and thereby tending to maintain steadier prices. Bulletin 599, U. S. Geological Survey.

Nailess boes, held together by wires, have been patented by a Florida man for shipping fruit.

**TWO STRAIGHT STREETS.**

In viewing Manhattan from a point of vantage on the Metropolitan tower, nearly 700 feet from the sidewalk, one is chiefly impressed by the rigid lines which Park and Madison avenues cut through the length of the island. A trolley drawn through a miniature model city could not be straighter. A twelve-inch rule discharged at twenty-third street would send its bullet straight into Harlem without touching a building on either side.—New York

Tobacco, says an English chemist, contains nicotine, nictotine, nictoline, pyrrolidine, methyl, pyrrolidine, cellulose, cadmium, pectate, chlorophyll, phlophaphane, oxalic acid, tannic acid, acetic acid, nitric acid and starch.

Classified according to Location

## SAN FRANCISCO.

**RESIDENCE**—2 story and base, frame, \$3,000. San Francisco. Architect, none. Owner, P. P. Quinn, 110 Jessie street, S. F. The dwelling will be erected on the east side of 4th avenue north of Fulton, and has been designed for a seven room house with bath. Interior will be finished in pine, redwood and some hardwood veneer. Hardwood floors will be used in the living room, dining room and reception hall. There will be furnace heat and open fire places. Mantels will be of tile or brick. An automatic water heater will be installed. Bath room will have tile wainscot. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor. Materials are now being purchased.

**RESIDENCE**—2 story and base, frame, \$2,500. San Francisco. Architect, none. Owner, M. A. Donovan, 430 Sanchez street, S. F. The dwelling will be erected on the west side of 21st avenue south of California, and has been designed to contain six rooms and bath. Interior finish will be of pine and redwood. Hardwood floors will be used in the two principal rooms. There will be an open fire place in the living room with tile or brick mantel. Tile wainscot will be used in the bath room. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor.

**RESIDENCE**—2 story and base, frame, \$3,000. San Francisco. Architect, none. Owner, Ernest W. Elliott, 155 Alma street, S. F. The dwelling will be erected on the east side of 41st avenue near Balboa street, and has been designed to contain seven rooms and bath. Interior will be finished in pine and redwood with some elm panels. Hardwood floors will be used in the principal rooms. There will be open fire places and tile or brick mantels. Bath room will be finished in tile. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor.

**APARTMENT HOUSE**—7 story and base, Class A construction, \$150,000. San Francisco. Architect, Houghton Sawyer, Shreve Bldg., S. F. Owner, Mr. Morehead. The building will be erected at the northwest corner of California and Mason streets, covering an area of 66 by 76 feet, and will be a fireproof building throughout. The upper two floors will be fitted up for the exclusive use of the owner, while each of the five lower floors will contain one apartment each. Interiors will be finished to suit the tenants. Among the many features of the building will be a swimming tank, roof garden and billiard hall. Interiors will be finished in pine and mahogany with Caden stone in the halls. There

will be steam heat, elevator service, electric dumb waiters and vacuum cleaning system. Bath rooms will be finished in tile. Exterior of the building will be faced with cement plaster in imitation of cut stone. Plans are complete and figures are being taken.

**APARTMENT HOUSE**—4 story and base, reinforced concrete, \$20,000. San Francisco. Architects, Smith & Stewart, 244 Kearny street, S. F. Owners, Smith & Stewart, 244 Kearny street. The building will be erected at the northeast corner of Pacific and Taylor streets, covering an area of 32½ by 54 feet. Interior has been arranged for a total of 15 suites of two rooms each. Pine, mahogany and white enamel will be used for interior finish. All rooms will have hardwood floors. There will be steam heat, an automatic elevator, hot water system and vacuum cleaning. All apartments will have wall beds and private baths. Bath rooms will be finished in tile. Exterior of the building will be faced with cement plaster. Plans are complete and segregated figures will be taken at once.

**APARTMENT HOUSE**—3 story and base, frame, \$15,000. San Francisco. Architect, C. A. Meussdorffer, Humboldt Bank Bldg., S. F. Owner's name withheld. The building will be erected on the north side of Chestnut street east of Hyde, and has been designed to contain twelve suites of two and three rooms. Interiors will be finished in pine, redwood and elm panels. Some hardwood floors will be used. There will be steam heat and a hot water system. All apartments will have wall beds and private bath rooms. Entrance will be finished in tile and marble. Exterior of the building will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

**APARTMENT HOUSE**—6 story and base, Class C construction, \$25,000. San Francisco. Architects, Rousseau & Rousseau, Monadnock Bldg., S. F. Owner, Mr. Pomme. The building will be erected on the south side of Turk street east of Polk, and will contain a number of two and three room suites besides one store. Interior finish will be of pine and elm panels. There will be steam heat, an automatic elevator and hot water supply. All apartments will have wall beds and private bath rooms. Tile wainscot and composition floors will be used in the bath rooms. Entrance will be finished in marble. Plans provide for patent store fronts. Exterior of the building will be faced with pressed brick. Plans are complete and segregated figures are being taken.

**TELEPHONE EXCHANGE**—Cost not stated. San Francisco. Engineer, Director of Works, Service Bldg., S. F. Owners, Panama Pacific International Exposition Co. Plans are complete and figures will be opened on September 29th for furnishing and installing a complete telephone exchange sys-

tem in the Food Products Building at the Exposition Grounds. This work was formerly figured, but all bids received were regarded in excess of the cost and were rejected. Plans and specifications can be secured from the office of the Director of Works. An official proposal appears in another column of this issue.

**FIRE HOUSE ELECTRIC WORK**—Cost not stated. San Francisco. Architects, City Department of Architecture, Temporary City Hall Bldg., S. F. Owners, City and County of San Francisco. Plans have been completed for the installation of a conduit system and other electric work in connection with the building of the central fire alarm station in Jefferson Square. Bids for this work are now being taken and will be opened by the Board of Public Works on September 30th. Plans and specifications can be secured from the Department of Architecture.

**FLATS**—2 story and base, frame, \$3,000. San Francisco. Architect, none. Owner, John J. Binet Co., 68 Ramona avenue, S. F. The building will be erected on the south side of 23rd street west of Kansas, and has been designed to contain two modern flats of five rooms each. Interiors will be finished in pine and redwood with some oak floors. There will be open fire places and tile mantels. The wainscot will be used in the bath rooms and kitchens. Exterior will be covered with rustic and shiplap. Plans are complete and in the hands of the owners who will do the work by Day Labor. Materials are now being purchased.

**RESIDENCE**—2 story and base, frame, \$2,500. San Francisco. Architect, none. Owners, Oscar Heyman & Bro., 742 Market street, S. F. The dwelling will be erected on the south side of Lincoln Way east of 24th avenue, and has been designed to contain six rooms and bath. Interior will be finished in pine and redwood. Some hardwood floors will be used. There will be an open fire place and tile or brick mantel. Tile wainscot will be used in the bath room and kitchen. Exterior of the house will be covered with shiplap. Plans are complete and in the hands of the owners who will do the work by Day Labor.

**PUMPING PLANTS**—17, 1 story, steel and corrugated iron. Cost not stated. California. Engineers, Sanderson & Porter, Nevada Bank Bldg., S. F. Owners, American Pipe Line Co., 312 Sansome street, S. F. Seventeen pumping plants will be erected along the line of the American Pipe Line from the Colima oil fields to Martinez. These buildings will have a complete steel frame, cement floor and exterior covered with corrugated iron. The equipment will be designed for raising the pressure and heating the oil as carried through the line.

**THEATRE**—1 story and base, Class A construction. Cost not stated. San Francisco. Architects, Rousseau & Rousseau, Monadnock Bldg., S. F. Own-

er's name withheld. The building will be erected on Van Ness avenue near Sacramento. The building will be a fireproof structure with a seating capacity of 1,500 people. Interior will be finished in ornamental plaster. There will be special electric work and a modern system of ventilation. Exterior will be faced with cement plaster. Plans are nearly complete and figures will be called for shortly.

**STATE EXHIBIT BUILDINGS**—2, 1 story, frame and plaster. Cost not stated. San Francisco. Architect, State Architect R. B. Spencer Jackson, Miss. Owners, States of Alabama and Mississippi. Commissioners from both Mississippi and Alabama are in the city completing arrangements for the construction of the buildings to be erected at the Panama-Pacific International Exposition. Each of these States will expend in the neighborhood of \$25,000 for their buildings.

**APARTMENT HOUSE**—2 story and base, frame, \$14,000. Architect, Albert Schroeffer, 68 Post street, S. E. Owner, Edwin S. Persson. The building will be erected at the southeast corner of Church and 24th streets, covering an area of 100 by 40 feet. There will be five stores on the first floor and a total of four suites of three and four rooms on the upper floor. Interior finish will be of pine and redwood with some elm panels. Hardwood floors will be used. There will be steam heat and a hot water system. All apartments will have wall beds and private baths. Tile wainscot and composition floors will be used in the bath rooms. Exterior of the building will be covered with brick veneer and cement plaster on metal lath. Plans are complete and the work will be done by Day Labor. Materials are now being purchased.

**MISSION HOUSE**—3 story and base, frame, \$10,000. San Francisco. Architect, W. J. Wythe, Central Bank Bldg., Oakland. Owners, Board of Home Missions of the Methodist church. The building will be erected on Pine street near Larkin, and will contain class rooms and living apartments. Interior will be finished in pine throughout. There will be a central heating system and hot and cold running water. Exterior of the building will be covered with rustic. Plans are complete and figures are now being taken for the work.

**RESIDENCE**—2 story and base, frame, \$2,500. San Francisco. Architect, none. Owner, Walter Greig, 2907 Mission street, S. F. The dwelling will be erected on Newton street, and has been designed to contain six rooms and bath. Pine and redwood interior finish will be used. There will be an open fire place in the living room. Mantel will be of tile. The wainscot will be used in the bath. Exterior of the building will be covered with shingles and rustic. Plans are complete and in the hands of the owner who will do the work by Day Labor.

**RESIDENCE**—2 story and base, frame, \$4,000. San Francisco. Architect, Joseph A. Leonard, 85 Gerritos avenue, S. E. Owners, Urban Realty Co., for Karl Diefenbach. The dwelling will be erected on Urbano Drive, and has been designed to contain seven rooms, bath and sleeping porch. Interior will be finished in pine and hardwood. Hardwood floors will be used in the living and dining rooms.

There will be furnace heat and open fire places. Mantels will be of tile or brick. Bath room will have tile wainscot and floor. An automatic water heater will be installed. Exterior of the house will be covered with shingles and klinker brick veneer. Plans are complete and the work will be done by Day Labor. Materials are now being purchased by the architect.

**RESIDENCE**—2 story and base, frame, \$3,500. San Francisco. Architect, none. Owner, Peter D. Polodoni, 638 Cole street, S. E. The dwelling will be erected on the east side of Belvedere south of Parnassus avenue, and has been designed for a seven-room house with bath. Interior will be finished in pine and redwood. Hardwood floors will be used in the living room, dining room and reception hall. Plans provide for furnace heat and open fire places. Mantels will be of tile or brick. Bath room will have tile wainscot. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor. Materials are now being purchased.

#### OAKLAND AND ALAMEDA COUNTY.

BINGALOWS—2, 1 story and base, frame, \$5,000 each. Oakland, Cal. Architect, Clay N. Burnett, Albany Bldg., Oakland. Owner, Mr. Charleston. These two houses will be erected at the corner of Fruitvale avenue and Chavonnet street, and each has been designed to contain six rooms and

bath. Interiors will be finished in pine, redwood and elm panels. Hardwood floors will be used in the living rooms, dining rooms and reception halls. There will be furnace heat and open fire places. Mantels will be of tile or brick. Bath rooms will be finished in tile. Automatic water heaters will be installed. Exteriors will be covered with cement plaster on metal lath. Plans are being prepared and when complete the work will be done by Day Labor.

RESIDENCE—2 story and base, frame, \$6,000. Piedmont, Alameda Co., Cal. Architect, Charles W. McCall, Central Bank Bldg., Oakland. Owner, Mr. Thayer. The dwelling will be erected on Mountain avenue, and has been designed for an eight-room house with two baths and sleeping porches. Interior finish will be of pine and white enamel. Hardwood floors will be used in the living room, dining room and reception hall. There will be furnace heat and open fire places. Mantels will be of tile or brick. An automatic water heater will be installed. Bath rooms will be finished in tile. Exterior of the house will be covered with cement plaster on metal lath. Plans are now being prepared.

RESIDENCE—2 story and base, frame, \$5,000. Oakland, Cal. Architect, Leo L. Nichols, First Trust Bldg., Oakland. Owner, T. W. Moran. The dwelling will be erected on the south side of Perry street near Crescent, and has been designed for an eight-room house with bath. Interior will be finished in pine and redwood with some white enamel. Hardwood floors will be used in the principal rooms. Plans provide for furnace heat and open fire places. Mantels will be of tile or brick. An automatic water heater will be installed. Bath room will be finished in tile. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and figures are now being taken by the architect.

RESIDENCE—2 story and base, frame, \$3,000. Oakland, Cal. Architects, Hutchinson Bros., 470 13th street, Oakland. Owner's name withheld. The dwelling will be erected in the Mount Aarat Tract, and has been designed to contain seven rooms and bath. A garage will be erected in the rear of the property. Interior of the house will be finished in pine and redwood. Hardwood floors will be used in the principal rooms. There will be furnace heat and open fire places. Mantels will be of tile. An automatic water heater will be installed. Bath room will be finished in tile. Exterior of the house will be covered with cement plaster on metal lath. Plans are now being prepared.

RESIDENCE—2 story and base, frame, \$3,000. Berkeley, Alameda Co., Cal. Architects, Milwain Bros., Belger Bldg., Oakland. Owner, C. M. Hudekin. The dwelling will be erected on San Bonito Road near Spruce street, and has been designed to contain seven rooms, bath and sleeping porch. Interior finish will be largely of pine and redwood. Hardwood floors will be used in the living room, dining room and reception hall. Plans provide for furnace heat and open fire places. Mantels will be of tile or brick. The wainscot and floors will be used in the bath room. An automatic water heater will be installed. Exte-

rior of the dwelling will be covered with cement plaster on metal lath. Plans are now complete and figures are being taken by the architects.

WHARF IMPROVEMENTS—Cost not stated. Oakland, Cal. Engineer's name not given. Owner, De Fremery Wharf and Land Co., Oakland. The Railroad Commission has granted the De Fremery Wharf and Land Co. permission to bond the company's property for \$110,000 in order that certain improvements to the company's Oakland wharf may be made at once.

HOTEL ALTERATION—Class C construction, \$10,000. Oakland, Cal. Architect, William Wilde, Albany Bldg., Oakland. Owners, Athens Hotel. This work will consist of the rearrangement of the ground floor of a five story building, and will require new brick work, plastering, patent store fronts, electric work, painting and plumbing. Plans are complete and figures are being taken.

HOTEL AND STORES—7 story and base. Class C construction. Cost not stated. Oakland, Cal. Architect, George W. Patton, 2126 Emerson street, Berkeley. Owner, O. J. Meade. The building will be erected at the corner of Clay and 10th streets and will cover an area of 50 by 100 feet. There will be eight stories on the ground floor besides the hotel lobby. Upper floors will contain in the neighborhood of 110 rooms, a large percentage of which will have private baths. Interior will be finished in pine and hardwood veneer. Some ornamental plaster will be used in the lobby. Patent store fronts will be specified. Plans provide for steam heat, elevator service and a hot water supply. The wainscot and composition floors will be used in the bath rooms. Exterior of the building will be faced with pressed brick. Plans are being prepared.

AUDITORIUM MARBLE AND TILE WORK—Cost not stated. Oakland, Cal. Architect, Supervising Architect J. J. Donovan, Oakland. Owners, City of Oakland. Bids opened for this work show Joseph Musto Sons-Keenan Co., S. P., low at \$21,770. Only two other figures were presented. A contract has not as yet been awarded. A complete list of the bids will be found under the heading of Oakland and Alameda County in this issue.

LIBRARY—1 story and base, brick and frame, \$10,000. Berkeley, Alameda Co., Cal. Architect, W. H. Ratcliff, Jr., First National Bank Bldg., Berkeley. Owners, City of Berkeley. The building has been designed in the classic style and will be erected at the corner of San Pablo and University avenues. Interior will be arranged for a large reading room, librarian's office and stack room. There will be maple floor and metal book stacks. Interior will be finished in pine. A central heating system, probably furnace heat, will be installed. Exterior of the building will be faced with cement plaster. Plans are now being prepared.

RESIDENCE—1½ story and base, frame, \$3,500. Piedmont, Alameda Co., Cal. Architect, Claude B. Barton, First Trust Bldg., Oakland. Owner, H. P. Houston. The dwelling has been designed to contain six rooms, bath and sleeping porch and will be erected in Piedmont Manor. Interior will be finished in pine, redwood and white enamel. Hardwood floors will be used

in the principal rooms. There will be furnace heat and open hearthplaces. Mantels will be of tile. Tile work will be used in the bath room. An automatic water heater will be installed. Exterior of the house will be covered with cement plaster on metal lath. Plans are being prepared.

**APARTMENT HOUSE ALTERATIONS**—2 story frame, \$3,000, Berkeley, Alameda Co., Cal. Architects, Thomas & Oliver, Pantages Theatre Bldg., Oakland. Owner, Mrs. McGill. This work will consist of altering the two-story frame dwelling located on Durant Way near Ellsworth into modern apartments. There will be five suites in the building of two, three, four and five rooms. The work will require new interior finish, painting, plumbing, plastering, electric work and finish hardware. Furnace heat will be installed. Exterior of the building will be covered with shingles. Plans are nearly ready for figures.

**APARTMENT HOUSE**—2 story and base, frame, \$6,000, Oakland, Cal. Architect, none. Owner, John A. Bischoff, 551 Craftsman avenue, Oakland. The building will be erected on the south side of Harwood avenue east of College, and has been designed to contain sixteen suites of two and three rooms. Interior will be finished in pine and redwood with some elm panels and hardwood floors. There will be furnace heat and a hot water system. Bath rooms will be finished in tile. There will be wall beds and private bath rooms. Exterior of the building will be covered with cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by day labor.

**STORES**—1 story and base, brick and frame, \$5,000, Berkeley, Alameda Co., Cal. Architect, James W. Plachek, Acheson Bldg., Berkeley. Owner, J. E. Wheeler. The building will be erected on Adeline street near Ashby, and will cover an area of 30 by 68 feet. There will be several retail stores. Interiors will be finished in pine. Patent store fronts and plate glass windows will be installed. Exterior will be covered with pressed brick and cement plaster. Plans are complete and figures are being taken.

### Contracts Awarded.

**APARTMENT HOUSE**—3 story and base, frame, \$20,000, Berkeley, Alameda Co., Cal. Architect, Olin S. Grove, 2911 Telegraph avenue, Berkeley. Owner, Dr. Crawford. Contractor, George W. Patton, 2136 Emerson street, Berkeley. Contract price, \$20,000. Note: The contractor is now taking subfigures on the work.

## Auditorium Marble And Tile Figures.

Three Sets of Figures Received By Oakland City Council for Marble And Tile for Auditorium.

## SAN JOSE AND THE SANTA CLARA VALLEY.

BUNGALOW—1 story and base, frame, \$2,000. San Jose, Santa Clara Co., Cal. Architect, Charles McKenzie, Bank of San Jose Bldg., San Jose. Owner, A. Lesta. The dwelling will be erected on George street near Poplar, and has been designed to contain five rooms and bath. Pine and redwood interior trim will be used throughout. There will be an open fire place and tile or brick mantel. Bath room will be finished in tile. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor.

BUNGALOW—1 story and base, frame, \$1,500. San Jose, Santa Clara Co., Cal. Architect, none. Owner, Mrs. C. B. Harper, 178 North 4th street, San Jose. The dwelling will be erected on North 4th street, and has been designed for a five-room house with bath. Interior will be finished in pine and redwood with some hardwood floors. There will be an open fire place and tile mantel. Exterior of the dwelling

will be covered with rustic and cement plaster. Plans are in the hands of the owner who will do the work by Day Labor.

RESIDENCE—1 story and base, frame, \$2,000. Santa Cruz, Santa Cruz Co., Cal. Architect, Clay N. Burrell, Albany Bldg., Oakland. Owner, D. S. Murphy. This dwelling has been designed for a summer home and will contain five rooms and bath. Interior will be finished in pine and redwood. Some hardwood floors will be used. There will be open fire places and tile or brick mantels. Bath room and kitchen will have tile wainscot. An automatic water heater will be installed. Exterior of the house will be covered with shingles. Plans are being prepared.

LIBRARY, 1 story and base, reinforced concrete. Cost not stated. Santa Cruz, Santa Cruz Co., Cal. Architect, W. H. Weeks, 75 Post street, S. P. Owners, City of Santa Cruz. The building will be erected in Garfield Park, and has been designed in the classic style. There will be two large reading rooms, office and stack and work rooms. Interior finish will be largely of pine with some hardwood veneer. Maple floors will be used. A central heating system will be installed. Metal book shelves will be specified. Exterior of the building will be faced with cement plaster, plans are complete and figures are being taken. Bids will be opened on October 5th. Plans can be secured from the architect.

SCHOOL—1 story and base, frame and plaster, \$25,000. Burlingame, San Mateo Co., Cal. Architects, Thomas Edwards and Ernest Norberg, Bank Bldg., Burlingame. Owners, Burlingame School District. Note has been sent out stating that the opening of bids for this work has been postponed until September 22nd. A complete list of the figures will be found in the next issue of the Building and Industrial News.

GYMNASIUM—1 story and base, brick and steel. Cost not stated. Palo Alto, Santa Clara Co., Cal. Architects, Bakewell & Brown, 251 Kearny street, S. F. Owners, Leland Stanford, Jr., University. Plans for the men's gymnasium to be erected on the campus of the university have been completed. The building will have a frontage of 340 feet and will vary in depth. Interior will be finished in pine with maple floors. There will be complete mechanical and gymnasium equipment. A large swimming tank will be installed. Steam heat and vacuum cleaning are specified. Exterior of the building will be faced with pressed brick. Plans are now out for figures.

BRIDGE—Reinforced concrete. Cost not stated. Los Gatos, Santa Clara Co., Cal. Engineer, County Surveyor, San Jose. Owners, Santa Clara County. Plans have been completed and approved for constructing a reinforced concrete bridge over Los Gatos Creek at the Infirmary Road. The bridge will be of the arch type. Bids are now being taken and will be opened on October 5th. Plans and specifications can be secured from the County Surveyor at San Jose.

CEMENT PLANT RECONSTRUCTION—\$250,000. San Juan, San Benito Co., Cal. Engineers, Hunt Engineering Co., Kansas City, Mo. Owners, Old

Mill, San Portland Cement Co. It is probable that the cement plant of the Old Mission Portland Cement Co., located at San Juan in San Benito County will be reconstructed and again put in operation. Frank L. Brown of San Francisco together with representatives of the Hunt Engineering Co. of Kansas City, Mo., visited the works last week. The Hunt Engineering Co. agrees to install \$250,000 worth of modern machinery and will carry stock in the company.

### PORTLAND AND OREGON.

**HOTEL**—4 story and base, brick and steel, \$100,000. North Bend, Ore. Architect, J. E. Tourtellotte, Rothchild Bldg., Portland. Owner's name withheld. The building will be erected on a corner lot, having frontages of 92 and 120 feet respectively. There will be five stores besides the hotel lobby, dining room and billiard room on the first floor. Upper three floors will contain in the neighborhood of 80 guest rooms, nearly all of which will have private baths. Interior will be finished in pine and hardwood. There will be steam heat, a passenger elevator and hot water system. Bath rooms will be finished in tile. Patent store fronts will be used. Exterior of the building will be faced with pressed brick. Plans are complete and subfigures will be taken at once. The brick and carpentry work will be done by Day Labor.

**RESIDENCE**—2 1/2 story and base, brick and frame, \$12,000. Portland, Ore. Architects, Whitehouse & Foulhoux, Wilcox Bldg., Portland. Owner, O. B. Stubbs. The dwelling will be erected at the corner of 23rd and Stephens streets and will be designed in the Colonial style. Interior finish will be of pine and hardwood with hardwood floors in the principal rooms. Chambers will be finished in white enamel. There will be steam heat and a hot water system. Open fire places and tile or brick mantels will be used. Bath rooms will be finished in tile and equipped with showers. A garage will be erected on the rear of the lot. Exterior of the dwelling will be covered with veneer pressed brick and cement plaster. Plans are complete and figures are being taken.

**PARISH SCHOOL**—2 story and base, brick, \$35,000. Portland, Ore. Architects, Whitehouse & Foulhoux, Wilcox Bldg., Portland. Owners, Roman Catholic Church. The first building of a group to be erected at 17th and Davis streets will be a combination school and parish house, covering an area of 45 by 129 feet. Interior will be finished in pine and hardwood with some hardwood floors. There will be a central heating system, probably steam heat. Modern school plumbing will be used. Exterior of the building will be faced with pressed brick. Plans are complete and figures for this work are now being taken.

#### Contracts Awarded.

**DUCK CONSTRUCTION**—\$175,000. Portland, Ore. Engineer, J. R. Holman. Portland. Owners, Oregon-Washington Railroad and Navigation Co. Contract

price, \$175,000.  
tor, Robert Wakefield, Portland. Contract price, \$12,998.  
Ore. Engineer, none. Owners, Portland Iron Works, 29th and Sullivan streets. Contractor, John Almer, Railroad Exchange Bldg., Portland. Contract price, \$12,998.

**RESIDENCE**—2 story and base, brick and tile, \$12,000. Portland. Architect's name not given. Owner, H. F. Kalvelage. Contractor, A. Horn, 690 Market street, Portland. Contract price, \$12,000.

### SEATTLE AND WASHINGTON.

**CANAL CONSTRUCTION**—\$75,000. Oak Bay and Port Townsend, Wash. Engineers, United States Engineers, Burke Bldg., Seattle. Owner, United States Government. Plans have been completed by the United States Engineers for a canal 4,800 feet long connecting these two bays. Bids on this work are now being taken and will be opened on October 16th. The project calls for two jetties, each feet long of creosoted piling, br and stone. There will also be a 2 foot bulkhead. The canal will be feet wide at the bottom and 15 feet deep at low water, and will call for removal of about 255,000 cubic yards of materials. Plans and specifications together with complete details, can had by addressing the United States Engineers, Burke Bldg., Seattle.

**RAILROAD TUNNEL**—\$2,000,000. Seattle, Wash. Engineer's name given. Owners, Bridle Belt Railroad and Navigation Co., represented by P. Gillies, Henry Bldg., Seattle. Councilman Fitzgerald will introduce ordinance in the city council granting a franchise for the Bridle Belt Railway and Navigation Co. to construct a tunnel under the city. The ordinance is now in the councilman's possession, and after passage, work on the structure will not be delayed. The ordinance calls for the construction of concrete lined tunnel from Virgh and Elliott along Elliott to Cedarthence to Clay, to Broad and also Broad to Lake Union. The tunnel will be either 17 by 22 feet or 20 by 25 feet in diameter, lined with concrete, and will cost about \$800,000 per mile, making the total cost for the three miles over \$2,000,000.

**THEATRE ALTERATION**—Class building, \$60,000. Spokane, Wash. Architect, B. Marcus Pretica, Emp Bldg., Seattle. Owner, Alex. Paatari. The entire front of the building will be torn out and faced with pressed brick and terra cotta. The interior will also be plastered and decorated. A large amount of ornamental plaster will be used.

#### Contracts Awarded.

**BANK**—2 story and base, reinforced concrete, \$50,000. Olympia, Wash. Architect, W. P. White, Walker Bldg., Seattle. Owners, P. M. Troy and W. Stocking. Contractors, Pouts C. struction Co., 815 Pike street, Seattle.

**FOUNDRY GROUP**—Reinforced concrete bulkhead work, excavated and cribbed pile—\$43,460. Seattle, Wash. Engineer, W. J. Roberts Tacoma. Owners, Inter-counties R Improvement Association. Contractors, Beance & Cleaver, Amer Bank Bldg., Seattle. Contract price, \$43,460. The work provides for

lowing: 250,000 cubic yards of excavation work, 6,000 feet of piles, 30,000 feet of lumber, 3,500 pounds of iron and steel, 2 acres clearing and grubbing and 600 cords of driftwood moved.

**CUT-OFF, EXCAVATING, ETC.** — \$10,000. Seattle, Wash. Engineer, W. Roberts, Tacoma. Owners, Intermountain River Improvement Association, Contractors, Cross & Bolins, Tacoma. Contract price, \$100,000. The work will involve about 1,000,000 cubic yards of excavating for which the company bid 7-10 cents per yard and portion at 11 cents per yard. The company will furnish the dredge.

### WHAT WOLFRAM IS.

Wolfram is not the name of a wild beast, even if the word is apparently a combination of the names of two well known members of animal society. Neither wolf nor ram, taken separately, has anything to do with it, nor may be a great many people who know—and again a great many more do not know—that wolfram is a mineral, and that tungsten is the metallic chemical element found therein, a fact which gives it an importance quite otherwise not have.

In a series of pamphlets describing the various countries of Latin America published by the Pan American Union, Washington, D. C., will be found two, those on Argentina and Bolivia, in which it is stated that these countries each export annually, among many other minerals, something over 100 tons of wolfram. That brings on the query, What is wolfram?

Wolfram is really the most commonly known of the various tungsten ores, and is the tungstate of iron and manganese. It is dark brown—almost black—in color, is very dense and heavy, being frequently mistaken for iron ore, and is heavier than metallic iron itself. It is said to have been first discovered by a Swedish sailing master in 1781, hence its name—tung, meaning heavy, and sten, stone—tungsten. Various tungsten ores are mined and exported by several countries, the chief supply coming from Queensland, Portugal, Argentina, Bolivia, and the United States, some of the most productive deposits being found in California. What's it good for? To make the elements in our incandescent electric lamps for one thing, thereby saving to consumers a total of something over \$210,000,000 a year. That of itself is enough to establish its importance, a method discovered by one of the great electric companies of the United

## For Quality's Sake use Wybro Panels!

If for no other reason, use WYBRO Panels for quality's sake.

Wybro Panels are smoother, look better and last longer than any other panel on the market.

There are many other reasons why you should use WYBRO Panels. The strongest is its quality.

States it is now possible to draw tungsten metal into a wire as fine as one-thousandth of an inch in diameter so that the wire is pliable and can be wound upon spools like sewing thread. It is used in one piece in the lamps and is said not to be so fragile as that produced by certain methods used in the German product. The tungsten wire, as drawn out for this purpose, is very strong, it being claimed that it has more strength than any steel piano wire that was ever made. The specific gravity of tungsten metal is given as 19.12, almost as much as that of gold, which is 19.3.

The discovery of this metal for making filaments has caused an enormous saving to the consumers of electric light the world over. It enables the consumer to obtain two or three times the quantity of light at about one-half the consumption of electricity formerly used by the old carbon lamp.

The principal use of tungsten, however, is to harden steel, especially the steel of which tools are made. The tool steel of the present day is said to be nearly all tungsten steel, having from 8 to 20 per cent metallic tungsten mixed with the steel in its manufacture. It is sometimes called "self-hardening steel" because it does not have to be tempered, for, with the addition of the metallic tungsten it tempers itself. When heated to a cherry red and allowed to cool, the steel attains its maximum hardness and can be used by machinists for lathe cutting tools and for drills. Machinists' tools can be run at much greater speed and it has been estimated that at least four times as much work can be done with the tungsten steel as with the ordinary kind, because the machines can be run four times as fast and that without taking the temper out of the tool when it gets very hot, as is the case with ordinary steel. The president of one of the large automobile manufacturing companies is said to have stated that if there were no such thing as tungsten steel the cost of each automobile would be \$200 more than it is now.

Tungsten and its salts are used for making silk and cotton fabrics fireproof; for winding electric furnaces, and for use in the apparatus employed for the utilization of Roentgen rays. Also occasionally in the manufacture of silk in order to add weight and to give it the desired stiff effect. It will thus be seen that from the standpoint of practical utility tungsten is of more benefit to humanity than gold.

Experiments are under way in India with cooling buildings by forcing

currents of air through hollow walls with electric fans.

During 12 years 9,000,000 working days were lost in Canada owing to strikes, or an average of 750,000 days per year.

The Italian government, which several years ago bought most of the telephone systems of the country, has extended until 1923 the time which some smaller companies may operate independently.

### PRODUCTION OF LUMBER IN 1913.

From the Forest Service, U. S. Department of Agriculture.

The production of lumber in the United States in 1913 was about three-quarters of a billion board feet less than in 1912, according to the official figures just issued by the U. S. Department of Agriculture.

The figures are based upon reports of production which the department obtains yearly from the lumber manufacturers. In 1913, 21,391 mills reported a production of 35,387,069,000 board feet, as against 39,158,411,000 feet reported by 29,648 mills in 1912 and 37,003,207,000 feet reported by 28,197 mills in 1911. Although about 8,000 fewer mills reported in 1913 than in 1912 most of those not reporting were of small capacity and the inclusion of their reports would not, it is said, materially increase the total.

The high-water mark in lumber production was set in 1903, when the cut exceeded 41,000,000,000 feet. In 1907 and 1910 the cut was slightly over 40,000,000,000 feet. No other years have come up to the record of the last two years.

The production in 1913 of nearly as much lumber as in 1912 is of special significance in view of the business conditions which have existed in the industry. During the first three months of the year the lumber trade was excellent, but in the second quarter the demand or lumber fell off noticeably. Further weakening in the demand during the summer led to a substantial curtailment of production in the yellow pine and Douglas fir regions. The fall demand did not improve. In general the year was one of overproduction and slack business in the principal lumber manufacturing regions.

Notwithstanding curtailments in the production of yellow pine and Douglas fir, the reported cut of yellow pine was

about seven-tenths of one per cent half percent greater in 1913 than in 1912. The cut of Douglas fir in 1913 and of Douglas fir about seven and a was the largest ever reported, while the 1913 cut of yellow pine was second only to that of 1909. Had not enforced curtailment in the output of these two woods been necessary, the total lumber production of 1913 would undoubtedly have exceeded that of 1912. In fact, not the cut of white pine, hemlock, spruce, oak, and maple declined in 1913, the increased cut of yellow pine, Douglas fir, spruce, and red gum of that year would have carried the total beyond that for 1912.

The increased cut of certain woods is reflected in the increased production of Washington, Oregon, and the lower Mississippi Valley states, while the decreased cut of other woods is reflected in the decreased production of the Northern, Central and Atlantic States. The reported production of 4,592,653,000 feet in Washington in 1913 was the largest ever recorded for that State or any other State. The largest production previously reported by one State was that of 4,311,240,000 feet in 1890, by Michigan.

Of the total reported production of lumber, soft-woods contributed 30,302,416,000 feet, board measure, in 1913, as against 30,526,416,000 feet in 1912, and 28,902,588,000 feet in 1911.

#### GRAPHITE IMPORTS CUT OFF.

**Stimulation of Mining of Fibrous Variety in United States Will Result—Ample Supply Available for Pencils, Lubricants, etc.**

Although the value of the graphite imported into the United States in 1913 was almost twice the domestic production, the cutting off of the foreign supply should seriously affect only the crucible industry. There is an ample supply of graphite in this country suited for stove-polish, foundry facings, and paint pigments, and large deposits of amorphous graphite in northern Mexico, now comparatively peaceful, are controlled by American firms and can be depended upon for supplies of graphite for pencils, lubricating material, and many other uses. Moreover, graphite is now being manufactured in the electric furnaces at Niagara Falls in amounts far in excess of the domestic production from natural sources, and this graphite is well adapted for most of the uses to which graphite is applied.

The graphite for which we depend mainly on foreign sources is that used in the manufacture of crucibles and other refractory products, but as these uses probably consume over half of the graphite used in this country, such dependence is a matter of no small importance. Moreover, the manufacture of crucible steel requires graphite crucibles. The graphite used in crucible making has been brought largely from the British island of Ceylon, although within the last few years some has been brought from the French island of Madagascar. This graphite is flaky or fibrous and for this reason is eminently adapted to crucible making. For the use it has never met with serious competition from domestic graphite. The earthy

amorphous graphite mined in this country and the graphite manufactured at Niagara Falls are not adapted to this use, and as a rule the expense of concentrating domestic flake graphite has been prohibitive. Nevertheless it is to the domestic supplies of flake graphite that this country must look in the event of foreign supplies being cut off. Practically inexhaustible supplies of this material are known to occur in New York, New Jersey, Pennsylvania, North Carolina, Alabama, Texas, and some other States and are fully described in the reports of the United States Geological Survey. Similar deposits are abundant in Canada. The graphite in these deposits occurs as small flakes in rocks composed mainly of quartz, feldspar, and mica, the graphite constituting 5 to 10 per cent by weight.

Several plants are now engaged in working such deposits, and many others now idle could be put on a producing basis in a short time and at little expense. Although the product might not be equal to the Ceylon graphite in all respects for crucible making, there is no question that it would be adequate, for similar graphite has for years been successfully used in Germany.

Another American resource is the graphite deposit near Dillon, Mont. The graphite there is very similar to that from Ceylon and should be adaptable for crucible making. Although the deposit does not compare in size with the Ceylon deposits, it might render material aid in case of a shortage.

#### CHANCE FOR CEMENT MAKERS.

American manufacturers have not yet made the most of their opportunities to establish greater export trade, according to Geo. Otis Smith in Bulletin 599 of the United States Geological Survey. Statistics show that the export of cement from England, Germany, Belgium, and France not only have been considerably greater than those from the United States, but have borne a much higher ratio to the production in these countries. The quantity of cement exported by France in recent years is estimated to have reached at least 23 per cent of her production, and that of Germany about 17 per cent. There are few cement plants in South American countries, and in the past these countries have been supplied mainly from Europe. There is evidently an opportunity now for the cement industry of the United States to secure this trade.

#### OPPORTUNITY FOR METAL MANUFACTURERS.

Of the metals and metallic ores the United States has been both an importer and an exporter. Our imports of iron ore are double our exports, whereas of metallic copper we export nearly twice as much as we import. The general rule, however, probably is that the imports of manufactured or partly manufactured metals largely exceed in value the ores and crude metals brought into this country for domestic manufacture, and in our exports a somewhat similar ratio exists between crude material and manufac-

tures, so that there is presented double opportunity for increasing the scope and extent of our metal industries for both domestic consumption and export. Far too much American metal crosses the Atlantic in the crude or semicrude state only to come back to us in various manufactured forms. Bulletin 599, U. S. Geological Survey.

Petroleum has been discovered in Somaliland and the British government is investigating its extent.

#### RAILWAY SUPPLIES FOR CHILE

##### Oil-Burning Experiments on Government Railways.

The Chilean Government has had under contemplation for some time the installation of oil-burning equipment on all the Government railways of this country before doing so. However, it has decided to turn over one entire division of the Longitudinal Railway, which consists of about 125 miles, for exhaustive experiments. It has, I am informed, asked for bids on this experimental work, the proposition having been worked out by individuals from the United States.

As there is every reason to believe that the result of these experiments will result in the installation of oil burning equipment on the entire system of Government railways, it might be well for American manufacturers of this class of railway material to get in touch with the officials having charge of this work, as it will undoubtedly be quite an extensive field for the sale of this class of material.

##### Appropriation for Government Railway Machine Shops.

The Chilean Government has authorized an expenditure of the equivalent of \$60,000 American gold for machinery and supplies to be installed in the Government railway shops. Interested parties would do well to communicate with Direccion General de los Ferrocarriles, Santiago, Chile.

A new hardening material for the surface of concrete floors contains 93 per cent of iron dust or iron flour.

#### AMERICAN BUILDING SUPPLIES FOR CHINA.

[Consul General Thomas Sammons Shanghai.]

It has been demonstrated to the satisfaction of a large number of Chinese contractors and builders in this district and in other parts of China that the lumber products of the north Pacific coast mills of the United States can be utilized to a far greater advantage for building purposes than the Chinese lumber products as heretofore generally used. It has been customary as lumber dealers are aware, to bring logs to China mostly from Far Eastern lumber districts, and then have them sawed according to dimensions by Chinese cheap labor, all the work being done by hand.

Americans and others interested in the sale of the output of the lumber mills of the Pacific northwest in the United States have conducted a campaign of education and have largely overcome the prejudice of the Chinese carpenters and contractors against the use of anything other than Chinese lumber products. As a result the pro-

acts of selling increasing quantities of American lumber and other building materials in this consular district throughout China generally are very bright. Owing to competition, however, it is suggested that the number of filling orders in accordance with trade requirements should receive careful attention. In some instances I find that American mills have given much satisfaction by failure to fill orders in accordance with the dimensions given, or in assuming an attitude of indifference to this matter.

It has also been demonstrated to the Chinese contractors and builders that to use doors manufactured by the American mills on the north Pacific coast can be supplied here at approximately half the cost of the Chinese handmade doors heretofore universally used.

**Bidding Boom in Shanghai—Concerns Interested in American Building Supplies.**

At present Shanghai is experiencing building boom, and there is a constantly increasing demand for building materials. Throughout China generally and import and export company with headquarters at Shanghai is dealing direct with the small Chinese contractors and is meeting with satisfactory results. This company has a branch office at Portland, Ore., although formerly it made purchases from Puget Sound mills as well. Four other concerns are also interested in increasing the sale of American lumber and building materials here.

An American citizen, who is manager of a realty company in Shanghai, is joining heartily in the movement to increase the sale of American building materials here. His company is conducting a large number of houses in Shanghai. The following letter from its manager of the realty company to its consulate will be of interest:

"We thank you for your letter inclosing folders advertising American doors. We have also to thank you for previous letters and catalogues, which we received by last mail from American manufacturers of building materials.

"We are using as many American doors as possible in the construction of our houses, and are trying to fit them in the most up-to-date manner possible. A local firm is importing special electrical devices and fittings such as, something different from the local Shanghai fittings.

"We have imported through another company samples of American doors and have also ordered British Colonial doors. We have now in stock over 100 American doors, which we are actually using in our houses and which will be one of their attractive features. We have in stock some of the best front doors ever imported into China.

"Our hardware is at present being imported from two of the best American manufacturers. We are gradually meeting up with other concerns who are with a view to getting the best American products.

"We have therefore to thank you for your interest in the matter."

The names of the various firms mentioned in the foregoing report may be found from the Bureau of Foreign and Domestic Commerce, Washington, and its branch offices.]

[Vice Consul General J. Paul Lamson, Hankow.]

**Structural Steel and Iron Needed in Central China.**

Owing to increased building construction in Hankow, Wuchang, and Hanyang, a strong demand is developing for local stocks of all kinds of building materials, especially iron and steel girders, sections, angles, tees, etc.

I am informed by one of the architects in Hankow that considerable difficulty is being experienced in Hankow in securing these materials without long delays. The Germans have a small stock of such materials at Shanghai and another stock at Tsingtau, but these are inadequate to meet the demands, and even German architects are compelled to accept and use incorrect sizes of iron and steel girders. Moreover, the use of metric system by the Germans is most inconvenient for British architects, who outnumber those of other nationalities in this section of the country. I am informed that the steel goods manufactured by the German Bessemer process are not meeting with as much success as those manufactured by the British and American open-hearth process.

British firms have a small stock of girders, angles, etc., in Hongkong, but the Hankow architects find much difficulty in obtaining the proper sizes.

**American Firm is Needed.**

There is an opportunity at Hankow for the establishment of an American firm carrying a full-size stock of building materials of all kinds, including hinges, locks, etc. There are firms here representing European and American concerns, manufacturing building materials, but the establishment of agencies has not proved satisfactory, owing to the fact that no adequate stocks are being carried by these representatives, and long delays result from the necessity of obtaining the desired materials directly from European and American markets.

The rapid development at Hankow, which has already begun and which will undoubtedly continue on account of the construction of railways centering at this port, would warrant the establishment in this city of a firm carrying adequate stocks of all necessary building materials. Such a firm should be under the local management of a technical expert who would be capable of meeting the requirements of the constructing engineers of German, British, French, and other nationalities. From Hankow as a center a firm of this kind well-stocked with materials, should be able to handle a large proportion of the building construction work throughout central China.

While at first the profits might be nil, firms which can establish themselves in Hankow particularly at this time of transition should be able to grow with the city.

**Small Local Production.**

The Hanyang Iron and Steel Works at Hankow has contracted years in advance for its entire output, which consists of pig iron and steel rails. This company will not be in a position to turn out girders, tees, etc., for many years to come, especially in view of the increasing railway construction in China. At present the Hanyang Iron and Steel Works cannot begin to supply the demand for rails. There would, therefore, be no fear of a competitor

under selling American goods by placing locally manufactured building construction materials on the market.

It might be interesting to American firms to communicate with a certain architect now in Hankow, who is very favorable toward American building materials and could supply technical information as to the needs of this territory in matters of construction. [The name of the architect may be had from the Bureau of Foreign and Domestic Commerce and its branches.]

**UP AND DOWN THE COAST.**

**BYRON, Contra Costa Co., Cal.**—Actual construction of an irrigation system to provide water for 14,000 acres in the Byron-Bethany District, will begin in less than thirty days. Bids for the excavating and grading of three miles of the main canal of the project have already been taken. The Byron-Bethany Irrigation Co., Volney Taylor, President, has full charge of the construction.

**WATSONVILLE, Santa Cruz Co., Cal.**—Work has begun on the foundation of the new Appleton Theatre. The building is being constructed by the Appleton Investment Company of Watsonville. The building will have a seating capacity of 500 and will cost in the neighborhood of \$50,000. Plans were prepared by Architect W. H. Weeks of San Francisco.

**RED BLUFF, Tehama Co., Cal.**—County Surveyor Lunning will soon submit plans and specifications for four new bridges to be constructed over creeks along the route of the proposed highway from Glenn County line to Corning. The plans call for steel and concrete bridges to cost in the neighborhood of \$15,000 each.

**CLARKSDEN, Plumas Co., Cal.**—The Interstate Company has finished the grading for its new \$140,000 log cabin tavern. Building operations will commence as soon as contracts are let.

**SACRAMENTO, Sacramento Co., Cal.**—Specifications for the improvement of Thirty-first street from the north line of S street to the north line of T street and for Donner avenue to the north boundary of California Boulevard have been presented to the City council by the City Engineer.

**FRESNO, Fresno Co., Cal.**—F. W. Webster, Manager of the Fresno Traction Company, has stated that his company is ready to begin the work of double tracking Fresno avenue as soon as all franchise matters are cleared and up to the city requirements. The work will take sometime, as the old single tracks will have to be removed and the double tracks laid. The work will cost about \$50,000.

**GRASS VALLEY, Nevada Co., Cal.**—Excavation for the big adjunct to the city's sewer system in the southern section of the town has been started under the supervision of City Engineer E. M. Miller. All materials are now on the ground and the work will be completed in sixty days. This city is also planning great improvements to its water distributing system.

**TOWNSENDVILLE, Sierra Co., Cal.**—The company operating the Wide Awake gravel mine has started the building of a line of pipe to the Never Sweated claim from a nearby spring.

### "THE WRITING ON THE WALL"

It would be rare indeed that any one construction job would show more clearly than the illustration given below, the marked change or trend of structural designing, from the accepted methods of a few years ago. The illustration shows the Municipal incinerator for the City of San Francisco, located in the Potrero. The two buildings at either side of the picture were designed and constructed of heavy, reinforced concrete some two years ago, using of course, the usual wooden forms, heavy foundations, etc., which would be inherent with such construction; also the construction work was necessarily slow and complicated.

At the present time it was necessary to erect a connecting building between the two old buildings, to house conveying machinery, etc., this con-

central portion when finished, cannot be distinguished from the exterior, from the old-style concrete building on either side.

The recognition of "Self-Sentering" construction in Municipal work of this character, is certainly a signal triumph. M. M. O'Shaughnessy, being the City Engineer for San Francisco, Tom Ransom, Assistant City Engineer, having charge of the Incinerator design and construction. This work was done by the H. A. Chalmers, Inc., who have made a specialty of this type of construction. Among other work, they have just completed a two-story covered passageway, connecting two wings of the St. Francis Hotel, where the roof and curtain-walls were of this type of construction, which can be appreciated when it is mentioned that the largest wall panel is some 12½ feet wide by 15 feet high, totally unsupported except in some 2 inches

to," and one Westphalia artificial breathing apparatus for use in poisonous or irrespirable atmospheres, with pump and supplies for recharging the apparatus, also with two Pulmotors for reviving those overcome by gas or smoke. In addition there are supplies of first-aid materials, stretchers, rope, crow bars, and other materials and supplies which may be needed at mine disasters. The car was originally sleeping car, and a number of the upper berths have been left in so that it can be turned into an emergency hospital, if necessary.

The United States Bureau of Mines now has eight of these cars equipped for mine-rescue and first-aid service. While not actually busy at mine fires or disasters, they are kept going from mine to mine in their respective districts, stops of sufficient length being made so that squads of men can be organized and trained by the crews in the use of mine-rescue apparatus and in first-aid to the injured. Each car crew consists of a foreman, a first-aid miner, and a cook, who live on board. It is under the direction of a district mining engineer of the bureau. The foremen and first-aid miners and, in some instances, the cooks, are practical miners, so that in cases of mine disaster every man on, or connected with, the car is available for service.

A. A. Krogdahl of the United States Bureau of Mines conducted a very successful first-aid field meet at Jackson, Amador County, on Labor Day. A large number of teams from the Mother Lode District competed for prizes offered by the American Mine Safety Association and the operators and miners of the district.

This first visit of the Mine Rescue car to California is an important event in the co-operative safety work of the United States Bureau of Mines and the Industrial Accident Commission of the State of California. Very generous support has been received from the Boards of California. The car will be carried all over the State without cost to either the Federal or State Governments. Mr. W. R. Scott, General Manager of the Southern Pacific Company, personally interested himself in making this splendid contribution to the "Safety First" movement.

H. M. Wolfelin is the mining engineer delegated by the Bureau of Mines to the California field. He is directing the work successfully.

sisting of a tower over the old building at the left, together with a connecting building, and this was constructed of a light steel frame, covered with 2 inch "Self-Sentering" curtain walls and roof. On account of the light weight of this construction, very simple foundations were required and the type of construction permitted extremely quick erection; the entire building only taking a month to construct.

Concrete without forms, made possible by "Self-Sentering," is now the accepted type of roof and where possible, of curtain-wall construction, and the ease with which it adapts itself to roofs of extreme pitch, or as on the tower, where by laying wooden screeds, terra cotta tile can be laid over it, and all clearly demonstrated in the picture. Also, at the present time, it is certainly a fact that the

of mortar reinforced with the "Self-sentering," for which Bliss & Faville were the architects.

### VISIT OF UNITED STATES MINE RESCUE CAR.

The United States Bureau of Mines Rescue Car (No. 5) will visit California mining districts from September 29th to October 31st, the attendants giving training in mine rescue work and first-aid work. The itinerary, which will probably be adhered to fairly closely, follows:

September 29-30	Colfax.
" 30-27	Jackson.
" 28-Oct. 5	Angelo's Camp.
October 6-13	Melones.
" 13-20	Jamestown.
" 20-31	Kennett.

This car No. 5 is equipped with ten 1910 type Dragoers, one Fluess "Pro-

### A MONSTER AQUEDUCT.

The aqueduct conducting the water of the Owens River at Los Angeles said to be the largest in the world, is designed to deliver a minimum of 258,000,000 gallons of water daily in the San Fernando reservoir, 25 miles northwest of the city. No pump plant is required, as the source of supply is several hundred feet above the city. The water will furnish a great amount of power—70,000 horsepower is anticipated—for electric lighting and other purposes. The total cost of the waterworks will be \$25,000,000, and the installation of the power plant will be approximately \$5,000,000 more.

## CONSTRUCTION WORK ABROAD.

## CANADA.

[Consul General R. E. Mansfield, Vancouver.]

## Plans for University of British Columbia.

It is learned from Dr. Westbrook, the president, that plans for the University of British Columbia have been completed and the contract let for the science building, the first of the series of structures to be erected on the site.

In the plans, which were prepared under the direction and with the advice of the president and board of governors of the University, special attention has been given to the details and requirements of the various departments, and when the several units have been completed the University of British Columbia will be one of the best equipped institutions of the kind in the Dominion.

The site consists of 250 acres at Point Gray, 4 miles from Vancouver, the entrance to Burrard Inlet, trading some of the roads and main campus is nearly completed. The University architects are Sharp & Thompson, of Vancouver, British Columbia, who obtained the award in the competition held in 1912. In November, 1913, Dr. C. C. James, commissioner of Dominion agricultural instruction, let with the commission appointed to examine and report upon the general design for the University. A general plan was prepared by the commission and approved by the board of governors.

In accordance with the commission's recommendation detailed plans and specifications are being prepared for the various buildings, and advertisements inviting tenders for the science building have already appeared. This building is planned for the temporary accommodation of physics, chemistry, zoology, and certain other sciences, but is intended for the ultimate sole use of chemistry. With its equipment, it is expected to cost about \$600,000.

Building plans are being completed for an administration building to house library, administration, and certain of the humanities, two dormitory buildings, buildings for mines, engineering and other applied sciences, and a heat and power plant. The approximate cost of these and the science building will be \$2,000,000.

In order that the nucleus of a library may be available when the University begins operations in the autumn of 1915, out-of-print publications and journals are being purchased and Government and other official documents are being obtained at a cost of some \$50,000. The University budget provides for an initial annual expenditure of \$24,000 for purchasing books and maintenance.

[A birds-eye view of the proposed buildings for the University will be shown on application to the Bureau of Foreign and Domestic Commerce, Washington.]

## CHILE.

[Consul Percival Gasset, Iquique.]

## The Tarapaca Waterworks.

The Chilean Government last year appropriated \$1,385,952 for constructing waterworks to supply the city of Iquique with portable water, and the Department of Public Works has made

surveys for conveying the waters of the Quebrada de Chintaguay at Pica, 66 miles from Iquique.

This action has surprised the stockholders of the Tarapaca Waterworks Co., an English concern, which has had a monopoly of supplying the city of Iquique with water for over 25 years, during which time it has been well managed, having paid 7½ and 8 per cent dividends, besides paying off \$20 on each of the original \$50 shares.

The original concession from the Chilean Government was made in 1883 to Mr. Hart, an Englishman, at whose death it was purchased from his widow and a company formed in London in 1888 with £150,000 (\$2,189,925) capital.

## Antofagasta Port Works.

The Finance Committee of the Chilean Senate has completed the report upon the new harbor works scheme for the port of Antofagasta, the measure now only requiring to be passed by the Upper House, says the South Pacific Mail. In the Senate it has been agreed to discuss the scheme at an early date. The plan which has been put forward makes the following recommendations:

That improved harbor works for the port of Antofagasta are of the first importance and should take precedence among improvements of this class undertaken by the Government. That the new port works should have preference to similar works proposed for the port of Mejillones.

That an essential complement to the progress of the port is the construction of a railway line connecting Antofagasta with the Longitudinal Railway. The Port Works Commission have taken as a base for their calculation the following statistics: (1) The export and import trade which should result from the improved facilities for

landing and discharging cargo, 1,600,000 tons. (2) Tonnage of ships entering and leaving the harbor, 7,600,000 net register. (3) Number of trading vessels which enter and leave the port, 3,000. (4) Accommodation for 18 vessels to embark or disembark cargo.

The Government plan is based on calculations which for the most part correspond to the above statistics. The cost, it is estimated, will be about \$7,600,397, inclusive of \$847,064, the cost of necessary work.

The ground reclaimed from the sea, after that needed for the new works has been selected, will leave an excess of over 100,000 square meters, the sale of which at say \$18.25 per meter, should yield \$1,825,000.

Allowing six years for completion of the works, their cost, it is calculated, will be \$8,996,175. Toward this total there will be available \$1,825,000 resulting from the sale of the reclaimed ground, and the proceeds of the loan of £1,500,000 (\$7,299,750) issued at 96½ per cent.

A record was established by the Western Maryland railway when it hauled 114 loaded coal cars from Cumberland to Hagerstown, Md., with a single locomotive. The trainload was in excess of 15,750,000 pounds.

In a recent popular voting contest in Germany wireless telegraphy was declared to be the greatest wonder of the twentieth century, with the Panama canal second and the dirigible balloon third.

Liverpool is thinking about spending more than \$26,000,000 on a system of underground railways.

## Announcement of Improved Service of the "BUILDING and INDUSTRIAL NEWS"

With the desire to aid our advertisers and subscribers we announce the appointment of Lloyd C. Comegys, as our advertising manager.

Advertisers will receive his free advice and assistance regarding the advertisements carried in our weekly magazine, in order that they may produce greater results for them, both in advertising trade names and goods, and in getting direct sales and returns.

**Our Weekly has MANY ADVANTAGES for you.**

**Learn about them by sending for**

by Lloyd C. Comegys

## What Letters, Post-Cards, Circulars and Folders Can Do.

### LETTERS:

A letter is the most personal and valuable instrument that you may utilize to dispose of your offerings, acquire information or settle difficulties, outside of sending a personal representative, or calling yourself.

With letters, you may call upon thousands of people, in a single day, gain admittance to the busy office and receive the attention of either the proprietor himself, or one of his trusted lieutenants. Many times your representative would be unable to even get into the office and would not be given a hearing at all.

A letter also, by having come through the mail, certifies that it is direct from you and valid, and its statements and offers contained are accepted without question, and the party is relieved of worry as to what you have offered, by reason of his having the written evidence of same, which would be accepted in court, if necessary.

The statements of your representatives or salesmen are not always accepted for their full intended value, and unless left in writing, do not inspire that feeling of security that the letters will.

The letter has also the advantage that should it arrive at an inopportune time, it will be laid on the desk, to be taken care of in the regular order of business. Salesmen could never wait the convenience of all their customers in this manner.

In using letters, if you desire a reply or an order signed, an insert should be enclosed and so worded as to make it necessary for the party receiving it to do but little else than designate his selection of goods and sign his name. POST CARDS.

Post cards for some propositions are as good, if not actually better, than sealed letters, but you must know whether this applies to your particular proposition and if the attitude of the receiver would be as favorable as when being approached through a sealed letter.

### FOLDERS, CIRCULARS

Folders and circulars are less personal than letters, but may utilize cuts and tabulated matter, including price lists, general data, and instructions as to your proposition that could not be conveniently put in letter form. It is very proper and desirable that when sending such it be accompanied by a personal letter clearly and concisely calling attention to the main features of your offer.

### DIRECT RESULT GETTING

In using all the above you should select those parties with whom you

wish to do business and submit a definite, concrete offer to them, and provide a means of closing that offer and realizing your profit. This allows you to pick out a large number of men, submit your proposition to them, and continue to follow up submitting it to them, until you have effected a sale or found that a sale cannot reasonably be made. Properly used such advertising can make more money for you than possibly any other single business facility that there is. By such advertising you can talk your proposition to thousands in a single day. You can learn who is interested and who will not take your line.

You can eliminate the time of seeing those who won't buy.

You can eliminate the cost of seeing those who won't buy.

Your time is your capital and what is saved is added capital for additional endeavors.

## How To Get Your Advertising Read.

### PLACING:

That is selecting the proper newspapers, magazines, or programs in which to insert your advertisement, or selecting the proper location of Bill Boards for your advertisement. Also selecting the proper parties to whom to mail your offer or to whom to distribute your printed matter. This is the first principle of getting your advertisement read, but what is more important that of getting it read by the people with whom there is a possibility of your doing business. To advertise Ladies' goods in a man's publication, hardly ever seen by women, would bring small, if any, results.

### ATTENTION TO ADVERTISEMENT:

This is obtained if it is a newspaper, magazine or program advertisement, by catch line in the advertisement, by the border around the advertisement or by the Cut in the advertisement.

### COMMON PHRASES:

Unless very strong and calculated to compel the mind to want to read what follows them in advertising, should not be used.

### BORDERS:

Many times it is only the ad with a clear border and strong display which will be read on that particular page, as the reading of one advertisement on a page will often sufficiently tire a person as to make them desire a change and cause them to turn to the next page of the paper or magazine.

### CUTS:

Cuts if very strong will attract the attention, but they should be in harmony with the border and the rest of the display matter of your advertisement and should be in harmony with the argument and appeal of the rest of your advertisement.

### ASSOCIATION OF IDEAS:

This means to keep the thought of your reader confined upon the one subject or details pertaining to it. It would be foolish to dwell upon the comforts of the parlor-side in trying to sell an automobile. Rather will you explain the pleasure of moving along beautiful roads, visiting new localities and receiving the exhilaration of out-of-door riding.

### SUGGESTING IN ADVERTISING:

Suggestion is sometimes stronger than a clear explanation if it is so that it cannot be misunderstood. A suggestiveness which allows of any different interpretation no matter how slight from what is intended should not be used.

The above points will illustrate the methods of attracting attention to your advertisement and getting it read, after which the reasoning and selling power of your advertisement must do the work of effecting a sale, or bringing an inquiry for further particulars, as you may have planned.

A trade paper or journal talks directly to persons interested in the trade lines, and you are assured of careful attention, if your advertisement is properly worked up.

## Editorial Comment.

Pictures from the war zone show that Belgium is paying the price of war destruction. It is estimated that the damages already incurred amount to over 200 million dollars and that is no doubt being augmented every day. Further than that Germany has exacted a big war indemnity and has annexed the captured territory, according to reports. And this for the reason that she refused to have her country made a cockpit and a fighting ground for a useless war. If this is modern warfare it would be better to return to the time of Attila.

The railroad to Eureka in Humboldt county will be completed next month and a great country will be opened up to ordinary travel. The countries of Northwestern California have been and are the great lumber districts of the State. It is the home of the great redwood forests of the world. And heretofore the only line of communication has been by sea through Humboldt Bay and during the winter season access to this port is difficult.

The coast counties of Northwestern California have unrivaled scenic beauty. Rugged mountains and narrow valleys are covered with the greatest forests in the world. Where the timber has been cleared or where there is open ground almost any kind of agricultural crops can be raised. The completion of the railroad will open up this country to the tourist and the sightseer at all seasons of the year. It will furnish an additional means of handling freight and bring the bay cities closer to the farmer of Humboldt county. It is a distinct improvement and a much needed one that has been delayed for a long time on account of the enormous expense of railroad construction in such a rugged country.

The passage of the American Hawaiian Steamship Company's steamer through the canal the other day, making the trip from New York to San Francisco in a period of sixteen days, seems to indicate that such means of freight carrying can be used even for the heavy fruits of California. That is not much over the limit for freight trains from San Francisco to New York and in refrigerator ships many kinds of fruits could be so shipped.

Secretary Lane points out the fact that the present war offers many opportunities for the development of American industries. Many articles that have been manufactured in Europe can be manufactured here if

once started. Particularly is this true of dye stuffs and many things that heretofore have come almost exclusively from Germany.

Another field of industry that can be developed is that of the potash fields and the fertilizer industry. Heretofore most of our mineral fertilizer has come from Germany. There are vast deposits in this country and the kelp beds of the ocean offer great opportunities for developing the industry along the seaboard. Now is the time to start the business to fill the want that the barbarian kings of Europe have created.

According to reports Villa is starting something in Mexico again. Naturally the savages in Mexico are not happy if they are not fighting and so long as they hold sway they will continue to whoop it up till they kill each other off. The chief difficulty with us is that Mexico is a near neighbor and the machinations of capitalists and filibusters and the agents of foreign countries makes it imperative that we have some interest in the matter. Until the average Mexican receives some degree of education or until the present breed is exterminated there seems little hope of establishing a permanent government outside of armed force. They are half savages down there and it seems impossible for them to unite on any common ground—or in other words it seems impossible for bandits to agree.

Political issues are strange things as the Chronicle sees them. It has the economy streak on now both as to State and Nation. And it is the economy that insists that a direct tax is an expense while the indirect tax is a benefit. In other words the expense of the Railroad Commission is an expense that the people have to pay and the high freight and express rates that the people generally had to pay before were a benefit and a means of employment.

For the past year and for three years the burden of the Chronicle and all the other reactionary papers has been that of freak legislation and wild-eyed laws that would ruin the prosperity of the state. Now since Captain Fredericks is the candidate of the united reactionaries the attitude is entirely the other way. All this beneficent legislation has been passed by the all-wise Republican party and the appeal is made that only under the beneficent guidance of the old guard can the state be expected to exist and hold up its head before the world. Surely the old guard must have taken a tip from Hearst for otherwise it could not expect to make such a complete somersault and get away with at only a Silurian would swallow such a pill as that.

## FACTS ABOUT STUCCO.

External Treatment, Changes in Temperature, Important Features Discussed.

The ease with which stucco lends itself to artistic treatment has tended toward a precocious development that has been harmful. The trouble is that a stucco job which first appears to be an artistic gem, gradually develops flaws which may finally overshadow the original beauty.

What is the cause of the "checking" and "hair-cracking"? Is it superficial, or is it hidden in the physico-chemical composition of cement? Much valuable study has been devoted to the external treatment of stucco, but few have stopped to question its internal composition. Let us therefore study some inside facts of stucco mortar.

The subject is an interesting one and the conclusions startling. Who would have thought for instance, that cement acts like wood; swelling up on wetting and contracting on drying? But this is proven by careful measurements.

A. T. Goldbeck, of the United States Department of Agriculture, showed this in experiments described in the Engineering Record of July 5th, 1911 (page 45). His researches were confirmed by Prof. A. H. White, working independently in the University of Michigan, and published in the Engineering Record for July 15th, 1911 (page 73). Both of these gentlemen proved scientifically and conclusively that mortar and concrete expand on wetting and contract on drying, the action keeping up for years.

In some cases the amount of expansion (due to wetting) was as great as that due to 100 degrees increase of temperature. This is a startling fact, when it is remembered that concrete expands with heat just as much as iron does. The strains due to wetting and drying are, therefore, very severe, and come quickly and repeatedly. It is not difficult to see why this should be such a serious source of cracking.

It is fortunate that only the cement is affected, the sand remaining practically unaltered by moisture. Therefore lean mortars are much less affected than rich ones; a 1:3 stucco when moistened expands much less than a 1:2. But as Prof. White says, "If a stucco is lean enough to avoid cracks water will go through freely, and if it is rich enough to keep out water it will crack."

In Italy, where stuccoes have been used for centuries, masonry walls were thick and waterproof in themselves. Cement was made from pulverized natural rock, and lean stucco mixtures were a matter of economy. The passage of ages has developed comparatively little checking in the Italian stuccoes. But today, in America, Portland cement is cheap, walls are thin, and climate severe, so that rich mixtures have been used in the attempt to get cheap waterproofing. The result is excessive hair cracking.

It is, of course, true that a 1:3 stucco is more waterproof than a 1:2, but it is very much more liable to crack, on

the other hand, a 1:3 stucco properly applied is safe from cracking, though very porous. This, then, is the dilemma which confronts the constructor: how to make stucco lean enough to avoid cracks, yet non-porous enough to keep out water. The problem has been solved by the use of a 1:3 mortar in conjunction with an effective waterproofing compound.

The leanness of the mortar prevents cracks, and the compound makes the mortar waterproof. This gives absolute reliable results both as to permanency of surface and permanency of waterproofing, and is in every way more satisfactory than asbestos or patented stuccos which do not positively prevent checking and never entirely waterproof.

Practical experience has corroborated the laboratory in showing the need for lean mixtures, but as is frequently the case, we did not see the everyday facts in clear light until science opened our eyes. For instance, it has long been known that excessive troweling of a floor, etc., should be avoided. Now we understand that the troweling worked the particles of cement to the surface, making a rich mixture which cracked for the reasons above mentioned.

Some years ago an architect was building a stucco home for himself. The contractor ran short of cement and asked permission to use a leaner mixture. This was permitted for the back of the house where it wouldn't be noticed, but the rich mortar was insisted upon for the rest. To the surprise of everyone the back wall is still flawless, while the front of the house is full of hair-cracks.

It must be emphasized that with a lean mortar, the permanency of the waterproofing compound is a very important point, as the stucco is exposed to beating storms. That class of compound using stearates, oleates, resins, or other soapy material as a base, gradually washes out under prolonged action of water which slowly but surely dissolves even stearate of lime. A permanently waterproof stucco is dependent on using a compound that is absolutely insoluble and unaffected by the elements. Bituminous waterproofing products belong to this class and compounds have been developed which are miscible with water yet become absolutely insoluble after the mortar has set. This result is obtained by emulsifying the bitumen, which then mixes with water as easily as milk does (milk is an emulsion). But when the mortar sets, it de-emulsifies the bitumen, which then becomes as insoluble as a milk spot. (Butter is de-emulsified milk and is not miscible with water.)

Bituminous materials so prepared give a very high degree of permanent waterproofing. They are absolutely unaffected by salt-air, brine, running water, boiling water and ordinary chemicals. Weight for weight they give four times the efficiency of soap

compounds, yet they actually strengthen the mortar instead of weakening it and because of the lack of all harmful action the amount of compound is not limited to 2 per cent. If desired 10 per cent or more may be incorporated in the mixture and the waterproofing effect correspondingly increased. In this way a factor of safety may be secured which is as important in waterproofing as in other branches of engineering. It then becomes possible to waterproof under guarantee, a cellar 50 feet below tide level, by means of a 3/4-inch interior mortar facing. Evidently this is the kind of material which will give satisfaction also in external stuccoes, where no pressure is encountered, but where, on account of the lean mixture, a safety factor is desirable to cover variations in mixing and plastering.

Bituminous materials also lubricate the mortar, enabling a very lean mixture to be troweled easily and compactly. They also retard the too rapid drying out of the stucco.

We might mention here that if new, green stucco is subjected to the rapid evaporation of hot summer days, great care must be taken to prevent premature drying out. It must be remembered that the setting of Portland cement is a chemical reaction that requires time and moisture. Mortar will have no strength unless this set is obtained. As mortar dries, it shrinks. This shrinking puts a strain on the mortar which causes cracks if it comes before the cement has sufficient strength to withstand it. If, however, the stucco is kept moist for several days, by means of tarpaulins or fine spray, the cement will harden normally and become strong enough to withstand the strain caused by drying. Soap compounds should be avoided as they delay the setting, thus causing the mortar to remain weak for a longer time. If stucco is made from a lean mortar, properly waterproofed, properly foundationed, and kept from premature drying, it may be allowed to harden without fear of immediate or subsequent cracking.

On large surfaces the thermal expansion should be considered, especially if the stucco is applied to a base having a different rate of expansion. It may be advisable to divide the surface into panels, having projections which add to the pleasing effect and facilitate the uniform application of the stucco.

The above outline calls attention to a few internal characteristics which are vital. Believe the stucco of the disrupting strains caused by their disregard and a worthy material is secured for the best ideals of architecture.—R. L. Shainwald in National Builder.

For the convenience of carpenters there has been invented a machine which, held in the hand, feeds nails into the position in which they are to be driven with a hammer held in the other.

## THE CONSTRUCTION OF A BATTLE-SHIP.

From the Wood-Worker.

Every year a naval appropriation bill is introduced in Congress, and we read of the discussion as to whether we will have one, two or four battleships of the "super-dreadnaught class."

I often wonder how many men, employed outside the ship yard in the wood-working industries, actually know the amount of lumber used and the class of work done in the preliminary and permanent work on such vessels. No doubt some will be surprised to learn that for 1,200,000 feet of yellow pine, spruce, oak and teak have been used in the construction of one of these monsters. Vessels of the Pennsylvania class will probably take more than this amount. Should we see one of these ships at anchor in the stream we would see no wood at all. Going on board, we would notice the wooden deck, but that would only account for about 10 per cent, or 120,000 feet. Where is the rest of it?

To answer that question we will have to start from the bottom, or rather before she has any bottom. A vessel of the class of the Pennsylvania, or battleship 29, which is now building at the navy yard, Brooklyn, while building, will cover an area of about 60,000 feet, viz., 968x625 feet, and will weigh, when about to be launched, about 12,000 tons, which is about 10 per cent of her total weight. Therefore, it is necessary that a foundation must be constructed sufficient to withstand this weight without any settlement. To accomplish this, piles are driven in rows across this space to be occupied and each row is four feet between centers. There are about 156 rows, with thirty-two piles to a row, in all nearly 5,000 piles. Each row is then capped with 14x11-inch yellow pine logs. In this item alone there are nearly 200,000 feet of lumber.

But the vessel must be constructed in such a manner that she will slide into the water and to do this must be built on an incline. That is, that the line of the keel will be much higher at the forward end than it is at the after end, so a declivity of about 1/4-inch to the foot is given her, which will bring her about 26 feet higher at the bow than at the stern. To accomplish this a heavy structure, called cribbing, is built up at the forward end to the height required, about 26 feet, inclined downward to the water's edge. The cribbing is built of 12x12-inch or 14x14-inch yellow pine logs, crossed and recrossed and bolted together in a substantial manner.

Upon the cribbing are erected the keel blocks, which are built up in sets of five blocks, pyramid fashion, the lower one being 8 feet long and the upper one 3 feet long. The upper blocks are perfectly aligned to the declivity of the vessel and a perfectly straight line, known as the center line, is struck and scored in on them, and from this line all measurements are taken. There are at least 150 sets of keel blocks, placed 1 foot between centers, and all blocks are dressed on two sides. The keel block being in perfect alignment, we are now ready to lay the keel. But as we are not ship-fitters or iron-workers, and only

dealing in lumber, we will leave this to the master ship-fitter and wish him well, for his troubles are commencing, now.

The ship starts to grow, plate after plate is put in place and bolted up. The shipwright must construct false work to receive them, must shore up to get them in position, must regulate them to hold the shape, and the mill provides him with the wherewithal to do it. Scaffolding and staking must also be provided, until a veritable forest of timber rises under and around her. The time is fast approaching when the work on the vessel will be far enough advanced to put her overboard, for she must go over just as light as possible, this is usually done, when the hull, exclusive of the armor, is completed.

The carpenters have been building the ways, on which she is to be launched, in some other part of the shipyard, and these are worthy of description. First come the groundways, 12-inch in thickness, 72 inches in width, the length of the ship and enough beyond to carry her into deep water, approximately 700 feet. The groundways are built of 12x12-inch yellow pine in sections 100 feet long, and as there are two sets of ways, one port and one starboard, it will require fourteen sections, 12x72 inches x 100 feet. This material must be clear, no defects in lumber being allowed. The ground ways are slid into place under the vessel and on the same incline, perfectly aligned, bolted together and secured to the cribbing on which it rests. They now form two immense tracks, one on each side of the keel, and about 15 feet out from the center line, and on these the ship is to make her first voyage.

Next come the slidingways, which are 12 inches thick, 66 inches wide and approximately 500 feet in length. They are built similar to the groundways and are placed on top of them, with an opening about 3/4-inch between, in which to run hot tallow and graphite. The extreme upper ends of the slidingways are bolted to the groundways and these few bolts are the last thing that hold the ship from sliding into the water until the order is given, "Cut away." With the ways in position, there still remains about 3 feet from top of ways to bottom of ship, and this must be filled in so that the weight can be taken off the keel blocks and shores on which she rests, and transferred to the ways. And here the mill again has a job on its hands.

Oak wedges, 7 feet long, 6 inches wide and tapering from 6 inches at large end to 1/2-inch at small end, dressed on both tapered sides, are made, and it will take about 700 of them for the job. These are placed across the top of the slidingways, about 18 inches apart, with butt ends projecting about 18 inches over edge of ways. On top of the wedges comes the packing, which is to fill up the intervening space. This is usually 18x12 yellow pine plank, surfaced 2 sides, as wide and as long as the slidingways and built up from top of ways to bottom of ship. The planking that comes next to bottom is fitted to conform to curvature of the hull, so that the vessel rests in a snug fitting cradle.

Packing and slidingways are now

made fast by wire cable to the ship, and hot tallow and graphite are run into the space between the groundways and slidingways. All shores, staking and scaffolding outside the ship are then removed. Double bottoms are shored and stiffened temporarily with wood, and all precautions taken to insure a successful launch. The vessel is now resting on the keel blocks, with a few temporary shores here and there.

The great day arrives and everybody is on edge, especially the naval constructors and master mechanics, upon whom the responsibility for the successful launch devolves. The wedges are rammed home; this is a heart-breaking job, but does not take long. The keel blocks are split out, the remaining shores tumbled down, and now the whole weight of the vessel is resting on the groundways, and nothing prevents her from sliding into the water but the few bolts which hold the slidingways to groundways. The order is given, "Cut away," the slidingways are cut through just below the holding bolts, and the vessel breaks away and commences her graceful journey to the water.

The launch over, let us go back to work, for she is but 10 or 15 per cent complete, and there is a great deal to do before she can meet the enemy in battle. The carpenters and mill men have as yet done very little permanent work on her, and there is still the armor backing and the wood decks to be done. All parts of the ship that are to be covered with armor must first be covered with teak wood, and this wood is known as armor backing.

The backing for the belt armor usually extends all around the vessel and is at least 7 feet below the water line to about 5 feet above, and from 3 to 6 inches in thickness. This is all sawed from the log into planks and dressed on two edges, with edges slightly beveled to form what is known as a caulking seam. The sides of the plank are then sawed to conform to the curvature of the vessel's hull. Above the belt armor backing comes the casemate armor backing, which extends from 350 feet to 400 feet over the vital parts of the ship, such as engine room, boilers and magazines. The casemate armor backing is treated in the same manner as the belt armor backing, viz., dressed on two edges. All armor backing is bolted to ship, bolt heads countersunk and plugs put in over the bolt heads. We will require 10,000 1 1/2-inch diameter plugs for this.

The turret armor backing comes next. She will have four turrets, elliptical in shape, with sloping sides. They will be 6 feet 6 inches high, about 10 feet long and 20 feet in width. It will take 29,000 feet of 6-inch lumber to cover them. As the sides of the turret slope inward, it is obvious that the top must be smaller than the bottom. As the backing on the turret is put on stave fashion that is, the plank running up and down it will be readily seen that the plank will be larger at the bottom than at the top, consequently they must all be tapered. Further, the taper is not all the same, because, as the turret runs up, the sides are almost perpendicular, and this gives a twist to the plank. In cutting the twist the degree of twist is given at about every foot and marked on the edge of plank. The

plank is then sawed on a bevel band saw (common to shipyards), whose upper and lower wheels turn on a circular guide, whose center is the point where the saw passes through the table of the machine. On a saw of this description you may commence sawing with the saw square with the table and finish with the saw 45 degrees to the right or left. It takes two men to operate this machine properly.

And now comes the deck. Nothing but the best material is used in this; it must be rift-sawed and straight-grained. Teakwood is used here, as it is considered the best wood for ship-building purposes. It is very durable, does not shrink or warp when seasoned, will not injure iron, nor will iron injure the wood. It will take, at least 200,000 feet of logs to make 125,000 feet of material fit for decking, as teak is a very wasteful wood; there are large heart shakes in it and nothing like this must enter.

The deck planks must be run to an accurate width, as they must be bolted to the iron deck upon which they lie. The holes have been drilled in the iron deck and spaced accurately, therefore we cannot afford to gain or lose in the width of plank, or we would very soon have the bolt holes over into the caulking seam. The plank will be  $3\frac{1}{2} \times 3\frac{1}{2}$  inches, and as the ship will be 36 feet in its widest part and the plank are laid fore and aft, it will take about 320 plank laid side by side, exclusive of margins, to cover this space. The decking is surfaced 4 sides and out-gauged; that is the sides of the plank are beveled slightly so as to leave an opening between the planks on the top edge, which forms a caulking seam; 5-32-inch is allowed between each plank.

Considerable trouble is experienced in dressing teakwood, especially when it is necessary to hold an exact width. It is apparently easy to work, not very hard, but it is very sandy, and with the ordinary soft steel cutters, running at the rate of 60 feet per minute, it is impossible to run more than 100 linear feet without filing. With hard cutters you may possibly double this amount. I have seen cutters, after running in linear feet, worn away 1-64th inch, so it keeps a man constantly grinding and setting cutters.

Besides the teak, yellow pine, oak and spruce, there is about 50,000 feet of soft Idaho white pine used for templates of plates and frames. This is all ripped into 2, 4 and 6 inch material, resawed to 3/8, and surfaced 2 sides to 1/4 inch. When the battleship is complete and goes into commission, there is a bill for about 1,200,000 feet of lumber against her, and probably only about 200,000 feet will actually go into her construction.

The total value of the output of the mines of Japan in 1902 amounted to \$28,500,000, and in 1912 it has increased to \$6,000,000. In the latter year the minerals mined, in the order of value of output, were: Coal, copper, petroleum, gold, silver, iron and zinc ore. The coal was valued in that year at over \$1,000,000, or about one half of the total value of the output, and copper at \$3,000,000.

## Gasoline Gas as a Means of Lighting, Heating and Cooking.

By Herbert Mievile.

For many years gasoline gas has been used for the purpose of lighting, heating and cooking, more especially in isolated towns where neither city gas nor electricity has been available.

It is fast superseding acetylene gas, which is recognized chiefly as a lighting proposition, its cost, when employed for cooking purposes, being expensive and somewhat dangerous.

It is highly probable that in the very near future the public will use gasoline to a large extent from which to make their gas for either or all of the three purposes referred to. Most owners of country homes have their automobiles and are therefore familiar with the handling of gasoline, and it is no more trouble to empty a can of gasoline in a gas generating plant, than to fill a tank on their motor car, and certainly no more dangerous.

There are two qualities of gasoline gas used for these purposes—"the wet, or rich gas," and "the three per cent mixture." The former contains eight to ten per cent of hydro-carbon vapor, to ninety or ninety-two per cent of air, while the latter does not exceed three per cent of gasoline vapor to ninety-seven per cent of air.

The former quality of gas has up to lately held the field and many and varied are the machines now on the market for the production of this gas. Unfortunately, however, this former quality gas is solely a production of the lighter grades of gasoline, which are readily volatile, and having a gravity not lower than seventy-two degrees Baume.

The cost of these lighter grades of gasoline is more or less prohibitive, besides being extremely difficult to obtain.

There are, however, at the present time machines on the market which will produce a "three per cent mixture gas" from the ordinary grade of motor gasoline, now selling for approximately 18c, a gallon and possessing a gravity from sixty to sixty-two degrees Baume, and it is on this quality of gasoline gas that the following remarks apply, as the writer believes the future of the industry depends very largely upon a machine capable of handling the commercial grade of gasoline met with every day, and obtainable everywhere, rather than in a special grade difficult to acquire.

This gas then is a mixture of air and gasoline vapor computed as Hexane (C<sub>6</sub>H<sub>14</sub>) the proportion of the latter not exceeding three per cent of the former. Its combustion, without added air, produces a perfect hunsen flame, having a blue outer cone with a greenish seating free of yellow flame.

This flame gives the maximum heat units, namely, 161 British thermal units to each cubic foot of mixture consumed, and one gallon of gasoline when vaporized, will produce approximately 775 cubic feet of gas, aggregating 125,000 units of heat.

This proportion gas is most efficient for all round use. The mixture itself

contains sufficient air for combustion, consequently taking none of the oxygen from the room in which it is burning. It is also free of carbon, causing neither dirt, odor, or poisonous fumes. Its chemical analysis is as follows:

Oxygen (O <sub>2</sub> )	19.5%
Nitrogen (N <sub>2</sub> )	77.2%
Carbon Dioxide (CO <sub>2</sub> )	0.1%
Hydrocarbon Vapors	
Computed as Hexane (C <sub>6</sub> H <sub>14</sub> )	3.2%

The machines now procurable for producing this gas, and capable of handling this everyday gasoline, are extremely simple in construction, entirely automatic and require very little looking after—the necessary air pressure being obtained either from an electric motor, hot-air engine, or water wheel—automatically governed. The gas is always ready for use, and ordinary sized gas pipes are employed for its transmission from the generator to the burner; there is also no condensation.

In conjunction with a small Welsbach mantle, the gas produces a most brilliant white light, its natural flame is intensely hot, clean and healthy, and moreover, it is perfectly safe, as directly the gas escapes (without being ignited) it becomes non-explosive.

Providing, therefore, the generator is simple, well constructed, and automatic in its working, its product should appeal to many as a superior artificial means for one or all of the three uses for which it can be so advantageously employed.

**STOCKTON, San Joaquin Co., Cal.**—A deal for the purchase of the Fanning property, 100 by 100 feet, at the north-west corner of Channel and Sutter streets for a consideration of \$30,500, has been consummated by the Stockton Masons. According to statements made by members of the order, a new temple will be erected on the site. Construction work is not likely to start before the first of next year, although it is thought that plans have already been prepared for the proposed structure.

**UKIAH, Mendocino Co., Cal.**—Bids will be received by the Clerk of the Board of Supervisors until October 6th for the construction of a wooden bridge across Cold Creek in the 2nd Supervisor District. Plans and specifications may be secured from the County Surveyor.

**RED BLUFF, Tehama Co., Cal.**—Bids will be received until October 6th by the Board of Supervisors of Tehama County for the construction of two steel bridges, one over Salt Creek Slough, two spans, 50 feet each, total length 100 feet, and the other over Mill Race, one span, 80 feet long. Further information may be had from the Clerk of the Board.

**SAN JOSE, Santa Clara Co., Cal.**—Representatives of six nearby counties at a meeting held in this city recently urged the building of an automobile roadway through Pacheco Pass as part of the plan of a Yosemite-to-the-sea highway.

**RICHMOND, Contra Costa Co., Cal.**—Congressman Chas. F. Curry is the authority for the statement that the Senate Commerce Committee cut the Rivers and Harbors Bill \$12,000,000. Richmond harbor, initial appropriation was cut to \$50,000.

Classified according to Character of Work

## APARTMENT HOUSES.

**SAN FRANCISCO**—Apartment house, 3 story and base, frame, \$20,000. Architect, Milton Lichtenstein, 111 Ellis street, S. F. Owner, Rebecca Tucker. The building will be erected at the northwest corner of Rush and Gough streets and will cover an area of 30 by 100 feet. Interior has been arranged for fifteen suites of three and four rooms. Pine and hardwood finish will be used. Oak floors will be used in the living and dining rooms. Plans provide for steam heat and a hot water system. All suites will have wall beds and private baths. Bath rooms will be finished in tile. Exterior of the building will be covered with rustic and shingles. Plans are complete and figures have been taken under advisement.

**BERKELEY, ALAMEDA CO., CAL.**—Apartment house alteration, 2 story, frame, \$3,000. Architects, Thomas & Oliver, Pantages Theatre Bldg., Oakland. Owner, Mrs. McGill. The present two-story frame dwelling located on Durant Way near Ellsworth will be altered into a modern apartment house. The suites will consist of three, four and five rooms, each with bath. Interior finish will be of pine and redwood. Some oak floors will be used. There will be new and modern plumbing, electric work, hot water system and plastering. Exterior of the building will also undergo alterations. Plans are complete and figures are now being taken.

**PORTLAND, ORE.**—Apartment house, 2 story and base, brick and steel. Cost not stated. Architect, Earl A. Roberts, Selling Bldg., Portland. Owner's name not given. The building will be erected at the corner of Broadway and Larabee street, having a frontage of 50 feet on each street. There will be two modern stores on the first floor. Upper floor will be arranged for apartments and offices. Interior will be finished in pine throughout. Hot water heat will be installed. All suites will have wall beds and private bath rooms. Tile wainscot will be used in the baths. Patent store fronts are specified. Exterior of the building will be faced with pressed brick. Plans are now being prepared.

## Contracts Awarded.

**LOS ANGELES, CAL.**—Apartment house, 4 story and base, brick and steel, \$60,000. Architects, California Architectural and Construction Co., Investment Bldg., L. A. Owner, George J. Ley. Contractors, California Architectural and Construction Co., Investment Bldg., L. A. Contract price, \$60,000.

**LOS ANGELES, CAL.**—Apartment house, 3 story and base, frame, \$26,000. Architect, none. Owner, Bond Ishman. Contractors, C. F. Borton Co., Hibernian Bldg., L. A. Contract price, \$26,000.

## BANKS

**SACRAMENTO, CAL.**—Bank and offices, 7 story and base. Class A construction. Cost not stated. Architect, R. A. Herold, Forum Bldg., Sacramento. Owners, Capitol National Bank. The building will be erected at the corner of 7th and J streets, and will cover a considerable ground area. Construction will be throughout with a complete steel frame, reinforced concrete or brick walls, concrete floors and hollow tile interior partitions. The entire first floor will be occupied by the bank. Upper floors will be arranged for modern offices. Plans provide for steam heat, vacuum cleaning, elevator service, a hot water system and metal window sash and frames. Interior will be finished in pine and hardwood. Marble and tile will be used extensively. Special bank fixtures and special bank vaults will be installed. Exterior of the building will be faced with pressed brick and terra cotta. Plans are now being prepared.

**BALDWIN PARK, LOS ANGELES CO., CAL.**—Bank and offices, 2 story and base, brick. Cost not stated. Architect, H. J. Knauer, Citizens' Bank Bldg., L. A. Owner, H. A. Church, Glendale. The building will cover an area of 38 by 62 feet. The first floor will be occupied by the bank and one store. Upper floor has been arranged for modern offices. Interior will be finished in pine and hardwood with tile floor in the banking room. There will be a central heating system. Special bank fixtures will be installed. Concrete vaults are specified. Exterior of the building will be faced with enameled brick. Plans are nearly complete and figures will be called for at once.

## BONDS.

**SANTA ROSA, SONOMA CO., CAL.**—District Attorney Lee in responding to a request has provided the Board of Supervisors with a draft of a resolution, calling for a road bond election to be held on the day of the general election, November 3rd, to submit to the voters of Sonoma County the question of voting \$1,000,000 bonds for permanent improvements.

The ordinance calls for bonds in \$1,000 denomination bearing 5½ per cent interest to run 32 years. It will require a two to one vote to carry the issue.

**FRESNO, FRESNO CO., CAL.**—No bids have been received here for the Princeton and Hopewell district bond issues. The bonds are of \$2,000 and \$900. When sold the proceeds will be used in the construction of school buildings.

There is some talk here that the \$250,000 bond issue of the Fresno schools will soon find a market.

**RED BLUFF, TEHAMA CO., CAL.**—A petition calling for a bond election

to establish a municipal water system is now in circulation in this city. The proposition is to bond the city in the sum of \$85,000 for the new system. About 200 signatures will be required before the petition will receive the recognition of the Board of Trustees and get an election.

**SACRAMENTO, CAL.**—A resolution setting October 16th as the date for the highway bond election has been adopted by the Board of Supervisors. The amount of money asked by the highway board for the construction of the highway system is \$2,125,000, the bonds to run for 37 years and to pay interest at the rate of 5 per cent per annum.

**SUISUN, SOLANO CO., CAL.**—The bid of the State Industrial Accident Board has been accepted by the Board of Supervisors for the purchase of the \$50,000 bond issue of the Rio Vista High School District, their bid being far and accrued interest.

**BEACONT, RIVERSIDE CO., CAL.**—An ordinance has been passed here to submit to the voters the holding of a bond issue to vote bonds of \$10,000 the proceeds to be used for street lighting and street improvements.

**ANDERSON SCHOOL DISTRICT, MENDOCINO CO., CAL.**—Bonds of \$2,000 are for sale. When sold the proceeds will be used in the erection of a school building.

**TWO RIVERS DISTRICT, MENDOCINO CO., CAL.**—Sealed bids will be received here by the Clerk of the Board of Supervisors for bonds in the amount of \$400. A. J. Fairbanks is the chairman of the Board.

**GLENDALE, LOS ANGELES CO., CAL.**—An ordinance has been adopted acquisition and construction of certain water works system, including lands, water rights, etc. for complete water works system. J. C. Sherer is the City clerk.

**BERKELEY, ALAMEDA CO., CAL.**—The school bond proposition carried here by 425 votes more than the necessary two-thirds, while both the harbor and civic center propositions failed. A half million dollars will be expended in the construction of school buildings and equipment.

**PASADENA, LOS ANGELES CO., CAL.**—No date has been set for the proposed water bond election. The estimated cost of the system is \$295,000.

**SCHOOL DISTRICT NO. 37, COCHISE CO., ARIZ.**—Bids will be received until October 6th for sale of bonds in the sum of \$90,000. Proceeds to be used in the erection of a school building. A. C. Karger is Clerk of the Supervisors.

**SAN FERNANDO, LOS ANGELES CO., CAL.**—A bond election will be held in the San Fernando School District for the voting of \$150,000 in bonds. The proceeds are to be used in the purchase of lots, building a school and equipping the same. E. M. Wright is a member of the School Board.

**HAWTHORNE SCHOOL DISTRICT, LOS ANGELES CO., CAL.**—The School Trustees will soon call an election to

vote \$10,000 to build a new grammar school building. Plans for the building have been prepared by W. C. Pennell.

**SIERRA MADRE SCHOOL DISTRICT, LOS ANGELES CO., CAL.**—A school bond election held here recently and which carried has been declared illegal. The bonds were for \$20,000. Another election will be held on October 14th.

**CULTON, SAN BERNARDINO CO., CAL.**—The County Supervisors have called an election for October 20th to decide on the issuing of bonds of \$150,000 to be used in the running of the County Hospital. Chas. Post is the County Clerk.

**PORTLAND, ORE.**—The city will sell \$50,000 bonds, the proceeds to be used in the construction of a municipal dock warehouse.

**RICHMOND, CONTRA COSTA CO., CAL.**—The water bond proposition was defeated here by an almost two to one vote, the returns showing 1,163 votes against them. It was necessary to have a two-thirds majority to carry the bonds.

The election, which included Stege, San Pablo and several other towns in the vicinity, concerned in the project of taking water from the Sacramento River at Toland's landing, above tide-water, and carrying it to Richmond by an elaborate aqueduct system costing \$2,500,000. This is the second time that such an election was held, both being defeated.

**GALLATIN SCHOOL DISTRICT, LOS ANGELES CO., CAL.**—The Board of Supervisors will receive bids for the purchase of \$10,000 school bonds until October 12th. H. J. Lelande is the County Clerk.

**TEMECULA UNION HIGH SCHOOL DISTRICT, RIVERSIDE CO., CAL.**—The Board of Supervisors will receive bids for the sale of \$10,000 school bonds until October 7th. A. B. Pilch is the Clerk of the Board.

**PRESCOTT, ARIZ.**—No bids have been received here for the purchase of the \$250,000 bonds, proceeds to be used for the erection of a new Court House. It is expected appeal will necessarily be made to local capital in order to sell the bonds.

**YUBA CITY, SUTTER CO., CAL.**—It is practically settled that the proposition of bonding the County of Sutter in the sum of \$550,000 for the construction of a county highway from San Diego by way of Nicolaus to Yuba City, the county seat, will be submitted to the voters in the November election.

The original scheme of extending the proposed road from Yuba City to Meridian has been abandoned for the present. It would have necessitated a bond issue of \$786,000.

**MARYSVILLE, YUBA CO., CAL.**—Perrin, Drake and Riley, bond brokers of San Francisco, have asked the Supervisors for a three days' option on all or any part of Yuba County's State Highway Bonds, and asking the lowest price the Board will accept. The county has \$10,000 worth of bonds for sale.

**OAKLAND, GLENN CO., CAL.**—The \$15,000 bond issue for the extension of the sewer and water system has been sold to the State Accident Insurance Commission, according to reports received here. It is said that money will be available at once and bids will

be called for by the Trustees immediately.

**MODESTO, STANISLAUS CO., CAL.**—A request to the people of Modesto to vote October 31st upon a proposition involving the issuance of \$20,000 in bonds for the purchase of sites for grammar schools to be built in the future is embodied in a resolution adopted by the City Board of Education at their last session.

**SANTA ANA, ORANGE CO., CAL.**—No bidders have been drawn to take up the \$10,000 Chapman avenue bridge bonds. City Attorney Garrett has stated that the bonds could be disposed of at private sale within five or six days.

## BRIDGES AND DAMS.

**PUTAH CREEK, SOLANO CO., CAL.**—Bridge, steel and reinforced concrete, \$110,000. Engineer, County Surveyor, Fairfield. Owners, Solano County. Final plans for the bridge to span the Putah Creek between Solano and Yolo Counties on the state highway have received the approval of the Board of Supervisors. The bridge will be of steel with reinforced concrete approaches and abutments. Bids will be called for at once. The engineer's estimate is \$140,000.

**ASTORIA, ORE.**—Culvert, reinforced concrete. Cost not stated. Engineer, State Highway Engineer, Salem. Owners, Klamath County. Plans and specifications have been completed under the supervision of the State Highway Engineer and bids are now being received and will be opened at the office of J. C. Clinton, County Clerk of Klamath County, Astoria, Ore., for the construction of a concrete culvert. The culvert will contain the following materials: 117 yards concrete, 4,450 pounds corrugated steel bars, 6,000 pounds old steel rails, 1,550 feet piling. Plans can be secured from the office of the State Highway Engineer, Salem, Astoria or Portland. Bids close on October 5th.

**RED BLUFF, TEHAMA CO., CAL.**—Highway bridges, S. steel and reinforced concrete. Cost not stated. Engineer, County Surveyor Lunning, Red Bluff. Owners, Tehama County. County Surveyor Lunning is now preparing plans and specifications for eight bridges to be constructed over the route of the State Highway from the Glenn County line to Corning, four of which will be of concrete and a like number of steel construction. Plans will be submitted to the Supervisors at the next meeting and on approval bids will be called for.

**SAN FRANCISCO.**—Dry dock construction, \$500,000 or more. Engineer, Union Iron Works, S. F. Owners, Union Iron Works. Actual work on the big dry dock project at Hunter's Point is to be undertaken without further delay. The Union Iron Works, will through their local office, receive figures for such portions of the work as they are not equipped to carry out. This work will include the concrete work principally. About \$500,000 will be expended on the dry dock, while several buildings will also be erected, which will cost about \$250,000.

**PORTLAND, ORE.**—Dock, 1 story, frame and corrugated iron, \$50,000. Engineer, G. B. Hegardt, Public Dock Commission, Portland. Owners, City

of Portland. The building will be erected on Pier No. 1, and will cover an area of 210 by 230 feet. Special cargo handling cranes will be used. Roof will be of four-ply asbestos. Exterior will be covered with corrugated iron. Plans are complete and figures will be opened on October 2nd. Plans and specifications can be secured from the Portland Dock Commission.

## Contracts Awarded.

**SAN RAFAEL, MARIN CO., CAL.**—Bridges, timber construction, \$2,797. Engineer, County Surveyor, San Rafael. Owners, Marin County. Contractors, Marin Rock Co., San Rafael. Contract price, \$2,797.

**MARYSVILLE, YUBA CO., CAL.**—Bridge, reinforced concrete, \$134,000. Engineer, County Surveyor, Marysville. Owners, Yuba County. Contractors, Clinton Fireproofing Co., Mutual Bank Bldg., S. F. Contract price, \$134,000.

**BELOTTA, SAN JOAQUIN CO., CAL.**—Bridge approach, concrete construction, \$1,470. Engineer, County Surveyor, Stockton. Owners, San Joaquin County. Contractors, Eckfeldt & Curry, Stockton. Contract price, \$1,470.30.

## CHURCHES.

**PORTLAND, ORE.**—Church, 2 story and base, brick and concrete, \$25,000. Architects, Pope & Burton, Salt Lake City, Utah. Owners, Latter Day Saints. The building will be erected at the corner of 25th and Madison streets and will cover a considerable area. The design is in the classic style. The main auditorium will have a seating capacity of 1,500 people. Basement has been designed to contain Sunday school rooms, pastor's study, a large social hall and kitchen. Interior will be finished in pine. There will be a central heating system. Art glass windows are specified. Exterior of the building will be faced with cement plaster. Plans are complete and segregated figures will be taken at once. Rev. Ballard is in charge of the work.

**BEAUMONT, RIVERSIDE CO., CAL.**—Church, 1 story and base, frame. Cost not stated. Architect not selected. Owners, First Presbyterian Church of Beaumont. At a recent meeting of the Building Committee of the First Presbyterian Church the plans for the new church building were agreed upon and it is expected that construction will start at an early date. No architect as yet has been selected.

## Contracts Awarded.

**SAN FRANCISCO.**—Church, 2 story and base, frame and plaster, \$15,000. Architects, Falch & Knoll, Hearst Bldg., S. F. Owners, Emanuel Evangelical Association. Contractor, Chas. Koenig, 3525 19th street, S. F. general construction only. Contract price, \$15,000. Art glass, painting and heating not included.

## FACTORIES AND WAREHOUSES.

**OAKLAND, CAL.**—Factory and warehouse, 4 story and base, reinforced concrete. Cost not stated. Architect, Lewis P. Hobart, Crocker Bldg., S. F. Owners, Shredded Wheat Biscuit Co. Architect Hobart has completed the architectural drawings for the first unit of the big plant which is to be

erected by this company on their Oakland property bounded by 12th, 14th, Poplar and Union streets. These plans have been submitted to Vice-President Fred Mason of the Shredded Wheat Co., who is now in the city. Structural plans have been completed by the company's engineers. Besides this building the company will shortly commence the construction of two other buildings of a similar type besides several cottages for their employees. Plans will be out for figures shortly.

**OAKLAND, CAL.**—Creamery, 1 story, brick, \$5,000. Architect, none. Owner, Miss Annie Johnson, 931 Bay View avenue, Oakland. The building will be erected on the south side of 18th street west of San Pablo avenue. The front portion of the building will be fitted up for a retail store and the rear for a modern sanitary creamery. A cement floor will be used. Interior will be finished in pine and tile. Exterior of the building will be faced with cement plaster. Plans are complete and the work will be done by Day Labor.

**OAKLAND, CAL.**—Warehouse, 2 story and base, brick, \$15,000. Architect, Alvin S. Stern, 1542 Broadway, Oakland. Owner's name withheld. The building will be erected on 19th street between San Pablo and Telegraph avenues and will cover a considerable ground area. Floors will be of concrete. Interior will be finished in pine. A freight elevator will be installed. Automatic sprinklers are also specified. Exterior of the building will be faced with pressed brick. Plans are complete and figures are now being taken by the architect.

**PORTLAND, ORE.**—Warehouse and factory, 4 story and base, reinforced concrete and brick, \$90,000. Architects, MacNaughton & Raymond, Title and Trust Bldg., Portland. Owners, Blake-McFall Paper Co. The building will be erected on the northside and will cover an area of 100 by 200 feet. Besides the factory plant and warehouse the building will contain the office of the company. Interior of the office portion will be finished in pine and hardwood. There will be two freight elevators, steam heat and automatic sprinklers. Exterior of the building will be faced with pressed brick. Plans are complete and figures are now being taken.

**HILLSBORO, ORE.**—Factory addition, brick, \$10,000. Architect, none. Owners, Pacific Coast Condensed Milk Co., Hillsboro. This company has commenced work on the enlarging of its plant here, and will expend about \$10,000 in the enterprise. The present building is too small for the milk available. Special machinery will be installed in the new addition.

**PORTLAND, ORE.**—Municipal barns, 2 story and base, reinforced concrete, \$50,000. Architect, City Building Inspector Plummer, Portland. Owners, City of Portland. The building will be erected at the corner of 13th and Jefferson streets, covering an area of used for storing the street cleaning equipment. The first floor has been 210 by 73 feet. The basement will be arranged for a total of 32 stalls, two box stalls and locker rooms. The second floor will be used for storage purposes and room for the feed grinder and offices. Special electric work and modern plumbing will be installed. Exterior of the building will be faced with pressed brick. Plans are com-

plete and figures are now being taken.

**AGNEW, SANTA CLARA CO., CAL.**—Factory plant group of 1 and 2 story and base, steel and corrugated iron, \$60,000. Architect, William Binder, Rea Bldg., San Jose. Owners, Pacific Chemical Co., Berkeley. This group of buildings will consist of a factory, warehouse, tower and a number of smaller buildings. Construction will be of steel, concrete and corrugated iron. The owners are engaged in the manufacture of a by-product of the Western Grain and Sugar Co. Special machinery and equipment will be installed. The company is now operating in Berkeley. Plans for these buildings have been revised and figures will shortly be called.

#### Contracts Awarded.

**LOS ANGELES, CAL.**—Laundry, 1 story and base, brick and steel, \$35,000. Architect, Fred A. Hale, 611 San Fernando street, L. A. Owners, Los Angeles Laundry Co. Contractors, Davidson Construction Co., 16th and Tennessee streets, L. A. Contract price, \$35,000.

#### FIRE HOUSES AND JAILS.

**WOODLAND, YOLO CO., CAL.**—Jail, 3 story and base, reinforced concrete, \$40,000. Architect, W. H. Weeks, 75 Post street, S. F. Owners, Yolo County. The building will be erected on property adjoining the present County Court House and will be fireproof throughout. The design is in the classic style. Provision has been made for two separate wards besides a large guard room and office of the sheriff and under sheriffs. Interior will be finished in pine. There will be steam heat and a modern system of ventilation. Special jail equipment will be installed. Exterior of the building will be faced with cement plaster. Plans are now being prepared.

#### FLATS.

**SAN FRANCISCO**—Flats, 2 story and base, frame, \$10,000. Architect, Paul F. De Martini, 2123 Powell street, S. F. Owner's name withheld. The building will be erected at the corner of Lyon and Union streets, and has been designed to contain two large flats of six and seven rooms. Interiors will be finished in pine with some elm panels. Hardwood floors will be used in the principal rooms. Tile wainscot and floors will be used in the bath rooms. Steam heat will be installed. There will be open fire places and tile or brick mantels. A private garage will occupy the basement. Exterior of the building will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

**SAN FRANCISCO**—Flats, 3 story and base, frame, \$5,000. Architect, Paul F. De Martini, 2123 Powell street, S. F. Owner, L. Itavani. The building will be erected on East Auburn street near Pacific, and will contain two flats and a store. Interior will be finished in pine and redwood. There will be open fire places and tile mantels. Bath rooms will have tile wainscot. Tile and marble will be used in the entrance. Exterior of the building will be covered with cement plaster

on metal lath. Plans are now being prepared.

#### GOVERNMENT WORK & SUPPLIES.

##### Machinery and Valves.

Bid for machinery and valves for Lake Washington canal locks were received by J. E. Cavanaugh, major of engineers, U. S. army, Seattle, Wash.

McMeyer Interstate Co., Bedford, Ohio, \$100,036.03.

Wm. E. Chase Engineering Co., Spokane, Wash., \$12,320.07.

L. & J. B. Mulholland Co., Pittsburgh, Pa., \$111,525.07.

C. C. Moore & Co., San Francisco, Cal., \$119,619.58.

Camden Iron Works, Camden, N. J., \$163,762.24.

Hans Pederson, Seattle, Wash., \$108,00.10, accepted.

A. McLean, Seattle, Wash., \$130,146.53.

Seattle Construction & Dry Dock Co., Seattle, Wash., \$117,160.24.

SAN FRANCISCO—Residence, 3 story and base, frame and plaster, \$19,000. Architect, John Davis Hatch, Humboldt Bank Bldg., S. F. Owner's name withheld. The dwelling will be erected at the foot of 32nd avenue, commanding one of the finest marine views in California. The dwelling will contain eighteen rooms, six baths and a private garage. Interior will be finished in hardwoods and white enamel. Hardwood floors will be used in the principal rooms. Plans provide for steam heat, a hot water system, vacuum cleaning and open fire places. Mantels will be of tile and brick. All bath rooms will have tile wainscot and floors. Exterior of the house will be covered with cement plaster on

metal lath. Plans have been out for figures. Edward Zinkund submitted the lowest figure on the general construction at \$18,120. He will probably be awarded the work. A complete list of the figures received will be found under the head of San Francisco in this issue.

SAN FRANCISCO—Residence, 2 story and base, frame, \$3,000. Architect, none. Owner, F. Nelson, 30 Presidio Terrace, S. F. The dwelling has been signed for a six-room house with bath, and will be erected on the east side of Arguello Boulevard south of Carl street. Pine and redwood interior finish will be used. Hardwood floors will be used in the living room, dining room and reception hall. There will be open fire places and tile or brick mantels. Bath room will have tile wainscot. Exterior of the building will be covered with cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor.

SAN FRANCISCO—Residence, 2 story and base, frame, \$3,000. Architect, Arthur G. Scholz, Phelan Bldg., S. F. Owner, E. R. Hayden. The dwelling will be erected on the east side of 17th avenue south of Riviera, and will contain seven rooms and bath. Interior will be finished in pine and redwood with some white enamel. Hardwood floors will be used in the principal rooms. Plans provide for open fire places and tile or brick mantels. The wainscot will be used in the bath room. There will be an automatic water heater. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and figures have been taken. A contract will be awarded this week.

OAKLAND, CAL.—Bungalow, 1 story and base, frame, \$3,000. Architect, none. Owner, T. B. Evans, 1417 East 20th street, Oakland. The dwelling will be erected at the corner of East 20th street and 16th avenue, and has been designed to contain seven rooms, bath and sleeping porch. Interior finish will be largely of pine. Hardwood floors will be used in the living room, dining room and reception hall. There will be furnace heat and open fire places. Mantels will be of tile. Bath room will have tile wainscot. An automatic water heater will be installed. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor. Materials are now being purchased.

BERKELEY, ALAMEDA CO., CAL.—Bungalow, 1 story and base, frame, \$2,500. Architect, Eugene K. Martin, 1192 Shattuck avenue, Berkeley. Owner, George Fodderwitz. The dwelling will be erected in West Berkeley and has been designed to contain six rooms and bath. Interior finish will be of pine and redwood. Some hardwood floors will be used. There will be an open fire place and tile or brick mantel. The wainscot will be used in the bath room. Exterior of the house will be covered with cement plaster on metal lath. Plans are now being prepared.

BERKELEY, ALAMEDA CO., CAL.—Residence, 2 story and base, frame, \$6,500. Architect, Samuel Arnold, Sharon Bldg., S. F. Owner, Z. P. Smith. The dwelling will be erected at the corner of Walnut and Shattuck

avenue, and has been designed to contain eight rooms and bath. Interior finish will be of pine and redwood with some elm panels. Hardwood floors will be used in the living room, dining room and reception hall. There will be furnace heat and open fire places. Mantels will be of tile. Bath room will be finished in tile. An automatic water heater will be installed. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and out for figures.

**BERKELEY, ALAMEDA CO., CAL.**—Bungalow, 1 story and base, frame, \$3,000. Architect, none. Owner, E. B. Spitzer, 2151 Ashby avenue, Berkeley. The dwelling will be erected on the south side of Marin west of Fresno, and has been designed for a seven-room house with bath and sleeping porch. Interior will be finished in pine and hardwood with hardwood floors in the living room, dining room and reception hall. There will be furnace heat and open fire places. Mantels will be of tile or brick. An automatic water heater will be installed. Tile wainscot will be used in the bath room. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor.

**SACRAMENTO, CAL.**—Bungalow, 1 story and base, frame, \$2,000. Architect, none. Owner, Manuel A. Pratts, 1728 D street, Sacramento. The dwelling will be erected on W street and will contain six rooms and bath. Pine and redwood interior finish will be used throughout. There will be some oak floors. Tile wainscot will be used in the bath room. There will be an open fire place and tile mantel. Exterior of the house will be covered with cement plaster and rustic. Plans are complete and in the hands of the owner who will do the work by Day Labor.

**SAN JOSE, SANTA CLARA CO., CAL.**—Bungalow, 1 story and base, frame, \$2,000. Architect, none. Owner, S. E. Druck, 901 Dalmas avenue, San Jose. The house has been designed for a six-room dwelling and will be erected on Dalmas avenue. Interior will be finished in pine and redwood with some oak floors. There will be an open fire place and tile or brick mantel. Bath room and kitchen will have tile wainscot. Exterior of the house will be covered with rustic and cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor.

**SISSON, SISKIYOU CO., CAL.**—Residence, 1 story and base, frame, \$4,000. Architect, James W. Plachek, Acheson Bldg., Berkeley. Owner, Chief United States Forester Hammett. The dwelling has been designed for a seven-room house with bath and sleeping porch. Interior will be finished in pine and redwood. Some oak floors will be used. There will be open fire places and tile or brick mantels. Furnace heat will also be installed. Bath room will be finished in tile. Exterior of the dwelling will be covered with shingles and stone. Plans are complete and figures are being taken.

**SEATTLE, WASH.**—Residence, 2 story and base, frame and hollow tile \$35,000. Architect, David L. Myers, Central Bldg., Seattle. Owner, M. A.

Arnold. The dwelling will be erected in the Highlands Tract, and will cover an area of 35 by 109 feet. There will be sixteen rooms, five baths and a garage in the center of large grounds. Interior will be finished in hardwood throughout. Hardwood floors will be used in the principal rooms. Bath rooms will be finished in tile and equipped with showers. Plans provide for steam heat and a hot water system. Vacuum cleaning will also be installed. Exterior of the house and garage will be covered with cement plaster. Plans are now being prepared.

**SAN FRANCISCO**—Residence, gardens and garage, frame construction, \$7,500. Architect, Willis Polk, Hobart Bldg., S. F. Owner, Mrs. Katherine Hooker. The owner has recently completed a handsome city home on the south side of Pacific avenue near Walnut, and now has had plans prepared for formal gardens with a fountain and other concrete work. A private garage of frame and plaster construction will also be erected on the property. Plans and specifications for this work are complete and figures are now being taken.

**OAKLAND, CAL.**—Bungalows, 2, 1 story and base, frame, \$2,000 each. Architect, none. Owners, Dean and Wade, 5210 Fairfax avenue, Oakland. These two houses will be erected on Wadman Place near 51th avenue, and each has been designed to contain five rooms and bath. Interiors will be finished in pine and redwood. Hardwood floors will be used in the living rooms and dining rooms. There will be open fire places and tile mantels. Bath rooms and kitchens will have tile wainscot. Interiors will be covered with cement plaster on metal lath. Plans are complete and in the hands of G. H. Halckenbeck, who will superintend the work, which will be done by Day Labor. Materials are now being purchased.

**SAN FRANCISCO**—Residence, 2 story and base, frame, \$4,000. Architect, none. Owner, William Koenig, 750 Parnassus avenue, S. F. The dwelling will be erected at the northwest corner of Ashbury and Congress streets and has been designed to contain seven rooms and bath. Interior will be finished in pine and redwood with some elm panels. Hardwood floors will be used in the living room, dining room and reception hall. There will be furnace heat and open fire places. Mantels will be of tile or brick. An automatic water heater will be installed. Tile wainscot will be used in the bath room. Exterior of the dwelling will be covered with brick veneer. Plans are complete and in the hands of the owner who will do the work by Day Labor. Materials are being purchased.

## PANAMA-PACIFIC EXPOSITION WORK.

### Contracts Awarded.

**SAN FRANCISCO**—Concession buildings, 1 story, frame and plaster, \$10,000. Architect, Director of Works, Service Bldg., S. F. Owners, Panama-Pacific International Exposition, Contractors, Strickland, Freese & Peterson, S. F. Contract price \$10,000.

## POST OFFICES.

**SAN FRANCISCO**—Subtreasury, metal vault equipment. Cost not stated. Architect, Supervising Architect Oscar Wenderoth, Washington, D. C. Owners, United States Government. Plans are complete and figures are being taken for furnishing and installing the metal vault equipment for the new United States Subtreasury building. Plans and complete information can be secured from the Supervising Architect. Bids will be opened on October 7th in Washington, D. C.

## RAILROAD CONSTRUCTION AND EQUIPMENT.

**SAN FRANCISCO**—Car barns, 1 and 2 story and base, reinforced concrete. Cost not stated. Architect, City Department of Architecture, Temporary City Hall, S. F. Owners, City and County of San Francisco. The City Department of Engineering are now going over the steel drawings for the new Potrero Street Car barns and report that the same will be completed within a few days. Bids will be called for in the course of the next three weeks. Further mention will be made in these columns at that time.

## SCHOOLS.

**BURLINGAME, SAN MATEO CO., CAL.**—School, 2 story and base, frame and plaster, \$25,000. Architects, Thomas Edwards and Ernest Norberg, Bank Bldg., Burlingame. Owners, Burlingame Meadow School District. Bids opened for this work show J. J. Leonard, S. F., low on the general construction at \$25,575, and J. C. Hurley, S. F., low on the heating and ventilating at \$2,398. Contracts will probably be awarded these firms. A complete list of the bids received will be found under the heading of San Jose and the Santa Clara Valley in this issue.

**FRESNO, FRESNO CO., CAL.**—School, 2 story. Class C construction, \$50,000. Architects, Coates & Traver, Head Bldg., S. F. Owners, City of Fresno. This building will be known as the Webster School and has been designed to contain thirteen class rooms and general office. Provision has been made for a large auditorium which will be added later. There will be no basement, the first floor being of concrete slabs and laid on filled ground. Stairs and halls will be of concrete. Interior finish will be of pine with some maple floors. Plans provide for steam heat, oil burning system and program clocks. Exterior of the building will be faced with pressed brick. Plans are complete and figures are being taken. Bids will be opened on October 27th.

**SAN FRANCISCO**—Exposition schools, 1 and 2 story, frame and plaster. Cost not stated. Architects, W. H. Weeks, 75 Post street, S. F., associated with Norman F. Marsh, Broadway Central Bldg., L. A. Owners, Panama-Pacific International Exposition Co. Architects Norman F. Marsh and W. H. Weeks have been appointed a commission to prepare plans for model school buildings to be erected on the grounds of the Panama-Pacific Exposition. The work will be done

under the direction of the commissioner of education of the exposition. It is planned to remodel a school building now on the Exposition site and to erect a domestic science building, a manual training building and a model rural school building. The task of designing the last three named buildings has been assigned to Mr. Marsh. It is the intention to make these schools a feature of the educational exhibit of the Exposition. School will be conducted daily and the buildings will be open to the public, the object being to illustrate in a practical manner advanced methods of education.

#### Contracts Awarded.

**SANTA CRUZ, SANTA CRUZ CO., CAL.**—School, 2 story and base, reinforced concrete. Cost not stated. Architect, W. H. Weeks, 75 Post street, S. F. Owners, Santa Cruz School District. Contractors, Peterson & Wilson, S. F., general construction, \$79,750; plumbing, Byrne Bros., Santa Cruz, \$5,550; painting, A. J. Pettidier, Santa Cruz, \$3,195; heating and ventilating, J. C. Hurley, S. F., \$9,290, and roofing, H. W. Johns-Manville Co., S. F., \$937. Awards on the vacuum cleaning, program clocks, electrical work and window shades were not made. A complete list of the bids submitted will be found under the heading of San Jose and the Santa Clara Valley in this issue.

**PORTLAND, ORE.**—School, 1 story and base, hollow tile, \$15,737. Architect, F. A. Naramore, Portland. Owners, City of Portland. Contractor A. C. Meyer, 1084 Albina avenue, Portland. Contract price, \$15,737.

**SAN FRANCISCO.**—Mission home, 2 story and base. Class C construction, \$25,000. Architect, Robert Orr, Van Nuys Bldg., L. A. Owners, Board of Women's Home Missions. Contractors, Gaspard & Hammond, Sharon Bldg., S. F. Contract price, \$25,000.

**FRESNO, FRESNO CO., CAL.**—School, 2 story and base. Class C construction, \$77,899. Architect's name not given. Coates & Traver, Head Bldg., S. F., supervising architects. Owners, City of Fresno. Contractor, H. A. Evans, Fresno. Contract price, \$77,899.

**GILBERT, ORE.**—School, 1 story and base, hollow tile, \$12,000. Architect's name not given. Owners, Gilbert School District. Contractor, F. S. Hallock, McKay Bldg., Portland. Contract price, \$12,000.

**ALHAMBRA, LOS ANGELES CO., CAL.**—School group, 1 and 2 story, brick and hollow tile, \$79,000. Architects, Allison & Allison, Hibernian Bldg., L. A. Owners, Alhambra School District. Contractor, H. E. Roberts, 203 North Marguerita avenue, Alhambra, general construction, Conroy & Winterbottom, Alhambra, plumbing, and Machinery and Electric Co., L. A., heating and ventilating.

**GLENDALE, LOS ANGELES CO., CAL.**—School, 1 story and base, brick, \$13,430. Architect, C. S. Westlake, 1158 Oak street, Glendale. Owners, Glendale School District. Contractor, E. D. Yard, 127 North Maryland avenue, Glendale. Contract price, \$13,430.

**FRESNO, FRESNO CO., CAL.**—School, 1 story and base, frame and plaster, \$12,199. Architect's name not given. Owners, Fresno School District.

Contractor, J. A. Daly, Fresno. Contract price, \$12,199.

**BAKERSFIELD, KERN CO., CAL.**—School toilets and plumbing, \$5,150. Architect, Orville L. Clark, Brower Bldg., Bakersfield. Owners, City of Bakersfield. Contractors, Baldwin Plumbing Co., Bakersfield.

#### SEWERS, STREET WORK & WATER SYSTEMS.

**CALIFORNIA.**—State Highway work. Cost not stated. Engineer, State Highway Commission, Forum Bldg., Sacramento. Owners, State of California. A complete list of the bids recently opened by the State Highway Commission for constructing highways in five counties will be found under the heading of Sacramento, Stockton and Northern California in this issue.

**KEENE, KERN CO., CAL.**—Transmission line. Cost not stated. Engineer, County Surveyor, Bakersfield. Owners, Kern County. Plans have been completed for constructing a transmission line of approximately 9½ miles, connecting the Pacific Light and Power Co.'s plant at Indian Creek with the Kern County rock crusher at Keene. The line is to carry a voltage of 50,000. Bids are now being taken and will be opened by the Board of Supervisors on October 7th. Plans and specifications together with full particulars can be secured from the County Surveyor at Bakersfield. An official proposal appears in another column of this issue.

**OREGON CITY, ORE.**—Water supply system, \$250,000. Engineers, Hurlburt & Rands, Henry Bldg., Portland. Owners, Oregon City. Plans and specifications have been completed by Hurlburt & Rands and bids will probably be authorized within a few days for the construction of the pipe line and water system to extend from Clackamas to Oregon City. William Anderson is chairman of the water commission. The work will consist of constructing a large reservoir to have a capacity of 5,000,000 gallons, to be of reinforced concrete construction, grading and building trenches and laying pipe. The pipe to be used will be 20-inch, 18-inch and 16-inch sizes of wood stave pipe. The cost of the work is estimated at between \$225,000 and \$250,000, and the work will probably be authorized at the next meeting of the commission at Oregon City, which has the matter in charge. The completed survey showed a total mileage of 24.9 miles. There will be 12 miles of 18-inch pipe, 7.5 miles of 16-inch pipe. According to the original plan it was the intention of the engineers to use 14-inch pipe, but the sizes have been increased.

**HOOD RIVER, ORE.**—Irrigation head works. Cost not stated. Engineer, R. A. McElmuthan, Heilbronner Bldg., Hood River. Owners, East Fork Irrigation District. Bids will be received by the Board of Directors of the East Fork Irrigation District until October 30th for the reconstruction of the head works at the intake on the East Fork of the Hood River and construction of main canal for a distance of about six miles. Plans and specifications can be obtained at the office of R. A. McElmuthan, Room No. 29,

Heilbronner Bldg., Hood River, Ore., on a deposit of \$5.

**SAN MATEO, SAN MATEO CO., CAL.**—Retaining wall, reinforced concrete. Cost not stated. Architect, Havens & Toepke, 46 Kearny street, S. F. Owners, City of San Mateo. Plans are now being prepared for constructing a reinforced concrete retaining wall from a point on the public library property to the school building. The work will be along a creek. Plans are now being prepared and figures will be called for shortly.

**PORTLAND, ORE.**—Sewer construction, reinforced concrete pipe, \$450,000. Engineer, City Engineer, Portland. Owners, City of Portland. All proceedings for the construction of the East 82nd street and Willow street extension of the East Stark street sewer will be started over, which will cause a delay of about two months in the advertising of bids for the work. This action was necessitated by the rescinding of the project. The work will be of 64-inch and 60-inch pipe, to be of reinforced concrete construction, while the Fulton Park sewer, which is to drain Fulton Park, Carson Heights and Parts of Capitol Hill and Burlingame, will be of 45-inch pipe. This sewer system will also be of reinforced concrete construction and is estimated to cost \$45,000. Bids for the Fulton Park sewer system will be called for in about 30 days.

**SAN RAFAEL, MARIN CO., CAL.**—Road construction and bridges, \$88,000. Engineer, County Surveyor, San Rafael. Owners, Marin County. At the last meeting of the Board of Supervisors improvements were decided on which will cost the county in the neighborhood of \$88,000. The work is divided as follows: \$20,000 for concrete bridges, \$35,000 for Black Point Cut-off, \$5,000 for road to McNear Point, \$7,000 for Bollinas Bay road, \$7,000 for rocking White's Hill, \$4,000 for Hicks Valley Cut-off, \$10,000 for Tocoloma and Nicasio Hill roads.

**NAPA, NAPA CO., CAL.**—Sewer work. Cost not stated. Engineer, City Engineer, Napa. Owners, City of Napa. The City Council has passed a resolution of intent providing for a new sewer system for the Alta Heights District. A resolution of intention, providing for a 16-inch sewer in First street to connect with the a new sewer to be constructed in the new reinforced concrete bridge on First street, was also adopted.

**BENICIA, SOLANO CO., CAL.**—Street work. Cost not stated. Engineer, City Engineer, Benicia. Owners, City of Benicia. Plans and specifications have been completed here for the improving of East Fifth street between the center of C street and East Fifth street and O streets. Plans and specifications may be had from the City Clerk at Benicia.

**CORONA, RIVERSIDE CO., CAL.**—Street work, \$37,633.15. Engineer, City Engineer, Corona. Owners, City of Corona. Bids for improving Sixth street from the East Boulevard to Yorba street on the west side of town were opened by the Board of Supervisors here and show: Johnson-Shea Co., \$37,633.45, O. F. Easley Contracting Co., \$38,944.88, W. J. Brandt, \$43,599.51. The bids were referred to the

W. R. BRODE, Pres.      LOUIS R. HOLM, Sec. R. J. BRODE, Vice-Pres.  
**BRODE IRON WORKS**  
 Established 1886—Incorporated 1913  
 Tel. Kearny 2464.  
 Fabricators and Contractors of Structural Steel and Ornamental Iron Work  
 Office & Works: 31-37 Hawthorne St., bet. Howard & Folsom Sts., San Francisco, Cal.

City Engineer and Street Superintendent Tuthill, who will report at the next meeting when an award will be made.

#### Contracts Awarded.

**RICHMOND TO MARTINEZ, CONTRA COSTA CO., CAL.**—Highway work, \$12,097. Engineer, State Highway Commission Forum Bldg., Sacramento. Owners, State of California. Contractors, Bates, Boreland & Ayer, Bank of Savings Bldg., Oakland. Contract price, \$12,097.

**SACRAMENTO, CAL.**—Sewer construction, \$22,000. Engineer, City Engineer, Sacramento. Owners, City of Sacramento. Contractor, J. W. Terrell, Chico. Contract price, \$22,000.

#### STORES AND OFFICES.

**SAN FRANCISCO**—Stores, 1 story and base, brick and steel, \$12,000. Architects, O'Brien Bros., Clunie Bldg., S. F. Owner, J. Gendotti. The building will be erected at the corner of Hayes and Octavia streets, covering an area of 39 by 120 feet. There will be six stories. Interior finish will be of pine throughout. A full basement will be built. Patent store fronts and plate glass windows are specified. Exterior of the building will be faced with pressed brick. Plans are now being prepared.

#### Contracts Awarded.

**PORTLAND, ORE.**—Stores, 2 story and base, brick and steel. Cost not stated. Architects, Clausen & Clausen, Macleay Bldg., Portland. Owner's name not given. Contractors, Green & Green, 394 Ross street, Portland. Contract price not stated.

#### LODI WANTS DETENTION HOME.

**LODI, San Joaquin Co., Cal.**—Members of the county probation committee have presented a communication to the Board of Supervisors asking that \$25,000 be set aside in the next yearly budget for the erection of a juvenile detention home. The Woman's Civic Council and Judge C. W. Norton have endorsed the petition. The matter has been laid over until some future date.

#### WANT POST OFFICE.

**RIVERBANK, Yolo Co., Cal.**—The petition for a post office in this place has been forwarded to the Postmaster General at Washington, D. C. If granted the station will be called Bryte City.

#### SHIP YARD FOR RICHMOND.

**RICHMOND, Contra Costa Co., Cal.**—A rumor has been persistent around the city that the Standard Oil Company is contemplating establishing a ship yard at their plant where their tankers and smaller craft for trans-bay service could be constructed.

#### PLANS FOR STORM DRAIN SYSTEM.

**SANTA MONICA, Los Angeles Co., Cal.**—Plans for a complete storm drain system have been presented by City Engineer Morfon to the City Trustee. Plans were referred to the committee as a whole for further consideration. The estimated cost of the work is \$225,000.

#### PREPARING BRIDGE PLANS.

**RED BLUFF, Tehama Co., Cal.** County Surveyor Lunning is now preparing plans and specifications for eight bridges to be constructed over the route of the state highway from Glenn county line to Corning. Four of the structures will be of concrete construction and a like number of steel. Plans will be submitted to the Supervisors at their next meeting and on approval bids will be called for.

#### WILL ENLARGE COALING STATION.

**SAN DIEGO, San Diego Co., Cal.**—According to late reports, plans and specifications for enlarging the navy coaling station at the San Diego harbor have been completed and work will start at once. The plans call for an expenditure of \$95,000 including the extension of the coal platform and the construction of a flume.

#### BRIDGE PLANS APPROVED.

Final plans for the bridge to span the Putah Creek, between Solano and Yolo counties, on the state highway have been approved by the Board of Supervisors. The bridge will be of steel construction with reinforced concrete approaches and abutments. Bids will be called for at once. The bridge will cost in the neighborhood of \$140,000.

#### SEWERS FOR NAPA.

**NAPA, Napa Co., Cal.**—The City Council has passed resolutions of intent for a new sewer system for the Alta Heights District. Resolution of intent, providing for a 16-inch sewer in First street, to connect with a sewer to be constructed in the new reinforced concrete bridge on First street was also adopted.

#### IMPROVEMENTS FOR MARIN CO.

**SAN RAFAEL, Marin Co., Cal.** At the last meeting of the Board of Supervisors many improvements to be made about the county were decided upon. Among them are the construction of concrete bridges for which \$20,000 will be expended, \$25,000 to the Black Point Cutoff, and \$35,000 for the construction of several roads and streets.

#### BIG SHIPMENT OF STEEL ARRIVES AT NAPA YARD.

**NAPA, Napa Co., Cal.** Two hundred tons of steel plates for construction and repair work has arrived

at the Navy Yard. These plates will be used as a general stock, which has been considerably depleted by the large amount of repair work which has been undertaken lately.

#### TUNGSTEN DEPOSITS.

The tungsten resources of the United States are probably considerably larger than have been generally realized. Many new deposits have been discovered in various parts of the Western States, according to the United States Geological Survey, and, should prices advance, it is probable that the output could soon be increased much above the record year of 1910, when 1,821 tons were marketed. Most of these new discoveries are not sufficient developed to show how large an output can be expected from them; but it is probable that some will prove to be of considerable extent, and one or two new large producers would make a noticeable difference in the American market. Similar discoveries may also be expected in other parts of the world.

#### SANTA FE SPENDING HALF MILLION ON IMPROVEMENTS.

#### Bridges and Roadways Being Constructed.

**RICHMOND, Contra Costa Co., Cal.**—Between \$100,000 and \$500,000 will be spent by the Santa Fe Railroad Company in bettering the conditions of its roadway between this city and Stockton, according to J. E. McNell, inspector of tracks and roadways.

A rock ballast is to be put down between Richmond and Mather, a station about twenty miles each of Richmond. The same kind of ballast will be laid between Holt and Stockton, a distance of ten miles, and which will cost about \$25,000.

When the ballasting is done the entire valley division of sixty-five miles between Stockton and Richmond will be in first class condition. All the bridges are being strengthened and ninety-five pound rails being substituted for seventy-five pounders. There are about four hundred men employed on the work.

#### NEW INDUSTRY FOR SAN JOSE.

#### Potash Factory Buildings Now Under Construction.

**SAN JOSE, Santa Clara Co., Cal.**—A large factory building for the manufacturing of potash is now under construction five miles north of San Jose. R. A. Branger, President of the Western Grain and Sugar Products Company of Azusa, and a group of San Francisco capitalists are financing the project. Buildings are now under construction on the grounds and the machinery is enroute from the East.

A new giant engine with 15 wheels has been put into use on the government railroads. It has no tender, but can store eight tons of coal and 12 cubic yards of water. A super heater sends to the cylinder steam at a heat of 550 degrees centigrade. Its speed is 70 miles an hour.

Solano County from Vacaville to Bayaville (H-1-S-7-D), about 8.2 miles in length, to be built of Portland cement concrete.

Santa Barbara County from Divide to Orcutt (V-S, H-2-A), about 3.5 miles in length, to be built of Portland cement concrete.

Santa Barbara County from Stony Creek to El Capitan Creek (V-S, H-2-B & D), about 10.2 miles in length, to be graded.

Plans may be seen, and forms of proposal, bonds, contract and specifications may be obtained at the said office, and they may be seen at the offices of the Division Engineers at Los Angeles and San Francisco, and at the office of the Division Engineer of the Division in which the work is situated. The Division Engineers' offices are located at Willits, Dunsmuir, Sacramento, San Francisco, San Luis Obispo, Fresno, and Los Angeles.

No bid will be received unless it is made upon a blank form furnished by the Commission. The special attention of prospective bidders is called to the "Notice to Contractors" annexed to the blank form of proposal, for full directions as to bidding, quantities of work to be done, etc.

The Department of Engineering reserves the right to reject any or all bids or to accept the bid deemed for the best interests of the State.

CHARLES D. REXNEY,  
NEWELL D. DARLINGTON,  
CHARLES P. STERN,

California Highway Commission.

AUSTIN E. FLETCHER,  
Highway Engineer.

CHARLES C. CARLETON,  
Acting Secretary.

Dated Sept. 2, 1914.

Sept. 10-17-24, Oct. 1

NOTICE TO CONTRACTORS.

SEALED PROPOSALS will be received by the Buildings and Grounds Committee of the Panama-Pacific International Exposition Company at Room 215, the Service Building, Fillmore and Chestnut streets, San Francisco, at 9:00 A. M., Thursday, October 1, 1914, for Chestnut Street Exits, in accordance with plans and specifications on file in the office of the Director of Works.

The right is reserved to reject any and all bids and to waive technical defects if in the interest of the Exposition Company.

Plans and specifications for the work may be obtained from the Director of Works, Room 207, Service Building, Fillmore and Chestnut Streets, San Francisco. Any other information may be had from the Chief of Construction, Room 211, Service Building.

(\*)

HEAVIEST OFFICE BUILDING IN THE WORLD.

The Equitable building, now under construction in New York City, will be the heaviest office building in the world, as well as one of the highest, the weight of the steel alone being about 33,000 tons. This building covers a ground area of 160 by 312 feet. When completed it will tower 500 feet above the street and will extend about 65 feet below street level at its lowest point. It will contain 36 stories and in addition to these there will be two mezzanine floors. The steel erection was made particularly difficult by the network of timber bracing that it was necessary to put in to hold the basement retaining walls until steelwork could be installed to take its place. The heaviest piece of steel to be handled was a column weighing 32 tons.—Popular Mechanics.

INCORPORATIONS.

Sholly Investment Co., Capital Stock, \$10,000; subscribed, \$20; shares, \$10 each. Directors—C. E. Hoffman, C. M. Cross, E. E. Hoffman, 1 share each. Place of business, San Francisco.

Philippine Mercantile Co., Capital Stock, \$50,000; subscribed, \$15; shares, \$5 each. Directors—L. Lerda, W. Padillo, S. M. Valenzuela, 1 share each. Place of business, San Francisco.

California Street Realty Co., Capital Stock, \$75,000; subscribed, \$20; shares, \$10 each. Directors—J. A. Grcuman, H. Clifford, W. B. Ryder, 1 share each. Place of business, San Francisco.

COST, CLASSIFICATION AND NUMBER OF BUILDINGS ERECTED FROM MAY 1906, TO AUGUST 31, 1914.

As Reported By The Board of Public Works.

Class	No. of Bldgs.	Cost
Class "A"	176	\$ 23,355,004
Class "B"	199	14,679,186
Class "C"	2758	82,212,868
Frames	25184	96,533,814
Alterations	23653	18,519,738
Exposition Bldgs	65	9,427,277
Public Bldgs	8	4,277,663
Total	52,343	\$259,335,580

ARCHITECT'S CERTIFICATE.

Sept. 21, 1914.—John A. Porporato (record, 1 Architect's Certificate, 3) has filed his certificate of architecture for San Francisco County.....

SISSON, Siskyou Co., Cal.—Sisson

Aerie, F. O. E., has purchased two lots just north of the City Hall and will commence work in the near future on a two-story modern lodge building. The first floor will be used as an opera house, with a large stage, dressing rooms and seating capacity of 500. A maple floor will be used in the assembly hall. There will be a steam heating system installed. The building is estimated to cost about \$15,000.

RED BLUFF, Tehama Co., Cal.—The Brown & Doane Lumber yard has been destroyed by fire causing a loss of over four million feet of lumber. The fire is believed to have been of incendiary origin.

CHICO, Butte Co., Cal.—County Engineers M. C. Folk of Butte county and Stile of Glenn county have started the investigation for a suitable site of the proposed ferry, which is being asked for by residents on both sides of the river. The engineers decided that the site at Monroeville, if selected, would never be in any danger of disruption by any change in the course of the river's bed. Dead Man's landing, a little south of Monroeville, will probably be the next site investigated.

GRASS VALLEY, Nevada Co., Cal.—The interior of the Grass Valley new Federal Building is to be thoroughly fireproofed, which will cost \$5,000 and which was not included in the general contract. The new improvements will increase the cost of the building to \$50,000.

OAK PARK, Sacramento Co., Cal.—Mount Elwell, which lies nine miles south of this city, is to be equipped with a lookout station. Forest Supervisor D. N. Rogers is in receipt of the building materials and work will be started immediately. The structure will be entirely galvanized iron and securely anchored at the top of the mountain. This will be the only lookout station in this section.

## Nearest to Everything

POWELL ST. AT O'FARRELL

Best located and most popular hotel in the City; circulating ice water in every room.

Especial attention to ladies travelling alone.

Excellent, reasonable priced grill. Meet your friends at the Many

European Plan Rates \$1.50 up.

Management. Chester W. Kelley

MERIDIAN, Sutter Co., Cal.—The Alameda Sugar Company, which owns a vast acreage in this section, is altering its irrigation system. Irrigation pipes are being taken up and sunk deeper into the ground. Surveys are being made for a new drainage system for the property.

VACAVILLE, Solano Co., Cal.—There has been received in Vacaville three carloads of structural steel to be used by the Southern Pacific Company in the construction of a steel bridge across Ulatas Creek to replace the wooden bridge which was destroyed recently.

SACRAMENTO, Sacramento Co., Cal.—The latter part of this month plans for a new County Hospital, to cost about \$500,000, will be submitted to the Board of Supervisors by Architect L. A. Harold, who was given the contract to prepare plans.

To enable firemen to work in smoke and gases a Colorado man has invented a device to be attached to hose nozzles in which water rotates a fan and pumps fresh air through tubes into face masks.

In a flameless, incandescent gas burner of European invention the gas is forced into a porous disk within which it burns.

The pump of a new rotary, gasoline driven fire engine consists of only two

gears, three casing two inlet and two outlet valves occupying the space beneath the driver's seat of an automobile.

# ADVANCE NEWS

Classified according to Location

## SAN FRANCISCO.

**RESIDENCE**—2 story and base, frame, \$1,000. San Francisco, Architect, none. Owner, James Welsh, 211 20th avenue, S. E. The dwelling will be erected on the east side of 22nd avenue north of California street and has been designed to contain seven rooms and bath. Interior finish will be of pine and redwood with some elm panels and white enamel. Hardwood floors will be used in the principal rooms. There will be furnace heat and open fire places. Mantels will be of tile. Tile wainscot will be used in the bath room. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor. Materials are now being purchased.

**RESIDENCE**—3 story and base, frame and plaster, \$19,000. San Francisco, Architect, John Davis Hatch, Humboldt Bank Bldg., S. F. Owner's name withheld. The dwelling will be erected at the foot of 32nd avenue, commanding one of the finest marine views in California. The dwelling will contain eighteen rooms, six baths and a private garage. Interior will be finished in hardwoods and white enamel. Hardwoods floors will be used in the principal rooms. Plans provide for steam heat, a hot water system, vacuum cleaning and open fire places. Mantels will be of tile and brick. All bath rooms will have the wainscot and floors. Exterior of the house will be covered with cement plaster on metal lath. Plans have been out for figures, Edward Zinkand submitting the lowest figure on the general construction at \$18,120. He will probably be awarded the work. A complete list of the figures received will be found under the head of San Francisco in this issue.

**RESIDENCE**—2 story and base, frame, \$3,000. San Francisco, Architect, none. Owner, E. Nelson, 30 Presidio Terrace, S. F. The dwelling has been designed for a six-room house with bath, and will be erected on the east side of Arguello Boulevard south of Carl street. Pine and redwood interior finish will be used. Hardwood floors will be used in the living room, dining room and reception hall. There will be open fire places and tile or brick mantels. Bath room will have the wainscot. Exterior of the building will be covered with cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor.

**RESIDENCE**—2 story and base, frame, \$3,000. San Francisco, Architect, Arthur G. Scholz, Phelan Bldg., S. F. Owner, E. K. Hayden. The dwelling will be erected on the east side of 17th avenue south of Revere, and will contain seven rooms and bath. Interior will be finished in pine and redwood with some white enamel. Hardwood floors will be used in the principal rooms. Plans provide for open fire

places and tile or brick mantels. The wainscot will be used in the bath room. There will be an automatic water heater. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and figures have been taken. A contract will be awarded this week.

**APARTMENT HOUSE**—3 story and base, frame, \$29,000. San Francisco, Architect, Milton Lichtenstein, 111 Ellis street, S. E. Owner, Rebecca Tucker. The building will be erected at the northwest corner of Bush and Gough streets and will cover an area of 30 by 100 feet. Interior has been arranged for fifteen suites of three and four rooms. Pine and hardwood finish will be used. Oak floors will be used in the living and dining rooms. Plans provide for steam heat and a hot water system. All suites will have wall beds and private baths. Bath rooms will be finished in tile. Exterior of the building will be covered with rustic and shingles. Plans are complete and figures have been taken under advisement.

**HOTEL**—3 story and base, Class C construction, \$15,000. San Francisco, Architect, D. C. Coleman, Merchants' National Bank Bldg., S. F. Owners, San Francisco Investment Co., Clunie Bldg. The building will be erected on Third street at the corner of Taber Place, and will cover an area of 47 by 67 feet. There will be one store on the first floor besides the entrance to the hotel rooms. Upper floors will contain a total of 43 rooms. Interior finish will be of pine throughout. Plans provide for steam heat and a hot water system. Bath rooms will be finished in tile with composition floors. Patent store fronts will be used. Exterior of the building will be faced with pressed brick. Plans are complete and figures are being taken.

**SUBTREASURY, METAL VAULT EQUIPMENT**—Cost not stated. San Francisco, Architect, Supervising Architect Oscar Wenderoth, Washington, D. C. Owners, United States government. Plans are complete and figures are being taken for furnishing and installing the metal vault equipment for the new United States Subtreasury building. Plans and complete information can be secured from the Supervising architect. Bids will be opened on October 1th in Washington, D. C.

**CAR BARN**—1 and 2 story and base, reinforced concrete. Cost not stated. San Francisco, Architect, City Department of Architecture, Temporary City Hall, S. F. Owners, City and County of San Francisco. The City Department of Engineering is now going over the steel drawings for the new Patricio Street Car Barn and reports that the same will be completed within a few days. Bids will be called for in the course of the next three weeks. Further mention will be made in these columns at that time.

**RESIDENCE GARDENS AND GARAGE**—Frame construction, \$7,500.

San Francisco. Architect, Willis Polk, Hobart Bldg., S. F. Owner, Mrs. Katherine Hooker. The owner has recently completed a handsome city home on the south side of Pacific avenue near Walnut, and now has had plans prepared for formal gardens with a fountain and other concrete work. A private garage of frame and plaster construction will also be erected on the property. Plans and specifications for this work are complete and figures are now being taken.

**STORES**—1 story and base, brick and steel, \$12,000. San Francisco, Architects, O'Brien Bros., Clunie Bldg., S. F. Owner, J. Gendotti. The building will be erected at the corner of Hayes and Octavia streets, covering an area of 39 by 120 feet. There will be six stores. Interior finish will be of pine throughout. A full basement will be built. Patent store fronts and plate glass windows are specified. Exterior of the building will be faced with pressed brick. Plans are now being prepared.

**DRY DOCK CONSTRUCTION**—\$500,000 or more. San Francisco, Engineer, Union Iron Works, S. F. Owners, Union Iron Works. Actual work on the big dry dock project at Hunter's Point is to be undertaken without further delay. The Union Iron Works will, through their local office, receive figures for such portions of the work as they are not equipped to carry out. This work will include the concrete principally. About \$500,000 will be expended on the dry dock, while several buildings will also be erected, which will cost about \$250,000.

**CHURCH**—2 story and base, frame and plaster, \$15,000. San Francisco, Architects, Falch & Knoll, Hearst Bldg., S. F. Owners, Emanuel Evangelical Association. Contractor, Chas. Koenig, 3525 19th street, S. F. general construction only. Contract price, \$15,000. Art glass, painting and heating not included.

**FLATS**—2 story and base, frame, \$10,000. San Francisco, Architect, Paul F. De Martini, 2123 Powell street, S. F. Owner's name withheld. The building will be erected at the corner of Lyon and Union streets and has been designed to contain two large flats of five and six rooms. Interiors will be finished in pine with some elm panels. Hardwood floors will be used in the principal rooms. The wainscot and floors will be used in the bath rooms. Steam heat will be installed. There will be open fire places and tile or brick mantels. A private garage will occupy the basement. Exterior of the building will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

**RESIDENCE**—2 story and base, frame, \$4,000. San Francisco, Architect, none. Owner, William Koenig, 750 Parnassus avenue, S. F. The dwelling will be erected at the northwest

corner of Ashbury and Congress streets, and has been designed to contain seven rooms and bath. Interior will be finished in pine and redwood with some elm panels. Hardwood floors will be used in the living room, dining room and reception hall. There will be furnace heat and open fire places. Mantels will be of tile or brick. An automatic water heater will be installed. Tile wainscot will be used in the bath room. Exterior of the dwelling will be covered with brick veneer. Plans are complete and in the hands of the owner who will do the work by Day Labor. Materials are being purchased.

**EXPOSITION SCHOOLS**—1 and 2 story, frame and plaster. Cost not stated. San Francisco, Architects, W. H. Weeks, 75 Post street, S. F., associated with Norman P. Marsh, Broadway Central Bldg., L. A. Owners, Panama-Pacific International Exposition Co. Architects Norman P. Marsh and W. H. Weeks have been appointed a commission to prepare plans for model school buildings to be erected on the grounds of the Panama-Pacific Exposition. The work will be done under the direction of the commissioner of education of the exposition. It is planned to remodel a school building now on the Exposition site and to erect a domestic science building, a manual training building and a model rural school building. The task of designing the last three named buildings has been assigned to Mr. Marsh. It is the intention to make these schools a feature of the educational exhibit of the Exposition. School will be conducted daily and the buildings will be open to the public, the object being to illustrate in a practical manner advanced methods of education.

**Contracts Awarded.**

**CONCESSION BUILDING**—1 story, frame and plaster, \$10,000. San Francisco. Architect, Director of Works, Service Bldg., S. F. Owners, Panama-Pacific International Exposition. Contractors, Strehlow, Freese & Peterson, S. F. Contract price, \$10,000.

**MISSION HOME**—3 story and base. Class C construction, \$25,000. San Francisco. Architect, Robert Orr, Van Nuys Bldg., L. A. Owners, Board of Women's Home Missions. Contractors, Gaspard & Hammon, Sharon Bldg., S. F. Contract price, \$25,000.

**Close Estimates By Local Contractors.**

**Architect John Davis Hatch Receives Five Close Figures For Handsome New City Residence.**

Architect John Davis Hatch, Humboldt Bank Bldg., recently opened figures for the construction of a handsome three-story and basement frame and plaster residence which is to be erected at the west end of Thirty-second avenue on the slope overlooking San Francisco Bay and commanding one of the finest marine views in California. The dwelling will contain eighteen rooms and six baths besides a private garage. All interior finish will be of hardwoods. Five representative firms figured the work, the closeness of

their bids furnishing an interesting comparison. The average of the figures was \$19,517. The two highest men were within \$11 of each other, while the two low men were within \$98 of each other. A third bidder was at most at the exact average. The figures submitted follow:

Eighteen Room Residence.			
Bidder	Total	Rough- Finish	ing in Plaster- ing
Finn Anderson.....	\$19,639	\$11,171	\$800
R. Glaze.....	20,870	12,757	530

# OAKLAND AND ALAMEDA COUNTY.

RESIDENCE — 1 story and base, frame, \$2,500, Berkeley, Alameda Co, Cal. Architect, Eugene K. Martin, 2192 Shattuck avenue, Berkeley. Owner, George Federwitz. The dwelling will be erected in West Berkeley, and has been designed to contain six rooms and bath. Interior finish will be of pine and redwood. Some hardwood floors will be used. There will be an open air place and tile or brick mantel. The wainscot will be used in the bath room. Exterior of the house will be covered with cement plaster on metal lath. Plans are being prepared.

RESIDENCE — 2 story and base, frame, \$6,500, Berkeley, Alameda Co, Cal. Architect, Samuel Arnold, Sharon Bldg., S. E. Owner, Z. P. Smith. The dwelling will be erected at the corner of Walnut and Shattuck avenue, and has been designed to contain eight rooms and bath. Interior finish will be of pine and redwood with some elm panels. Hardwood floors will be used in the living room, dining room and reception hall. There will be furnace heat and open tile places. Mantels will be of tile. Bath room will be finished in tile. An automatic water heater will be installed. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and out for figures.

RESIDENCE — 1 story and base, frame, \$7,000, Berkeley, Alameda Co, Cal. Architect, same as above. Z. P. Smith, 2192 Shattuck avenue, Berkeley. The dwelling will be erected on the south side of Marin ave. at Fresno,

and has been designed for a seven-room house with bath and sleeping porch. Interior will be finished in pine and hardwood with hardwood floors in the living room, dining room and reception hall. There will be furnace heat and open fire places. Mantels will be of tile or brick. An automatic water heater will be installed. Tile wainscot will be used in the bath room. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor.

**APARTMENT HOUSE ALTERATION**—2 story, frame, \$3,000. Berkeley, Alameda Co., Cal. Architects, Thomas & Oliver, Pantages Theatre Bldg., Oakland. Owner, Mrs. McGill. The present two-story frame dwelling located on Durant Way near Ellsworth will be altered into a modern apartment house. The suites will consist of three, four and five rooms, each with bath. Interior finish will be of pine and redwood. Some oak floors will be used. There will be new and modern plumbing, electric work, hot water system

and plastering. Exterior of the building will also undergo alterations. Plans are complete and figures are now being taken.

**FACTORY AND WAREHOUSE**—1 story and base, reinforced concrete. Cost not stated. Oakland, Cal. Architect, Lewis P. Hobart, Crocker Bldg., S. F. Owners, Shredded Wheat Biscuit Co., Oakland, Cal. Architect Hobart has completed the architectural drawings for the first unit of the big plant to be erected by this company on their Oakland property bounded by 12th, 14th, Poplar and Union streets. These plans have been submitted to Vice-President Fred Mason of the Shredded Wheat Co., who is now in this city. Structural plans have been completed by the company's engineers. Besides this building the company will shortly undertake construction of two other buildings of a similar type besides several cottages for their employees. Plans will be out for figures shortly.

**CREMAERY**—1 story, brick, \$2,000. Oakland, Cal. Architect, none. Owner, Miss Anne Johnson, 931 Bay View avenue, Oakland. The building will

be erected on the south side of 18th street west of San Pablo avenue. The front portion of the building will be fitted up for a retail store and the rear for a modern sanitary creamery. A cement floor will be used. Interior will be finished in pine and tile. Exterior of the building will be faced with cement plaster. Plans are complete and the work will be done by Day Labor.

**WAREHOUSE**—2 story and base, brick, \$15,000. Oakland, Cal. Architect, Alvin J. Stern, 1542 Broadway, Oakland. The building will be erected on 19th street between San Pablo and Telegraph avenues and will cover a considerable ground area. Floors will be of concrete. Interior will be finished in pine. A freight elevator will be installed. Automatic sprinklers are also specified. Exterior of the building will be faced with pressed brick. Plans are complete and figures are now being taken by the architect.

**BUNGALOWS**—2, 1 story and base, frame, \$2,000 each. Oakland, Cal. Architect, none. Owners, Dean & Wade, 5210 Fairfax avenue, Oakland. These two houses will be erected on Wade Place near 54th avenue, and each has been designed to contain five rooms and bath. Interiors will be finished in pine and redwood. Hardwood floors will be used in the living rooms and dining rooms. There will be open fire places and tile mantels. Bath rooms and kitchens will have tile wainscot. Exteriors will be covered with cement plaster on metal lath. Plans are complete and in the hands of G. H. Hollenbeck who will superintend the work, which will be done by Day Labor. Materials are now being purchased.

**BUNGALOW**—1 story and base, frame, \$3,000. Oakland, Cal. Architect, none. Owner, T. B. Evans, 1417 East 20th street, Oakland. The dwelling will be erected at the corner of East 20th street and 16th avenue, and has been designed to contain seven rooms, bath and sleeping porch. Interior finish will be largely of pine. Hardwood floors will be used in the living room, dining room and reception hall. There will be furnace heat and open fire places. Mantels will be of tile. Bath room will have tile wainscot. An automatic water heater will be installed. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor. Materials are now being purchased.

### SAN JOSE AND THE SANTA CLARA VALLEY.

FACTORY PLANT GROUP—1 and 2  
 story and base, steel and corrugated  
 iron, \$60,000, Agnew, Santa Clara Co.,  
 Cal. Architect, William Binder, Rea  
 Bldg., San Jose. Owners, Pacific  
 Chemical Co., Berkeley. This group  
 of buildings will consist of a factory,  
 warehouse, tower and a number of  
 smaller buildings. Construction will  
 be of steel, concrete and corrugated  
 iron. The owners are engaged in the  
 manufacture of a by-product of the  
 Western Grain and Sugar Co. Special  
 machinery and equipment will be in-  
 stalled. The company is now operat-  
 ing in Berkeley. Plans for these  
 buildings have been revised and fig-  
 ures will shortly be called.

BUNGALOW—1 story and base,  
 frame, \$2,000, San Jose, Santa Clara  
 Co., Cal. Architect, none. Owner, S.  
 B. Druck, 391 Dalmas avenue, San Jose.  
 The house has been designed for a six-  
 room dwelling and will be erected on  
 Dalmas avenue. Interior will be fin-  
 ished in pine and redwood with some  
 oak floors. There will be an open fire  
 place and tile or brick mantel. Bath  
 room and kitchen will have tile wain-  
 scot. Exterior of the house will be  
 covered with rustic and cement plas-  
 ter on metal lath. Plans are complete  
 and in the hands of the owner who will  
 do the work by Day Labor.

TEMPORARY COTTAGES—1 story,  
 frame, \$25,599, Agnew, Santa Clara Co.,  
 Cal. Architect, State Architect George  
 E. McDougall, Sacramento. Owners,  
 State of California. Bids opened for  
 constructing temporary cottages for  
 males at the Agnew State Hospital  
 show Boyd, Kerr & McLean of San  
 Francisco low at \$29,599. They will be  
 awarded the contract. A complete list

of the bids will be found under the heading of San Jose and the Santa Clara Valley in this issue.

**LIBRARY**—1 story and base, concrete and frame, \$10,000. South San Francisco, San Mateo Co., Cal. Architect, W. H. Weeks, 75 Post street, S. F. Owners, Town of South San Francisco. The building will be designed in the classic style and will contain a large reading room and stack room. Interior finish will be of pine with some oak floors. Furnace heat will be used. Metal book stacks are specified. Exterior of the building will be covered with cement plaster. Plans are being prepared.

**SCHOOL**—2 story and base, frame and plaster, \$25,000. Burlingame, San Mateo Co., Cal. Architects, Thomas Edwards and Ernest Norberg, Bank Bldg., Burlingame. Owners, Burlingame Meadows School District. Bids opened for this work show J. J. Leonard, S. F., low on the general construction at \$25,575, and J. C. Hurley, S. F., low on the heating and ventilating at \$2,389. Contracts will probably be awarded these firms. A complete list of the bids received will be found under the heading of San Jose and the Santa Clara Valley in this issue.

**SCHOOL**—2 story and base, reinforced concrete. Cost not stated. Santa Cruz, Santa Cruz Co., Cal. Architect, W. H. Weeks, 75 Post street, S. F. Owners, Santa Cruz School District. Contractors, Peterson & Wilson, S. F., general construction, \$79,750; plumbing, Byrne Bros., Santa Cruz, \$5,550; painting, A. J. Pettididier, Santa Cruz, \$3,195; heating and ventilating, J. C. Hurley, S. F., \$9,200, and roofing, H. W. Johns-Manville Co., S. F., \$937. Awards on the vacuum cleaning, program clocks, electric work and window shades were not made. A complete list of the bids submitted will be found under the heading of San Jose and the Santa Clara Valley in this issue.

**RETAINING WALL**—Reinforced concrete. Cost not stated. San Mateo, San Mateo Co., Cal. Architects, Havens & Toepke, 46 Kearny street, S. F. Owners, City of San Mateo. Plans are now being prepared for constructing a concrete retaining wall from a point on the library property to the school building. The work will be along a creek. Plans are now being prepared and figures will be called for shortly.

## Bids For Temporary Cottages At Agnew.

### MARIN, CONTRA COSTA AND SONOMA COUNTIES.

BRIDGE—Steel and reinforced concrete, \$110,000. Putah Creek, Solano Co. Cal. Engineer, County Surveyor, Fairfield. Owners, Solano County. Final plans for the bridge to span the Putah Creek between Solano and Yolo Counties on the state highway have received the approval of the Board of Supervisors. The bridge will be of steel with reinforced concrete approaches and abutments. Bids will be called for at once. The engineer's estimate is \$110,000.

HOSPITAL COTTAGE—1 story, frame and concrete, \$11,261. Napa, Napa Co., Cal. Architect, State Architect George B. McDougall, Sacramento. Owners, State of California. Bids opened by the State Board of Control for the construction of this building show R. S. K. MacMillan of San Francisco low at \$11,261. He will be awarded the contract. A complete list of bids for the work appear under the heading of Marin, Contra Costa and Sonoma Counties in this issue.

ROAD CONSTRUCTION AND BRIDGES—\$88,000. San Rafael, Marin County, Cal. Engineer, County Surveyor, San Rafael. Owners, Marin County. At the last meeting of the Board of Supervisors, improvements were decided on which will cost the county in the neighborhood of \$88,000. The work is divided as follows: \$20,000 for concrete bridges, \$5,000 for Black Point cut-off, \$5,000 for road

to McNear Point, \$7,000 for Bollinas Bay road, \$7,000 for rocking White's Hill, \$4,000 for Hicks Valley cut-off, \$10,000 for Tocoloma and Nicasio Hill roads.

SEWER WORK—Cost not stated. Napa, Napa Co., Cal. Engineer, City Engineer, Napa. Owners, City of Napa. The City Council has passed a resolution of intent providing for a new sewer system for the Alta Heights District. Resolution of intention providing for a 16-inch sewer in First street, to connect with a sewer to be constructed in the new reinforced concrete bridge on First street was also adopted.

HOTEL AND STORES—2 story and base, brick and steel, \$30,000. Pittsburg, Contra Costa Co., Cal. Architect, A. W. Cornelius, Merchants' National Bank Bldg., S. F. Owner, A. Engel. The building will be erected on a corner lot covering an area of 60 by 100 feet. There will be a number of stores on the first floor and in the neighborhood of 50 guest rooms on the upper floor. Interior will be finished in pine throughout. There will be steam heat and a hot water system. Bath rooms will have tile wainscot and composition floors. Exterior of the building will be faced with pressed brick. Patent store fronts will be used. Plans are complete and figures are now being taken.

### Contracts Awarded.

BRIDGES—Timber construction, \$2,797. San Rafael, Marin Co., Cal. Engineer, County Surveyor, San Rafael. Owners, Marin County. Contractors, Alvin Rock Co., San Rafael. Contract price, \$2,797.

HIGHWAY WORK—\$42,097. Richmond to Martinez. Engineer, State Highway Commission, Forum Bldg., Sacramento. Owners, State of California. Contractors, Bates, Forland & Ayer, Bank of Savings Bldg., Oakland. Contract price, \$42,097.

## MacMillen Low On Napa Cottage.

**LOS ANGELES AND SOUTHERN CALIFORNIA.**

HOSPITAL COTTAGE AND TWO TYPICAL COTTAGES—Concrete and frame, \$79,972. Ventura, Ventura Co., Cal. Architect, State Architect George B. McQuigall, Sacramento. Owners, State of California. L. G. Bergren & Son, San Francisco, submitted the lowest figure for constructing the hospital cottage and two typical cottages at the new state institution for girls to be built at Ventura. They will be awarded the contract. A complete list of the figures appears under the heading of Los Angeles and Southern California in this issue.

COALING STATION—Steel and concrete, \$95,000. San Diego, Cal. Engineers, Department of Yards and Docks, Washington, D. C. Owners, United States Government. According to late reports, plans and specifications for enlarging the navy coaling station at San Diego harbor have been completed and work will start at an early date. The plans call for an expenditure of \$95,000, including the extension of the coal platform and the construction of a flume.

BANK AND OFFICES—2 story and base, brick. Cost not stated. Baldwin Park, Los Angeles Co., Cal. Architect, H. J. Knauer, Citizens' Bank Bldg., L. A. Owner, H. A. Church, Glendale. The building will cover an area of 28 by 62 feet. The first floor will be occupied by the bank and one store. Upper floor has been arranged for modern offices. Interior will be finished in pine and hardwood with tile floor in the banking room. There will be a central heating system. Special bank fixtures will be installed. Concrete vault is specified. Exterior of the building will be faced with enameled brick. Plans are nearly complete and figures will be called for at once.

CHURCH—1 story and base, frame. Cost not stated. Beaumont, Riverside Co., Cal. Architect not selected, own-

er First Presbyterian Church of Beaumont. At a recent meeting of the building Committee of the First Presbyterian Church the plans for the new church building were agreed upon and it is expected that construction will start at an early date. No architect as yet has been selected.

STREET WORK—\$37,633.15. Corona, Riverside Co., Cal. Engineer, City Engineer, Corona. Owners, City of Corona. Bids for improving Sixth street from the East Boulevard to Yorba street on the West side of town were opened by the Board of Supervisors here and show: Johnson-Shea Co., \$47,633.15; O. F. Easley Contracting Co., \$38,914.88; W. J. Brandt, \$43,599.51. The bids were referred to the City Engineer and Street Superintendent Tuthill, who will report at the next meeting when award will be made.

**Contracts Awarded.**

SCHOOL GROUP—1 and 2 story, brick and hollow tile, \$79,000. Alhambra, Los Angeles Co., Cal. Architects, Allison & Allison, Hibernian Bldg., L. A. Owners, Alhambra School District. Contractor, H. F. Roberts, 203 North Marguerita avenue, Alhambra, general contractor; Cooney & Winterbottom, Alhambra, plumbing, and Machinery and Electric Co., L. A., heating and ventilating.

APARTMENT HOUSE—3 story and base, frame, \$26,000. Los Angeles, Cal. Architect, none. Owner, Benj. Ishman. Contractors, C. E. Barton Co., Hibernian Bldg., L. A. Contract price, \$26,000.

LAUNDRY—1 story and base, brick and steel, \$35,000. Los Angeles, Cal. Architect, Fred A. Hale, 641 San Fernando street, L. A. Owners, Los Angeles Laundry Co. Contractors, David-son Construction Co., 16th and Tennessee streets, L. A. Contract price, \$35,000.

SCHOOL—1 story and base, brick, \$13,450. Glendale, Los Angeles Co., Cal. Architect, C. S. Westlake, 1458 Oak street, Glendale. Owners, Glendale School District. Contractor, E. D. Yard, 127 North Maryland avenue, Glendale. Contract price \$13,450.

**Ventura Girls' Home Goes To S. F. Firm.**

L. G. Bergren & Son Low Men and Will Be Awarded Contract For New State Institution.

(By Special Wire)

SACRAMENTO, CAL.—Sept. 23, 1914—Bids opened by the State Board of Control for constructing the hospital cottage and typical cottages Nos. 1 and 2 at the California Girls' Home, a new State institution to be located in Ventura. Construction will be of frame and concrete. L. G. Bergren & Son of San Francisco submitted the low figure. Contract for the work will undoubtedly be awarded to this firm. Following is a complete list of the bids received:

**Work at Girls' Home, Ventura.**

L. G. Bergren & Son, S. F.	\$79,972.00
Alta Planning Mill Co.	\$2,480.00
Kling Co. & J. C. Boer	\$2,965.00
Mulder & Harnish	\$6,950.00
W. E. Kier Constr. Co.	\$8,600.00

S. W. Hunter Eng. Co.	\$9,226.95
Ventura Mill & Lumber Co.	\$9,317.00
Willard Slater Co.	91,500.00
Summers & Land Co.	98,700.00
Southwestern Constr. Co.	111,000.00

### PORTLAND AND OREGON.

**WAREHOUSE AND FACTORY**—1 story and base, reinforced concrete and brick, \$30,000. Portland, Ore. Architects, MacNaughton & Raymond, Title and Trust Bldg., Portland, Owners, Blake McFall Paper Co. The building will be erected on the northside and will cover an area of 100 by 200 feet. Besides the factory plant and warehouse the building will contain the office of the company. Interior of the office portion will be finished in pine and hardwood. There will be two freight elevators, steam heat and automatic sprinklers. Exterior of the building will be faced with pressed brick. Plans are complete and figures are being taken.

**FACTORY ADDITION**—1 story and base, brick, \$10,000. Hillsboro, Ore. Architect, none. Owners, Pacific Coast Condensed Milk Co., Hillsboro. This company has commenced work on the enlarging of its plant here, and will expend about \$10,000 in the enterprise. The present building is too small to care for the milk available. Special machinery will be installed in the new additions.

**MUNICIPAL BARN**—2 story and base, reinforced concrete, \$50,000. Portland, Ore. Architect, City Building Inspector Plummer, Portland. Owners, City of Portland. The building will be erected at the corner of 13th and Jefferson streets, covering an area of 210 by 75 feet. The basement will be used for storing the street cleaning equipment. The first floor has been arranged for a total of 92 stalls, two box stalls and locker rooms. The second floor will be used for storage purposes and room for the feed rider and offices. Special electrical work and modern plumbing will be installed. Exterior of the building will be faced with pressed brick. Plans are complete and figures are now being taken.

**WATER SUPPLY SYSTEM**—\$250,000. Oregon City, Ore. Engineers, Hurlburt & Rands, Henry Bldg., Portland. Owners, Oregon City. Plans and specifications have been completed by Hurlburt & Rands and bids will probably be authorized within a few days for the construction of the pipe line and water system to extend from Clackamas to Oregon City. William Anderson is chairman of the water commission. The work will consist of constructing a large reservoir to have a capacity of 5,000,000 gallons, to be of reinforced concrete construction, grading and building trenches and laying pipe. The pipe to be used will be 20-inch, 18-inch and 16-inch sizes of wood stave pipe. The cost of the work is estimated at between \$225,000 and \$250,000 and the work will probably be authorized at the next meeting of the commission at Oregon City, which has the matter in charge. The completed survey showed a total mileage of 24.9 miles. There will be 13 miles of 18-inch pipe and 11.6 miles of 16-inch pipe. According to the original plan it was the intention of the engineers to use 14-inch pipe, but the sizes have been increased.

**IRRIGATION HEAD WORKS**. Cost not stated. Hood River, Ore. Engineer, R. A. McClannathan, Heilbronner Bldg., Hood River. Owners, East Fork Irrigation District. Bids will be received by the Board of Directors of the East Fork Irrigation District until October 9th for the reconstruction of the headworks at the intake on the East Fork of the Hood River and construction of main canal for a distance of about six miles. Plans and specifications can be obtained at the office of R. A. McClannathan, Engineer, Room No. 29, Heilbronner Bldg., Hood River, Ore., on deposit of \$5.

**SEWER CONSTRUCTION**—Reinforced concrete pipe, \$150,000. Portland, Ore. Engineer, City Engineer, Portland. Owners, City of Portland. All proceedings for the construction of the East 82nd street and Willow street extension of the East Stark street sewer will be started over, which will cause a delay of about two months in the advertising of bids for the work. This action was necessitated by the rescinding of the project. The work will be of 64-inch and 60-inch pipe to be of reinforced concrete construction, while the Fulton Park sewer, which is to drain Fulton Park, Carson Heights and parts of Capitol Hill and Burlingame will be of 45-inch pipe. This sewer system will also be of reinforced concrete construction and is estimated to cost \$15,000. Bids for the Fulton Park sewer system will be called for in about 30 days.

**APARTMENT HOUSE**—2 story and base, brick and steel. Cost not stated. Portland, Ore. Architect, Earl A. Roberts, Selling Bldg., Portland. Owner's name not given. The building will be erected at the corner of Broadway and Larabee streets, having a frontage of 50 feet on each street. There will be two modern stores on the first floor. Upper floor will be arranged for apartments and offices. Interior will be finished in pine throughout. Hot water heat will be installed. All suites will have wall beds and private bath rooms. Tile wainscot will be used in the baths. Patent store fronts are specified. Exterior of the building will be faced with pressed brick. Plans are being prepared.

**CULVERT**—Reinforced concrete. Cost not stated. Astoria, Ore. Engineer, State Highway Engineer, Salem. Owners, Clatsop County. Plans and specifications have been completed under the supervision of the State Highway Engineer, and bids are now being received and will be opened at the office of J. C. Chilton, County Clerk of Clatsop County, Astoria, Ore., for the construction of a concrete culvert. The culvert will contain the following materials: 117 yards concrete, 1,450 pounds corrugated steel bars, 6,000 pounds old steel rails, 1,550 feet piling. Plans can be secured from the office of the State Highway Engineer, Salem, Astoria or Portland. Bids close on October 5th.

**CHURCH**—2 story and base, brick and concrete, \$25,000. Portland, Ore. Architects, Pope & Burton, 5th Lake City, 17th, Owners, Latter Day Saints. The building will be erected at the corner of 25th and Madison streets and will cover a considerable area. The design is in the classic style. The

main auditorium will have a seating capacity of 1,500 people. Basement has been designed to contain Sunday school rooms, pastor's study, a large social hall and kitchen. Interior will be finished in pine. There will be a central heating system. Art glass windows are specified. Exterior of the building will be faced with cement plaster. Plans are complete and segregated figures will be taken at once. Rev. Ballard is in charge of the work.

**DOCK**—1 story, frame and corrugated iron, \$50,000. Portland, Ore. Engineer, G. B. Hegardt, Public Dock Commission, Portland. Owners, City of Portland. The building will be erected on Pier No. 1, and will cover an area of 210 by 230 feet. Special cargo handling cranes will be used. Roof will be of four-ply asbestos. Exterior will be covered with corrugated iron. Plans are complete and figures will be opened on October 2nd. Plans and specifications can be secured from the Portland Dock Commission.

### Contracts Awarded.

**SCHOOL**—1 story and base, hollow tile, \$15,737. Portland, Ore. Architect, F. A. Naramore, Portland. Owners, City of Portland. Contractor, A. C. Meyer, 1084 Albina avenue, Portland. Contract price, \$15,737.

**SCHOOL**—1 story and base, hollow tile, \$12,000. Architect's name not given. Owners, Gilbert School District. Contractor, P. S. Hallock, McKay Bldg., Portland. Contract price, \$12,000.

**STORES**—2 story and base, brick and steel. Cost not stated. Portland, Ore. Architects, Clausen & Clausen, Macley Bldg., Portland. Owner's name not given. Contractors, Green & Green, 394 Ross street, Portland. Contract price not stated.

### SEATTLE AND WASHINGTON.

**RESIDENCE**—2 story and base, frame and hollow tile, \$35,000. Seattle, Wash. Architect, David J. Myers, Central Bldg., Seattle. Owner, M. A. Arnold. The dwelling will be erected in the Highlands Tract, and will cover an area of 35 by 109 feet. There will be sixteen rooms, five baths and a garage. The dwelling will set back in the center of large grounds. Interior will be finished in hardwoods throughout. Hardwood floors will be used in the principal rooms. Bath rooms will be finished in tile and equipped with showers. Plans provide for steam heat and a hot water system. Vacuum cleaning will also be installed. Exterior of the house and garage will be covered with cement plaster. Plans are now being prepared.

**LIBRARY**—2 story and base, brick and steel, \$30,000. Seattle, Wash. Architect, W. Somerville, White Bldg., Seattle. Owners, City of Seattle. The building has been designed in the classic style and will be practically a fire-proof building. There will be two reading rooms and an assembly hall. Interior will be finished in pine with some hardwood. Hardwood floors will be used. Plans provide for steam heat. Metal book stacks will be used. Besides the two reading rooms there will be an office for the librarian and stack room. Exterior of the building will be faced with pressed brick. Plans are complete and figures are being taken.

**FIRE PREVENTION DAY.**

October 9th, 1914, will be the forty-third anniversary of the great Chicago Fire. This fire was caused according to our present information by the upsetting of a lamp or lantern which Mrs. O'Leary carried with her when she went to milk her cow. Nearly all of city of Chicago was destroyed in the resultant conflagration.

In order that good may come from evil and saving be secured through past loss, the governors of most of the western and some of the eastern states have for the past few years designated October 9th, as Fire Prevention Day. The choice of this day is appropriate not only because of its being so important an anniversary, but also because of the time of year. The approach of winter, the accumulation of rubbish during the summer months, the necessity of putting up stoves and fixing furnaces for the winter's use, all combine to render extraordinary care necessary at this particular time.

It is therefore thought advisable for a combined clean-up or fire prevention day to be observed on that date. The governors in these states in designating the day as Fire Prevention Day have called attention to practicable means by which fires can be prevented. Some of these have already been named. In addition it is well to say that the autumn produces a very large proportion of our disastrous forest fires. The long drought of the summer and the presence in the mountains of campers tend to the origin and spread of great forest fires, which not only destroy millions of feet of growing timber, but also threaten the safety of homes and cities. Hence it is appropriate that warning be issued against carelessness here as well as in the home, the store, and the factory.

The admonition to citizens that they clean up the rubbish and debris around their premises; that they overhaul stoves and furnaces and put them in order for the winter; that they remove all other fire hazards as far as possible; that they prevent grass fires and forest fires by being careful to extinguish all bonfires and campfires before leaving them; and that every other possible means be used to reduce the fire waste and add to the sum of human health and happiness, comes sometimes with greater force when it has an official setting. This is given it by the proclamation of the governor suggesting that these things be done.

In some states this is supplemented by school exercises. Suggested programs have been prepared in various states, and booklets sent out telling how a portion of the day can be profitably spent in furthering this most important movement. In some of the states textbooks on fire prevention have been published, and in other states small pamphlets containing simple instructions on fire prevention have been prepared and distributed.

In Utah the Insurance Commissioner both while in office and after retirement, offered prizes to school children for essays on fire prevention, thus arousing interest in the movement from that point of view. It is thought that with strong and united effort on this day, supplemented by the daily care that naturally comes out of it, a great deal can be done to lessen the enormous fire waste which is devastating

**Building and Industrial News**

**560 Mission St., S. F.**

the resources, and threatening the financial safety of our nation.

#### INDUSTRIAL SAFETY PUBLIC HEARINGS.

The Safety Department of the Industrial Accident Commission will hold Public Hearings in Los Angeles on September 21st, in San Diego on September 23rd, in Bakersfield on September 28th, and in Fresno on September 30th. Early in October these Hearings will be continued in the cities around San Francisco Bay, as well as in Stockton and Sacramento.

The Workmen's Compensation, Insurance and Safety Act requires that public Hearings be held before proposed safety orders may be made permanent. That is the Wisconsin idea, and has worked admirably in that State. Its essence is that those directly concerned may participate in legislation for themselves and in this way due consideration is given a subject and there is an avoidance of hasty legislation.

Committees of employers and employees will meet to consider Tentative General Safety Orders and make their recommendations.

The Public Hearings on the dates named will take the form of "Safety First" conferences. The law on the subject will be outlined, the work and plans of the Safety Department discussed, pictures will be thrown on a screen to show the "before" and "after" effects of industrial safety in the factories and workshops of California, and short speeches will be delivered by representative employers, employees and other citizens. Commissioner Will

J. French will preside, and John R. Brownell, Superintendent of Safety, will have charge of the pictures and the plans for discussing the technical part of the orders.

These Public Hearings are open to all interested. The Industrial Accident Commission reports that the co-operation extended by employers and employees in the State of California to the Safety Department has been all that could be desired, and indicative of a strong, public sentiment for a reduction in the number of deaths and injuries in our industries.

#### FORT MASON TUNNEL NEARING COMPLETION.

**Work Progressing on Important Rail Link.**

The Fort Mason Tunnel, twice as long as the Stockton street tunnel, is nearing completion. The work which is being done by the State Board of Harbor Commissioners will bring the water front in touch with the exposition, permitting the loading of exhibits on the cars and their delivery to the grounds, through the bore.

The tunnel is 1600 feet in length and extends from Van Ness avenue through the Fort Mason hill. It links the State Belt road with the United States transport docks, which will be a big feature in the carrying of freight and passengers. The work represents an expenditure of \$300,000.

It is estimated that the dried fruit product of California this year will amount to \$10,000,000, not including raisins.

# Efficiency and Advertising

by Lloyd C. Comegys

## The Greatest of Business Problems.

The greatest of business problems is the obtaining of NET PROFITS. All other matters are details toward the attainment of this end.

It is the object of the business man, and he is succeeding or failing in accordance with the amount of his NET PROFITS. That's what he is in business for.

In seeking to obtain NET PROFITS, certain ways have been learned to be more successful than others, and it is these MORE SUCCESSFUL WAYS, SPECIAL METHODS AND DEVICES for attaining NET PROFITS that have been given the designation of EFFICIENCY.

**Efficiency is the Scientific Method of Securing Increased NET PROFITS.**

Efficiency is new. Very little of it has been written down in books. As a general tendency it is everywhere, but as a system of thought, it exists only in the minds of a comparatively small number of men.

Those in business, as owners or employees, who understand Efficiency, are inclined to keep this valuable new knowledge to themselves, just as the gold miner, who has struck a rich vein of yellow treasure, is inclined to be secretive about his good luck.

And there are only a few men, as yet, who are practicing as a profession, the installing of Efficiency in offices, business houses, plants and factories.

### What Efficiency is NOT.

Efficiency is not a new name for an old truth so far as it relates to industry and to individual success. It is an absolutely new point of view in the business world.

It is not Expert Accounting, for the reason that accounting deals only with records and not with methods.

It is not Economy, for the reason that mere saving is often the most suicidal of all business policies.

It is not Emury, for the reason that misdirected energy is the most universal of all industrial wastes.

It is not Slave-driving, for the reason that one of its main benefits is to elevate and profit the wage-workers, not to degrade or oppress them.

And it is not System, for the reason that the most useless and wasteful actions can be done in the most systematic way. There can only be too much system, but there can never be too much Efficiency.

Efficiency will get a greater percentage of results for you, without adding to expense, and will reduce costs without lessening results.

Efficiency is needed in the one-man business, as in the concern employing thousands of men. It is as important to the one, as to the other, to increase NET PROFITS.

LOOK INTO THIS SUBJECT OF EFFICIENCY.

It means greater NET PROFITS for YOU!

## Efficiency Methods.

As applied to business, and considering individuals only as one of the parts of business used to produce the NET PROFITS desired, Efficiency approaches the particular firm it is called in to assist from every angle, large and small.

Almost the first matter to be considered is the question of OVERHEAD CHARGES. This subject, though almost the controlling feature as to whether or not the firm is to make NET PROFITS,—is probably the most neglected and wrongly handled of all business subjects. The subject is a difficult one and in consequence many avoid looking at squarely in the face, as soon as they have made a semblance of settling upon a percentage for their firm.

Efficiency takes hold of this subject and in a scientific way lines the facts about it up in connection with the other features of the business.

Another difficult problem is Salesmanship and the other one advertising. These are constructive and productive forces and the most valuable.

Here it is that Efficiency gains greater results without increased costs, and lesser costs without reducing results.

And the modern Salesmanager and Advertising manager approaches his work from an Efficiency standpoint.

## The Small Firm.

The small firm having less margin in the way of expense for a large office force, needs to utilize the time of its employees to the very best advantage. This means that without the employee working harder or longer, that the results he produces may be made much greater, simply by a change of his methods of work or the facilities to work with. The small firm therefore needs EFFICIENCY Methods as much, if not actually more than the larger ones.

## What Trade Name Advertising can do as Efficient Sales Co-operation.

It can give general publicity to your trade name and goods in the locality you desire to cover, through the use of newspaper, magazine, program, mail and bill-board advertising. The results would come to you through the sales made by your representatives or selling-houses in those localities. Such advertising so establishes the character and value of your offerings or products as to largely relieve your selling-houses, representatives and salesmen from so establishing or informing regarding who you are and the general lines that you offer.

This leaves the salesmen or selling-houses free to devote their entire time to actual sales making and eliminates a large amount of waste effort on their part in connection with your offerings.

Advertising may be very profitably used in obtaining inquiries regarding your offerings and getting in touch with live prospects or those whose minds have already been directed or centered upon taking your proposition. These inquiries or leads to prospects may then be turned over to your representatives or salesmen, who thus can produce many times the results that they otherwise could if left alone to scatter their efforts in a general way.

### GOOD WILL:

The good will of a firm that is established through advertising coming directly from the house is the most valuable kind, in that it cannot be materially affected by the presence or absence of any particular salesman.

### ADVERTISING:

In plain words means explaining to possible customers of whatever you have to offer, who you are, and what you have to offer. Notice, I say to possible customers and it is right here where so much money is lost in advertising, even when it is properly done and contains real pulling or selling power. Be sure you are advertising to possible customers of your particular offerings and not to the general public or to those who would under most circumstances not want them. A trade magazine is one of the very best mediums for reaching the exact people in your line.

## Editorial Comment.

The completion of the Civic Center and the city improvements dependent upon the sale of bonds to the public are liable to suffer some depression on account of the condition of the money market caused by the war.

It is fortunate that the greater part of the improvements are already completed as the marketing of bonds under present conditions would be a difficult task.

In this regard the Secretary of the Treasury has taken definite steps to prevent the hoarding of money in federal banks. This is a move in the right direction. And the new banking system provides for safety for deposits and an equal basis for all banks in such a way that small concerns are not likely to suffer from the strain any more than the large ones. This action of the Secretary is particularly favorable to all people interested in building for the reason that there must be ready money for the purpose. When banks refuse to loan on gilt edge security business soon comes to a stand still.

Lists of the National banks throughout the state and their reserves have been published and with reference to the order of the Secretary the Fresno Republican has this to say:

"Secretary McAdoo announces that he will now regard the possession of an excessive reserve by any bank as an announcement by that bank that it is refraining from doing its share toward the active business life of its community and is confining itself to its merely passive function of being a storehouse for other people's money. The appeal to citizens generally not to hoard their money, but to deposit it in banks, has been based on the fact that money in banks does its part toward moving the business of the community, while money in stockpiles does not do so. But if the money put in banks is to be retained there either by excessive interest or by excessive caution in the extension of credits, it might as well be buried in the ground as put in the banks. The secretary of the treasury therefore announces, so far as national banks are concerned, that any of them which indicate by the accumulation of excessive reserves that they are adopting this policy, will be deprived of all assistance or support of the government through deposits or otherwise, and will receive an unwelcome amount of free advertising upon the authority of the secretary of the treasury in their respective communities.

The co-operation of state bank superintendents in a similar policy toward state banks will be invited. This is a new method of averting panic and

promoting trade, and a decidedly bold one, but it is a decidedly welcome and well justified one."

The reported destruction of the old Cathedral at Rheims is one of the catastrophes of the war. It is said to be the most perfect example of Gothic architecture in Europe, that form of building construction which is identified with and which typifies the great religious life of the middle ages. The war is yet young and aside from the appalling destruction of human life which it has entailed the irreparable destruction of property will daily grow larger and larger. The great library at Lovain has gone up in smoke. The art treasures that have accumulated for untold years will be obliterated and the world will be made that much the poorer.

And for why? To allow some monarch to perpetuate his breed and oppress the people by military rule. And today the whole world suffers, the life blood of every nation is being poured out upon the battlefields and before the end, no doubt, whole peoples will be annihilated because the people have allowed this rule of monarchs to encumber the earth.

Before the Primary there was a great deal of talk about the fact that those candidates who were endorsed by more than one party would be refused the privilege of putting their names on any ballot at the general election. As every body knew there was no merit to such a contention. The reactionaries resorted to the time-honored custom of appealing to the Supreme Court. That court has decided that the Primary law is all right from a legal standpoint and that people registered under any party name can vote for whom they please for any party.

The wild appeal is made by the Chronicle that all the present candidates for Lieutenant Governor would destroy the Republican party if they could. And what is the Republican Party? Is it the little coterie of men headed by Harrison Gray Otis and Michael De Young, who thus assume to be the personification of all the virtues and traditions of the Republican Party?

What is there in a name that any man with sense enough to sit up should follow it when it leads to destruction? Has the voter no more reason than a South African nigger that he should worship the party name and vote the party ticket and perpetuate the rule of a band of pirates? Every man should vote for the principles and the men that he thinks are right. For only then will enlightened self government and free institutions survive.

## Purifying Water By Electricity.

How the Ultra Violet Rays of the Mercury Vapor Quartz Lamp Are Used For Sterilizing Water.

By M. von Recklinghausen.

Sterilizing water appears to be a rather peculiar task for electricity to perform, but it has been used successfully in Europe and particularly in France. The general European war has, of course, interrupted the course of further investigation. The following abstract of a paper presented before the American Institute of Electrical Engineers by Von Recklinghausen, an authority on this application of electricity, is of decided interest:

The only industrially applied source of ultra-violet light is the mercury-vapor quartz lamp. The spectrum is known by its bright lines in the visible part and by a large number of typical lines in the ultra-violet part, found that we had to go pretty fully into the question of the measure of the ultra-violet power of the different light sources at our disposal, so as to give the mercury quartz lamps the electrical characteristics which made them most useful for the creation of ultra-violet light. It is a well known fact that the skin takes a less ghastly hue under the quartz mercury lamp than under the ordinary mercury-vapor lamp. Spectroscopic examination shows that this is due to a considerable increase of the intensity of the red lines in the spectrum of the quartz lamp. This phenomena was examined somewhat more closely, with the following results:

An ordinary 110-volt lamp was taken, which normally operates at 3.5 amperes and 80 volts; it was operated at different wattages obtaining thereby, naturally, different temperatures of the mercury arc. A spectro-photometric analysis was made of the five principal colors, composing the visible light of these lamps. Assuming the intensity of each color at the lowest wattage as unity, we note that increasing the wattage of the lamp tends to increase the red more than the other colors. It might, therefore, be expected that the increase of the ultra-violet rays with increasing temperature of the lamp would be somewhat like the increase at the violet end of the spectrum, that is to say, proportionately less than at the red end. As will be seen from what follows, this is not the case. There is obtained, on the contrary, a considerably greater increase in ultra-violet than in violet rays with increasing temperature of the lamp.

The most efficient way for the mercury lamp to react upon water seems to be, a priori, to submerge the lamp entirely in the water which is to be sterilized. Direct contact, however, of the water with the heated lamp influences the luminous and ultra-violet efficiency of the quartz lamp to an enormous degree. It seems to be certain, therefore, that it is better, if one wants to plunge the light source into the water, to protect the lamp from direct contact with the water, and this system has been adopted with modern apparatus. This protection against direct contact can be secured

by fusing over the lamp a wide quartz jacket which prevents contact of the light-giving portion of the lamp with the water.

Difficulties, however, arose in the manufacture of such jacketed lamps and it was found advisable to construct the apparatus in such a way that the lamp was removable from the protective jacket, allowing, nevertheless, all the light to enter the water. Another method is to let the water circulate in such a way around the lamp that it would not come into contact with it, receiving nevertheless practically all the rays emitted by the lamp.

Where it is more a question of convenience and less a question of efficiency the simplest method is evidently to place the lamp above the water, but as close as possible to the surface. Unfortunately, reflectors placed above such lamps, have a low efficiency in reflection of ultra-violet rays. It may, therefore, be said that with such apparatus hardly half the rays of the lamp will enter into the water.

Different germs have different sensibilities to the ultra-violet rays. The one of greatest interest to us are the water bacteria and we find that they are killed in as short a time as 1-20 second, at a distance one to two centimeters from the powerful ultra-violet ray lamps. Water being practically as transparent as air to the ultra-violet rays, we are therefore certain that if a germ floats in the water it will be annihilated by getting into the illuminated zone, the condition for this being that no suspended matter is contained in the water which would form a shield for the germ.

Water for this sterilization has, therefore, in most cases to be filtered before being submitted to the sterilizing action of the rays. However, even very good filters will allow some microscopic matter to pass. It is much more effective, as shown by experiments, to stir up such water while it is going through the illuminated zone so as to turn over and over any particles which otherwise might allow microbes to pass by under cover. For the same reason, also, it is best to pass the water through several illuminated zones, which can easily be done by leading the water several times towards the same source of light, or by passing it successively under several sources of light.

The largest unit ever built was set up about two years ago in the city of Luneville, France, to sterilize the city water supply. It consists of a huge inlet on the sides of which ten 200-volt pistol lamp equipments are inserted. These equipments consist of metal boxes for the starting of the lamps (the latest types of them contain also the rheostats). The boxes are equipped on the inside with a stuffing box arrangement holding the quartz protective tube which protrudes into the water. The lamps are lit in the starting boxes and then their luminous parts are inserted into the protective

tubes, so that the light emitted from the lamp enters the water.

The raw water fed into this plant comes from the Meur River and contains sometimes as high as 60,000 germs per cu. cm. It is clarified by a series of roughing filters and one filter. After this it is physically in fairly good condition, being very poor in suspended matter, but having from time to time fairly deep color (up to 15 U. S. standard) in solution. The germ contents are sometimes as high as 1,000 per cu. cm. in this water. It is then passed through the sterilizing unit described above, coming under the influence of the light from one to two minutes altogether, according to the number of lamps running. This number (sometimes only 4) depends on the physical condition of the water, which is easily observed. The bacteriological tests of the water when leaving the sterilizer rarely show more than 10 germs per cu. cm. and are often zero. Bacterium coli is always eliminated. Not only are the bacteriological tests satisfactory; the health of the community has improved considerably. Typhoid used to cause from 70 to 100 deaths annually; it is now practically eliminated, there being no cases at all this year.

Another typical installation was made in New York lately for the purification of the water of a swimming pool, which is naturally exposed to continuous pollution from the bathers. The water in this case is circulated continually through a filter to take out suspended matter and then it passes through the ultra-violet ray sterilizer. This apparatus is similar to the Luneville unit except for its size, as it contains only two 220-volt pistol lamps. It is rated at 175,000 gallons capacity per day. Tests at the outlet of the sterilizer show only a few germs, and tests of the water going to the purifying apparatus have improved from 6,000 germs per cu. cm. to about 350 germs per cu. cm. since the introduction of the ultra-violet ray apparatus.

The smallest lamp used in the above apparatus operates at 110 volts with two amperes. The largest made so far is for 500 volts, 2.5 amperes. The largest apparatus built contains ten of the last mentioned lamps. The power consumption in such a case, with a very large safety coefficient for the sterilization, is between 50 and 150 kw. per million gallons of water. This amount of power is evidently not very great but it will always do something to smooth out the load curve of a power station, as, in most cases, such apparatus will be operated continuously. Many installations of this kind have been made in Europe for both small and large waterworks, and they are operating very successfully. Their simplicity and rapidity of action are highly satisfactory.

From The Isolated Plant.

## APARTMENT HOUSES.

**SAN FRANCISCO**—Apartment house, 5 story and base, reinforced concrete. Cost not stated. Engineers, Bad & Fisher, Nevada Bank Bldg., S. F. Owner's name not given. The building will be erected in the Fifty Vara District, and will contain a number of two and three room suites. All apartments will have wall beds and private baths. Interior finish will be of pine with some elm panels and hardwood floors. Plans provide for steam heat, a hot water system and elevator service. Bath rooms will have tile wainscot and composition floors. Entrance will be finished in tile and marble. Exterior of the building will be faced with cement plaster. Plans are out for figures.

**OAKLAND, CAL.**—Apartment house, 3 story and base, frame, \$20,000. Architect, William Wilde, 1725 Broadway. Oakland. Owner, R. Pozzi. The building will be erected at the corner of 23rd and Harrison streets, and has been designed to contain two, three and four room apartments. There will be wall beds and private bath rooms. Pine and redwood interior finish will be used. There will be some oak floors. All bath rooms will have tile wainscot and composition floors. There will be steam heat and a hot water supply. Exterior of the building will be covered with cement plaster on metal lath. Plans are complete and new figures are being taken.

**LOS ANGELES, CAL.**—Apartment house, 1 story and base. Class C construction. Cost not stated. Architect, W. J. Saunders, International Bank Bldg., L. A. Owner, F. W. Braun. The building will be erected at the corner of Hope and Fifth streets, covering an area of 61 by 65 feet. There will be a total of 76 suites in the building, arranged in two and three room apartments. All apartments will have wall beds and private baths. Interior will be finished in pine and elm. Plans provide for steam heat, a hot water system and automatic elevator. Bath rooms will have tile wainscot and composition floors. Entrance will be finished in marble. Plans are complete and figures will be called for at once.

## BANKS

**SAN FRANCISCO**—Bank, 1 story, frame and plaster, \$10,000. Architect, Charles S. Kaiser, Mechanics' Institute Bldg., S. F. Owners, Anglo-California Trust Co. The building will be erected on Fillmore street near the Exposition Grounds, and is intended to care for the company's business in that section of the city during the Exposition year. The design is in the classic style. Interior will be finished in pine. Plans provide for special bank fixtures and equipment, including bank vault and safe deposit vaults. Exterior of

the building will be covered with cement plaster. Plans are now being prepared.

## BONDS.

**SAN DIEGO, SAN DIEGO CO., CAL.**—Mayor O'Neal has announced that when the Volcan water proposition is voted on there will also be included on the ballot a \$500,000 proposition for development of the San Diego River. The proposition was suggested by the Mayor and endorsed by several councilmen.

**SAN FERNANDO, LOS ANGELES CO., CAL.**—An election will be held here on October 15th in the San Fernando Union High School District of Los Angeles County, to vote bonds of \$150,000 to raise funds for the purchase of sites, erection of school buildings and the furnishing of same. F. M. Wright is a member of the School Board.

**FRESNO, FRESNO CO., CAL.**—At the general election this city will vote on the proposition of bonding the county for \$200,000, the funds to be used in the erection of a Hall of Records.

**WATSONVILLE, MONTEREY CO., CAL.**—The question of bonding Monterey County for \$550,000 for bridge and road improvement will go on the November ballot. The money will be apportioned as follows: Bridges, \$250,000; roads, \$285,000.

**VACAVILLE, SOLANO CO., CAL.**—Engineer, Steiger after working some time has come to the decision that the estimate for the bond issue for improving the streets of Vacaville will be about \$125,000. It is probable that the question will be submitted to the voters in two propositions. No date as yet has been set for the election.

**OWENSMOUTH, LOS ANGELES CO., CAL.**—An election will be held in the Chatsworth Park School District of Los Angeles County on October 26th for the purpose of voting bonds in the sum of \$35,000. The funds will be used in the purchasing of school lots, erecting school buildings and making necessary alterations and repairs to the present buildings. Mrs. Minnie Gray is one of the school trustees of the district.

**SIERRA MADRE, LOS ANGELES CO., CAL.**—An election will be held on October 14th for the purpose of voting bonds in the sum of \$20,000, the funds to be used in the erection of school buildings and the making of additions to the same. J. H. Wright and Edward T. Pierce are the Trustees of the Sierra Madre School District for which the bonds are being voted.

**HERMOSA BEACH, LOS ANGELES CO., CAL.**—An ordinance has been adopted by the Board of Trustees of Hermosa, calling for a bond election to vote bonds of \$10,000 for acquisition and construction of a city hall building. Bonds of \$5,000 will also be voted for the purchasing of fire apparatus.

**SAN GABRIEL, LOS ANGELES CO., CAL.**—Bonds in the sum of \$8,000 have

been voted here for the construction of a school building. Work on the building will be started as soon as bonds are sold.

**LONG BEACH, LOS ANGELES CO., CAL.**—Long Beach electors have defeated the proposition to purchase holdings of the Long Beach Bath House on the beach for \$700,000. The bonds were defeated by a majority of 61%.

## BRIDGES AND DAMS.

**SANTA BARBARA CO., CAL.**—Bridges, 2, steel and reinforced concrete, \$10,000 and \$75,000. Engineer, County Surveyor F. F. Flournoy, Santa Barbara. Owners, Santa Barbara County. A \$10,000 bridge, 400 feet long and 77 feet high to carry the State Highway across the water way at El Guamada, is now occupying the attention of County Surveyor F. F. Flournoy. The structure has been demanded by the State Highway Commission to enable them to get to the grade along their survey. Plans for another bridge have also been started. This bridge will be 625 feet long and 80 feet high across the Arroyo Honda. The structure will cost in the neighborhood of \$75,000.

**SAN JOSE, SANTA CLARA CO., CAL.**—Bridge, steel pony truss. Cost not stated. Engineer, County Surveyor, San Jose. Owners, Santa Clara County. Plans and specifications have been completed and approved for constructing a bridge on the Podfish road over L'vas Creek. Bids are now being taken for the work and figures will be opened on October 19th. Plans and specifications can be secured from the County Surveyor at San Jose.

**WOODLAND, YOLO CO., CAL.**—Bridge, timber construction. Cost not stated. Engineer, County Surveyor, Woodland. Owners, Yolo County. Plans for the construction of the wooden bridge to span the new Woodland-Knights Landing road over the Knights Landing ridge cut in Yolo County have been submitted to the Knights Landing Drainage Commission for its approval. Bids will be called for on approval.

**RIVERSIDE, RIVERSIDE CO., CAL.**—Bridge, reinforced concrete construction. Cost not stated. Engineer, County Surveyor, Riverside. Owners, Riverside County. Bids will be received by the Board of Supervisors of Riverside County up to October 10th for the construction of a concrete bridge over the San Jacinto River near the San Jacinto Hot Springs in accordance with plans and specifications, which may be obtained from County Surveyor Fulmor.

## CHURCHES.

**LOCKEFORE, SAN JOAQUIN CO., CAL.**—Church, 1 story and base, frame, \$10,000. Architect, James W. Plachek, Acheson Bldg., Berkeley. Owners,

**Lockeford Congregational Church.** The building will contain a main auditorium, social rooms and Sunday school rooms. Interior finish will be of pine throughout. There will be furnace heat. Exterior of the building will be covered with rustic. Plans are now being prepared.

**FRESNO, FRESNO CO., CAL.**—Church addition and a renovation, frame construction. Cost not stated. Architect, A. C. Martin, Higgins Bldg., 12 A. Owners, Roman Catholic Church. The work will consist of new interior plastering and decoration, art glass windows and painting. The nave will be extended, this portion of the building being of brick with a slate roof. Plans are being prepared.

**RIVERSIDE, RIVERSIDE CO., CAL.**—Church, 1 story and base, frame, \$10,000. Architect, Lester S. Moore, 596 Blaine street, Riverside. Owners, Providence Congregational Church. The main auditorium will seat in the neighborhood of 200 people. Besides the auditorium there will be Sunday school rooms and social rooms. The building will cover an area of 64 by 65 feet. Interior will be finished in pine. There will be modern plumbing and electric work. Exterior of the building will be covered with rustic. Plans are complete and the work will be done by Day Labor.

**SANTA MONICA, LOS ANGELES CO., CAL.**—Church, 1 story and base, frame and plaster, \$10,000. Architect, Norman F. Marsh, Broadway Central Bldg., L. A. Owners, First Baptist Congregation. The building will cover an area of 50 by 90 feet and will contain an auditorium seating 500 people besides 15 class rooms and pastor's study. Interior will be finished in pine. There will be art glass windows and ornamental plaster work. Exterior of the building will be covered with cement plaster on metal lath. Plans are complete and figures are being taken by the architect.

**PORTLAND, ORE.**—Church, 1 story and base, reinforced concrete, \$10,000. Architects, Tourtellotte & Hummel, Ketchikan Bldg., Portland. Owners, First Methodist Church. The building will be erected at the corner of 14th and Taylor streets, covering an area of 160 by 60 feet, and will be of fireproof construction. The ground floor will be arranged for general club rooms and social parlors, while the upper floor will contain an auditorium to seat 600 people and a number of class rooms. Interior finish will be of pine and ornamental plaster. Art glass windows will be installed. There will be a central heating system and modern plumbing. Exterior of the building will be faced with cement plaster. Plans are nearly complete and figures will be called for shortly.

## COURT HOUSES.

**SACRAMENTO, CAL.**—Court house grounds, etc. Cost not stated. Architect, A. R. Harold, Polman Bldg., Sacramento. Owners, Sacramento County. Bids opened by the Board of Supervisors for the improving of the north half of the Court House grounds, with the following bidders and amounts: E. M. Bernier, \$1,000; G. W. Jones & Son, \$200; D. Terhune & Associates, \$74; J. Lawrence, \$1,000.

## FACTORIES AND WAREHOUSES.

**SAN FRANCISCO.**—Shop building, 2 story and base, brick and steel, \$18,000. Architect, City Department of Architecture, Temporary City Hall, S. F. Owners, City and County of San Francisco. The building will be erected on the north side of Golden Gate avenue east of Hyde street, and will be used by the Department of Electricity. Interior will be finished in pine throughout. A large amount of special electric equipment will be installed. There will be a central heating system. Exterior will be faced with pressed brick. Plans are nearly complete and figures will be called for shortly.

**SAN FRANCISCO.**—Warehouse, 1 story, steel and corrugated iron, \$5,000. Architect, none. Owners, Iyer Bros., 17th and Kansas streets, S. F. The building will be erected on 16th street between Rhode Island and Kansas streets, adjoining other buildings of the same company, and will be used for storage purposes. Exterior will be covered with corrugated iron. Plans are in the hands of the owners who will erect the building by Day Labor.

**SEATTLE, WASH.**—Cold storage warehouse, 6 to 8 story and base, Class A construction. Engineers, Port of Seattle Commission, Seattle. Owners, City of Seattle. Bids for the construction of the proposed cold storage warehouse to be built by the Port of Seattle Commission have been opened and show the Pearson Construction Co. of Seattle the lowest bidder on their bid of \$164,855 for the eight-story structure and \$114,927 for the smaller building. It is expected that the contract will be awarded to them.

## FIRE HOUSES AND JAILS.

**SAN FRANCISCO.**—Fire alarm station equipment. Cost not stated. Architect, City Department of Architecture, Temporary City Hall, S. F. Owners, City and County of San Francisco. Bids opened at the last meeting of the Board of Public Works for furnishing and installing generator equipment and switch boards for the new Central Fire Alarm Station will be found under the heading of San Francisco in this issue. Awards were not made.

## FLATS.

**SAN FRANCISCO.**—Flats, 2 story and base, frame, \$5,000. Architect, none. Owner, James Gleeson, 581 5th avenue, S. F. The building will be erected on the north side of Anza street east of 8th avenue, and has been designed to contain two modern flats of five and six rooms. Interiors will be finished in pine and redwood. Hardwood floors will be used in the principal rooms. There will be open fire places and tile mantels. Bath rooms will be finished in tile. Entrance will have marble wainscot. Exterior of the building will be covered with rustic and cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor. Materials are now being purchased.

**BERKELEY, ALAMEDA CO., CAL.**—Flats, 2 story and base, frame, cost not stated. Architect, A. Peterson, 515 Guerrero street, S. F. Owners, E. E. Patton & E. M. Street. The building will be erected on the west side of Guerrero avenue south of Stuart, and will contain

two flats of five and six rooms. There will be open fire places in the living rooms with tile or brick mantels. Interior finish will be of pine and redwood. Hardwood floors will be used in the living and dining rooms. Bath rooms will have tile wainscot. Exterior of the building will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

**SAN FRANCISCO.**—Flats, 2 story and base, frame, \$4,000. Architect, J. C. Thomas, S. F. Owner, P. K. Clausen, 133 1/2 19th avenue, S. F. The building will be erected on the north side of Clement street east of 23rd avenue, covering an area of 25 by 48 feet. There will be two modern flats of five and six rooms. Interior finish will be of pine and redwood. Hardwood floors will be used in the principal rooms. Tile wainscot will be used in the bath rooms and kitchens. Each living room will have an open fire place and tile mantel. Exterior of the building will be covered with rustic and cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor.

**SAN FRANCISCO.**—Flats, 2 story and base, frame, \$4,000. Architect, none. Owners, San Francisco Building Co., 45 Kearny street, S. F. The building will be erected on the west side of 19th avenue south of Lake, covering an area of 27 1/2 feet by 70 feet. Plans provide for two flats of five and six rooms. Interior finish will be of pine and redwood with some elm panels. Hardwood floors will be used in the living rooms, dining rooms and reception halls. An open fire place will be used in each living room. Mantels will be of tile. Tile wainscot will be used in the baths. Marble wainscot is specified for the entrance. Exterior of the building will be covered with rustic, cement plaster on metal lath and brick veneer. Plans are complete and in the hands of the owners who will do the work by Day Labor.

## GOVERNMENT WORK & SUPPLIES.

**Light Fixtures for San Francisco.** Allowance for special fixtures, \$7,500. Stock fixtures, Wahle-Phillips Co., New York, \$375; Cassidy & Son Mfg. Co., New York, \$416.55; Reading Chandler Works, Reading, Pa., \$300; The Tiffany Studio, New York, \$593; Home Light Co. of America, New York, \$326.30; Horn & Brannan Mfg. The buildings will be in the nature of an addition to the present building at Fruitvale and Hopkins streets. There will be a large dining room, wards and private rooms. The buildings will be heated by steam from the central plant. Interior finish will be of pine. Exterior will be faced with pressed brick and cement plaster. Plans are complete and figures are being taken.

OAKLAND, CAL.—Sanitarium, 2 story and base, frame, \$10,000. Architects, Elite Planners, 555 7th avenue, Oakland. Owner W. N. Downey. The building will be located at the corner of 5th avenue and East 50th street and will contain a number of private rooms, operating rooms and ward interior will be finished in pine with some hardwood floors. Tile wainscot

will be used extensively. A central heating system and hot water supply will be installed. Exterior of the building will be covered with ship-lap and cement plaster on metal lath. Plans are complete and suggested figures will be taken at once.

### ● HOTELS.

**STOCKTON, SAN JOAQUIN CO., CAL.**  
Hotel and stores, 1 story and base, Class C construction, \$10,000. Architect, Henry H. Meyers, Kohl Bldg., S. F. Owners, R. E. Wilhoit & Son. The building will be erected on a corner lot and has been designed to contain a number of stores on the ground floor besides the hotel lobby. Upper floors will contain in the neighborhood of 50 hotel rooms besides the baths. Interior finish will be of pine throughout. There will be steam heat and a hot water supply. Bath rooms will be finished in tile. Patent store fronts are specified. Exterior of the building will be faced with pressed brick. Plans are complete and figures are being taken.

### ◆ RESIDENCES.

**SAN FRANCISCO**—Residence, 2 story and base, frame, \$6,000. Architect, H. R. Schulze, 512 East 17th street, Oakland. Owners, L. D. and H. B. Allen, 128 Sutter street, S. F. The dwelling will be erected on the west side of 8th avenue north of Moraga and has been designed to contain eight rooms, bath and sleeping porch. Interior finish will be largely of pine with some elm panels. Hardwood floors will be used in the living room, dining room and reception hall. Plans provide for furnace heat and open fire places. Mantels will be of tile. Bath room will have tile floor and wainscot. An automatic water heater will be installed. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and in the hands of the owners who will do the work by Day Labor. Materials are now being purchased.

**SAN FRANCISCO**—Residence, 2 story and base, frame, \$4,000. Architect, none. Owner, William Koenig, 150 Larnassus avenue, S. F. The dwelling has been designed for a seven-room house with bath and will be erected at the northwest corner of Ashbury and Congress streets. Interior finish will be of pine and redwood with some white enamel. Hardwood floors will be used in the principal rooms. There will be furnace heat and open fire places. Mantels will be of tile or brick. Tile wainscot and floor will be used in the bath room. An automatic water heater will be installed. Exterior of the house will be covered with pressed brick veneer. Plans are complete and in the hands of the owner who will do the work by Day Labor.

**SAN FRANCISCO**—Residence, 2 story and base, frame and plaster, \$10,000. Architect, Henry H. Meyers, Kohl Bldg., S. F. Owner, Edwin Newman. The dwelling will be erected in Jordan Park, and has been designed for an eight-room house with three baths and sleeping porch. Interior will be finished in pine, redwood, hardwoods and white enamel. Hardwood floors will be used in the principal rooms. There will be a central heating system probably hot air, and open fire places. Mantels will be of tile or brick. Bath

rooms will be finished in tile and equipped with showers. An automatic water heater will be installed. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and figures have been taken. A contract will be awarded this week.

**SAN FRANCISCO**—Residence alterations, frame. Cost not stated. Architect, Henry Shermund, Mills Bldg., S. F. Owner, Benj. Abraham. This work will consist of new interior finish, hardwood floors, plumbing, painting, plastering and electric work. No exterior alterations will be made. Plans are complete and the work will be done by Day Labor.

**SAN FRANCISCO**—Residence, 2 story and base, frame, \$4,000. Architect, none. Owners, Thomas Volden & Son, 1015 Cole street, S. F. The dwelling will be erected on the north side of Balboa street west of 30th avenue, and has been designed for a seven-room house with bath. Interior finish will be of pine and hardwood. Hardwood floors will be used in the living room, dining room and reception hall. There will be open fire places and tile mantels. Bath room will have tile wainscot. An automatic water heater will be installed. Exterior of the dwelling will be covered with cement plaster on metal lath and rustic. Plans are complete and in the hands of the owners who will do the work by Day Labor. Materials are being purchased.

**SAN FRANCISCO**—Residences, 5, 2 story and base, frame, \$60,000 to \$100,000. Architect, Charles J. Rousseau, 46 Kearny street, S. F. Owner, John Little. These houses will be erected on the west side of 11th avenue north of Balboa, and will each contain eight rooms, two baths and sleeping porches. Interiors will be finished in pine, white enamel, blue gum and eastern oak. There will be furnace heat and open fire places. Hardwood floors will be used throughout. Mantels will be of tile and brick. All bath rooms will be finished in tile. Exterior will be covered with cement plaster on metal lath and brick veneer. Work will be done soon as the architect can complete the working drawings.

**OAKLAND, CAL.**—Residence, 1 story and base, frame, \$2,000. Architect, none. Owner, J. Lehman, 959 Apgar street, Oakland. The dwelling will be erected on Wellington east of 13th avenue, and has been designed for a six-room house with bath and sleeping porch. Interior will be finished in pine and redwood. Some hardwood floors will be used. Plans provide for furnace heat and open fire places. An automatic water heater will be installed. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor.

**BERKELEY, ALAMEDA CO., CAL.**—Bungalow, 1 story and base, frame. Cost not stated. Architect, Eugene K. Martin, 2192 Shattuck avenue, Berkeley. Owner, George Fiedlerwitz. The house has been designed to contain six rooms and bath, and will be erected on University avenue. Pine and redwood will be used for interior finish. Hardwood floors will be used throughout. There will be an open fire place in the living room. Mantel will be of brick. Tile wainscot will be used in the bath room. Exterior of the dwelling will

be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

**BERKELEY, ALAMEDA CO., CAL.**—Residence, 2 story and base, frame, \$12,500. Architect, Charles W. McCall, Central Bank Bldg., Oakland. Owner's name withheld. The dwelling will be erected in the Claremont Tract, and has been designed for a ten-room house with several baths and sleeping porches. A garage will also be erected on the property. Interior of the house will be finished in pine, hardwoods and white enamel. Hardwood floors will be used in the principal rooms. There will be a central heating system, probably hot air, and open fire places. Mantels will be of brick and tile. Bath rooms will be finished in tile. An automatic water heater will be installed. Exterior of the house will be covered with cement plaster on metal lath. Plans are being prepared.

**WOODLAND, YOLO CO., CAL.**—Residence, 1 story and base, frame, \$4,000. Architect, C. H. Miller, Dalziel Bldg., Oakland. Owner, Ralph Schluer. The dwelling has been designed for a six-room house with bath. Interior will be finished in pine and redwood. Hardwood floors will be used in the living and dining rooms. There will be furnace heat and open fire place. Mantel will be of tile or brick. Tile wainscot will be used in the bath room. Exterior of the house will be covered with cement plaster on metal lath. Plans are being prepared.

**BERKELEY, ALAMEDA CO., CAL.**—Residence, 2 story and base, frame, \$5,000. Architect, Eugene K. Martin, 2192 Shattuck avenue, Berkeley. Owner, Mrs. R. Clifford. The dwelling will be erected in Claremont, and has been designed for an eight-room house with bath and sleeping porch. Interior finish will be of pine, hardwood and white enamel. Hardwood floors will be used in the living room, dining room and reception hall. There will be furnace heat and open fire places. Mantels will be of tile. Bath room will have tile wainscot and floors. An automatic water heater will be installed. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and figures are now being taken by the architect.

**SACRAMENTO, CAL.**—Bungalows, 2, 1 story and base, frame, \$2,000 each. Architect, none. Owners, J. J. Jennings, 719 J street and H. C. Muddox, 2930 K street, Sacramento. These two dwellings will each contain five rooms and bath. Interiors will be finished in pine and redwood. Some oak floors will be used. There will be open fire places and tile or brick mantels. Bath rooms will have tile wainscot. Interiors will be covered with rustic and cement plaster on metal lath. Plans are complete and in the hands of the owners who will do the work by Day Labor. Materials are now being purchased.

**RICHMOND, CONTRA COSTA CO., CAL.**—Residence, 2 story and base, frame, \$5,000. Architect, H. H. Gutterson, 50 Post street, S. F. Owner, H. W. Wernse. The dwelling will contain eight rooms, bath and sleeping porch. Interior finish will be of pine and redwood with some white enamel. Hardwood floors will be used in the living room, dining room and reception hall. There will be furnace heat and open fire places. Mantels will be

of tile or brick. Bath room will have tile floor and wainscot. An automatic water heater will be installed. Exterior of the house will be covered with cement plaster on metal lath. Plans are now being prepared.

**REDWOOD CITY, SAN MATEO CO., CAL.**—Residence, 2 story and base, frame, \$30,000. Architects, Bliss & Faville, Balboa Bldg., S. F. Owner, Jacob Stern. The dwelling will be erected on property adjoining the home of Louis Stern, and has been designed for a modern country residence. There will be in the neighborhood of fourteen rooms, several baths and sleeping porch. Stables and a garage and hot house will also be erected. Interior of the house will be finished in pine and hardwoods. Hardwood floors will be used in all principal rooms. There will be a central heating system and open fire places. Mantels will be of tile or brick. Bath rooms will be finished in tile. Exterior of the house will be covered with cement plaster on metal lath. Plans are nearly complete and will go out for figures in a week or ten days.

**SAN FRANCISCO**—Residence, 2 story and base, frame and brick veneer, \$15,000. Architect, G. Albert Linsbargh, 709 Mission street, S. F. Owner, Samuel Lowenstein. The dwelling will be erected at the southwest corner of Webster and Broadway, and has been designed to contain twelve rooms, three baths and sleeping porch. A private garage will also be constructed. Interior finish will be of pine, hardwoods and white enamel. Hardwood floors will be used throughout. There will be a central heating system and open fire places. Mantels will be of tile or brick. Bath rooms will be finished in tile. Exterior of the building will be covered with cement plaster and veneer pressed brick. Plans are complete and figures are being taken.

**OAKLAND, CAL.**—Residence, 2 story and base, frame, \$3,000. Architect, none. Owner, G. H. Lewis, 4005 37th street, Oakland. The dwelling has been designed for a seven-room house with bath and will be erected on Emerson street south of 37th. Interior finish will be of pine and redwood. Hardwood floors will be used in the principal rooms. There will be open fire places and tile mantels. Bath room will be finished in tile. An automatic water heater will be installed. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor. Materials are now being purchased.

**SISSON, SISKIYOU CO., CAL.**—Residence, 1 story and base, frame and stone, \$5,000. Architect, James W. Plachek, Acheson Bldg., Berkeley. Owner, Head Forester Schuller, Sissons. The dwelling has been designed for an eight-room house with two baths. Interior finish will be of pine and redwood. Some hardwood floors will be used. There will be furnace heat and open fire places. Mantels will be of stone and tile. Tile wainscot will be used in the bath rooms. Exterior of the house will be covered with stone veneer and cement plaster. Plans are being prepared.

**SAN JOSE, SANTA CLARA CO., CAL.**—Bungalows, 2, 1 story and base, frame, \$2,500 each. Architect, none. Owners, G. E. Baggott, 150 Terranie

street, and A. M. Whiteside, 71 North 19th street, San Jose. Each of the dwellings will contain six rooms and bath. Interior finish will be of pine and redwood. Some oak floors will be used. Tile wainscot will be used in the bath rooms and kitchens. Exteriors will be covered with rustic and cement plaster on metal lath. Plans are complete and in the hands of the owners who will do the work by Day Labor.

**HOLLYWOOD, LOS ANGELES CO., CAL.**—Residence, 2 story and base, frame. Cost not stated. Architect, Harold B. Dunn, Van Nuys Bldg., L. A. Owner, E. R. Dunbar. The dwelling has been designed in the Swiss chalet style and will contain nine rooms, two baths and sleeping porch. Interior will be finished in pine and hardwoods. Hardwood floors will be used in the living room, dining room and reception hall. Open fire places and tile and brick mantels will be used. Bath rooms will be finished in tile. Exterior of the building will be covered with shakes and cement plaster on metal lath. Plans are complete and the work will be done by Day Labor.

**BEVERLY HILLS, LOS ANGELES CO., CAL.**—Residence, 1 and 2 story and base, brick, \$75,000. Architect, W. J. Dodd, Marsh-Strong Bldg., L. A. Owner, Roland Bishop. The dwelling will contain sixteen rooms, six baths and sleeping porches. A two-story frame garage will also be erected on the property. Interior of the dwelling will be finished in mahogany and white enamel. Hardwood floors will be used throughout except in the baths, which will have tile floors and wainscot. There will be steam heat, a hot water supply and vacuum cleaning. Art glass will also be used. Exterior of the house will be faced with pressed brick. A large retaining wall and formal gardens will be constructed. Plans are now nearly complete and figures will be called for in a short time.

**SAN FRANCISCO**—Residence, 2 story and base, frame, \$2,500. Architect, none. Owner, John Bjorkman, 2793 Mission street, S. F. The dwelling will be erected on Geneva avenue and has been designed to contain five rooms and bath. Interior will be finished in pine and redwood. Some oak floors will be used. There will be open fire place in the living room with a tile mantel. Bath room will have tile wainscot. Exterior of the house will be covered with rustic and cement plaster. Plans are complete and in the hands of the owner who will do the work by Day Labor. Materials are now being purchased.

**MIDMONT, ALAMEDA CO., CAL.**—Residence, 1½ story and base, frame, \$2,500. Architects, Elite Planners, 1844 5th avenue, Oakland. Owner, James. Ravghman. The dwelling has been designed to contain five rooms, bath and sleeping porch. Interior will be finished in pine and redwood with some hardwood floors. There will be a large open fire place in the living room. Mantel will be of tile or brick. Tile wainscot will be used in the bath room. Exterior of the house will be covered with shingles. Plans are being prepared and when complete the work will be done by Day Labor.

**OAKLAND, CAL.**—Bungalow, 1 story and base, frame, \$2,500. Architects, Elite Planners, 1844 5th avenue, Oakland. Owner, W. E. Brown. The dwell-

ing has been designed for a five-room house and will be erected in three heights. Interior will be finished in pine and redwood. Hardwood floors will be used in the living room and dining room. There will be an open fire place with tile or brick mantel. Tile will be used in the bath room. Exterior of the house will be covered with cement plaster on metal lath. Plans are being prepared and when complete the work will be done by Day Labor.

**OAKLAND, CAL.**—Residence, 1½ story and base, frame, \$2,500. Architects, Elite Planners, 1844 5th avenue, Oakland. Owner, R. A. McWilliam. The dwelling will be erected in Fourth Avenue Heights, and has been designed to contain five rooms, bath and sleeping porch. Interior will be finished in pine and redwood. Some hardwood floors will be used. There will be a large open fire place in the living room. Mantel will be of tile. Tile wainscot will be used in the bath room. Exterior of the house will be covered with cement plaster. Plans are being prepared and when complete the work will be done by Day Labor.

**OAKLAND, CAL.**—Residence, 2 story and base, frame, \$2,000. Architects Elite Planners, 1844 5th avenue, Oakland. Owner, Mr. Small. The dwelling will be erected on Newton avenue, and has been designed for a seven-room house with bath and sleeping porch. Interior finish will be of pine and hardwood. Oak floors will be used in the living room, dining room and reception hall. Plans provide for furnace heat and open fire places. Mantels will be of tile or brick. Tile wainscot will be used in the bath room. An automatic water heater will be installed. Exterior of the house will be covered with cement plaster on metal lath. Plans are being prepared.

**LARKSPUR, MARIN CO., CAL.**—Residence, 2 story and base, frame, \$10,000. Architect, Norman Coulter, 46 Kearny street, S. F. Owner, George Eckert. The dwelling will be erected in Baltimore Park, and has been designed for an eight room house with baths and sleeping porch. A garage will also be erected on the property. Interior of the dwelling will be finished in pine and hardwood. Hardwood floors will be used in the principal rooms. Plans provide for furnace heat and open fire places. Mantels will be of tile and brick. Bath rooms will be finished in tile. An automatic water heater will be installed. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

## PANAMA-PACIFIC EXPOSITION WORK.

**SAN FRANCISCO**—Exhibit booth, frame construction, \$15,000. Architect, Oscar C. Haupt, Phelan Bldg., S. F. Owners, California Fruit Growers' Association. The booth will be erected in the Horticultural Building at the Exposition and will be arranged to display the products of the company in their many branches. Fruits of the state will be shown as selected by the company before their process and the work of canning and preparing will also be shown. Plans are now being prepared.

### POST OFFICES.

**SAN FRANCISCO**—Subtreasury vault equipment. Cost not stated. Architect, Supervising Architect Oscar Wenderoth Washington D. C. Owners, United States Government. New figures are being called for on furnishing and installing metal vault equipment for the new United States Subtreasury under construction in San Francisco. Bids will be opened on October 7th. Plans and specifications can be secured from the Supervising Architect. An official proposal appears in another column of this issue.

### RAILROAD CONSTRUCTION AND EQUIPMENT.

**BENICIA, SOLANO CO., CAL.**—Electric railroad. Cost not stated. Engineer's name not given. Owners, Benicia Land and Terminal Co., Benicia. The City Trustees have been asked for a franchise for an electric road through the city streets to the city limits on the Vallejo road. The application was made by A. T. Brown, president of the Benicia Land and Terminal Company, who proposes to build a road from Benicia to Vallejo and a line from Benicia to Winters. A franchise will be applied for at the next meeting. Officials of the company state that the road will be in operation within one year.

### SCHOOLS.

**SAN FRANCISCO**—School fire escapes. Cost not stated. Architects, City Department of Architecture, Temporary City Hall S. F. Owners, City and County of San Francisco. Bids will be opened by the Board of Public Works on October 7th for furnishing and installing fire escapes on the new Burnett School. Plans can be secured from the Department of Architecture.

**FOLSOM, SACRAMENTO CO., CAL.**—School, 1 story and base, hollow tile construction, \$25,000. Architects, Geo. C. Sellon and Alden W. Campbell, 1905 K street, Sacramento. Owners, Folsom School District. Plans for this building have been revised and new figures are being taken. The building will contain eight class rooms and an assembly hall. Interior will be finished in pine with some maple floors. There will be a central heating system and oil burning equipment. Modern school plumbing will be installed. Exterior of the building will be faced with cement plaster. Plans and specifications can be secured from the architects.

**PALO ALTO, SANTA CLARA CO., CAL.**—School gymnasium, 1 story and base, brick. Cost not stated. Architects, Bakewell & Brown, 271 Kearny street, S. F. Owners, Leland Stanford, Jr. University. Preliminary plans are being prepared for the new gymnasium to be erected for the women of the University. The building will be similar in construction to the new gymnasium recently constructed for the men. Exterior will be faced with pressed brick. Steam heat and modern plumbing will be installed. Special apparatus will be installed. Working drawings are being prepared.

**RICHMOND, CONTRA COSTA CO., CAL.**—School plumbing. Cost not stated. Architect, none. Owners, Richmond School District. Bids for

the installation of the sanitary equipment for the Land School in this city were opened by the School Trustees. The following bids were submitted: M. Morton, \$3,137. M. B. Roberts, \$5,715. Jas. Crumchenk, \$6,201. The Trustees have taken the bids under advisement. An award will be made at an early date.

**RICHMOND, CONTRA COSTA CO., CAL.**—School, 1 story and base, brick or hollow tile, \$50,000. Architects, Stone & Wright, Stockton. Owners, Richmond School District. That bids for the construction of the Grant School, which is to be built in East Richmond, will be called for in about ten days, is the opinion of the School Trustees. Tentative plans for the building have been looked over. Architect L. S. Stone of Stockton has announced that all but a few blue prints are completed. W. E. Leland of San Francisco, a heating engineer, has presented plans for the heating system.

**PORTLAND, ORE.**—School, 2 story and base, reinforced concrete and brick, \$160,000. Architect, P. A. Naramore, Court House, Portland. Owners, City of Portland. The building will be erected at the corner of 26th and Hoyt streets and will be of semi-fireproof construction. There will be twenty-four class rooms, an auditorium seating 700 people, domestic science and manual training departments and a large gymnasium with swimming pool and showers. Interior will be finished in pine throughout with maple floors in the class rooms. There will be a central heating system, probably steam heat with oil burning equipment. Modern school plumbing will be installed. Exterior of the building will be faced with pressed brick trimmed with terra cotta. Plans are complete and figures are now being taken. Bids will close on October 19th. Plans and specifications can be secured from the architect.

**ATHENA, ORE.**—School, 2 story and base, brick, \$35,000. Architects, Tourtellotte & Hummel, Rothchild Bldg., Portland. Owners, Athena School District. The building will cover an area of 75 by 125 feet and will contain eight class rooms, assembly hall, auditorium and teachers' rooms. Interior will be finished in pine with maple floors in the class rooms. Plans provide for steam heat and modern school plumbing. Slate blackboards will be used. Exterior of the building will be faced with pressed brick. Plans are complete and figures are being taken.

**FRESNO, FRESNO CO., CAL.**—School, 2 story and base, Class C construction, \$50,000. Architect, J. Carl Thayer, Fresno. Owners, Fresno School District. The building will be known as the Jefferson School and will contain six class rooms and an assembly hall. First floor and all corridors and stairways will be of concrete. Interior will be finished in pine with maple floors in the class rooms. A central heating system with oil burning equipment will be installed. Slate blackboards will be used. Exterior of the building will be faced with pressed brick. Plans are being completed and figures will shortly be called.

### Contracts Awarded.

**PALO ALTO, SANTA CLARA CO., CAL.**—Men's gymnasium, 1 story and base, brick, \$100,000. Architects, Bakewell & Brown 21 Kearny street, S. F.

Owners, Leland Stanford, Jr., University. Contractors, Larsen & Sampson, Crocker Bldg., S. F. Contract price not stated.

### SEWERS, STREET WORK & WATER SYSTEMS.

**SAN FRANCISCO**—Water distributing system. Cost not stated. Engineer, Lt. Col. W. H. Hart, 1086 North Point street, S. F. Owners, United States Government. Bids will be opened by Lt. Col. Hart on October 10th for constructing a water distributing system in the National Cemetery at the Presidio of San Francisco. Plans and complete information can be secured on application to Lt. Col. Hart. An official proposal appears in another column of this issue.

**SAN FRANCISCO**—Tunnel construction, \$3,475,300. Engineer, City Engineer, Temporary City Hall, S. F. Owners, City and County of San Francisco. Hans Pederson of Seattle submitted the lowest figures for the construction of the new Twin Peaks Tunnel. His bid was \$3,475,300. The Board of Public Works states that he will be awarded the contract. A complete list of Mr. Pederson's unit prices for the work appears under the heading of San Francisco in this issue.

**SAN FRANCISCO**—Power station, 1 story and base, brick and steel, \$25,000. Architect, General Construction Department Pacific Gas and Electric Co., 415 Sutter street, S. F. Owners, Pacific Gas and Electric Co. The building will be erected at the northwest corner of 24th and Balboa streets and will cover a considerable ground area. Construction will be fireproof. Interior will be finished in cement and pine. A cement floor will be used. Special electric work will be installed by the company. Exterior of the building will be faced with pressed brick. Plans are complete and figures are being taken.

**SAN MATEO, SAN MATEO CO., CAL.**—Retaining wall, reinforced concrete. Cost not stated. Architects, Havens & Toepke, 46 Kearny street, S. F. Owners, City of San Mateo. Bids will be opened by the City Trustees on October 15th for constructing a retaining wall of reinforced concrete from the Library to a point on the school property. The wall will protect the earth along the creek. Plans can be secured from the architects.

**VALLEJO, SOLANO CO., CAL.**—Sewer extensions. Cost not stated. Engineer, City Engineer, Vallejo. Owners, City of Vallejo. Property owners north of Georgia street and east of the railroad tracks have petitioned the City Council to provide for extending the sewers of this city. In response to the petition the City Engineer has been instructed to make a survey and submit a report to the council at their next meeting.

**SAUSALITO, MARIN CO., CAL.**—Street paving. Cost not stated. Engineer, City Engineer, Sausalito. Owners, City of Sausalito. Bids will be opened on October 12th by the City Trustees for paving approximately 30,000 square yards of the city streets. Plans and complete particulars can be secured from either the City Clerk or City Engineer.

**BENICIA, SOLANO CO., CAL.**—Street paving. Cost not stated. Engineer, City Engineer, Benicia. Owners, City of Benicia. Specifications have been

completed here for the improving of East Fifth street between the center of C street and East Fifth street and O street. Plans and specifications with complete information may be had from the City Clerk at Benicia.

**LENARE DISTRICT, FRESNO CO., CAL.**—Irrigation project, \$150,000. Engineer's name not given. Owners, Summit Lake Investment Co., Fresno. A. C. Cranor, Griffith-McKenzie Bldg., Fresno, is representing the Summit Lake Investment Co., which owns some 125,000 acres of land located about 28 miles out of Fresno in what is known as the Lenare District. This tract is irrigated by 14 artesian wells, and the excess waters are to be carried off in new canals and ditches. Mr. Cranor is to have entire charge of the construction work, which has been estimated to cost in the neighborhood of \$150,000.

**GRASS VALLEY, NEVADA CO., CAL.**—Water distribution. Cost not stated. Engineer's name not given. Owners, Nevada Water Consumers' Association, Grass Valley. The Nevada Water Consumers' Association will hold an important meeting at the headquarters of the Chamber of Commerce in this city on October 10th. At this meeting it is expected that some definite action will be taken on the system of water distribution to reclaim thousands of acres in the southern part of the county. Although the Pacific Gas and Electric Co. has seemingly passed the matter up, the association is endeavoring to adopt some co-operative plan for the building of the canals. It is possible that the Supervisors will be petitioned to call an election to allow the people to vote irrigation bonds.

**SACRAMENTO, CAL.**—Paving plant, \$10,000. Engineer, none. Owner, A. Teichert, Ochsen Bldg., Sacramento. A new asphalt paving plant will be constructed at the corner of Oakes and Railroad avenues. The work will be done by Day Labor. Materials are now being purchased.

**SACRAMENTO, CAL.**—Trunk sewer work, concrete, \$32,000. Engineer, City Engineer, Sacramento. Owners, City of Sacramento. Bids will be opened on October 8th for constructing a trunk line sewer between the southern part of the city and the new city sump. Plans and specifications can be secured from the City Engineer.

**SANTA BARBARA, SANTA BARBARA CO., CAL.**—Highway work, \$1,000,000. Engineer, County Surveyor, F. F. Flourney, Santa Barbara. Owners, Santa Barbara County. The survey of the proposed road over the Najoqui hill from the State Highway at the foot of the Najoqui over the Alisal grade to the Santa Ynez Mission, connecting the Santa Ynez country with the State Highway has been commenced. J. H. Kincaid has been sent out by County Surveyor F. F. Flourney to take charge of the work. The road to be surveyed is eight miles long, over hills, and is one of the proposed roads to be built under the expected bond issue of \$1,000,000. The order for this survey was given by the Board of Supervisors before the bond issue was proposed.

**VALLEJO, SOLANO CO., CAL.**—Street paving. Cost not stated. Engineer, City Engineer, Vallejo. Owners, City of Vallejo. Because of an error in the specifications, the paving on Georgia street from Colusa to Contra Costa in Vallejo is again postponed, the City

Street Improvement Company having asked the City Council to release them from their contract. It appears that no reference was made in the call for bids for the cement sidewalks, not usually included in street work advertisements. New bids will be called for immediately.

**SAN JOSE, SANTA CLARA CO., CAL.**—Highway work and lighting. Cost not stated. Engineer, County Surveyor, San Jose. Owners, Santa Clara County. At the meeting of the Board of Supervisors September 28th, the following important matters were gone through. Plans and specifications for improving the highway known as the Alameda were presented by the County Surveyor and on motion adopted, and the Clerk directed to advertise for bids for said work; bids to be opened Monday, October 19th, 1914, at 11 o'clock a. m. Plans and specifications for lighting Willow Glen Highway Lighting District were adopted by the Board and the Clerk directed to advertise for bids for said work; bids to be opened Monday, October 12th, 1914, at 11 o'clock a. m.

**FRESNO, FRESNO CO., CAL.**—Canal repairs and headgates. Cost not stated. Engineer, none. Owners, Fresno Canal and Irrigation Co., Fresno. More than seventy-five men will be put to work in a few days cleaning and repairing the 450 miles of canals controlled by the Fresno Canal and Irrigation Company. New headgates on concrete foundations will be installed in many places. The work will last several months. A section of the Enterprise Canal north of Clovis may be cemented to prevent flood damage.

**WOODLAND, YOLO CO., CAL.**—Gas plant improvements, \$50,000 to \$60,000. Engineer, none. Owners, Pacific Gas and Electric Co. Rather indefinite plans are being prepared by the officials of the Pacific Gas and Electric Co. to improve gas service in this place. The project is either to construct a new plant altogether or to lay a pipe line from Sacramento and discontinue the making of gas here. Whichever plan is put into effect the cost will be between \$50,000 and \$60,000.

**MARYSVILLE, YUBA CO., CAL.**—Highway work. Cost not stated. Engineer, County Surveyor, Marysville. Owners, Yuba County. At a meeting of the M. M. and E. recently a resolution was adopted favoring the construction of a lateral from the main trunk of the State Highway from Marysville to Downieville via Smartsville, Nevada City and Camptonville. The proposed route from Camptonville to Downieville would follow along the North Fork of the Yuba River. A committee is urging that this lateral be built. James K. O'Brien of Smartsville and Commissioner Miller of Nevada City will be asked to serve with the joint committee.

#### Contracts Awarded.

**STOCKTON, SAN JOAQUIN CO., CAL.**—Street paving, \$27,500. Engineer, City Engineer, Stockton. Owners, City of Stockton. Contractors, Clark & Benery, Stockton. Contract price, \$27,500.

**SACRAMENTO, CAL.**—Sewer work, \$22,000. Engineer, City Engineer, Sacramento. Owners, City of Sacramento. Contractor, J. V. Terrell, Chico. Contract price, \$22,000.

**BYRON, CONTRA COSTA CO., CAL.**—Irrigation work. Cost not stated. Engineer's name not given. Owners, Byron-Bethany Irrigation District. Bids for the excavation of three miles of the main canal in the Byron-Bethany Irrigation system have been opened and the contract awarded to Steel Bros. of Ceres, Stanislaus County, on their bid of 13c per cubic yard. Murray Bros. of Hughson, Stanislaus, were the next lowest bidders, their bid being 15c per cubic yard. Work is expected to start immediately. The main ditch will be 6 to 7 feet deep, 7 to 12 feet wide at the bottom and 20 to 30 feet wide at the top. Digging will commence at Bruns Hill, about a mile south of Byron Hot Springs, and will extend southward toward Bethany for a distance of three miles. Branches will later extend to the Mountain House road. North of Bruns Hill will extend laterals to the Byron-Brentwood line, a distance of several miles. Water will be taken from the Italian Slough. A channel will be dredged about a mile and a quarter to the Bruns Hill.

#### STORES AND OFFICES.

**SAN ANSELMO, MARIN CO., CAL.**—Stores 1 story and base reinforced concrete, \$10,000. Architects, Dolliver & Sawin, Royal Insurance Bldg., S. F. Owner, Mr. Walcott. The building will be designed to contain several stores. Interior finish will be of pine. There will be large plate glass display windows and patent store fronts. Exterior of the building will be faced with cement plaster. Plans are being prepared.

#### CONCRETE HOUSE BUILDING IN CANADA.

[From the Government Labor Gazette, Ottawa.]

Work on 25 new concrete houses in Berlin, Ontario, is being pushed. The construction of these houses is a comparatively new feature in building, the contractor having the latest machines therefor. Molds are put up for the entire house, and by means of a large derrick the concrete is poured from the top and when dry has the appearance of brick. Although the 25 houses will be alike in size and shape, no two will be alike in finish, which will be in woodwork colors.

#### A NEW USE FOR CONCRETE.

In building a ferry landing stage at Sydney, Australia, a big pontoon made of reinforced concrete was adopted. It was 100 feet long 68 feet wide at one end and 43 at the other, and 7 feet 2 inches, giving it a freeboard of 32 inches. The bottom was flat, and the sides and ends were given an inclination of 70 degrees. The pontoon was divided into 48 water-tight compartments, and was carefully reinforced and strengthened to withstand the pressure of vessels lying a-astide. A live load of 150 tons is provided for, and the structure would weigh 650 tons. It is expected that this concrete structure will require little attention in the way of repairs, will be permanently water-tight and will overcome many other troubles that the ordinary wooden or steel pontoons are subject to.

# PROPOSALS

## Bids Wanted

### PROPOSALS FOR STEEL PIPES.

**STEEL PIPES**—Department of the Interior, U. S. Reclamation Service, Los Angeles, Cal. Sealed proposals will be received at the office of the U. S. Reclamation Service, Los Angeles, Cal., until 2 o'clock p. m. October 13, 1914, for erecting riveted steel pressure pipes for the Okanogan project, Wash. For particulars address U. S. Reclamation Service, 605 Federal Building, Los Angeles, Cal., or Washington, D. C. O. H. ENSIGN, chief electrical engineer.

### PROPOSALS FOR TOWER AND TANK.

**TOWER AND TANK**—Treasury Department, Office of the Supervising Architect, Washington, D. C. Sealed proposals will be received at this office until 3 p. m. October 27, 1914, and then opened, for the construction of a concrete water tower, concrete tank, etc., at the quarantine station, Honolulu, Hawaii, in accordance with the specification and drawing, copies of which may be obtained at this office, at office of superintendent of repairs, U. S. post office, San Francisco, Cal., or at the office of the custodian of the station at Honolulu, Hawaii, in the discretion of the supervising architect, O. WENDEROTH, supervising architect.

### PROPOSALS FOR VAULT EQUIPMENT.

**VAULT EQUIPMENT**—Treasury Department, Office of the Supervising Architect, Washington, D. C. Sealed proposals will be opened in this office at 3 p. m. October 7, 1914, for the construction and installation of metal vault equipment for the new United States subtreasury at San Francisco, Cal. Drawings and specifications may be obtained at this office, in the discretion of the supervising architect, O. WENDEROTH, supervising architect.

### PROPOSALS FOR DISTRIBUTING SYSTEM.

**WATER DISTRIBUTING SYSTEM**—Office of the Depot Quartermaster, 1046 North Point Street, San Francisco, Cal. Sealed proposals will be received here until 10 a. m. October 10, 1914, for a water distributing system for the San Francisco National Cemetery, Presidio of San Francisco. Further information may be had upon application to W. H. HART, lieutenant colonel, quartermaster corps, depot quartermaster.

### PROPOSALS FOR CANAL WORK.

**CANAL WORK**—Department of the Interior, U. S. Reclamation Service, Washington, D. C. Sealed proposals will be received at the office of the United States Reclamation Service, Malta, Mont., until 2 o'clock p. m. October 28, 1914, for the reconstruction of Dodson South Canal at Dodson Bridge. The work involves about 72,000 cubic yards of excavation, 12,000 cubic yards of puddled filling, 5,200 cubic yards of riprap, 10 cubic yards of concrete, and the moving of two steel bridge spans, abutments and pier. The work is situated on the south side of Milk River, about one and one-quarter miles south of Dodson, Mont., a station on the Great Northern Railway. For particulars address the United States Reclamation Service, Washington, D. C. Great Falls, Mont., or Malta, Mont. F. H. NEWELL, director.

### PROPOSALS FOR DREDGING.

**DREDGING**—U. S. Reclamation Service, Office of the Supervising Architect, Washington, D. C. Sealed proposals will be received at the office of the U. S. Reclamation Service, Washington, D. C., until 12 o'clock noon, Monday, October 19th, 1914, for dredging the

and Oak Bay, Wash., will be received at this office until 12 o'clock October 16, 1914, and then publicly opened. Information on application, J. B. CAVANAUGH, major, engineers.

### PROPOSAL FOR LANTERN.

**LANTERN**—Sealed proposals will be received at the office of the light house inspector, Portland, Ore., until 2 o'clock p. m. October 10, 1914, and then opened, for furnishing one standard fourth order lantern. Blank proposals and particulars may be obtained by addressing the light house inspector, Portland, Ore.

### PROPOSALS FOR CANAL OUTLETS.

**CANAL OUTLETS, ETC.**—Department of the Interior, U. S. Reclamation Service, Washington, D. C. Sealed proposals will be received at the office of the U. S. Reclamation Service, Malta, Mont., until 2 p. m. October 13, 1914, for construction of Nelson reservoir outlet canals, dikes and controlling works, involving about 67,500 cubic yards of earth excavation, 1,200 square yards of rock paving and 900 cubic yards of reinforced concrete. The work is situated about 4½ miles north of Ashfield Station on the main line of the Great Northern Railway. For particulars address the U. S. Reclamation Service, Washington, D. C. Great Falls, Mont., or Malta, Mont. F. H. NEWELL, director.

### NOTICE TO CONTRACTORS.

**TREASURY DEPARTMENT**, Supervising Architect's Office, Washington, D. C., September 18, 1914.—SEALED PROPOSALS will be opened in this office at 3 p. m. October 7, 1914, for construction and installation of metal vault equipment for the new United States subtreasury at San Francisco, Cal. Drawings and specifications may be obtained at this office, in the discretion of the supervising architect, O. WENDEROTH, Supervising Architect.

**CANAL WORK**—Department of the Interior, U. S. Reclamation Service, Washington, D. C.—Sealed proposals will be received at the office of the United States Reclamation Service, Malta, Mont., until 2 o'clock p. m. October 13, 1914, for the construction of Nelson reservoir outlet canals, dikes and controlling works, involving about 67,500 cubic yards of earth excavation, 1,200 square yards of rock paving and 90 cubic yards of reinforced concrete. The work is situated about 4½ miles north of Ashfield Station on the main line of the Great Northern Railway. For particulars address the United States Reclamation Service, Washington, D. C. Great Falls, Mont., or Malta, Mont. F. H. NEWELL, director.

### PROPOSALS FOR COAL PLATFORM.

**COAL PLATFORM AND FLUME**—Sealed proposals indorsed "Proposals for Extension to Coal Platform and Flume" will be received at the bureau of yards and docks, Navy Department, Washington, D. C., until 11 o'clock a. m. October 10, 1914, and then and there publicly opened, for extension to coal platform and flume at the naval coal depot, San Diego, Cal. Plans and specifications may be obtained on application to the bureau or to the officer in charge, naval coal depot, San Diego, Cal. H. R. STANFORD, chief of bureau.

**SEALED BIDS** will be received by W. C. McCreary, State Engineer, Capital Building, Sacramento, California, up to and including 12 o'clock noon, Monday, October 19th, 1914, said bids then

and there to be publicly opened and read for furnishing all plant, materials, and labor, and doing the work required for the construction and erection of a building to be known as Cottage for Epileptic Girls, Sonoma State Home, Eldridge, California, in accordance with the plans and specifications therefor, copies of which may be obtained on application to the State Department of Engineering, Sacramento, California.

Such bids will be received for the Entire Work, and must be submitted on forms prepared and furnished by the State Department of Engineering. Cash, a bidder's bond, or a certified check, the sum of ten percentum (10%) of the amount of the bid must accompany each bid.

### NOTICE TO CONTRACTORS.

**TREASURY DEPARTMENT**, Supervising Architect's Office, Washington, D. C., October 1, 1914.—SEALED PROPOSALS will be opened in this office at 3 p. m. November 12, 1914, for the construction complete (including mechanical equipment, interior lighting fixtures, and approaches) of the United States post office at The Dalles, Oreg. Two-story and basement building; ground area, 5,080 square feet; stone facing; partial fireproof construction. Drawings and specifications may be obtained from the custodian of site at The Dalles, Oreg., or at this office, in the discretion of the Supervising Architect, O. WENDEROTH, Supervising Architect.

### STATEMENT OF THE OWNERSHIP, MANAGEMENT, CIRCULATION, ETC., REQUIRED BY THE ACT OF AUGUST 24, 1912.

**BUILDING AND INDUSTRIAL NEWS** published weekly at San Francisco, for October 1, 1914.

Name of Editor, C. Munday, 560 Mission Street.

Managing Editor, L. A. Larsen, 560 Mission Street.

Business Manager, L. A. Larsen, 560 Mission Street.

Publisher, L. A. Larsen, 560 Mission Street.

Owner, L. A. Larsen, 560 Mission St. Known bondholders, mortgagees, and other security holders, holding 1 per cent or more of total amount of bonds, mortgages, or other securities: None.

L. A. LARSEN, Owner. Sworn to and subscribed before me this Second day of October, 1914.

CHALMER MUNDAY, Notary Public in and for the City and County of San Francisco, State of California.

(My commission expires October 15th, 1917.)

[SEAL]

The Washington government has done well to lose no time in sitting down heavily on the "moratorium" nonsense of suspending debt collections. There is not even a remote necessity for any such action either by Congress or by any State government. The country is at peace and doing an aggregate domestic business little reduced by the shock of foreign war. It has been provided with an ample emergency currency for the very purpose of sustaining the usual operations of credit and its liquidation at maturity. To introduce a moratorium in imitation of countries demoralized by war would be to precipitate here a like financial demoralization, utterly destructive of an orderly conduct of business and industry.

## SAN FRANCISCO.

**RESIDENCE**—2 story and base, frame, \$6,000. San Francisco. Architect, H. R. Schulze, 512 East 17th street, Oakland. Owners, L. D. and H. B. Allen, 128 Sutter street, S. F. The dwelling will be erected on the west side of 8th avenue north of Moraga, and has been designed to contain eight rooms, bath and sleeping porch. Interior finish will be largely of pine with some elm panels. Hardwood floors will be used in the living room, dining room and reception hall. Plans provide for furnace heat and open fire places. Mantels will be of tile. Bath room will have tile floor and wainscot. An automatic water heater will be installed. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and in the hands of the owners who will do the work by Day Labor. Materials are now being purchased.

**RESIDENCE**—2 story and base, frame, \$1,000. San Francisco. Architect, none. Owner, William Koenig, 750 Parnassus avenue, S. F. The dwelling has been designed for a seven-room house with bath, and will be erected at the northwest corner of Ashbury and Congress streets. Interior finish will be of pine and redwood with some white enamel. Hardwood floors will be used in the principal rooms. There will be furnace heat and open fire places. Mantels will be of tile or brick. Tile wainscot and floor will be used in the bath room. An automatic water heater will be installed. Exterior of the house will be covered with pressed brick veneer. Plans are complete and in the hands of the owner who will do the work by Day Labor.

**RESIDENCE**—2 story and base, frame and plaster, \$10,000. San Francisco. Architect, Henry H. Meyers, Kohl Bldg., S. F. Owner, Edwin Newman. The dwelling will be erected in Jordan Park, and has been designed for an eight-room house with three baths and sleeping porch. Interior will be finished in pine, redwood, hardwoods and white enamel. Hardwood floors will be used in the principal rooms. There will be a central heating system, probably hot air, and open fire places. Mantels will be of tile or brick. Bath rooms will be finished in tile and equipped with showers. An automatic water heater will be installed. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and figures have been taken. A contract will be awarded this week.

**RESIDENCE ALTERATION**—Frame. Cost not stated. San Francisco. Architect Henry Shermund Mills Bldg., S. F. Owner, Benj. Abraham. This work will consist of new interior finish, hardwood floors, plumbing, painting, plastering and electric work. No exterior alterations will be made. Plans are complete and the work will be done by Day Labor.

**RESIDENCE**—2 story and base, frame, \$1,000. San Francisco. Architect, none. Owners, Thomas Volden and Son, 1015 Cole street, S. F. The dwelling will be erected on the north side of Balboa street west of Ninth avenue, and has been designed for a seven-room house with bath. Interior finish will be of pine and hardwood. Hardwood floors will be used in the living room, dining room and reception hall. There will be open fire places and tile mantels. Bath room will have tile wainscot. An automatic water heater will be installed. Exterior of the dwelling will be covered with cement plaster on metal lath and rustic. Plans are complete and in the hands of the owners who will do the work by Day Labor. Materials are being purchased.

**RESIDENCES**—5, 2 story and base, frame, \$6,000 to \$10,000. San Francisco. Architect, Charles J. Rousseau, 16 Kearny street, S. F. Owner, John Little. These houses will be erected on the west side of 11th avenue north of Balboa, and will each contain eight rooms, two baths and sleeping porches. Interiors will be finished in pine, white enamel, blue gum and eastern oak. There will be furnace heat and open fire places. Hardwood floors will be used throughout. Mantels will be of tile and brick. All bath rooms will be finished in tile. Exteriors will be covered with cement plaster on metal lath and brick veneer. Work will be done by Day Labor, and will be started as soon as the architect can complete the working drawings.

**base, reinforced concrete.** Cost not stated. San Francisco. Engineers, Bad & Fisher, Nevada Bank Bldg., S. F. Owner's name not given. The building will be erected in the Fifty Vara District and will contain a number of two and three room suites. All apartments will have wall beds and private baths. Interior finish will be of pine with some elm panels and hardwood floors. Plans provide for steam heat, a hot water system and elevator service. Bath rooms will have tile wainscot and composition floors. Entrance will be finished in tile and marble. Exterior of the building will be faced with cement plaster. Plans are out for figures.

**FIRE ALARM STATION EQUIPMENT**—Cost not stated. San Francisco. Architect, City Department of Architecture, Temporary City Hall, S. F. Owners, City and County of San Francisco. Bids opened at the last meeting of the Board of Public Works for furnishing and installing generator equipment and switch boards for the new Central Fire Alarm Station will be found under the heading of San Francisco in this issue. Awards were not made.

**PLATS**—2 story and base, frame, \$5,000. San Francisco. Architect, none. Owner, James Gleason, 581 5th avenue, S. F. The building will be erected on the north side of Anza street east of 5th avenue, and has been designed to

contain two modern flats of five and six rooms. Interiors will be finished in pine and redwood. Hardwood floors will be used in the principal rooms. There will be open fire places and tile mantels. Bath rooms will be finished in tile. Entrance will have marble wainscot. Exterior of the building will be covered with rustic and cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor. Materials are now being purchased.

**QUARANTINE TASKS AND TOWER**—Concrete construction. Cost not stated. Honolulu, Hawaii. Architect, Supervising Architect Oscar Wenderoth, Washington, D. C. Owners, United States Government. Plans for a reinforced concrete water tower and tank are complete and out for figures. Bids will be opened on October 27th. Plans and specifications can be secured from the Superintendent at the Post office building, San Francisco. An official proposal appears in another column of this issue.

**HOSPITAL NURSES' HOME**—3 story and base, frame, \$17,000. San Francisco. Architect, A. L. Coffey, Humboldt Bank Bldg., S. F. Owners, St. Francis Hospital. The building will be erected at the corner of Bush and Hyde streets in the rear of the present hospital. The building will cover an area of 32½ by 60 feet, the first floor being given over to laboratories. Upper floors will contain about 12 rooms to the floor. Interior finish will be of pine throughout. There will be a hot water supply and steam heat. Exterior of the building will be covered with terra cotta. Plans have been out for figures and a contract will be awarded at once.

**SUBTREASURY VALUATION EQUIPMENT**—Cost not stated. San Francisco. Architect, Supervising Architect Oscar Wenderoth, Washington, D. C. Owners, United States Government. New figures are being called for on furnishing and installing metal vault equipment for the new United States Subtreasury under construction in San Francisco. Bids will be opened on October 17th. Plans and specifications can be secured from the Supervising Architect. An official proposal appears in another column of this issue.

**SCHOOL FIRE ESCAPES**—Cost not stated. San Francisco. Architects, City Department of Architecture, Temporary City Hall, S. F. Owners, City and County of San Francisco. Bids will be opened by the Board of Public Works on October 17th for furnishing and installing fire escapes on the new Burnett School. Plans can be secured from the Department of Architecture.

**WATER DISTRIBUTING SYSTEM**—Cost not stated. San Francisco. Engineer, Lt. Col. W. H. Hart, 1056 North Point street, S. F. Owners, United States Government. Bids will be opened by Lt. Col. Hart on October 19th for constructing a water distributing system in the National Cemetery at the Presidio of San Francisco. Plans and

W. R. BRODE, Pres. LOUIS R. HOLM, Sec. R. J. BRODE, Vice-Pres.

**BRODE IRON WORKS**

Established 1886—Incorporated 1913

Tel. Kearny 2464.

Fabricators and Contractors of Structural Steel and Ornamental Iron Work

Office &amp; Works: 31-37 Hewthorne St., bet. Howard &amp; Folsom Sts., San Francisco, Cal.

complete information can be secured on application to L. C. Hart. An official proposal appears in another column of this issue.

**TUNNEL.** CONSTRUCTION \$3,475,300. San Francisco. Engineer, City Engineer, Temporary City, S. F. Owners, City and County of San Francisco. Hans Pederson of Seattle submitted the lowest figure for the construction of the new Twin Peaks Tunnel. His bid was \$3,475,300. The Board of Public Works states that he will be awarded the contract. A complete list of Mr. Pederson's unit prices for the work appear under the heading of San Francisco in this issue.

**POWER STATION.** 1 story and base, brick and steel, \$25,000. San Francisco. Architect, General Construction Department Pacific Gas and Electric Co., 445 Sutter street, S. F. Owners, Pacific Gas and Electric Co. The building will be erected at the northwest corner of 24th and Balboa streets, and will cover a considerable ground area. Construction will be fireproof. Interior will be finished in cement and pine. A cement floor will be used. Special electric work will be installed by the company. Exterior of the building will be faced with pressed brick. Plans are complete and figures are being taken.

**FLATS.**—2 story and base, frame, \$1,000. San Francisco. Architect, J. C. Thomas, S. F. Owner, P. K. Clausen, 133½ 19th avenue, S. F. The building will be erected on the north side of Clement street east of 23rd avenue, covering an area of 25 by 18 feet. There will be two modern flats of five and six rooms. Interior finish will be of pine and redwood. Hardwood floors will be used in the principal rooms. Tile wainscot will be used in the bath rooms and kitchens. Each living room will have an open fire place and the mantel. Exterior of the building will be covered with rustic and cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor.

**FLATS.**—2 story and base, frame, \$1,000. San Francisco. Architect, none. Owners, San Francisco Building Co., 45 Kearny street, S. F. The building will be erected on the west side of 19th avenue south of Lake, covering an area of 27½ feet by 50 feet. Plans provide for two flats of five and six rooms. Interior finish will be of pine and redwood with some elm panels. Hardwood floors will be used in the living rooms, dining rooms and reception halls. An open fire place will be used in each living room. Mantels will be of tile. Tile wainscot will be used in the baths. Marble wainscot is specified for the entrance. Exterior of the building will be covered with rustic, cement plaster on metal lath and brick veneer. Plans are complete and in the hands of the owners who will do the work by Day Labor.

**BANK.** 1 story, frame and plaster, \$10,000. San Francisco. Architect, Charles S. Kiser, Mechanic. Design

Bldg., S. F. Owners, Anglo-California Trust Co. The building will be erected on Fillmore street near the Exposition Grounds and is intended to care for the company's business in that section of the city during the Exposition year. The design is in the classic style. Interior will be finished in pine. Plans provide for special bank fixtures and equipment including bank vault and safe deposit vaults. Exterior of the building will be covered with cement plaster. Plans are being prepared.

**RESIDENCE.**—2 story and base, frame and brick veneer, \$16,000. San Francisco. Architect, G. Albert Lunsburgh, 709 Mission street, S. F. Owner, Samuel Lowenstein. The dwelling will be erected at the southwest corner of Webster and Broadway, and has been designed to contain twelve rooms three baths and sleeping porch. A private garage will also be constructed. Interior finish will be of pine and white enamel. Hardwood floors will be used throughout. There will be a central heating system and open fire places. Mantels will be of tile or brick. Bath rooms will be finished in tile. Exterior of the building will be covered with cement plaster and veneer pressed brick. Plans are complete and figures are being taken.

**EXHIBIT BOOTH.**—Frame construction, \$15,000. San Francisco. Architect, Oscar C. Haupt, Phelan Bldg., S. F. Owners, California Fruit Cannery Association. The booth will be erected in the Horticultural Building at the Exposition and will be arranged to display the products of the company in their many branches. Fruits of the state will be shown as selected by the company before their process and the work of canning and preparing will also be shown. Plans are now being prepared.

**SHOP BUILDING.**—2 story and base, brick and steel, \$18,000. San Francisco. Architect, City Department of Architecture, Temporary City Hall, S. F. Owners, City and County of San Francisco. The building will be erected on the north side of Golden Gate avenue east of Hyde street, and will be used by the Department of Electricity. Interior will be finished in pine throughout. A large amount of special electric equipment will be installed. There will be a central heating system. Exterior will be faced with pressed brick. Plans are nearly complete and figures will be called for shortly.

**RESIDENCE.**—2 story and base, frame, \$25,000. San Francisco. Architect, none. Owner, John Bjorkman, 2703 Mission street, S. F. The dwelling will be erected on Geneva avenue and has been designed to contain five rooms and bath. Interior will be finished in pine and redwood. Some oak floors will be used. There will be an open fire place in the living room with a tile mantel. Bath room will have tile wainscot. Exterior of the home will be covered with rustic and cement plaster. Plans are complete and in

the hands of the owner who will do the work by Day Labor. Materials are now being purchased.

**WAREHOUSE.**—1 story, steel and corrugated iron, \$5,000. San Francisco. Architect, none. Owners, Dyer Bros., 17th and Kansas streets, S. F. The building will be erected on 16th street between Rhode Island and Kansas streets, adjoining other buildings of the same company, and will be used for storage purposes. Exterior will be covered with corrugated iron. Plans are in the hands of the owners who will erect the building by Day Labor.

## City Bids Opened.

Hans Pederson of Seattle Lowest Bidder for Big Twin Peaks Job.

Figure Close to Engineer's Estimate.

Bids were opened at Wednesday's session of the Board of Public Works for constructing the Twin Peaks Tunnel. Hans Pederson of Seattle was the only bidder, his total for the work, as announced by the Board of Public Works, was \$3,475,300. The City Engineer's estimate for constructing the tunnel was \$3,433,000. A difference of \$42,300 appears in the grand total as announced by the Board of Public Works, and the grand total of the figures for the various parts of the work as appearing below.

Twin Peaks Tunnel is the largest single contract let by the City and County of San Francisco. This work was divided into the following divisions for which unit prices were asked as follows. Mr. Hans Pederson's bid was accompanied by a certified check for \$350,000 on the Scandinavian-American Bank of Seattle. The contractor is well known in the north, where he has carried out many of the largest engineering projects, including tunnel work in Tacoma amounting to nearly as much as the Twin Peaks job, following is a list of the unit prices as presented by Mr. Pederson:

### Unit Prices Twin Peaks Tunnel.

Item 1. 2,940 lineal feet of Standard Tunnel Section for earth or soft material, \$330 per ft. **Total, \$970,200.**

Item 2. 4,020 lineal feet of Standard Tunnel Section for soft rock, \$240 per ft. **Total, \$964,800.**

Item 3. 2,500 lineal feet of Standard Tunnel Section for hard rock, \$240 per ft. **Total, \$600,000.**

Item 4. 20 lineal feet of 20-foot 6-inch Tunnel Section of reinforced concrete, \$250 per ft. **Total \$10,500.**

Item 5. 1,360 lineal feet of Standard Flat Top Section of reinforced concrete, \$260 per ft. **Total, \$353,600.**

Item 6. 1 taper connection of reinforced concrete, at Clover Street, \$63,250.

Item 7. 1 easterly approach, including retaining walls for the approach, the portal, adjacent curbs, and all work necessary to connect with the Standard Flat Top Section, \$21,000.

Item 8. 1 retaining wall, including stairs, adjacent curbs and sidewalk, \$37,450.

Item 9. 1 station, including stairs, kiosks, surface cement sidewalks in Purcha Valley, \$132,000.

Item 10. 1 ventilating intake station to be constructed in Eighteenth street east of Clover Street, \$72,000.

Item 11. 1 ventilating intake station is to be constructed in the Relief Home Tract, \$20,000.

Item 12. 1 station referred to in the plans as Laguna Honda Station, \$250,000.

Item 13. 1 westerly portal is to be constructed at the westerly end of the tunnel, \$7,500.

Item 14. 1 drain for tunnel, including manholes, is to be constructed in Eighteenth Street, \$1,800.

Item 15. 1 drain for tunnel, including manholes, is to be constructed in Collingwood Street, \$2,300.

**Grand Total, \$3,475,300**

Bids were also opened by the Board of Public Works for furnishing the following electrical equipment for the Central Fire Alarm Station.

**Motor Generator Sets and Dynamotor.**  
Telephone Electric Equipment Co., (a) \$580; (b) \$798; (c) \$303.

General Electric Co., (a) \$300; (b) \$148; (c) \$180.

**Switch Boards and Equipment.**

Butte Eng. & Electric Co., \$6,559.70

**Underground Conduit.**

J. H. O'Brien submitted the lowest figure for this work at \$3,150. Other firms bidding were Eaton & Smith and Contra Costa Construction Co.

**Motor Generator Sets.**

Fairbanks-Morse Co., \$919.00

Telephone Elec. Equip., 1,345.00

Allis-Chalmers Co., 985.00

General Electric Co., 961.65

**Gas Engine and Direct Current Generator.**

Union Gas Engine Co., \$2,493.65

General Electric Co., 2,568.30

#### OAKLAND AND ALAMEDA COUNTY.

RESIDENCE — 1 story and base, frame, \$3,000. Oakland, Cal. Architect, none. Owner, J. Lehman, 959 Appar street, Oakland. The dwelling will be erected on Wellington east of 13th avenue, and has been designed for a six-room house with bath and sleeping porch. Interior will be finished in pine and redwood. Some hardwood floors will be used. Plans provide for furnace heat and open fire places. Mantels will be of tile or brick. Bath room will have tile wainscot. An automatic water heater will be installed. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor.

BUNGALOW — 1 story and base, frame. Cost not stated. Berkeley, Alameda Co., Cal. Architect, Eugene K. Martin, 2192 Shattuck avenue, Berkeley. Owner, George Federwitz. The house has been designed to contain six rooms and bath, and will be erected on University avenue. Pine and redwood will be used for interior finish. Hardwood floors will be used throughout. There will be an open fire place in the living room. Mantel will be of brick. Tile wainscot will be used in the bath room. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

RESIDENCE — 2 story and base, frame, \$5,000. Berkeley, Alameda Co., Cal. Architect, Eugene K. Martin, 2192 Shattuck avenue, Berkeley. Owner, Mrs. R. Clifford. The dwelling will be erected in Claremont and has been designed for an eight-room house with bath and sleeping porch. Interior finish will be of pine, hardwood and white enamel. Hardwood floors will be used in the living room, dining room and reception hall. There will be furnace heat and open fire places. Mantels will be of tile. Bath room will have tile wainscot and floors. An automatic water heater will be installed. Exterior of the house will be

covered with cement plaster on metal lath. Plans are complete and figures are now being taken by the architect.

RESIDENCE — 2 story and base, frame, \$12,500. Berkeley, Alameda Co., Cal. Architect, Charles W. McCall, Central Bank Bldg., Oakland. Owner's name withheld. The dwelling will be erected in the Claremont Tract, and has been designed for a ten-room house with several baths and sleeping porches. A garage will also be erected on the property. Interior of the house will be finished in pine, hardwoods and white enamel. Hardwood floors will be used in the principal rooms. There will be a central heating system, probably hot air, and open fire places. Mantels will be of tile and brick. Bath rooms will be finished in tile. An automatic water heater will be installed. Exterior of the house will be covered with cement plaster on metal lath. Plans are being prepared.

APARTMENT HOUSE—3 story and base, frame, \$20,000. Oakland, Cal. Architect, William Wilde, 1725 Broadway, Oakland. Owner, R. Pozzi. The building will be erected at the corner of 23rd and Harrison streets, and has been designed to contain two, three and four room apartments. There will be wall beds and private bath rooms. Pine and redwood interior finish will be used. There will be some oak floors. All bath rooms will have tile wainscot and composition floors. There will be steam heat and a hot water supply. Exterior of the building will be covered with cement plaster on metal lath. Plans are complete and new figures are being taken.

FLATS—2 story and base, frame. Cost not stated. Berkeley, Alameda Co., Cal. Architect, A. Petersen, 844 Guerrero street, S. F. Owner, Mrs. Fannie E. Martinez. The building will be erected on the west side of College avenue south of Stuart, and will contain two flats of five and six rooms. There will be open fire places in the living rooms with tile or brick mantels. Interior finish will be of pine and redwood. Hardwood floors will be used in the living and dining rooms. Bath rooms will have tile wainscot. Exterior of the building will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

OLD PEOPLE'S HOME—Group of 1 and 3 story and base, brick and reinforced concrete, \$50,000. Oakland, Cal. Architect, Oscar Haupt, Phelan Bldg., S. F. Owners, California Altenheim. The buildings will be in the nature of an addition to the present building at Fruitvale and Hopkins streets. There will be a large dining room, wards and private rooms. The buildings will be heated by steam from the central plant. Interior finish will be of pine. Exterior will be faced with pressed brick and cement plaster. Plans are complete and figures are being taken.

RESIDENCE — 2 story and base, frame, \$3,000. Oakland, Cal. Architect, none. Owner, G. H. Lewis, 4008 37th street, Oakland. The dwelling has been designed for a seven-room house with bath and will be erected on Emerson street south of 37th. Interior finish will be of pine and redwood. Hardwood floors will be used in the principal rooms. There will be open fire places and tile mantels. Bath room will be finished in tile. An automatic water heater will be installed.

Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor. Materials are now being purchased.

**RESIDENCE**—1½ story and base, frame, \$2,500. Piedmont, Alameda Co., Cal. Architects, Elite Planners, 1844 5th avenue, Oakland. Owner, James Baughman. The dwelling has been designed to contain five rooms, bath and sleeping porch. Interior will be finished in pine and redwood with some hardwood floors. There will be a large open fire place in the living room. Mantel will be of tile or brick. Tile wainscot will be used in the bath room. Exterior of the house will be covered with shingles. Plans are being prepared and when complete the work will be done by Day Labor.
